V. ROE & CO. LIMITED, MANCHESTER, ENGLAND.

(Branch of Hawker Siddeley Aircraft Co. Ltd.)

Does your collar let your suit look as good as it is?

A "Van Heusen" collar will flatter the cut of an expensive suit and even endow an old suit with distinction. Woven on a curve for comfort, "Van Heusen" is the world's best collar.

"VAN HEUSEN"

SEMI-STIFF COLLARS

Manufactured by:
Harding, Tilleard, Hartley Ltd., Thurston, Somerset, Eng.

What price Sympathy?

His building was destroyed by fire; the flames devoured his goods and furniture; it was too big a loss. All his friends' expressions of sympathy were of no avail. But, The Advance Insurance Company made good the total loss by sending him a cheque. What a relief!

Be wise in time. Take out a Fire Insurance Policy with the ADVANCE. It settles all claims promptly and gives every facility to policy-holders.

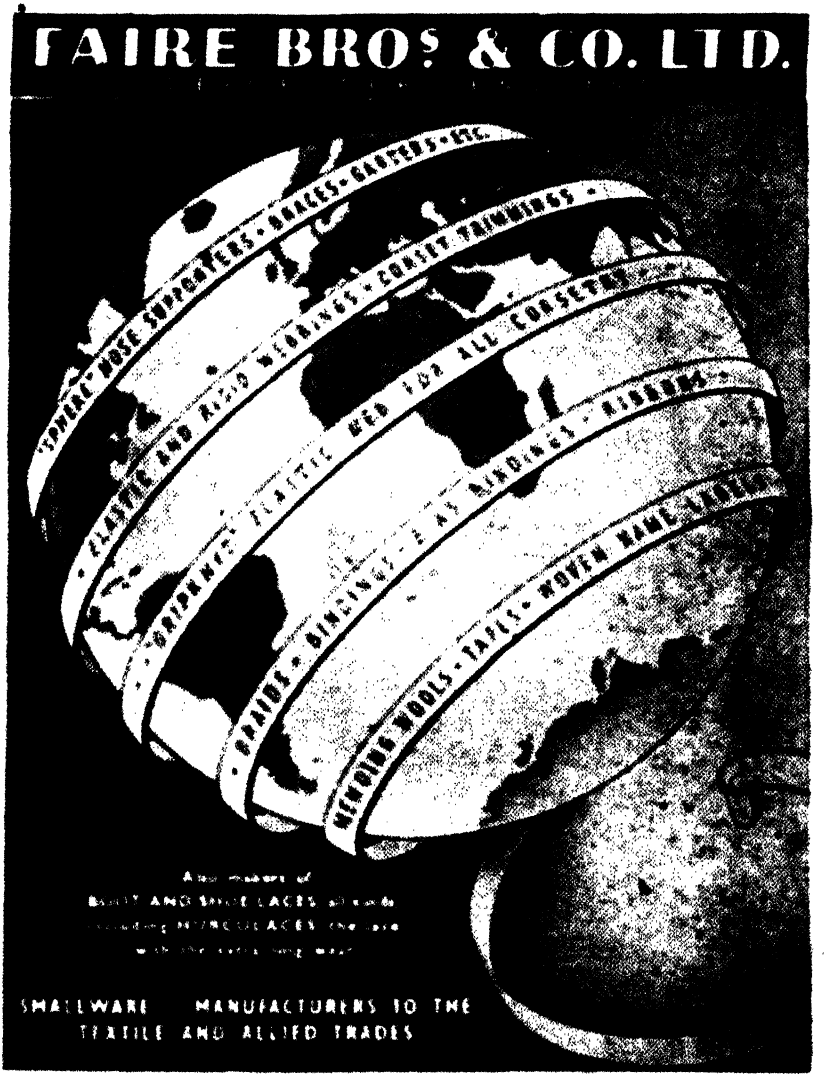
The significance of

ILFORD



To thousands of successful photographers the name Ilford means something more than just photographic materials. To them Ilford signifies the ultimate in quality, the finest possible results in their work whether it be portraiture or radiography. Photographers of great reputation and experience never question the quality of any product which bears the name ILFORD.

BOVRIL

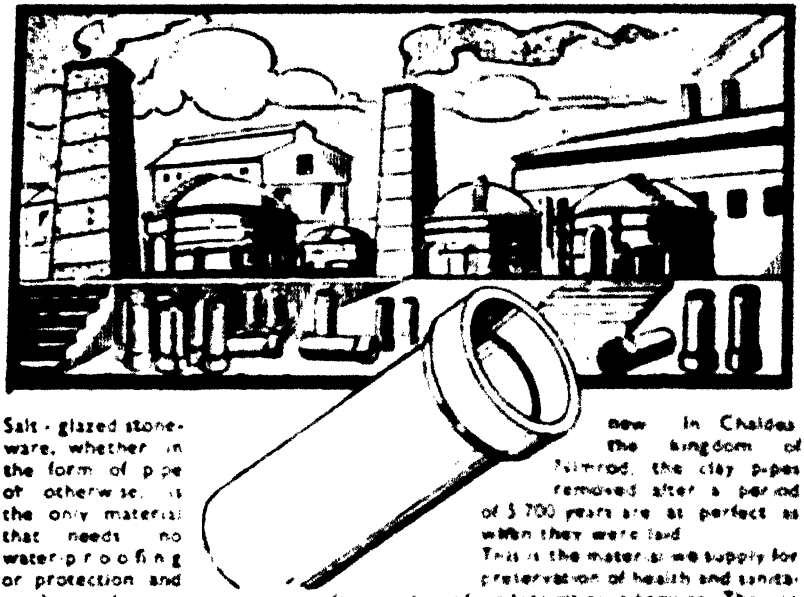
AS A BEVERAGE

One teaspoonful of Bovril in a cup of water, or a half teaspoonful of Bovril mixed in a glass of milk gives you a nourishing and stimulating drink. Bovril mixed in any mineral water is a first-class reviver. Bovril can be prepared instantly, and keeps good in any climate for any length of time.

IN SANDWICHES

Bovril sandwiches are quickly made and are most economical because only the thinnest spread is needed. A 4 oz. bottle will make over 100 sandwiches.

IN COOKING



Bovril gives character to your cooking and improves all meat dishes. It makes the flavour delicious and the whole meal more nourishing.

IN ILLNESS AND CONVALESCENCE

Bovril is recommended by the medical profession all over the world.

Daily Bovril *for health and vitality*

MYSORE STONEWARE

Salt-glazed stoneware, whether in the form of pipe or otherwise, is the only material that needs no waterproofing or protection and can be used to protect sewers from the corrosive action of acids and gases in the sullage.

This is borne out by facts drawn from ancient times. At Nippur, one of Babylonia's ancient cities, a few clay drain-pipes and 'T' fittings removed after 6,400 years, are as good as new. In Chaldea the kingdom of Nimrod, the clay pipes removed after a period of 5,700 years are at perfect as when they were laid.

This is the material we supply for preservation of health and sanitation of modern cities and towns. The war imposed a severe test on our production. We claim that we were equal to severity of the demands. But God be praised, there has been constructive victory, and we can confidently hope for a lasting and firm world peace. We are now in a position to meet the needs of cities, towns and the public.

RAYON

A CARDINAL FACTOR IN RAISING STANDARDS OF LIFE THROUGHOUT THE WORLD

DURING the first forty-five years of the present century, rayon has given abundant proof of its ability to establish a higher standard of living for many millions of people.

Today, when the whole world is experiencing a serious shortage of the older textiles, rayon will assume an important part in alleviating the situation.

Tremendous advances have been achieved in the technical development of rayon and the uses to which it can be applied. Courtaulds, as the largest manufacturers of rayon yarns in Great Britain, can with justice claim a major share in this development.

In the near future, there will be rayon carpets for post-war homes. Rayon sheets, towels, and tablecloths will set a new standard in household furnishings. Spun rayon yarns, either alone or blended with wool and other fibres, are already producing cloths of excellent quality for suits, coats, and other items of personal attire. Rayon cord carcases for tyres have already proved their superiority in strength and durability on all the battlefields of the world.

Courtaulds Limited have faith in the vast potentialities of rayon, not only as a textile of immense and varied usefulness, but also as a new force in raising standards of living.

FARADAY HOUSE
ELECTRICAL ENGINEERING COLLEGE.

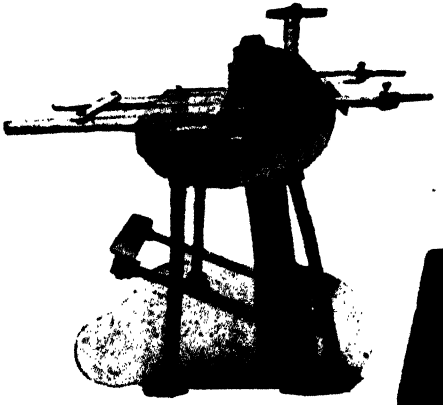
(Established 1889).

Principal:
W. R. C. COODE-ADAMS, M.A., M.Sc., Ph.D.(Cantab.), B.Sc. (London), M.I.E.E., F.I.C.

A four year Diploma Course in Electrical Engineering comprising periods of theoretical instruction at Faraday House and of practical training with Mechanical and Electrical Engineering firms, or in suitable technical essential war work, or in the Services if called up.

Women students are now accepted at the College.

Over 150 affiliated firms are available for the period of practical training, distributed throughout Great Britain.



The course is sandwiched, between theory and practice, the first year's theory being followed by a period of practical training at mechanical engineering works. The third year is again devoted to theory and a final year to practical training with an electrical engineering firm. Students therefore already have a connection with Industry at the end of the course.

THIS IS A K.V. ROPE DRIVE

K.V. Ropes are the latest development of V-pulley drives — endless cotton ropes with rubber-impregnated outer layer.

They give long life, smoother running, higher flexibility and greater strength than any other form of V-rope. Every K.V. drive installed is covered by the Kenyon guarantee.

WM. KENYON & SONS, LTD.,
DUKINFIELD. CHESHIRE.

An Indian Glossary.

ABKARI.—Excise of liquors and drugs; the business of a wine-merchant or distiller.

ADHIRAJ.—Over lord, added to "Maharaja," it makes a higher title for a landlord or a Chief.

RAMAYANA.—National epic of Hindus. Rama, one of the nine incarnations of Vishnu, is the hero of the poem.

RAMAZAN.—Ninth month of the Muhammadan year which is observed as a strict fast from dawn to sunset of each day in the month.

RANA.—A title borne by some Rajput chiefs equivalent to that of Raja.

RANG MAHAL.—The palace of pleasure.

RANI.—The wife or widow of a Raja.

RAO.—A title borne by Hindus, either equivalent to, or ranking below, that of Raja. Also a common surname.

RASHTRAPATHI.—President of the Indian National Congress.

RASUL.—Prophet, Muhammad.

RATH.—A chariot formerly, now refers to car used for Hindu gods on ceremonial occasions.

RICKSHAW.—A one or two seated vehicle on two wheels, drawn by man.

RISALDAR.—Commander of a troop of horses.

RIYASAT.—*Government*, state (applied to an Indian State).

ROTI.—Bread, unleavened thin flat bread.

ROZA.—Muslim fast during Ramazan.

RYOT.—A corruption of the Arabic word *ra'iyyat*, a subject, a peasant.

RYOTWARI.—The system of tenure in which land revenue is imposed on the actual occupants of holdings.

SABHA.—Assembly, meeting, congress.

SACHIVOTTAMA.—A most distinguished minister (a title conferred by Rulers of certain Indian States).

SADAR.—The headquarters of a district.

SADHU.—A Hindu ascetic, a religious man.

SAHIB, SAHAB, SAHEB.—A term of respectful address. Often added to names. A term used to or of a European. A European.

SAHUKAR, SAUKAR, SOWKAR.—Money-lender, banker, dealer in money, exchanger, etc.

SAID, SAIYAD, SAYED, SAYID, SAIYID, SIDI, SYED, SYUD.—Various forms for a title adopted by those who claim direct descent from Muhammad. A descendant of Husain, grandson of Muhammad.

SALAM.—Formed from the abbreviation of Salla-allah allahiwa Sallam, the blessing and peace of God be with him. Usual term of salutation. Peace, safety.

SAMITI.—Association, union, assembly.

SANAD.—A charter or grant; any kind of deed of grants. Diploma. Signature.

SANDAL.—The fragrant wood of a tree, the *Santalum Album*.

SANGATHAN.—Literally tying together, proper development. A movement which aims at unity and the growth of knowledge of the art of self-defence among Hindus. The Hindu counterpart of the Musalman "Tanzim."

SANGRAM SAMITI.—War Council in Civil Disobedience movement.

SANNYASI.—Hindu ascetic.

SARAI, SARAE.—Caravansary.

SARASVATI.—The wife of Brahma: Goddess of all arts and sciences.

SARDAR (corrupted to SIRDAR).—Lit. A leader. A title. In practice all Sikhs bear the title. Government titles—Sardar Bahadur and Sardar Sahab.

SARI.—Cloth worn by women.

SARKAR.—The Government, state.

SATEE.—Suicide by widow on funeral pyre of her husband.

SATYAGRAHA.—(lit. Insistence on or acceptance of truth), passive resistance.

SATYAGRAHI.—A passive resister, one who will follow the truth wherever it may lead.

SEER.—A weight or measure varying in size in different parts of the country.

SETH, SHETH.—Merchant, banker, rich man

SHABASH.—Bravo! Excellent!

SHAHID.—A (Muslim) martyr.

SHAHZADA.—Son of a King.

SHAIKH OR SHEIKH (Arabic).—Lit. a chief.

SHAMS-UL-ULAMA.—Lit. "A Sun among the Learned." A title conferred by the Govt. of writers or religious heads.

SHAMSHER-JANG.—"Sword of Battle" (a title of the Maharaja of Travancore, the royal and the prime minister's families of Nepal).

SHARBAT, SHERBET.—Beverage, cold drink of syrup, etc.

SHARIYAT.—Laws of Mohammed, justice equity.

SHASTRAS.—The religious law-books of the Hindus.

SHER, Ser, seer.—A weight, or measure varying in different parts of the country. The standard seer is 2.057 lbs., or 2 lbs. 0 oz. 13.853 drs.

SHIAS.—Muslims who accept Ali as the first lawful Khalifa and successor of the prophet and who therefore reject Abu Bakr, Umar and Usman, the first three Khalifas of the Sunni Muslims, as usurpers.

SHIKAR.—Hunting.

SHIVA.—God of destruction.

SHRADDHA, SARADH.—Hindu ceremony offering oblations to departed ones.

SHRI.—Lit. fortune, beauty; Goddess Fortune, another name for Lakshmi. A Sanskrit term used by Hindus to denote "Mr." "Esquire"; this term is common before Hindu names.

SHRIJUT, SHRIYUT.—Same as the honorific Shri. Shortened form Srijut.

SHRIYUTA, SHRIYUKTA (long a).—Fem. Sriyut, shortened form Sja.

SHROFF, SARRAF.—Banker, money-changer.

SHRUTI.—Literally "heard." The Veda revealed to inspired sages.

SHUDDHI.—Literally purification. A movement of conversion among Hindus particularly of those whose ancestors were Hindus and who have retained many Hindu practices.

SIKH.—Disciple. A sect of the Punjab, the disciples of Nanak, established in the early part of the 16th century.

SINDHIA.—See under "GAEKWAR."

SINGH, SINGHA.—Lion. A title used by all Sikhs and some Hindus.

SIPAHI, SEPOY, SEPAL.—An Indian soldier.

SITAR.—A kind of guitar with three strings.

SMRITI.—Unrevealed Laws, as opposed to Shruti, the revealed Vedas. Books of Hindu Law.

SOWAR.—A mounted soldier or constable.

SOWKAR.—See SAHUKAR.

SRADDH.—Funeral obsequies, consisting in offering rice, fruits, etc., to the departed ones.

STUPA (tope).—A Buddhist or Jain tumulus, usually of brick or stone, hemispherical, containing relics or marking sacred spots.

SULTAN.—A King.

SUNNI.—The sect of Muslims who accept the first four Khalifas as lawful successors of the Prophet and who receive the "six authentic" books of tradition. They embrace by far the greater part of the Muhammadan world.

SUPARI.—The seed or nut of the palm, ARECA.

SWADESI.—Of one's own country; made in India.

SURAJ, SURYA.—Sun.

SWAMI.—A Hindu religious ascetic; husband, lord.

TABLIGH.—The Muslim conversion movement of Suddhi.

TABUT.—Coffin.

TAHSIL.—A revenue sub-division of a district.

TAHSILDAR.—The officer in charge of a tahsil; syn. Mamlatdar, Bombay.

TAKLI.—Small distaff for spinning yarn revived by Mr. Gandhi.

TAL.—Lake. Musical time.

TALAK.—Muslim term for divorce. Utterance of this term thrice by the husband in presence of the wife dissolves the marriage.

TALUK, taluka.—The estate of a talukdar. A revenue sub-division of a District, in Bombay, Madras and Mysore; syn. tahsil.

TALUKDAR.—A landholder with peculiar tenures in different parts of India. An official in the Hyderabad State, corresponding to the Magistrate and Collector (First Talukdar) or Deputy Magistrates and Collectors (Second and Third Talukdars).

TAMASHA.—Entertainment, gala. In sarcastic sense, exhibition.

TAMTAM, tumtum.—A North Indian name for a light trap or cart.

TANGA, TONGA.—A one or two-horsed, two-wheeled, vehicle with a covered top; syn. SHIGHRAM.

TANZIM.—Literally "organization." A movement among the Muslims which aims at securing a closer approach to unity of Muslims. *See* SANGATHAN.

TAPPAL.—The Post.

TARI, TODDY.—The sap of the date, palmyra, or coconut palm, used as a drink, after fermentation. Also made from rice.

TATTY.—*See* KHAS-KHAS.

TAZIA.—Lath and paper models of the tombs of Hasan and Husain, carried in procession at the Muharram festival; syn. tabut; Marathi, dola.

TAZIAT-NAMA.—Letter of condolence.

THAKUR.—A title of respect applied to Brahmans or a petty chief.

THUGGEE or THAGI.—Robbery after strangulation of the victim, practised by Thugs who formed an association of professional murderers and robbers.

THANA.—Police-station, hence, its jurisdiction.

TIKA.—Ceremonial anointing on the forehead.

TIKA SAHEB.—Heir-apparent.

TILAK.—A streak on the fore-head or elsewhere on the upper part of the body; sect (at some places caste) mark on the forehead among Hindus.

TINDAL, tandel.—A foreman, subordinate officer of a ship.

TOLA.—A weight equivalent to 180 grains (troy), 179.666 exactly.

TONGA.—A two-wheeled vehicle drawn by a pony.

ULEMA (Plural of Alim).—Muslim learned men. The term usually includes all religious teachers, such as Imams, Muftis, Qazis and Moulvis.

USTAD.—Master, teacher, one skilled in any art or science.

UTHAMNA.—Among Hindus, visit to console, paid on second or third day after the death of a person. Among Parsis a religious ceremony held on the third day after death.

VAID OR VAIDYA.—Practitioner of Hindu system of medicine; also a caste.

VAKIL.—A class of legal practitioners, entitled to practice in High Courts.

VEDA.—Revealed sacred books of Hindus.

VEDANTA.—System of Hindu philosoph It professes that only Brahma (God) exis and all else is Maya or cosmic illusion.

VIHARA.—A Buddhist monastery.

VISHNU.—God of protection.

WALA, WALLA.—A suffix, indicating owner, dealer, agent, keeper.

WAQF.—A Muslim religious or charitable endowment.

WATAN.—Native country. Country. In Bombay Presidency used mostly of the land or cash allowance enjoyed by the person who performs some service useful to Government or to the village community.

WAZIR.—Chief minister, a Muhammadan term which is anglicised as Vizier.

WILAYAT.—England, Europe.

YAMA.—Hindu god of death.

YOGA.—(1) A system of Hindu philosophy leading to Yoga or union with God. (2) Practice of control of breath, senses, sensations, etc., said to give supernatural powers of body and mind. Ultimate aim is Mukti.

YOGI.—A Hindu ascetic who practises Yoga.

YUNANI, UNANI.—Lit. Greek; the system of medicine practised by Muslims.

ZADA.—Born. Nawab-Zada.—Son of a Nawab.

ZAMINDAR.—A landholder.

ZAMINDARI.—An estate; the system of tenure in which land revenue is imposed on an individual for a Mahal as opposed to Ryotari or farmer's tenure system.

ZANANA.—Female, feminine. Hence women's apartment, harem.

ZARI.—Gold thread, anything woven with gold thread.

ZILA.—A District.

ZINDABAD.—Long live.

ZULM, ZULUM, ZALUM.—Tyranny, oppression.

Manners and Customs.

Next to the complexion of the people, which varies from fair to black, the tourist's attention in India is drawn by their dress and personal decoration. In its simplest form a Hindu's dress consists of a piece of cloth round the loins. Many an ascetic, who regards dress as a luxury, wears nothing more, and he would dispense with even so much if the police allowed him to. The Mahomedan always covers his legs, generally with trousers, sometimes with a piece of cloth tied round the waist and reaching to the ankles. Hill men and women, who at one time were a few leaves before and behind and were totally innocent of clothing, do not appear to-day within the precincts of civilisation and will not meet the tourist's eye. Children, either absolutely nude or with a piece of metal hanging from the waist in front, may be seen in the streets in the most advanced cities, and in the homes of the rich. The child Krishna, with all the jewels on his person, is nude in his pictures and images.

Dress.—The next stage in the evolution of the Hindu dress brings the loincloth nearly down to the feet. On the Malabar coast, as in Burma, the ends are left loose in front. In the greater part of India, they are tucked up behind—a fashion which is supposed to befit the warrior, or one end is gathered up in folds before and the other tucked up behind. The simplest dress for the trunk is a scarf thrown over the left shoulder, or round both the shoulders like a Roman toga. Under this garment is often worn a coat or a shirt. When an Indian appears in his full indigenous dress, he wears a long robe, reaching at least down to the calves: the sleeves may be wide, or long and sometimes puckered from the wrist to the elbow. Before Europeans introduced buttons, a coat was fastened by ribbons, and the fashion is not obsolete. The Mahomedan prefers to button his coat to the left, the Hindu to the right. A shawl is tied round the waist over the long coat, and serves as a belt, in which one may carry money or a weapon, if allowed. The greatest variety is shown in the head-dress. More than seventy shapes of caps, hats, and turbans, may be seen in the city of Bombay. In the Punjab and the United Provinces, in Bengal, in Burma and in Madras other varieties prevail. Cones and cylinders, domes and truncated pyramids, high and low, with sides at different angles: folded brims, projecting brims: long strips of cloth wound round the head or the cap in all possible ways, ingenuity culminating perhaps in the "parrot's beak" of the Maratha turban—all these fashions have been evolved by different communities and in different places, so that a trained eye can tell from the head-covering whether the wearer is a Hindu, Mahomedan or Parsi, and whether he hails from Poona or Dharwar, Ahmedabad or Bhavnagar.

Fashion Variations.—Fashions often vary with climate and occupation. The Bombay fisherman may wear a short coat and a cap, and may carry a watch in his pocket; yet, as he must work for long hours in water, he does not cover his legs, but suspends only a coloured kerchief from his waist in front. The Puthan of the cold north-west wears loose baggy trousers, a tall head-dress befitting his stature and covers his ears with its folds as if to keep off cold. The poorer people in Bengal and Madras do not cover their heads, except when they work in the sun or must appear respectable. Many well-to-do Indians wear European dress at the present day, or a compromise between the Indian and European costumes; notably the Christians and Parsis. Most Parsis however have retained their own head-dress, and many have not borrowed the European collar and cuffs. The majority of the people do not use shoes: those who can afford them wear sandals, slippers and shoes, and a few cover their feet with stockings and boots after the European fashion in public.

Women's Costumes.—The usual dress of a woman consists of a long piece of cloth tied round the waist, with folds in front, and one end brought over the shoulder or the head. The folds are sometimes drawn in and tucked up behind. In the greater part of India women wear a bodice: on the Malabar coast many do not, but merely throw a piece of cloth over the breast. In some communities petticoats, or drawers, or both are worn. Many Mussalman ladies wear gowns and scarfs over them. The vast majority of Mahomedan women are *goshá* and their dress and persons are hidden by a veil when they appear in public: a few converts from Hinduism have not borrowed the custom. In Northern India Hindu women have generally adopted the Mussalman practice of seclusion. In the Deccan and in Southern India they have not.

As a rule the hair is daily oiled, combed, parted in the middle of the head, plaited and rolled into a chignon, by most women. Among high caste Hindus, widows sometimes shave their heads in imitation of certain ascetics, or monks and nuns. Hindu men do not, as a rule, completely shave their heads, Mahomedans in most cases do. The former generally remove the hair from a part of the head in front, over the temples, and near the neck, and grow it in the centre, the quantity grown depending upon the fancy of the individual. Nowadays many keep the hair cropped in the European fashion, which is also followed by Parsis and Christians. Most Mussalmans grow beards, most Hindus do not, except in Bengal and elsewhere, where the Mahomedan influence was paramount in the past. Parsis and Christians follow their individual inclinations. Hindu ascetics, known as Sadhus or Bairagis as distinguished from Sanyasis, do not clip their hair, and generally coil the uncombed hair of the head into a crest, in imitation of the god Shiva.

Hindu women wear more ornaments than others of the corresponding grade in society. Ornaments bedeck the head, the ears, the nose, the neck, the arms, wrists, fingers, the waist until motherhood is attained, and by some even later—and the toes. Children wear anklets. Each community affects its peculiar ornaments, though imitation is not uncommon. Serpents with several heads, and flowers, like

the lotus, the rose, and the champaka, are among the most popular object of representation in gold or silver.

Caste Marks.—Caste marks constitute a mode of personal decoration peculiar to Hindus, especially of the higher castes. The simplest mark is a round spot on the forehead. It represents prosperity or joy, and is omitted in mourning and on fast-days. It may be red, or yellowish as when it is made with ground sandalwood paste. The worshippers of Vishnu draw a vertical line across the spot, and as Lakshmi is the goddess of prosperity, it is said to represent her. A more elaborate mark on the forehead has the shape of U or V, generally with the central line, sometimes without it, and represents Vishnu's foot. The worshippers of Shiva adopt horizontal lines, made with sandalwood paste or ashes. Some Vaishnavas stamp their temples, near the corners of the eyes, with figures of Vishnu's conch and disc. Other parts of the body are also similarly marked. The material used is a kind of yellowish clay. To smear the arms and the chest with sandalwood paste is a favourite kind of toilet, especially in the hot season. Beads of Tulsi or sacred Basil, and berries of Rudraksha *elaeocarpus ganitrus*, strung together are worn round their necks by Vaishnavas and Shaivas respectively. The Lingayats, a Shaiva sect, suspend from their necks a metallic casket containing the Linga or phallus of their god. Bairagis, ascetics, besides wearing Rudraksha rosaries round their necks and matted hair, smear their bodies with ashes. Religious mendicants suspend from their necks figures of the gods in whose name they beg. Strings of cowries may also be seen round their necks. Muslim dervishes sometimes carry peacock's feathers.

Hindu women mark their foreheads with a red spot or horizontal line. High caste widows are forbidden to exhibit this sign of happiness, nor may they deck themselves with flowers or ornaments. Flowers are worn in the chignon. Hindu women smear their faces, arms, and feet sometimes with a paste of turmeric, so that they may shine like gold. The choice of the same colour for different purposes cannot always be explained in the same way. The red liquid with which the evil eye is averted may be a substitute for the blood of the animal slaughtered for the purpose in former times. In many other cases this colour has no such associations. The Muslim dervish affects green, the Sikh Akali is fond of blue, the Sanyasi adopts orange for his robe, and no reason can be assigned with any degree of certainty.

Indian Names.

The personal name of most Hindus denotes a material object, colour, or quality, an animal, a relationship, or a deity. The uneducated man, who cannot correctly pronounce long Sanskrit words, is content to call his child, father, brother, uncle, or mother, or sister, as the case may be. This practice survives among the higher classes as well. Appa Saheb, Anna Rao, Babaji, Bapu Lal, Bhai Shankar, Tatacharya, Jijibhai, are names of this description, with honorific titles added. It is possible that in early society the belief in the re-birth of departed kinsmen lent popularity to this practice. Nothing could be more natural than to call a man white, black, or red: gold or silver: gem, diamond, ruby, pearl, or merely a stone: small or tall, weak or strong: a lion, a snake, a parrot, or a dog: and to name a woman after a flower or a creeper. Thus, to take a few names from the epics, Pandu means white, and so does Arjuna: Krishna black: Bhima terrible: Nakula a mongoose: Shunaka a dog: Shuka a parrot: Shringa a horn. Among the names prevalent at the present day Hira is a diamond: Ratna or Ratan a jewel: Sonu or Chinna gold: Velli or Belli, in the Dravidian languages, means white metal or silver. Men are often called after the days of the week on which they were born, and hence they bear the names of the seven heavenly bodies concerned. When they begin to assume the names of the Hindu deities, they practically enter upon a new stage of civilisation. It is doubtful whether the Animists ever venture to assume the names of the dreaded spirits worshipped by them. To pronounce the name of a devil is to invite him to do harm. If the spirits sometimes bear the names of human beings the reason seems to be that they were originally human.

High-caste practices.—The high caste Hindu, on the other hand, believes that the more often the name of a deity is on his lips, the more merit he earns. Therefore he deliberately names his children after his gods and goddesses, so that he may have the opportunity of pronouncing the holy names as frequently as possible. These are also sonorous and picturesque. Shiva is happy: Vishnu is a pervader: Govinda is the cowherd Krishna: Keshava has fine hair: Rama is a delighter: Lakshmana is lucky: Narayana produced the first living being on the primeval waters: Ganesha is the Lord of Shiva's hosts: Dinakara is the luminary that makes the day: Subrahmanya is a brother of Ganesha. Sita is a furrow: Savitri a ray of light: Tara a star: Radha prosperity: Rukmini is she of golden ornaments: Dharma of the glowing heart. Shiva and Vishnu has each got at least a thousand names, and they may be freely drawn upon and paraphrased in naming one's children, and the whole Hindu pantheon is as crowded as it is large.

Family names.—When a person rises in importance, he adds to his personal name a family or caste name. It was once the rule, that the title Sharma might be added to a Brahman's name, Varma to a Kshatriya's, Gupta to a Vaishya's, and Dasa to a Shudra's. This rule is fairly well observed in the case of

the first two titles, but the meaning of the other two has changed. Dasa means a slave or servant, and the proudest Brahman cannot disdain to call himself the servant of some god. Thus, although Kalidas, the famous poet, was a Shudra, Ramadas, the famous guru of Shivaji, was a Brahmin. The Vaishnavas have made this fashion of calling oneself a servant of some god exceedingly popular, and in Western India high caste Hindus of this sect very commonly add Das to their names. The Brahmans of Southern India add Aiyer or Aiyangar to their names. Shastri, Acharya, Bhat, Bhattacharya, Upadhyaya, Mukhopadhyaya, changed in Bengal into Mukerji, are among the titles indicative of the Brahmanical profession of studying and teaching the sacred books. Among warlike classes, like the Rajputs and Sikhs, the title Singh (lion) has become more popular than the ancient Varma. The Sindhi Mal, as in Gidumal, means brave and has the same force. Raja changed into Raya, Rao and Rai was a political title, and is not confined to any caste. The Bengali family names, like Bose and Ghose, Dutt and Mitra, Sen and Guha, enable one to identify the caste of their bearers, because the caste of a family or clan cannot be changed. Shet, chief of a guild or a town, becomes Chetty, a Vaishya title, in Southern India. Mudaliyar and Nayudu, meaning leaders, are titles which were assumed by castes of political importance under native rulers. Nayar and Menon are the titles of important castes in Malabar. Ram, Lal, Nand, Chand, are among the additions made to personal names in Northern India. Suffixes like Ji, as in Ramji or Jamshedji, the Kanarese Appa, the Telugu Garu, the feminine Bai or Devi, are honorific. Prefixes like Babu, Baba, Lala, Sobhi, Pandit, Raja, and the Burmese Maung are also honorific.

Professional names.—Family names sometimes denote a profession: in some cases they might have been conferred by the old rulers. Mehta, Kulkarni, Deshpande, Chitnavis, Mahalnavis are the names of offices held in former times. One family name may mean a flour seller, another a cane-seller, and a third a liquor-seller. To insert the father's name between one's personal and the family name is a common practice in Western India. It is rare elsewhere. When a family comes from a certain place, the suffix 'kar' or 'wallah' is added to the name of the place and it makes a family surname in Western India. Thus we may have Chiplunkars and Suratwallahs, or without these affixes we may have Bhavnagris, Malabaris and Bilimorias, as among Parsis. Thus Vasudev, Pandurang, Chiplunkar would be a Hindu, whose personal name is Vasudev, his father's name Pandurang, and family name derived from the village of Chiplun, is Chiplunkar. In Southern India the village name precedes the personal name. The evolution of Musalman names follows the same lines as Hindu names. But Muslims have no god or goddesses, and their names are derived from their religious and secular history. These names and titles are often as long and picturesque as Hindu appellations. The agnomens Baksh, Din, Ghulam, Khwaje, Fakir, Kazi, Munshi, Sheikh, Syed, Begum, Bibi and others, as well as honorific additions like Khan have meanings which throw light on Muslim customs and institutions. The Parsis also have no gods and goddesses, and their personal names are generally borrowed from their sacred and secular history. Their surnames frequently indicate a profession or a place, as in the cases of Hindus in Western India. Batliwallah, Readymoney, Contractor, Saklatwallah Adenwallah and others like them are tell-tale names.

Indian Art.

Sculpture & Painting.

Geographical Limits.—Indian Art, like the art of any other country, is an organically grown part of the life of the country and must be viewed in its historical development. Strictly speaking, Indian Art comprises only the artistic creations of the Indian Peninsula and the plains and foothills of the North. To these must be added the arts of Ceylon and Nepal because of their close affinities to the art of India proper. In a wider sense Indian Art embraces also Burma, Siam, Indo-China, Java, Bali and the Malayan Archipelagos which, colonised by Indians, bore for centuries the imprint of the motherland on their arts. Influences of Indian Art are also felt in Central Asia, China and even Japan.

Characteristics of Indian Art.—Indian Art is almost completely a religious art. Creation as well as contemplation of a work of art is a devotional act. From this it follows that Indian Art is predominantly spiritual and contemplative and not concerned with the representation of appearances. In that it is akin to the arts of most Asiatic people and to the arts of medieval Europe before the Renaissance. Form in Indian Art achieves symbolical meaning. Without the help of correct anatomy and perspective, Indian artists fill their works with life from within. Naturalistic to a degree, they give expression to the internal forces of nature through its visible form. The essential qualities of Indian Art are its inherent rhythm and vitality and its plastic power which, in painting and sculpture alike, reaches a perfection hardly ever matched in World Art.

Indian Artists.—Indian Art, up to very recent times, was anonymous, *i.e.*, hardly any names of individual artists were known or connected with any particular work of Art. The arts of ancient and medieval India sprung from the co-operative effort of craftsmen guilds who worked in the employ of rulers or religious institutions. In the course of time a collection of scriptures came into being, the *shilpa shastra*, which laid down certain rules to be followed in the creation of religious images, buildings, etc. While these manuals were originally meant to guide design without interference in the creative work of the artist, they had, in the long run, a sterilizing effect on the artists' imagination and may have contributed to the decline of Indian Art.

History of Indian Sculpture and Painting.—Art in India is always Indian regardless of the religions or dynastic powers which it happened to serve at different times. The formerly accepted division of Indian Art into Buddhist, Jain and Hindu should, for this reason, be given up. Religion could give nothing more than themes to the artist. The idiom of expression was always Indian. Racial and provincial peculiarities can be traced in all Indian styles, but "what separates the provinces of Indian Art is subsidiary to what they have in common" (S. Kramrisch). Indian art in all times and in all parts of India has a flavour of its own. The inherent strength of this art enabled it to absorb and overcome numerous foreign influences (such as Greek, Persian, Scythian, etc. without being altered in its course.

Chronology.—The chronology of Indian Art is a difficult problem because of the so often uncertain historical background and because of the diversity and complexity of contemporary styles in a large sub-continent. For instance, elements of the classical and medieval styles survived in South India up to the 18th century A.D. while in the North, owing to Muslim and other influences, totally new forms developed. The classification of periods given here tries to do justice to the development of styles and is based on a broad dynastic framework.

Beginnings :—The art of the Indus Valley (appron. 3,000 B.C.).

Archaic :—Maurya Art (3rd Century B.C.).

Early Classic :—Post Maurya Art (2nd and 1st Century B.C.).

Kushan and Andhra Art (1st - 3rd Century A.D.).

Classic : Gupta Art (4th—6th Century A.D.).

Post Gupta Art (7th - 9th Century A.D.).

Medieval Art (9th - 18th Century A.D.).

Modern Art (from 1900 A.D.).

Early Art.—The excavations of Sir John Marshall and others in the Indus valley at Mohenjodaro and in Harrappa in the Punjab discovered an ancient Indian civilisation which in about 3000 B.C. had already reached a considerable degree of refinement. The high standards of culture and art in the Indus valley indicate a long development during times in which the rest of India persisted in various stages of the younger stone-age. Trade connections between the Indus valley and Sumeria in Mesopotamia and cultural affinities are documented also in the arts. But in many forms and symbols Mohenjodaro heralds the beginning of Indian art with a strong Dravidian flavour. Outstanding are animal engravings on seals and little statuettes in terracotta, stone or bronze, amongst which a bronze girl in a dancing pose anticipates later qualities of Indian plastic art.

From Mohenjodaro to about 300 B.C. hardly any traces of artistic activities in India survive. Yet we know from the description of houses and palaces in the great epics that painting, image making and the minor arts existed. The intervening time saw the arrival of the Aryans in India and the coming into being of the three great Indian religions, Brahmanism, Buddhism and Jainism. The archaic sculptures, made under the patronage of the Buddhist Maurya rulers, retain vestiges of earlier and more primitive cults in the large "*yaksha*" stone statues of Besnagar and Mathura (Muttra). Soberly naturalistic animal sculpture adorns the capitals of Asokan edict pillars. Persian and Greek influences, if present, are only superficial.

Beginnings of Classic Art.—After the fall of the Maurya Empire, the Sungas ruled in the North, the Andhras in the South (2nd—1st century B.C.). The robust sculpture of earlier stages is made pliable by a penetrating flowing rhythm. The characteristic voluptuous forms of Indian art, through which pulsates the sap of life, make their appearance in the Yakshi figures of the Bharhut stupa rails. A certain angularity and flatness of modelling are gradually being overcome. The art of the period is almost exclusively Buddhist. Its famous centres are Bharhut, Sanchi, Buth Gaya, Mathura and Pataliputra (Patna), Bhaja in the Western Ghats and Veraz in South India. Sculpture and relief (and most probably not surviving painting) were used to illustrate religious teaching on the rails, gates and walls of *stupas* (relic mounds) which had become the centres of worship and in the monasteries and chapels attached to them. In the reliefs depicting Buddha's life or that of his previous incarnations (*jatakas*) Buddha is never presented in human form, but his presence is shown by symbols such as the tree of enlightenment, his footprints, the throne on which he sat or the platform on which he used to walk. This fundamentally Indian principle indicates the Aryan component of Indian art, while the lovesome, passionate figures of "*yakshis*" on the sacred gates are pre-Buddhist in spirit and in the true Indian tradition. The wealth of form and movement, the inventiveness of composition and the controlled dynamism of this early art ushers in the classic era.

Kushan and Andhra Art.—The first and second centuries A.D. saw the power of the Kushan empire establishing itself in the North-West and North of India, while the Andhras ruled the South. The classic progress shows itself in increased plastic penetration of large-size sculptures and in great vitality. The centre of artistic creation is Mathura (Mattra). Buddhism is still the predominant theme. Mathura creates the Indian Buddha image in direct continuation of the Maurvan tradition of large-size stone figures, overcoming bulk and crudeness in spirited modelling. Frankly sensuous but in a different way from the nudes of the Greek school, are the female figures of Mathura and other centres. Most probably originating from aboriginal symbols of fertility, these graceful if voluptuous nymphs, for centuries to come, the round-breasted, narrow-waisted, full-hipped ideal of female beauty for the Indian artist. In the South, the *stupa* of Amaravati has yielded a wealth of magnificent sculpture. More fluid, mellow and exuberant than the North, it comes nearest to classic perfection.

Early Fresco Paintings.—Belonging to the first century B.C., the fresco paintings in cave 9 and 10 in Ajanta (Nizam's Dominion) are the earliest well-preserved Indian paintings though still earlier work survives in several other localities. The high level of competence in Ajanta proves a long but lost, history of this art. Akin to reliefs in Barhut and Sanchi, these early paintings have already the graceful outlines of later work.

Graeco-Indian Art—From the first century A. D. onwards a peculiar hybrid art develops in the North-West of India, the Gandhara country. Through the direct contact with Graeco-Scythian and Parthian neighbours, Hellenistic forms were applied to Indian Buddhist themes. It is possible that the human presentation of Buddha was tried here first but in a different spirit from that of Mathura. The Gandhara school is famous for the quantity of its output and for fine workmanship. From an artistic point it is inferior and derivative. Its chief interest is archaeological. A later school of the 3rd and 4th century, produced sculpture of baroque quality mainly in stucco.

Classic Art of the Gupta Age.

(1) *Sculpture.*—In 320 A. D. Chandragupta founded the Gupta dynasty from Patna, which was to be the dominant power in India for about 250 years. The main centres of Buddhist sculpture are Mathura, Sarnath, Ajanta, Aurangabad and others. Paurande Hinduism came to the forefront during this period and the most powerful Brahmanical art was produced all over India, especially in Deogarh, Badami and Aihole (Deccan), Udaygirl (near Sanchi), Gwalior and many other places. Stylistic differences of Western and Eastern schools become more pronounced, although the homogeneity of Indian Art is not broken. The art of the Gupta period can best be characterised by the word spiritual. The latent naturalism of earlier periods is now overcome or harnessed to the spiritual representations of superhuman, elementary or cosmical powers. The human figure is only the vehicle of transcendental forces. The artist masters every mood from the lyrical to the terrible. The Buddha images of Mathura and Sarnath are in their classic simplification and perfection of modelling, in their serene spirituality and dignity amongst the world's supreme religious images. The boar incarnation of Vishnu in Udaygirl is of impressive power which changes primitive terror to a deep experience of divine force. The iconography of the Hindu'c pantheon is developed during this age.

(2) *Painting.*—During the sixth and seventh century the Gupta spirit survives in Indian art in spite of the decline and overthrow of the Gupta empire; therefore, in our classification of styles they are included in Gupta Art. The art of fresco painting had then reached its zenith. Ajanta Bagh (Buddhist) and Badami (Brahmanical) are the chief centres of this art as it survives today, but the Jain paintings of Sittanavasal (South India), the Brahmanical paintings of Tirumalaipuram and the Singhalese rock pictures of Sigiriya (Ceylon) testify to an All-India distribution.

End of 5th century	..	Sigiriya, Ceylon.
6th century	..	Ajanta Caves 16 and 17 Bagh, Badami.
7th century	..	Ajanta Caves 1 and 2 Sittanavasal, Tirumalaipuram.

All these paintings are mostly narrative in character. The painters depict religious legends in easily understandable form, making use of the costume, scenery and manners of their own time. The colours, made from minerals, are bright green, red, brown, yellow, black and

blue (Ajanta). The greatest artistic merit of these paintings lies in their rhythmical, flowing outline which indicates the plastic volume of a body. Light and shade are unknown, but forms are modelled with colour shading. Perspective in the western sense was not known but compositions achieve a surprising degree of depth. Indian fresco paintings are not only examples of overflowing artistic talent and imagination but also an invaluable source of information about life in the past.

Climax of Indian Art.—During the seventh and eighth centuries Indian art reaches its high water mark. The surging power of Brahmanism fills Indian sculpture with unheard-of virility. Sweeping movement becomes an expression of force; the swelling, rounded forms of human or animal bodies become signs of pent up energies. The rock-hewn sculptures of Elephanta (near Bombay), Ellora (Deccan) and Mahavalipuram (seven pagodas, near Madras) are the finest representatives of this period. In Ellora, the close union between sculpture and architecture, so typical for Indian art, is carried to an extreme in the Kailasanatha temple which, an enormous building, was carved out of solid rock as a whole.

Medieval Art.—From the 9th and 10th centuries onwards Hindu art conquered every corner of India. With wider distribution, local schools and styles developed in the course of time, without, however, breaking the unity of Indian art. Medieval sculpture was called upon to decorate with stone carvings the innumerable temples, that were being built, and to provide images for worship in temples and private chapels in stone, bronze or wood.

While much of the grandeur of the classical age survives in medieval sculpture its simplicity and force are gradually lost in an over-elaboration of decorative by-work such as jewellery and the iconographical attributes of deities. The tendency towards spiritualism is accentuated especially under the influence of *tantric* Symbolism. In the end, the demands of iconographical correctness, made on the artist by the priests, suppressed his own imagination and sensitivity and produced an enormous volume of indifferent and mediocre work. Yet it must be said that art of a high order was created right up to the 18th century.

The main schools of medieval sculpture are the following: Candela School (Khajuraho) in Central India, the Pala School of Bihar and Bengal (partly Buddhist), the Orissa School (Bhuvanesvara, Puri and Konarak), known for its erotic sculptures, the Western School (Gujerat and Rajputana) with the famous Jain art of Mt. Abu and Patan; the Gujarat School excelled in finely detailed carving in stone and wood and applied its work also to the decoration of private houses (Ahmedabad); the Deccan School and the Mysore (Hoysala) School with the profuse carvings of Belur, Halebid and Somnathpura; the Chola School of South India which decorated the famous Tanjore temple and gave Indian art its finest bronze images; the late Vijayanagar school of the 16th century which produced very lively work and the Madura School of the 17th century.

Medieval Paintings.—It was, not so long ago, a widely accepted belief that the art of painting died out in India after the 7th century and was not revived till the 16th century by the miniature paintings of the Moghul Court. But there is enough evidence now to show that mural painting was practised in India throughout the medieval period even if, owing to large scale destruction (especially in the North) and to neglect, little of it survives. Medieval painting is of varying vigour and excellence and tends, like sculpture, towards an overemphasis of decorative detail and to a hardening of accepted forms. In Ellora paintings of the 8th-10th century are preserved, in Tanjore frescoes of the 11th century, in Polonnaruva in Ceylon Buddhist work of the 12th century. Later work of the Vijayanagar period is known and a large volume of murals survives in Jain temples and monasteries of Gujerat and in the palaces of Rajputana, all dating from a much later time. In Cochin and Travancore many examples of elaborate Kerala painting can be found belonging to the 16th-19th century. Jain paintings in Conjeevaram of the 17th and 18th century illustrate the close affinity between medieval mural art and miniature book illustrations.

Indian Miniature Paintings.—The illuminating and illustrating of religious scriptures was a widespread art in India even if little of it escaped destruction with the exception of a large number of Jain manuscripts from Gujerat. The earliest, painted on palm leaves, date from the 12th and 13th centuries. They have highly conventionalized figures with sharp noses and protruding eyes. The background is first red, later blue. Manuscript illustrations of the Pala period (Bengal 12th century) are also known.

Rajasthani and Pahari Paintings.—The middle of the sixteenth century sees the beginning of an Indian School of miniature painting in Rajputana of great vitality, charm and artistic merit. The early Rajasthani paintings are known as *ragmalas*, pictorial representations of musical moods (*Ragas*). These paintings have an intimate, lyrical flavour and are full of the loving devotion which the Vaishnava revival brought with its intense cult of Krishna. Rajasthani Painting, like the *pahari* Schools of the North, is strictly formalised *i.e.* human figures, animals and trees are represented in a simplified, conceptual manner but are, nevertheless, very alive and expressive. The plastic quality of the great frescoes is absent, the line very gentle and sensitive. The colours are flat, yet brilliant and colour schemes vary in the different schools (*kalams*). Perspective is attempted but not in the western, scientific manner. Rajasthani paintings existed up to the 19th century with a sharp decline after the end of the 18th century. The *pahari* (Hill) Schools of the Hill States in the North, are similar in type to Rajasthani painting. They flourished in several *kalams* (Kangra, Basholi, Jammu, etc.) from the 17th to 19th century and seem to have absorbed a number of artists who became unemployed with the decline of Moghul painting under Aurangzeb. Rajasthani and Pahari paintings were influenced to a degree by Moghul painting in technical detail without ever giving themselves to the external naturalism of the latter.

Moghul Painting.—Derived from the Timurid School of miniature painting in Persia and beginning under strong Persian influence in the middle of the 16th century, Moghul painting developed into an Indian art, if that term can be accepted with reservations. Already Akbar employed Indian artists who under the guidance of Persian masters were put to the task of illustrating manuscripts. Under Jehangir and Shajahan Moghul painting reached its climax. Moghul art is a court art, limited in its scope, and overshadowed by the demand for extreme technical perfection. It is individualistic with a clear development of personal styles of different artists which are known by name, (a thing rarely heard of in popular Indian art). It is illustrative, and mainly concerned with the representation of court scenes, portraits, historical events, or the skilful rendering of flowers or animals. That means it is concerned with appearances and not with moods or poetical feelings as the contemporary Indian work. But Indian painters did not only introduce Indian, i.e. Hindu themes into Moghul art, but gradually flavoured it with an Indian spirit. In technical excellence, accurate and delicate drawing, observance and taste Moghul art is unsurpassed. The wrong notion that the Moghul court art was responsible for the revival of painting in India must be given up though a strong influence on Rajasthani and Pahari painting is obvious. Under Mohamedan rulers offshoots of Moghul art developed in different parts of India such as Bijapur, Hyderabad, Ahmednagar, Lucknow, etc.

Modern Art in India.—With the eclipse of medieval powers in India and the arrival of European civilisation, the indigenous arts experienced a rapid decline. While folk art and crafts survived during the 19th century, the higher forms of indigenous art died out and were replaced by imported western art, rarely of more than mediocre quality. Art schools were initiated in India on British models in the 19th century and attached to the educational system. In these the arts of drawing, painting and modelling and certain arts and crafts were taught on the lines of western academic tradition. At the beginning of this century a revival of traditional and indigenous art was propagated by Mr. Havell, then principal of the Calcutta Art School, and by Abanindranath Tagore and his followers. By a reorientation on the lines of Ajanta and medieval miniature painting these men began a powerful and successful art movement, which, known as the Bengal School, very soon influenced artists throughout India. Unfortunately, succeeding generations have not been able to widen and deepen the flow of this new stream but exhausted themselves in an imitative mannerism. An outstanding figure of this school is Nandalal Bose whose imaginative force is great. The present principal of the Government School of Art in Calcutta is Mr. Atul Bose. The School teaches fine (western) art, Indian Art, commercial art, modelling and certain crafts.

Under its successive principals Messrs. Lockwood Kipling, Griffiths, Greenwood, Cecil Burns and Gladstone-Solomon the Sir J. J. School of Arts in Bombay has grown into a large and many-sided institution. The School favoured thorough training on European lines. Under Mr. W. E. Gladstone Solomon a class of mural painting was added in which western art was fused with Indian decorative principles. The School teaches a variety of crafts and industrial arts, such as stone carving, metal work, leather work, textile design, etc. It has a large commercial art and photographic section which was added by its present principal, Mr. C. R. Gerrard, A.R.C.A., R.B.A., R.O.I., F.A.S.A., J.P. Under Mr. Gerrard interesting modern tendencies developed in painting which seem to indicate a union of contemporary European work with sound Indian traditions.

Many art schools flourish in India in different centres such as Lahore, Delhi, Lucknow, Benares, Shantiniketan, Madras, Mysore, Travancore, Patna, etc., under the patronage of provincial governments, State governments or as private institutions. Indian artists of today strive for new forms of expression which would be in tune with present day life without breaking with the ancient traditions of their country. A most impressive solution for this problem was found in the moving paintings of Miss Amrita Sher Gil who died prematurely in 1941.

Indian Architecture.

Indian architecture, like Indian sculpture and painting, is the visible expression of spiritual conditions in successive phases. While the requirements of various religious creeds decree and modify the forms of Indian buildings, the historical development of the architectural art in India is indicated by a gradual progress of constructional types and by the successive usage of different building material, such as wood, brick or stone, which is primarily independent of religious domination. The former division of Indian architecture into Buddhist, Jain and Hindu styles is for these reasons not satisfactory and should be replaced by a division based on stylistic evidence. The first comprehensive work, accessible to lay readers, to give a history of styles in Indian architecture is Mr. Percy Brown's *Indian Architecture* in two volumes which marks a definite advance in the treatment of the subject over Fergusson's *Indian and Eastern Architecture* which, for many years, was considered to be the standard work.

The chief characteristics of Indian architecture, especially in its later stone phase, are (*a*) its use of heavy masses; (*b*) construction based on vertical not lateral pressure, i.e. without true arches or true domes; (*c*) its plastic treatment and close relationship with sculpture, (*d*) its undeveloped treatment of space and (*e*) its spiritual significance and symbolism. These features distinguish Indian building from most Western types of architecture and from Islamic architecture in India, though the latter naturally contains many Indian elements.

History of Styles.—A history of styles in Indian architecture must be based on historical

development and geographical distribution. The overlapping of types in time and space make a clear division impossible but the following crude classification may be suggested.

Brick Architecture of the Indus Valley ..	c. 3000 B.C.
Vedic Wood Architecture	from 1500 B.C.
Mauryan Architecture.	300 to 200 B.C.
Sunga and Andhra Architecture ..	200 B.C. to 200 A.D.
Gupta Architecture ..	350 to 650 A.D.
Early Medieval:	
Northern	600 to 800 A.D.
Chalukya	
Rastrakuta	
Pallava	
Medieval Architecture:	
Northern (Indo-Aryan) Style ..	750 to 1800 A.D.
Southern (Dravidian) Style ..	
Western (Chalukyan) Style ..	
Indo-Saracenic Architecture	1250 to 1300 A.D.

The Indus Valley Cities.— In Harappa and Mohenjodaro and other sites of the Indus valley extensive cities have been discovered under the mud and sand of the river. These cities were built from c. 3000—2000 B.C. by a people whose chief occupation was trading. The buildings, which are carried out in brick in "English bond", are plain, functional and without great artistic merit. They are mainly houses, store houses, baths and wells and no certain traces of temples or palaces have yet been found. The city drainage system was perfect. The corbelled arch was used, the true arch being unknown.

The Vedic Village.—After the extinction of the Indus cities, which may have spread their influence to the Ganges valley, and with the invasion of the Aryan tribes a new architecture came into existence which, originating from the village, developed into the city and palace architecture of the epic period. Wood being the only building material, hardly any visible traces of this period exist; but the scriptures and the Buddhist art of later times give us a faint idea of the forms used. The main forms were the long house with a vaulted roof constructed with bamboo or reed and with horse-shoe shaped "sun windows" on either end; circular village huts (and perhaps shrines) and the wooden fence with wooden "cowgates". In the South are found "dolmens" covered with a single slab of stone, and in Rajgriha, the ancient capital of Maghada, cyclopean fortifications in stone were carried to a height of 12 feet.

Mauryan Architecture.—With the establishment of a large political power under Asoka the use of a more permanent stone architecture was gradually introduced. Monuments of this period include (*a*) 13 monolithic edict pillars, some with beautifully carved animal figures on bell shaped capitals (Persian influence); (*b*) remains of a large, three storied wooden palace near Patna supported on stone pillars; (*c*) several *stupas* or Buddhist relic mounds built largely in brick and (*d*) a group of rock-cut caves in the Barabar Hills in Bihar. *Stupas* are circular mounts inclosing some relic casket and surmounted by a ceremonial umbrella. They were the chief object of Buddhist worship. The rock caves are an imitation of wooden buildings and indicate the existence of small circular shrines with a hall in front, quite probably of vedic origin.

The Great Stupas.—During almost four centuries, from 200 B.C. to 200 A.D., under two great dynasties, the Sungas of the North and the Andhras of the South, Buddhist zeal gave India some of the most remarkable monuments. The *stupas*, which were founded in Mauryan times, were now enlarged and beautified. In this period they are stonefaced, with a stone casket and umbrella on top, surrounded by stone railings in which are set four doorways or *toranas*. All forms, though carried out in stone, betray their wooden origin. Sculpture and relief are used profusely to decorate the sacred shrines. Here also the conversion to stone from other materials is indicated by an inscription which says that the southern gateway of the great *stupa* of Sanchi was made by the ivory carvers of Besnagar. The most famous *stupas* are those of Sanchi (Bhopal State), Barhut (C.I.), Budh Gaya, Sarnath, and Amaravati in Madras Presidency which is the latest and most elaborate one.

Rock Temples.—To serve priests, monks and lay worshippers, temples and monasteries were built, mainly in brick and wood. Little of these has survived but their exact replicas have come to us, carved from solid rock in the shape of cave temples and monasteries. The practice of hewing shrines out of solid rock had begun under Asoka, but in the centuries just before and after the Christian era it was widely practised and the largest caves (Karli, 124 ft. long, 46½ ft. wide and 45 ft. high) reach considerable proportions.

Buddhist caves are generally of two types—*chaityas* or chapels, and *viharas* or monasteries. The *chaityas* are long apsidal buildings with a vaulted roof and a horse-shoe window over the entrance. The interior is divided into a nave for the priests and aisles for the lay worshippers by means of a double row of pillars. At the apsidal end is a *stupa*. *Chaityas* are thus remarkably similar to Christian basilicas. *Viharas* are rectangular halls surrounded by cells and having (in a later development) a sanctum in the centre of the backwall containing a Buddha image. Some *viharas* are double-storied. In both *vihara* and *chaitya*, the structural features of wood architecture have been imitated to the last detail. The most important groups of caves of this period are those of Bhaja, Koudane, Pitalkhora, Bedsa, Nasik, Ajanta, Ellora, Junnar and Kanheri, all in Western India. Jain caves of a different type, dating from the second to the first century B.C. are situated near Cuttack in Orissa. Buddhist rock architecture continued with variations of style up to 650 A.D. In the Gandhara country of N.-W. India another style of Buddhist architecture developed under mixed Greek, Scythian, Persian and Indian influence.

The Gupta Temple.—During the Gupta age (c. 350—650 A.D.) a flood of creative energy swept over India. It is during this period that the later Hindu temple begins to take shape. Wood architecture is gradually replaced by stone masonry. Indian builders used the simple construction of pillar and bracket supporting beams. Arches, except corbelled arches, were not used. Pillars and beams are, preferably, monolithic *i.e.*, made from single large slabs of stone. Masonry consists of large, very well worked stones bonded without mortar.

The reawakening of Brahmin culture soon developed its own forms for houses of worship suited to its ritual requirements and expressive of its own religious spirit. Buddhist *chaitya* halls were designed for congregational worship, while Hindu ritual demanded a house for the image and enough room for individual worship (*puja*). First, the apsidal temple of Buddhist usage is adapted by the Hindus. In Ter and Gherzala (S. India) are found brick and plaster *chaitya* temples of the 4th century, dedicated to Hindu worship. The Durga temple of Aihole in the Bijapur district is an apsidal stone structure dating from the 5th or 6th century, though its *shikhara* or spire may be of a later period. Typical of the Gupta age are flat roofed temples consisting of a square sanctum with a pillared porch. They are found in Udayagiri (Bhopal), Sanchi, Tigowa, Bhumara and Nachna Kuthara (C.I.) and in Aihole (Lad Khan Temple). They belong to the 4th and 5th centuries. Some have another cell on the roof which may mark the beginning development of the *shikhara*. In the Ganges valley originates a form of brick temple consisting of a square shrine with a pyramidal roof which is made up by duplicating the roof twice or repeatedly (Bhitargaon near Cawnpore). The principle of double shrines or elevated shrines with repeated stories was known in the North of India for a long time, and is recorded in several relief carvings or plaquettes from Mathura (2nd century A.D.). The large temple of Bodh Gaya in its original form may have been a similar structure. The earliest temple with a true *shikhara* seems to be the Dasavatara temple in Deogarh near Jhansi belonging perhaps to the middle of the 6th century. The northern temples have pillars with bell-shaped capitals or with "vase and flower" capitals, the Deccan temples use square pilasters with heavy brackets.

Development of Indian Temple Styles.—During the 200 years from 600 to 800 A.D. the medieval Indian temple is established in its main forms and styles. The typical temple consists of a cell which houses the image (*Garbha Griha*—womb-house), and a pillared hall (*mandap*). Originally not connected, these two parts were joined by an intermediate chamber (*antarala*). Leading into the main hall are one or several porches (*ardhi-mandap*). The cell is surmounted by a *shikhara* (spire or pyramidal roof) which is the main distinguishing mark of temple styles. The whole temple may be raised on a platform and be surrounded by an enclosure through which leads a gateway (*gopuram*).

The origin of the *shikhara* is still obscure. Many theories have been put forward deducing its form from the bamboo tower of processional cars, from multiple ceremonial umbrellas over Buddhist shrines, etc. It seems that the principle of duplicated and repeated roofs of diminishing size gives the most satisfactory answer to the problem.

In the seventh and eighth century, the two main forms of *shikharas*, the northern curvilinear spire and the southern pyramid, are found side by side in Aihole and Pattakadal, old capitals of the Chalukyan dynasties. At Bhuvaneshvar in Orissa, the northern style unfolds in many beautiful temples (from 750 A.D.). The rock cut temples of the "seven pagodas" at Mahavalipuram near Madras, excavated by the Pallavas of the 7th century, show how the earliest southern temples grow out of common forms of preceding times: the house, the village shrine, the Buddhist *chaitya* and the many-storied Buddhist monastery. It is the latter with its ascending stories, decorated with many little *chaitya* cells, that leads to the pyramidal roof or *vimana* of the southern temple. Under the Rashtrakuta family which overwhelmed the Chalukyans in Western India during the 8th century, rock-cut caves and temples, Shaiva in character, were excavated in Elephanta and Ellora (Deccan). The Kailasanath temple of Ellora is a complete Dravidian structural temple carved in solid rock.

Medieval Temples.—The time from the 8th to the 13th century is the great age of temple-building in India, comparable in its achievement only to the age of Gothic cathedral building in Europe. The three main styles are now clearly differentiated, the northern or Indo-Aryan style emphasising the perpendicular, the southern or Dravidian style stressing the horizontal, while the Chalukyan or western style combines elements of both the other. Apart from Bhuvaneshvar in Orissa, the northern style comes into full flower in Khajuraho in Bundelkhand, in Rajputana (Mount Abu), Gujerat (Modhera), Osia in Marwar, in the Deccan (Ambarnath) and many other places.

The Dravidian Temple.—In the south, temple architecture develops independently through its successive phases, nominated after the leading dynasties: Pallava (600—900), Chola (900—1150), Pandya (1100—1350), Vijayanagar (1350—1565), Madura (1600—and after). Typical of the southern temple is the addition of spreading pillared halls and long covered corridors. The temple compound expands into a whole complex of buildings surrounded by large walls. The entrance gates are marked by impressive pyramidal towers (*gopurams*) which grow larger in time and far exceed the *vimana* in size. Famous Dravidian temples, in their order of origin, are the Kailasanath of Conjeeveram, the great temple of Tanjore, the Vithala temple of Vijayanagar and the Meenakshi temple of Madura.

The Chalukyan temples, combining North and South in their structures, are noteworthy for their star-shaped plan and their lavish use of decorative carving. Beginning with the imposing temples of Pattakadal the style reaches its climax in the countless temples of Darwar and the profusely carved temples of Mysore (Belur, Halebid, Somnathpura) of the 12th century which belong to the finest in India.

Other Styles.—Local developments of temple-building include the temples of Kashmir, the temples with multiple roofs of Malabar and Nepal, and the later temples of Bengal with the

"thatched hut" type roof. Civilian architecture, though of equal importance as sacred architecture, has left fewer traces. The palaces of Rajputana give an indication of its type. With the Mohammedan conquests in the north, Indian architecture declined in the 13th century. In the south it survived till the 18th century though, while growing in size and pretension, declining in taste and artistic feeling.

Indo-Saracenic Architecture.—This begins in India with the 13th century after the permanent occupation of the Mohammedans. Their first mosques were constructed of the materials of Hindu and Jaina temples, and sometimes with comparatively slight alterations. The *Quwwat-ul-Islam* mosque near the Qutb Minar in Delhi and the *Arhai-din-ka-jhompra* mosque in Ajmer are the best examples of this kind. Gradually new methods and principles of construction were introduced from Persia and other Islamic countries of the West. The Mohammedans brought the arch and the true dome, they used mortar (which became necessary because of the lateral pressure exercised by arches and they introduced novel types of buildings (the mosque and the tomb). They had greater emphasis on the perfection and the proportions of interior spaces than the Indian temple builders who did not require lofty spaces. The Mohammedan architecture of India varied at different periods and under the various dynasties, imperial and local. The early Pathan architecture of Delhi was massive and at the same time characterised by elaborate richness of ornamentation. The Qutb Minar and the tombs of Iltitmish and Ala-ud-din Khilji are typical examples. The tomb of Ghiasuddin Tughlak at Tughlakabad, the Lodi tombs, and lastly the tomb of Sher Shah at Sasseram in Bihar clearly illustrate the subsequent progress of Pathan architecture. Of the Sharqi style we have three mosques in Jaunpur, besides several tombs. At Mandu in the Dhar State, a third form of Saracenic architecture sprang up, and we have here the Jami Masjid, Hoshang's Tomb, Jahaz Mahal and Hindola Mahal as the most notable instances of the secular and ecclesiastical styles of the Malwa Pathans. The Mohammedans of Bengal again developed their style, somewhat feeble and ornate, and Gaur and Pandua teem with the ruins of buildings of this type, the most important of which are the Adina Masjid of Sikandar Shah, the Eklakhi Mosque, Baradwari Masjid, Lattan Masjid, a small golden mosque and so forth. The Rulers of the Bahmani dynasty of Gulbarga and Bidar were also great builders, and adorned their capitals with important buildings. The most striking of these is the great mosque of Gulbarga, which differs from all mosques in India in having the whole central area covered over so that what in others would be an open court is here roofed by sixty-three small domes. "Of the various forms which the Saracenic architecture assumed," says Fergusson, "that of Ahmedabad may probably be considered to be the most elegant." It is notable for its carved stone work; and the work of the perforated stone windows in Sidi Sayyid's mosque, the carved niches of the minars of many other mosques, the sculptured *Mihrabs* and domed and panelled roofs is so exquisite that it will rival anything of the sort executed elsewhere at any period. No other style is so essentially Hindu. In complete contrast with this was the form of architecture employed by the Adil Shahi dynasty of Bijapur. There is here relatively little trace of Hindu forms or details. The principal buildings now left at Bijapur are the Jami Masjid, Gagan Mahal, Mihtari Mahal, Ibrahim Rauza and Mosque and the Gol Gumbaz. The latter is supposed to have the largest dome in existence. Like their predecessors, the Pathans of Delhi, the Moghuls were a great building race. Their style first began to evolve itself during the reign of Akbar in a combination of Hindu and Mohammedan features. Noteworthy among the Emperor's buildings are the tomb of Humayun, and the palaces at Fatehpur Sikri and Agra. Of Jehangir's time his tomb at Lahore and the tomb of Itimad-ud-daula at Agra are the most typical structures. The force and originality of the style gave way under Shah Jahan to a delicate elegance and refinement of detail and it was during his reign that the luxurious buildings in the forts at Delhi and Agra and the most splendid of the Moghul tombs, the Taj Mahal at Agra, the tomb of his wife Mumtaz Mahal, were constructed. The Moti Masjid in Agra Fort is another surpassingly pure and elegant monument of his time.

Modern Architecture in India.—With the arrival of Europeans in India, western styles of architecture were soon introduced. The Portuguese built churches and palaces in an agreeable baroque style. The early British colonial style of which many pleasant examples survive, especially in South India, was appealing in its simplicity and its clever adaptation to the Indian climate. During the 19th century public buildings were erected in a hybrid style composed of classic, romanesque, Gothic and Indian elements comparable with the derivative styles of the Victorian epoch in Europe. In more recent times, two schools of thought have fought for supremacy in India; the one propagating a revival of indigenous Indian art as still practised by the Indian "master builders" surviving in Rajputana and other parts of the country; the other proclaiming the development of a modern architecture on western lines. The "master builder" has undoubtedly inherited a great deal of the craft, the taste and the sensitive artistic feeling of his forefathers, but his structural knowledge is totally inadequate for modern requirements. The western school has found more widespread acceptance. The work of building the new capital in Delhi was entrusted to Sir Edwin Lutyens and Sir Herbert Baker. This most ambitious scheme, incorporating the design and planning of a whole new city, has led to a new style of official architecture, the merit of which is still a controversial question. The contemporary use of reinforced concrete structures, though indubitably cheaper, safer and faster, emphasises the dangers of standardisation and suppression of national character. The solution to the problem will have to be found by a young generation of Indian architects who, while fully trained in modern methods of construction, are yet conscious of the glorious artistic heritage of their country.

Schools of Architecture.—A School of Architecture, recognised by the R.I.B.A., is part of the Sir J. J. School of Arts in Bombay. Its professors of Architecture since 1913 were R. W. Cable, H. Foster King and Claude Batley; the present Professor of Architecture is Mr. C. M.

Master, M.A., F.R.I.B.A., F.I.I.A. The Indian Institute of Architects, affiliated to the Royal Institute of British Architects in 1925, co-operate with the R.I.B.A. in conducting the Final R.I.B.A. Examinations in Bombay. Other schools preparing students for government examinations in architecture are (1) the Kala Bhuvan, Baroda; (2) the Architectural Academy, Bombay; (3) the Calcutta University; (4) the Polytechnic Institute, New Delhi.

Indian Arts and Crafts.

It is in the arts and crafts of a people that its heritage of artistic feeling, design and religious belief remain alive over many hundreds, if not thousands, of years. India absorbed throughout her long history innumerable foreign influences into her arts. Beginning with the fusion of Aryan and indigenous Indian (Dravidian) art during the first millenium B.C., over the influx of Greek, Persian, Hellenistic, central Asiatic or far-eastern elements in pre-Gupta and Gupta times, to the blending of Islamic with Indian forms of design after the Mohammedan conquest and even to the absorption of European features, the arts and crafts of India have adopted new designs, fused them with old ones and infused them with the spirit and the sensitiveness of this country. Two main elements can be discerned in Indian design: on the one hand we have the geometrical element of the northern nomads in which all natural forms are reduced to decorative patterns. This element came into India in successive waves with the Aryans, the Scythians, the White Huns, the Mongols and the Muslims. The other element, which might be taken as belonging to the indigenous Indian South, is more exuberant and uses natural forms such as human or animal figures with greater freedom. The desire to decorate even the humblest articles of daily use and to introduce beauty into every feature of life has been inherent in India from time immemorial and has even survived, sadly weakened, the industrial revolution of our age. The gay and tasteful dresses of Indian village folk of today testify to the indestructible artistic sense of this ancient race.

Pottery.—In the excavations of Mohenjodaro and other Indus valley sites pottery of the 4th and 3rd millenium B.C. has been found, of pleasing shape and with very decorative paintings in black or red in which animal forms feature prominently. Up to the present time, the potter's wares are usually of good functional design and quite often painted. Well known is the glazed ware from Agra. Terracotta work has found manifold adaptations in India throughout the ages, a particularly beautiful one in the terracotta reliefs on 17th century temples in Bengal. Glazed tiles were used by the Mohammedans for architectural decoration. The many coloured tile mosaics of Lahore Fort are famous.

Stone Work.—Carved stone work is the principal form of decoration on Hindu or Mohammedan buildings. Ranging from fully sculptured figure friezes to the finest trellis work it is found on buildings of every epoch. Well known for the skill and the imagination displayed, are the Jain marble temples of Dilwara in Mount Abu and the Hoysala temples of Mysore. Muslim buildings are soberer in their ornamentation. The stone carvers of Ahmedabad excelled in delicate "*jali*" (stone tracery) work for windows (Sidi Sayyid's mosque). On buildings of the Pathan dynasty of Delhi wonderful decorative use has been made of carved Persian or Arabic lettering (Qutb Minar). The use of marble inlay and mosaic work became fashionable under the Moghuls and led to mastership in the costly art of "pietra dura" in which precious stones are inlaid in marble in most delicate and delightful flower patterns. The stone masons of modern Jaipur are highly skilled in architectural carving.

Wood Work.—Wood carving was in India, as in most other countries, the mother of the art of stone carving. With a fine range of precious timbers suitable for the purpose, wood has always played an important part in Indian building and decoration. Typical are the carved house front in Ahmedabad and other Gujerat cities, in Nasik, in the Punjab, etc. 16th and 17th century Jain temples in Ahmedabad are carved in wood and painted right up to their domes teeming with multitudes of figures. They are the prototype of the stone carved temple ceilings of Mount Abu. Richly carved furniture is made today in Kashmir (walnut) and in South India (rose wood and black wood). Decorative carving in sandalwood for domestic or religious purposes is at home in South India.

Ivory.—An inscription in Sanchi (1st century B.C.) says that part of the stone relief work of the Southgate was done by the ivory carvers of Besnagar. This alone proves the close interrelation of all the arts and crafts in India. Still a flourishing art in South India (Mysore, Travancore) and in Delhi, ivory articles find a ready market in India and overseas. Though of perfect finish, modern work lacks the sensitive sculpturing of earlier work.

Metal Work.—With the exception of weaving the metal industry employed and still employs the greatest number of craftsmen in India and the greatest variety of methods and techniques. There is hardly a place in India where metal objects are not made in one form or other. Iron and steel, known from early times, were mainly used in weapons. The best damascened blades come from South India and Rajputana. Brass and copper go to make the plain but beautiful utensils of domestic use (*lota, huqqa*, etc.) and ceremonial lamps, images, vessels, etc., for religious worship. These articles are cast, hammered, chased, inlaid, encrusted or otherwise worked. The South Indian image maker's (*sthapati*) bronze or brass castings are marvels of this craft. Well known is *bidri* ware (from Bidar in Hyderabad), in which silver is inlaid in a dark metal alloy of *koftgari* ware, best from Muradabad, Punjab, in which gold and silver are inlaid in steel. Gold and silver, in repoussé or filigree, are worked into fine articles in Kashmir, Lucknow and other places.

Jewellery.—From time immemorial jewellery of rich design was made in India, and worn by both sexes. Simple beads of polished precious stones have been found in many prehistoric and early historic sites. Classic and medieval sculptures and paintings tell us about the endless variety of jewellery, to describe which would require a large treatise. Flowers being the most primitive form of adornment, many forms of jewellery, up to the present day, derive name and shape from floral prototypes. Perhaps the finest jewellery work is done in gold enamelling, Lahore and Jaipur giving the choicest pieces. Typical of India is the incrustration of gold and silver with gems which are always *cabochon* cut (never facetted as modern European jewellery) for a fuller colour effect. Another very ancient technique is gold and silver filigree applied to ornaments. Nothing can compare with the exuberant splendour of Indian jewellery, though the skill in stone-cutting and also in setting has not always reached the level of western craftsmen.

Lacquer work and papier mache.—Lac being an indigenous Indian product, lacquer work in various techniques has assumed industrial proportions in many parts of the country. Best known perhaps are the products of the Kashmiri craftsmen, especially in connection with papier maché painting. Lac turnery for furniture, toys and other objects is a widespread art in western India, especially in Kathiawar and Gujerat. In Sawantwadi (Konkan Coast) a small lacquer industry produces artificial fruits, playing cards, toys, etc.

Textiles.—No other country, East or West has ever excelled India in the weaving of cotton and silken fabrics. Since ancient times, Indian textiles were in great demand in all world markets. There is hardly a technique or art in fabric making that was or is not known in India. A very short enumeration must suffice: *Patola* silks of Gujerat, in which the threads are variously dyed before weaving; fine silks and brocades from Benares, Murshidabad, Hyderabad, Madras, Tanjore and other places; finely woven woollen Kashmir shawls; delicate muslins from Dacca; tie-dyed fabrics from Rajputana; various forms of dye-painting on cotton (*qalmdar*, similar to Javanese batic) from South India; printed silks and cottons from all parts of the country, some of the finest cotton prints coming from Sanganir near Jaipur. As there is no limit to the styles of embroidery, mention may be made only of the *phulkari* work of the Punjab, the colourful embroideries of Kathiawar and the world-famous Kashmir shawls. Carpet making is at home in Northern India. Especially under Akbar in the 16th century, gorgeous rugs and carpets were made, exquisite in colour and fabric; yet the finest work from Persia was never equalled.

It has been estimated that there are still 2½ million handlooms in India, and the industry though depressed by the competition of the power loom, is surviving with part of its wealth of artistic sense and skill.

Rangolis.—Worth mentioning are the artistic designs made by the women of India with coloured powders on the floor or on the doorstep of their houses as festival decoration. Preserving the age-old designs of religious symbolism, they are known in all parts of the country in a great variety of patterns (*rangoli* in Gujerat, *alpona* in Bengal, *kolam* in South India, etc.).

There can be no doubt that the skill and artistic sense of the Indian craftsman is still alive, perhaps slumbering. As Mr. Fred H. Andrews said, "deterioration is not the fault of the craftsman but of his employer." Well directed official and private patronage can do much to save the cultural heritage of the arts and crafts in India which may, otherwise fall victim to progressing industrialisation.

Archaeology.

Although India is one of the most ancient lands in the world and the cradle of an ancient civilization, it has long remained in the background owing to the absence of written histories going back to the earliest period as in the case of other ancient lands such as Egypt and Mesopotamia. Just over a hundred years ago the foundation of Indian Archaeology was laid by Prinsep, who first deciphered the ancient Brahmi script and thus opened the way to the knowledge of the edicts of the Emperor Asoka and other ancient documents, which till then were a sealed book to the natives of the soil. Since then a large number of scholars both Indian and European have helped in building up the edifice of Indian Archaeology which though fairly comprehensive is still incomplete in several respects.

The story of Indian Archaeology commences with the beginnings of human existence in the vast sub-continent. The rough and chipped stone implements discovered in various parts of the country, particularly in the eastern districts of the Madras Presidency, and the valleys of the Sabarmati, Narmada and the Godavari have yielded hundreds of implements which show the first attempts made by man to work his tools with which to master his surroundings. Two of these palaeolithic implements were found in association with the bones of extinct animals, one from Bhutra in Narsingpur district, C.P. on the banks of the Narmada and the other from Mungi on the upper Godavari. The age of the palaeoliths determined mostly by geological considerations may be anywhere from 50,000 to 200,000 years, and the great interval of time between the microlithic and the palaeolithic periods is shown by nearly a hundred feet of alluvial and wind-blown loss deposits in the valley of the Sabarmati river.

The whole field of prehistory is gradually receiving much attention, which is expected to systematise our knowledge of the earliest inhabitants of India and systematic work has been recently attempted at several sites in Madras, Mayurbhanj, Rajpipla and Baroda State. Neolithic man, who used a large variety of polished stone implements, was more widely distributed

throughout the country, particularly in the Peninsula and the Vindhyan regions and his skeletal remains have for the first time been unearthed in Gujerat. To this period may also be dated some of the earliest megalithic tombs which occur in a great variety of forms in the central and southern parts of the Peninsula although a vast majority belong to the iron age and some even persist to our age. The knowledge of metals supervened at a later stage but its development has been different in northern and southern India. Thus in northern India the copper implements of the Gangetic Valley and the copper and bronze antiquities of the Indus culture exclude any knowledge of iron. In the south, however, though certain recent finds in Raichur Dt do not exclude the knowledge of copper smelting in the Peninsula the neolithic settlements of the Bellary district seem to have been immediately followed by the knowledge of the smelting of iron as evidenced by the large scale furnaces which stand in the shape of cinder mounds notably those at Kudatini. It is clear, however, that while copper and bronze were known in the north in the fourth millennium B.C. the south may have been generally content with the use of stone implements right up to the first millennium B.C. until stone was supplanted by iron. It is remarkable that in some of the localities in the ancient Deccan, comprising the Bombay Karnatic, the Ceded Districts of Madras, south Hyderabad and North Mysore, stone implements and painted pottery are followed by antiquities of the regular historic period. This gives the hope that a regular sequence can be established and links forged between the history and prehistory of the Deccan.

The most interesting and well developed phase of the prehistoric civilization of India is, however, that represented by the recent excavations at Harappa in the Punjab and Mohenjo-daro in Sind. These have completely revolutionized ideas on this subject and proved that as far back as the 3rd millennium B.C India was in possession of a highly developed civilization with well planned and populous cities, well built houses, temples and public buildings of brick carefully constructed wells and a system of drains and many other amenities not always enjoyed at that period by the peoples of Mesopotamia and Egypt. Both at Mohenjo-daro and Harappa there are the remains of some 5 or 6 cities super-imposed one upon the ruins of another.

The structures that have so far been exposed at Mohenjo-daro belong to the three latest cities on the site which do not appear to be far removed from each other in date, style of architecture or other cultural elements. Most of the structures are dwelling houses, but there are others which appear to have been temples and one of particularly massive proportions is a large bath, surrounded by fenestrated galleries and halls. Another massive and extensive building found at Harappa appears to have been a public granary. All were built of well burnt brick and most of them were of two or more storeys with staircases giving access to the upper rooms. In and around the ruins have been found many minor antiquities ,including gold and silver jewellery, some remarkable statuary in stone and copper, engraved seals of stone, ivory and paste, some of them exquisite specimens of glyptic art copper implements and vessels, terracotta figurines and toys, shell ornaments, pottery, both painted and plain, and polished stone weights, practically accurate in a regular scale as well as a well developed artistic sense and numerous like habits.

These discoveries establish the existence in Sind and the Punjab during the 3rd millennium B.C of a highly developed city life; and the presence, in many of the houses, of wells and bathrooms as well as an elaborate drainage system betoken a social condition of the citizens at least equal to that found in Sumer and superior to that prevailing in contemporary Babylonia and Egypt. The inhabitants of these cities lived largely no doubt by agriculture and it is a point of interest that the specimens of wheat found at Mohenjo daro and Harappa resemble the common variety grown in the Punjab today. Besides bread, their food appears to have included beef, mutton, and pork, the flesh of tortoises, turtles and ghatial, fresh fish from the Indus and dried fish from the sea coast. Among their domesticated animals were the humped Indian bull, the buffalo, a short horned bull, the sheep, pig, dog and elephant. Besides gold and silver they used copper, tin, bronze and lead; they were familiar with the arts of spinning and weaving and with cultivation of cotton and had attained a high degree of proficiency in the jeweller's and potter's arts.

That they possessed a well developed system of writing is evidenced by the discovery of over a thousand tablets engraved with well executed animal devices and pictographic legends in an unknown script. The method of the disposal of the dead during the Indus Valley period, as revealed by the excavations at Harappa during 1946, was that of inhumation. The body usually oriented from north to south and laid supine, was buried in a grave together with funerary pottery, sometimes a few ornaments and toilet objects were also placed. A unique example was that of a "coffin burial" with post-shroud, the only one of its kind so far known in the Indus Valley but of a type common in contemporary Mesopotamia.

Previous excavations revealed "pot-burials" which contained the skull and some other human bones. These are seemingly post-exposure burials, and are later in point of time than the proper Harappa burials.

The 1946 excavations also discovered fortifications in the western part of the city of Harappa around an area of 450 yards by 250 yards. The main wall, built of mud-bricks, is 40 feet wide and now stands to a height of over 30 feet. It is battered both internally and externally and has a baked-brick facing on the outside. The wall is reinforced at intervals on the outside by rectangular bastions. The discovery of defence points to a "citadel-rule" under whose shadow was carried on the highly centralised life of the Indus people.

The late Sir Aurel Stein's survey of the whole of Baluchistan and his last journey in Bahawalpur and Las Bela States have added to our know-

ledge a number of ancient sites of the prehistoric epoch. Among the 20 or more sites in Sind, discovered mostly by the efforts of the late Mr. Majumdar, at least three are now recognised representing distinct phases, some earlier and some later than the main culture of Harappa and Mohen jo-daro.

The Indus Valley culture has now been traced in the North east as far as Rupar in the Ambala District, relatively close to the watershed of the Sutlej and Jumna and it is therefore highly improbable that this civilization was confined to the Indus Valley. There can hardly be any reasonable doubt that future researches will trace it or its successors into the valley of the Ganges where already painted pottery has been traced in the earliest levels. On the south-east, this prehistoric culture has been traced in Lothal in Kathiawar. Of the long period of more than 2,000 years that separates the pre-historic monuments referred to above from the historic period of India, little is yet known except some painted pottery but there is every hope that this gap in our knowledge may be filled in by further finds in the western U.P. and Punjab. From the time of the Mauryas, i.e. the 4th cent. B.C. the history of art in India and the forms of the arts of India are clear and can be traced with relative precision. Time, circumstances and difficulties have caused by the world war of 1939-45 to slow the programme of excavation to be extended as might be wished but efforts are being made by earnest workers to extend the bounds of knowledge.

Mauryan Monuments.—The earliest monuments of the historical period that have come down to us relate to the Mauryan period from which time onwards the main currents of Indian Archæology are pretty clear, thanks to the systematic research of the last half a century and in particular the bold work of the last four decades. The Mauryan monuments include certain caves in the Barabar hills near Gaya the remains of a palace at Patna, ancient Pataliputra, remains of the wooden palisade near Patna, a number of stupas of different places, built of large sized bricks traditionally attributed to Asoka, and a wealth of minor antiquities such as sculptures, terracottas, beads, etc., recovered in the excavations at Patna, Taxila (Bhir mound), Benares and Sarnath and in course of the sewage operations at Patna.

The rock and pillar edicts of Asoka (*circa* 250 B.C.), deserve special mention. His major rock edicts are engraved in seven places, ranging from Shahbazgarhi in the Peshawar District to Jonnagiri in the Karnul District in the south. Amongst the thirteen pillars of Asoka (besides the Elephant capital of a 14th at Sankisa and a fragment of a 15th at Benares) ten bear his inscriptions. Of these the Lauriya-Nandangarh column in the Champaran District, Tirhut, is practically uninjured. Special mention must be made here of the *stupa* at Piprahwa opened by Peppe in 1898, which yielded a large stone box containing an inscribed steatite or soap-stone reliquary with a number of relics and beautiful precious stones now preserved at the Indian Museum, Calcutta. The inscription written in characters of the 4th-3rd century B.C., speaks of the relics being of the Buddha himself and enshrined by his kinsmen, the Sakyas.

Sunga Art.—The Mauryas were followed in the second century B.C. by the Sungas in the east, while in north-west India Graeco-Bactrian rulers were gradually extending their sway. The Buddhist stupa at Bharhut (Nagaud State, Central India) is the most typical and remarkable monument of this period illustrating the simple but expressive character of the art. Besides dedicatory inscriptions the labels inscribed on the Bharhut panels are of unique importance. Antiquities of this period particularly terracotta figurines with exquisite ornamentation have been found in the excavations of city sites all over North India, notably Kosam and Bhita near Allahabad, Ahichchhatra near Bareilly, Benares and Patna.

Sanchi Monuments.—The best preserved in the series of early Buddhist monuments in India are the magnificent Buddhist remains at Sanchi in Bhopal State. Here the main stupa of which the core probably belongs to the time of Asoka, was later faced with stone and surrounded by a stone railing with four great gateways, one at each cardinal point, sometime about the first century B.C. Besides the stupas, a number of other buildings temples, apsidal halls and monasteries of different periods form a splendid galaxy, illustrating the principal phases of the religion of the Buddha, from its early days to its decline.

Taxila.—The extensive remains of the ancient city of Taxila, near Rawalpindi, are among the most important in the country, constituting three different cities that flourished in succession in successive epochs and a number of monastic establishments centred around stupas, scattered in the surrounding hills on the tops of hills in the vicinity. For over a quarter of a century, Sir John Marshall's labours here have served to elucidate the splendid history of this city of the ages, the meeting-place of the three great civilizations of India, Greece and Persia. The most prosperous city was the Indo-Scythian city, now known as Sirkap, dating from a century on either side of the Christian era with regularly planned streets, houses and palaces, the many fine stone which including exquisite jewellery, beads, coins all kinds of household objects and pottery, etc., form the bulk of the exhibits of the fine Museum on the spot.

Mathura.—Mathura, one of the most important religious and art centres in northern India, from ancient times was galvanised into activity from the second century A.D. onwards. Here the abundance of red sandstone in the neighbourhood was availed of by the followers of all the religions and some of the earliest Brahmanical and Jain images were manufactured here in a peculiarly attractive and playful though sensuous art. From Mathura the Buddha image and some of the Hellenistic motifs travelled further to the east and south and even to the distant Buddhist school of the lower Krishna valley as at Amravati, Nagarjunikonda and other places. By the fourth century A.D. the Hellenistic element in Indian art was, however, completely absorbed when under the stimulus of the Gupta Empire Indian art reached its golden age.

The Gupta Age.—The rise of the Gupta dynasty in northern India early in the fourth century was a signal for the high water mark of Indian achievement in literature, art and

sculpture. A thoughtful synthesis of the best impulses of Indian art and the foreign influences were brought about in this period of which the keynote was a broad intellectualism and a balance between spiritual thought and material expression. The best sculpture of this period has been found in Sarnath, Muttra, Deogarh and Garhwa in the United Provinces, while examples of terracotta and minor arts have been found in all north Indian excavations. Sarnath, where Buddhism first saw the light of the day, was the most prosperous centre of Buddhism at this time and, significantly enough, is the centre of a Buddhist revival in India, the Mulagandhakuti vihara founded here by the Mahabodhi Society, having received from the Government of India three Buddhist relics recovered from excavations at Nagarjunikonda in Madras, Mirpurkhas in Sind and Taxila in the Punjab. In the field of religion the Brahmanical faith was steadily in the ascendency while Buddhism still held its own, the intellectualism of the age finding expression in a broad spirit of tolerance. Simplicity of conception and restrained ornament is the keynote of the architecture of this period, examples of which are found at Sanchi, Bhumara, and Deogarh in stone and Bhitargaon, Ahichchhatra and other places in brick. A well known monument of the Gupta period is the iron pillar standing in the middle of the open court of the mosque near the Qutb Minar near Delhi, which has an inscription referring to king Chandra (identified with Chandragupta II) circa A.D. 379-413. It is wonderful to find that a bar of wrought iron of such dimension should have been made in India at this early period and still more surprising that not a speck of rust appears anywhere on it inspite of the weather action of 15 centuries. Other interesting examples of wrought iron are the beams from Konarak, 12th century, and the iron pillar at Dhar, C.I., dating back to the time of the Paramara king Bhoja early 11th century.

The art and architecture of the medieval period have been dealt with in the preceding chapters.

Inscriptions.—We now come to inscriptions, of which vast numbers have been brought to light in India and are particularly numerous in South India. They have been engraved on varieties of materials, but principally on stone and copper. The former are mostly associated with temples of which they record the construction or donations, while the copper plate records are usually grants of land made by kings on special occasions. In either case, the mention of the exploits of the donor and his ancestors and the dates (where specified) give the student of history, valuable contemporary material, which has made it possible to reconstruct India's history, from century to century and dynasty by dynasty. The earliest of these are found incised in two distinct kinds of alphabet, known as Brahmi and Kharoshthi, the latter being confined to the north-west of India. Brahmi was read from left to right, and from it have been evolved all the modern vernacular scripts of India. The Kharoshthi script was written from right to left, and was a modified form of the ancient Aramaic alphabet introduced into the Punjab during the period of the Persian domination in the 5th century B.C. It was prevalent up to the 4th century A.D., and was supplanted by the Brahmi. The earliest dateable inscriptions are the celebrated edicts of Asoka to which a reference has been made above. One group of these has been engraved on rocks, and another on pillars. They have been found from Shahbazgarhi 40 miles north-east of Peshawar to Nigliva in the Nepal Tarai, from Girnar in Kathiawar to Dhauli in Orissa, from Kalsi in the Lower Himalayas to Jonnagiri in Madras showing by the way the vast extent of territory held by him. The reference in his Rock Edicts to the five contemporary Greek Princes, Antiochus II of Syria, Ptolemy Philadelphus, and so forth is exceedingly interesting, and fixes B.C. 260 as the date of his coronation. His Rummindei pillar inscription, again, discovered in Nepal Tarai, now settles beyond all doubt, the birth-place of Buddha which was for long disputed. Another noteworthy record is the inscription of the Besnagar pillar at Besnagar, near Bhilsa, C.I., which records the erection of this column, which was a Garuda Pillar, in honour of the god Vasudeva by one Heliodoros, son of Dion, an envoy of King Antialkidas of Taxila. Heliodoros is herein called a *Bhagavata* which shows that though a Greek he had become a Hindu and a Vaishnava. Another inscription worth noticing in this connection is that of Cave No. 10 at Nasik, in which Ushavadata, who calls himself a Saka or an Indo-scythian, granted three hundred thousand kine and sixteen villages to gods and Brahmans and annually fed one hundred thousand Brahmans. Here is another instance of a foreigner having embraced Hinduism. Thus for the political, social, economical and religious history of India at the different periods the inscriptions are invaluable records, and are the only light but for which we are 'forlorn and blind.'

Numismatics.—The part played by Numismatics in reconstructing India's ancient history may also here be mentioned in brief. The earliest coins are those of the silver punch-marked series, going back at least to the 4th century B.C., and found all over the country in large hoards, which are still being systematically studied. Next come at the cast coins issued by almost all the tribes and rulers of North India. For the Indo Greek, Indo-Scythian and Indo Parthian periods, coins are our almost exclusive source of information, having revealed the names of scores of rulers, otherwise unknown. The entire genealogy, succession and regnal years of the kings of Kathiawar and surrounding territories, known as the Western Kshatrapas (2nd to 4th centuries A.D.) has been built up on their numerous coins. The history of various tribes, families and rulers in different regions of northern India is made up of information pieced together from their numismatic issues and the chronology of most of the historical excavations has been fixed by the finds of coins in the different strata.

Archaeological Department.—As the archaeological monuments of India must attract the attention of all intelligent visitors, they would naturally feel desirous to know something of the Archaeological Department. The work of this Department is primarily twofold, conservation, and research and exploration. None but spasmodic efforts appear to have been made by Government in these directions till 1870 when they established the Archaeological Survey of India and entrusted it to General (afterwards Sir) Alexander Cunningham, who was also the first

Director-General of Archaeology. The first systematic step towards recognising official responsibility in conservation matters was taken by Lord Curzon's Government who established most of the Archaeological Circles that now obtain placed them on a permanent footing and united them together under the control of a Director-General, provision being also made for subsidising local Governments out of imperial funds, when necessary. The Ancient Monuments Preservation Act was passed for the protection of historic monuments and relics especially in private possession and also for State control over the excavation of ancient sites and traffic in antiquities. Under the direction of Sir John Marshall, Kt., C.I.E., late Director-General of Archaeology, a comprehensive and systematic campaign of repair and excavation was prosecuted and at present the Central Government bears all expenditure in connection with the preservation and maintenance of monuments, as well as with excavation and research. Under later Directors-General it was continued with equal vigour and the result of it is manifest in the present altered conditions of many old and historic buildings and in the scientific excavation of buried sites such as Taxila, Pataliputra, Sanchi in the Bhopal State, Sarnath near Benares, Nalanda in Bihar, Paharpur in Bengal and Nagarjunikonda in Madras and in the Indus Valley at Harappa in the Punjab and Mohenjo daro in Sind. The last systematic excavations were those at Ramnagar (ancient Ahichchhatra) in Bareilly District, U.P., where an extensive walled town inhabited from before the fourth century B.C. to the ninth century A.D. has been unearthed stratum by stratum with far reaching results for the study of archaeology throughout the periods of India's age long history. The present Director-General, Dr. R. E. Mortimer Wheeler, opened an excavation training centre at Taxila in 1944, where a large number of students were trained in the latest methods of archeological excavation. He has also carried out excavations at the ancient port of Arikamadu near Pondicherry, which have yielded vestiges of Roman intercourse and have thus helped in the dating of an associated Indian culture of the 1st and 2nd centuries A. D.

The Archaeological Survey has devoted considerable attention to the organization and development of museums as centres of research and education. It maintains the archaeological section of the Indian Museum at Calcutta, small museums at the Forts at Delhi and Lahore, and at the Taj, the Central Asian Antiquities Museum at New Delhi. Local museums have also been established at the excavated sites of Taxila, Sarnath, Nalanda, Mohen-jo-daro and Harappa with the object of keeping the principal movable antiquities recovered at these sites in close association with the structural remains to which they belong, so that they may be studied amid their natural surroundings and not lose focus and meaning by being transported to some distant place. Duplicates of antiquities from Mohen-jo-daro and Harappa have, however, been widely distributed among other Museums.

The epigraphical material dealt with by the Archaeological Survey has enabled the history and chronology of the various dynasties of India to be established on a firmer basis and in greater detail. The "Epigraphia Indica" is now in the 26th volume, a revised edition of the Asoka inscriptions has been recently published, while the companion volume of post Asokan Brahmi inscriptions is under preparation along with two others devoted to the records of the Gupta and Kalachuri epochs. The volume of work done in South India, which is particularly rich in lithic records, will be apparent from the fact that over 20,000 inscriptions have been copied and noticed in the Annual Reports on South Indian epigraphy and a large number published *in extenso*. For the time the entire programme of publication of the Department has been suspended owing to the paper position in the country.

The example of British India has stimulated several among the progressive Indian States to create their own Archaeological Departments. Prominent among these must be mentioned Hyderabad, Mysore, Gwalior, Baroda and Jaipur. In Hyderabad the systematic and scientific treatment of the frescoes at Ajanta is an outstanding achievement of the Archaeological Department, created in 1914 under the distinguished guidance of Mr. Ghulam Yazdani. Besides this, attention has been devoted to the rock cut temples at Ellora and many other structural temples. Among the Islamic monuments the great mosque of Gulbarga and the Bahamani mosque at Bidar have been fully conserved. Of late, systematic excavation of ancient sites as at Maski and Paithan has been a regular feature of the Department's work the latest excavations at the Andhra city site of Kondapur and at Kallur in Raichur being brought with results of immense importance. The Mysore Archaeological Department has nearly completed half a century of its existence. The first Director, Mr. B. L. Rice, published some 10,000 inscriptions in 12 volumes of the Epigraphia Karnatica. This progress has been well maintained, and the conservation work has rescued many famous temples, such as the Kesava temple at Somanathpur, and the temples at Belur and Halebid. Excavations conducted at Chandravalli and Brahmagiri have been very fruitful. In Gwalior the Department established in 1913 has done excellent work in exploration of ancient sites, such as Pawaya, Ujjain, Besnagar and Mandasor. The conservation of the Bagh caves and other ancient monuments and the maintenance of a good museum are among the other achievements of the Department. In Jaipur excavations initiated by the late Rai Bahadur Daya Ram Sahni have revealed the existence of a unique Buddhist establishment at Bairat and a city site near the Sambhar lake. The excavations at Rairh, an ancient commercial and industrial mart, have brought to light large hoards of punch-marked and other coins of early date and the work now started at the great site of Karkotanagar bids fair to assume great importance. The recently started Archaeological Department of the Baroda State has done a valuable work in the listing of monuments and the exploration of several sites including Amreli in Kathiawad and Pattan in Gujarat. Indore, Mayurbhanj, Travancore, Jodhpur, Kashmir, Pudukkottai, Patna, Rewah, Cochin and Rajpipla are among the States that maintain Archaeological Departments of their own.

The recently amended Ancient Monuments Preservation Act has established a system of licenses for scientific excavations to non-official

bodies. The first Society to take part in this work was the American School of India and Iranian Studies which, co-operating with the Boston Museum of Fine Arts, organized an expedition for work in Chanhudaro in Sind in 1936. Here, several phases of the prehistoric culture of the Indus Valley represented by Harappa were unearthed. Unfortunately the work was discontinued after the first season. The University of Calcutta have conducted excavations at Bangarh in North Bengal for a number of years, with success and the Punjab Exploration Fund have done work at the site of Bhera in the District of Punjab.

Indian Time.

For many years Indian time was in a state of chaotic confusion. What was called Madras or Railway time was kept on all the railways: and each great centre of population kept its own local time, which was not based on any common scientific principle and was divorced from the standards of all other countries. It was with a view to remedying this confusion that the Government of India took the matter up in 1904, and addressed the Provincial Governments and through them all local bodies, a long letter which reviewed the situation and made suggestions for the future. The essential points in this letter were:—

"In India we have already a standard time which is very generally, though by no means universally, recognised. It is the Madras local time, which is kept on all railway and telegraph lines throughout India and which is 5h. 21m. 10s. in advance of Greenwich. Similarly Rangoon local time is used upon the railway- and telegraphs of Burma, and is 6h. 24m. 47s. ahead of Greenwich. But neither of these standards bears a simple and easily remembered relation to Greenwich time.

"The Government of India have several times been addressed by Scientific Societies, both in India and in England, and urged to fall into line with the rest of the civilised world. And now the Royal Society has once more returned to the attack. The Committee of that Society which advises the Government of India upon matters connected with its observatories, writes:—'The Committee think that a change from Madras time to that corresponding to a longitude exactly 5½ hours east of Greenwich would be an improvement upon the existing arrangements: but that for international scientific purposes the hourly zone system, making the time 5 hours in advance of Greenwich in the west, and 6 hours in advance in the east of India would be preferable.'

"Now if India were connected with Europe by a continuous series of civilised nations with their continuous railway systems all of which had adopted the European hour-zone system, it would be imperative upon India to conform and to adopt the second suggestion. But as she is not, and as she is as much isolated by uncivilised States as Cape Colony is by the ocean, it is open to her to follow the example of that and some other similarly situated colonies and to adopt the first suggestion.

"It is believed that this will be the better solution. There are obvious objections to drawing an arbitrary line right across the richest and most populous portions of India, and so as to bisect all the main lines of communication, and keeping times differing by an hour on opposite sides of that line. India has become accustomed to a uniform standard in the Madras time of the railways; and the substitution for it of a double standard would appear to be a retrograde step; while it would, in all probability, be strongly opposed by the railway authorities. Moreover, it is very desirable that whatever system is adopted should be followed by all Europeans and Indians alike; and it is certain that the double standard would puzzle the latter greatly; while by emphasising the fact that railway differed from local time, it might postpone or even altogether prevent the acceptance of the former instead of the latter by people generally over a large part of India. The one great advantage which the second possesses over the first alternative is, that under the former, the difference between local and standard time can never exceed half an hour: whereas under the latter it will even exceed an hour in the extreme cases of Karachi and Quetta. But this inconvenience is believed to be smaller than that of keeping two different times on the Indian system of railways and telegraphs.

"It is proposed, therefore, to put on all the railway and telegraph clocks in India by 8m. 50s. They would then represent a time 5½ hours faster than that of Greenwich, which would be known as **Indian Standard Time**: and the difference between standard and local time at the places mentioned below would be approximately as follows, the figures representing minutes, and F. and S. meaning that the standard time is in advance of or behind local time respectively.—Dibrugarh 51 S., Shillong 38 S., Calcutta 24 S., Allahabad 2 F., Madras 9 F., Lahore 33 F., Bombay 39 F., Peshawar 44 F., Karachi 62 F., Quetta 62 F.

"This standard time would be as much as 54 and 55 minutes behind local time at Mandalay and Rangoon, respectively; and since the railway system of Burma is not connected with that of India, and already keeps a time of its own, namely, Rangoon local time, it is not suggested that Indian Standard Time should be adopted in Burma. It is proposed, however, that instead of using Rangoon Standard Time as at present, which is 6h. 24m. 47s. in advance of Greenwich, a Burma Standard Time should be adopted on all the Burmese railways and telegraphs, which would be one hour in advance of Indian Standard Time, or 6½ hours ahead of Greenwich time, and would correspond with 97° 30' E. longitude. The change would bring Burma time into simple relation both with European and with Indian time, and would (among other things) simplify telegraphic communication with other countries.

"Standard time will thus have been fixed for railways and telegraphs for the whole of the Indian Empire. Its general adoption for all purposes, while eminently advisable, is a matter which must be left to the local community in each case."

The Government scheme left local bodies to decide whether or not they would adopt it.

Calcutta decided to retain its own local time. In Bombay the first reception of the proposal was hostile; but on reconsideration the Chamber of Commerce decided in favour of it and so did the Municipality. Subsequently the opposing element in the Municipality brought in a side resolution, by which the Municipal clocks were put at Bombay time which was thirty-nine minutes behind Standard Time. On the 1st January 1906 all the railway and telegraph clocks in India were put at Indian Standard Time. Bombay localtime is retained only in the clocks which are maintained by the Municipality and in the establishments of some orthodox Hindus. Elsewhere Standard Time is universal.

The Bengal Government decided from October 1, 1941, to move forward their clocks by 30 minutes; Bengal time therefore became an hour ahead of Indian Standard Time and 36 minutes ahead of Calcutta local time. This was followed by the Indian Standard Time also being advanced by one hour with effect from September 1, 1942, making it 6½ hours ahead of Greenwich Mean Time.

The measure was introduced to ensure the continuance of sufficient daylight in the eastern provinces of India, where it was essential to avoid any electricity overload due to overlap of factory demands with those of domestic, office and street lighting and where extra daylight is needed to mitigate the effect of obscuration of lights necessary as a war measure. With the cessation of hostilities the old Indian standard time was restored with effect from 2 a.m. on October 15, 1945.

Coinage, Weights and Measures.

As the currency of India is based upon the rupee, statements with regard to money are generally expressed in rupees. Down to about 1873 the gold value of the rupee (containing 165 grains of pure silver) was approximately equal to 2s., or one-tenth of a £, and for that period it is easy to convert rupees into sterling by striking off the final cipher (Rs. 1,000 = £100). But after 1873, owing to the depreciation of silver as compared with gold throughout the world there came a serious and progressive fall in the exchange, until at one time the gold value of the rupee dropped as low as 1s. In order to provide a remedy for the heavy loss caused to the Government of India in respect of its gold payments to be made in England, and also to relieve foreign trade and finance from the inconvenience due to constant and unforeseen fluctuations in exchange, it was resolved in 1893 to close the mints to the free coinage of silver, and thus force up the value of the rupee by restricting the circulation. The intention was to raise the exchange value of the rupee to 1s. 4d., and then introduce a gold standard at the rate of Rs. 15 = £1. From 1899 onwards the value of the rupee was maintained, with insignificant fluctuations, at the proposed rate of 1s. 4d. until February 1920 when the recommendation of the Committee appointed in the previous year that the rupee should be linked with gold and not with sterling at 2s. instead of 1s. 4d. was adopted. This was followed by great fluctuations. (See article on Currency System.)

Decimal Coinage.—In June 1915 the Government of India issued a communique suggesting a decimal coinage for India in which the rupee would be divided into 100 cents instead of 192 pies, and invited public opinion on the proposal. Government's reasons were that the decimal currency had displaced other forms in most countries, the chief exceptions being India, Great Britain, and certain empire countries. Public reaction to the proposal being favourable, the Government of India introduced a bill in the Central Assembly on February 18, 1946. At the time of going to press this has not been passed and become law.

The new coinage, if and when introduced, will have the rupee coin as the standard coin. Smaller coins will be of 50 cents and 25 cents, equivalent to the present half-rupee and quarter-rupee, 10 cents, 5 cents, 1 cent and ½ cent. The ten, five and one cent coins will be made of cupro-nickel, the alloy of which the present two and one anna coins are made. Decimal coins of higher denominations will consist of the same alloy of which the rupee, half-rupee and quarter-rupee are now made.

Weight.—The maund is the denomination of weight common all over India, but we shall find that in a given city there are nearly as many maunds as there are articles to weigh. If we consider the maund as between district and district the state of affairs is worse. Thus in the United Provinces alone, the maund of sugar weighs 48½ seers in Cawnpore, 40 in Muttra, 72½ in Gorakhpur, 40 in Agra, 50 in Moradabad, 43¾ in Saharanpur, 50 in Bareilly, 46 in Fyzabad, 48½ in Shahjehanpur, 51 in Goshangunge. The maund varies throughout all India from the Bengal or railway maund of 82-2/7 lbs. to the Factory maund of 74 lbs. 10 oz. 11 drs., the Bombay maund of 28 lbs., which apparently answers to the Forest Department maund in use at the Fuel Depot, and the Madras maund, which some authorities estimate at 25 lbs. and others at 24 lbs. and so on.

Committees of Inquiry.—These are merely typical instances which are multiplied indefinitely. There are variations of every detail of weights and measures in every part of India. The losses to trade arising from the confusion and the trouble which this state of things causes are heavy. Municipal and commercial bodies are continually returning to the problem with a view to devising a practical scheme of reform. The Supreme and Provincial Governments have made various attempts during 40 years past to solve the problem of universal units of weights and measures and commerce and trade have agitated about the question for the past century. The Indian railways and Government departments adopted a standard tola (180 grains), seer (80 tolas) and maund (40 seers) and it was hoped that this would act as a successful "lead" which would gradually be followed by trade throughout the empire, but the expectation has not

been realised.

The Government of India considered the whole question in consultation with the provincial Governments in 1890-1894 and various special steps have at different times been taken in different parts of India. The Government of Bombay appointed a committee in 1911 to make proposals for reform for the Bombay Presidency. Their final report has not been published, but they presented in 1912 an *ad interim* report which has been issued for public discussion. In brief, it points out the practical impossibility of proceeding by compulsory measures affecting the whole of India. The Committee stated that over the greater part of the Bombay Presidency a standard of weights and measures would be heartily welcome by the people. They thought that legislation compulsorily applied over large areas subject to many diverse conditions of trade and social life would not result in bringing about the desired reform so successfully as a "lead" supplied by local legislation based on practical experience. The want of coherence, *savoir faire*, or the means of co-operation among the people at large pointed to this conclusion. The Committee pointed out that at a good example of the results that in hundreds of thousands and millions, but in lakhs and crores. A **lakh** is one hundred thousand (written out as 1,00,000), and a **crore** is one hundred lakhs or ten millions (written out as 1,00,00,000). Consequently, according to the exchange value of the rupee, a lakh of rupees (Rs. 1,00,000) may be read as the equivalent of £10,000 before 1873, and as the equivalent of (about) £6,667 after 1899, while a crore of rupees (Rs. 1,00,00,000) may similarly be read as the equivalent of £1,000,000 before 1873, and as the equivalent of (about) £666,667 after 1899. With the rupee at 1s. 6d. a lakh is equivalent to £7,500 and a crore is equivalent to £750,000.

Coinage.—Finally, it should be mentioned that the rupee is divided into 16 annas, a fraction commonly used for many purposes by both Indians and Europeans. The anna was formerly reckoned as 1½d., it may now be considered as exactly corresponding to 1d. The anna is again sub-divided into 12 pies.

Weights.—The various systems of weights used in India combine uniformity of scales with immense variations in the weights of units. The scales used generally throughout Northern India and less commonly in Madras and standardized in Bombay Presidency under the Bombay Weights and Measures Act, 1932, may be thus expressed as one maund = 40 seers, one seer = 80 tolas. The actual weight of seer varies greatly from district to district and even from village to village in India except in Bombay Presidency. In the standard system the tola is of 180 grains, and seer thus weighs 2.057 lbs. and the maund 82.28 lbs. This standard is also used in official reports.

Retail.—For calculating retail prices, the universal custom in India is to express them in terms of seers to the rupee. Thus, when prices change what varies is not the amount of money to be paid for the same quantity, but the quantity to be obtained for the same amount of money. In other words, prices in India are quantity prices, not money prices. When the figure of quantity goes up, this of course means that the price has gone down, which is at first sight perplexing to an English reader. It may, however, be mentioned that quantity prices are not altogether unknown in England, especially at small shops, where pennyworths of many groceries can be bought. Eggs, likewise, are commonly sold at a varying number for the shilling. If it be desired to convert quantity prices from Indian into English denominations without having recourse to money prices (which would often be misleading), the following scale may be adopted—based upon the assumption that a seer is exactly 2 lb., and that the value of the rupee remains constant at 1s. 4d., 1 seer per rupee=(about) 3 lb. for 2s., 2 seers per rupee=(about) 6 lb. for 2s., and so on.

The name of the unit for square measurement in India generally is the *bigha*, which varies greatly in different parts of the country. But areas have been expressed in this work either in square miles or in acres.

Proposed Reforms.—Indian weights and measures have never been settled upon an organised basis suitable for commerce and trade characteristic of the modern age. They vary from town to town and village to village will follow a good lead is apparent in the East Khandesh District of the Presidency, where the District Officer, Mr. Simcox, gradually during the course of three years, induced the people to adopt throughout the district uniform weights and measures, the unit of weight in this case being a tola of 180 grains. But the committee abstained from recommending that the same weights and measures should be adopted over the whole Presidency, preferring that a new system started in any area should be as nearly as possible similar to the best system already prevailing there.

Committee of 1913.—The whole problem was again brought under special consideration by the Government of India in October, 1913, when the following committee was appointed to inquire into the entire subject anew:—

C. A. Silberrad (*President*).
A. Y. G. Campbell.
Rustomji Pardoonji.

This Committee reported, in August 1915, in favour of a uniform system of weights to be adopted in India based on the 180 grain tola viz.:—

8 khaskhas	= 1 chawal
8 chawals	= 1 ratti
8 rattis	= 1 masha
12 mashes or 4 tanks	= 1 tola
5 tolas	= 1 chatak
16 chataks	= 1 seer
40 seers	= 1 maund

The tola is the tola of 180 grains, equal to the rupee weight. The viss has recently been fixed at 3·60 lbs. or 140 tolas.

Government Action.—The Government of India at first approved the principles of the Report and left the Provincial Governments to take action, but they passed more detailed orders in January, 1922. In these they again, for the present and subject to the restrictions imposed by the Government of India Act and the devolution rules, left it entirely to local Governments to take such action as they think advisable to standardise dry and liquid measures of capacity within their provinces. Similarly,

they announced their decision not to adopt all-India standards of length or area.

As regards weights they decided in favour of the standard mentioned under the heading "Weights", earlier in this article, this having been recommended by a majority of the Weights and Measures Committee and having received the unanimous support of the Local Governments. At the same time they provisionally undertook to assist provincial legislation or standardisation and stated that if subsequently, opinion developed strongly in favour of the Imperial standardisation of weights, the Government of India would be prepared to undertake such legislation, but for the time being they considered that any such step would be premature.

By 1939 opinion in favour of legislation by the Government of India for the standardisation of weights crystallised to the extent that the Indian Legislature passed the Standards of Weight Act (Act No. IX of 1939) applicable to the whole of British India. The Act received the assent of the Governor-General of India on the 28th March, 1939, and was published in Part IV of the Gazette of India of the 1st April, 1939. The Act laid down the following standard weights :—

(*a*) the standard tola, being a weight of 180 standard grains ;

(*b*) the standard seer, being a weight of 80 standard tolas or 14,400 standard grains ;

(*c*) the standard maund, being a weight of 40 standard seers ;

(*d*) the standard pound, being a weight of 7,000 standard grains ;

(*e*) the standard ounce, being one-sixteenth part of the weight of a standard pound ;

(*f*) the standard hundred-weight, being a weight of 112 standard pounds ;

(*g*) the standard ton, being a weight of 2,240 standard pounds.

Under sub-section (2) of section 4 of the Act, the Central Government undertook to supply to each Provincial Government a complete set of duly authenticated standard weights. Accordingly in October, 1941, Government of India supplied to the Provincial Government of Bihar a complete set of Reference Standard Weights, which was placed under the charge of the Senior Marketing Officer, Bihar.

The enforcement of standard weights throughout the Province of Bihar, as laid down in Act IX of 1939 of the Central Government, was awaiting a supplementary provincial legislation which may be possible under normal conditions. But Government of Bihar in their notification No. 185 D.R. dated the 7th May, 1942, in exercise of the power conferred by sub-section (1) of section 92 of the Government of India Act, 1935, have directed that the Standards of Weight Act, 1939 (IX of 1939), shall apply to the Chota Nagpur Division and to the Santal Parganas District, as a special measure. In Bihar it was felt that it may be convenient to start with the enforcement of standard weights alone in the first instance, and the measures of capacity may be left alone for some time to allow the buyers and sellers to adjust the measures on the basis of the standard weights."

The following are the Standard Weights and Measures according to the Bombay Weights and Measures Act of 1932 :—

Weights—

The Bombay Tola of 180 grains.
The Bombay Seer of 80 tolas.
The Bombay Maund of 40 seers.

The sub-multiples ¼, ½, ¾ 1/16 and 1 32 and the multiples 2, 4 and 8 of the tola, seer and maund.

The pound avoirdupois equal to 7,000 grains and the sub-multiples ¼, ½, ¾, 1, 2, 4 and 8 ounces, the multiples 1, 2, 4, 7, 14, 28 lbs. (a quarter), 56 lbs., 112 lbs. (1 cwt.) and 2,240 lbs. (1 ton).

Dry measures—

The Bombay seer.
The sub-multiples ¼, ½ and ¾ seer.
The Bombay Chatak = 1.16 seer.
The Adpao = ¼ seer.
The Adholi = 2 seers.
The Bombay Payali of 4 seers.
The Bombay Maund of 16 payalis.
The Bombay Map of 2 maunds.

Liquid measure—

The Bombay seer.
The sub-multiples ¼, ½, ¾ and ¼ seer.
The multiples 2, 4 and 8 seers.
The Imperial gallon.
The Pint = ⅛ gallon.

Length—

The Inch = 1 36th yard, and
The Foot = ⅓rd yard.
The Furlong of 220 yards.
The Mile of 1,760 yards.
The yard is that unit of length which is exactly equal to the certified yard kept in the custody of the Mint Master, Bombay.

Area and Volume—

The Square Yard, Square Foot and Square Inch.

The Cubic Yard, Cubic Foot and Cubic Inch and sub-multiples of a Cubic Inch.

The anna of ¼ of the guntha.

The Guntha of 121 square yards and the acre of 4,840 square yards for land measurement.

The Square of 100 square feet.

The Brass of 100 cubic feet.

The Peoples of India.

It is essential to bear in mind, when dealing with the people of India, that it is a continent rather than a country. Nowhere is the complex character of Indians more clearly exemplified than in the physical type of its inhabitants. No one would confuse the main types, such as Gurkhas, Pathans, Sikhs, Rajputs, Burmans, Nagas, Tamils, etc., nor does it take long to carry the differentiation much farther. The typical inhabitants of India—the Dravidians—differ altogether from those of Northern Asia, and more nearly resemble the tribes of Malaya, Sumatra and Madagascar. Whatever may be their origin, it is certain that they have settled in the country for countless ages and that their present physical characteristics have been evolved locally. They have been displaced in the North-West by successive hordes of invaders, including Aryans, Scythians, Pathans and Moghals, and in the North-East by Mongoloid tribes allied to those of Burma, which is India only in a modern political sense. Between these foreign elements and the pure Dravidians is borderland where the contiguous races have intermingled.

The people of the Indian Empire are divided by Sir Henry Risley (Caste, Tribe and Race, Indian Census Report, 1901; the Gazetteer of India, Ethnology and Caste, Volume I, Chapter 6) into seven main physical types. There would be eight if the Andamanese were included, but this tiny group of Negritos may be disregarded.

The Turko-Iranian, represented by the Baloch, Brahui and Afghans of Baluchistan and the North-West Frontier Province. Probably formed by a fusion of Turki and Persian elements, in which the former predominate. Stature above mean; complexion fair; eyes mostly dark but occasionally grey; hair on face plentiful; head broad, nose moderately narrow, prominent, and very long. The feature in these people that strikes one most prominently is the portentous length of their noses, and it is probably this peculiarity that has given rise to the tradition of the Jewish origin of the Afghans.

The Indo-Aryan occupying the Punjab, Rajputana, and Kashmir, and having as its characteristic members the Rajputs, Khattris, and Jats. This type, which is readily distinguishable from the Turko-Iranian, approaches most closely to that ascribed to the traditional Aryan colonists of India. The stature is mostly tall; complexion fair; eyes dark; hair on face plentiful, head long; nose narrow, and prominent but not specially long.

The Scytho-Dravidian, comprising the Maratha Brahmans, the Kunbis, and the Coorgs of Western India. Probably formed by a mixture of Scythian and Dravidian elements. This type is clearly distinguished from the Turko-Iranian by a lower stature, a greater length of head, a higher nasal index, a shorter nose, and a lower orbito-nasal index. All of these characters, except perhaps the last, may be due to a varying degree of intermixture with the Dravidians. In the higher groups the amount of crossing seems to have been slight; in the lower Dravidian elements are more pronounced.

The Aryo-Dravidian or Hindustani, found in the United Provinces, in parts of Rajputana and in Bihar and represented in its upper strata by the Hindustani Brahman and in its lower by the Chamar. Probably the result of the intermixture, in varying proportions, of the Indo-Aryan and Dravidian types. The head-form is long with a tendency to medium; the complexion varies from lightish brown to black; the nose ranges from medium to broad, being always broader than among the Indo-Aryans; the stature is lower than in the latter group and usually below the average according to the scale. The higher representatives of this type approach the Indo-Aryans while the lower members are in many respects not very far removed from the Dravidians. The type is essentially a mixed one, yet its characteristics are readily definable, and no one would take even an upper class Hindustani for a pure Indo-Aryan or a Chamar for a genuine Dravidian. The distinctive feature of the type, the character which gives the real clue to its origin and stamps the Aryo-Dravidian as racially different from the Indo-Aryan is to be found in the proportion of the nose.

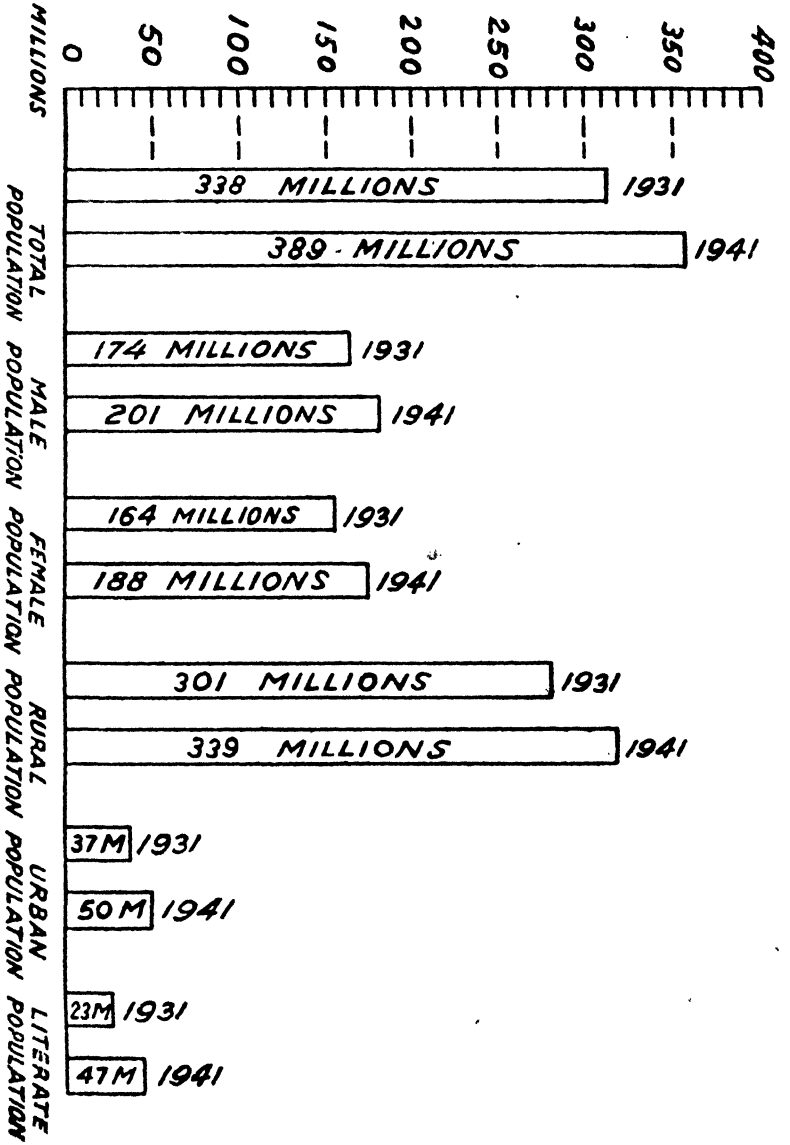
The Mongolo-Dravidian, or Bengali type of Lower Bengal and Orissa, comprising the Bengal Brahmans and Kayasthas, the Mahomedans of Eastern Bengal, and other groups peculiar to this part of India. Probably a blend of Dravidian and Mongoloid elements, with a strain of Indo-Aryan blood in the higher groups. The head is broad; complexion dark; hair on face usually plentiful; stature medium; nose medium, with a tendency to broad. This is one of the most distinctive types in India, and its members may be recognised at a glance throughout the wide area where their remarkable aptitude for clerical pursuits has procured them employment. Within its own habitat the type extends to the Himalayas on the north and to Assam on the east, and probably includes the bulk of the population of Orissa; the western limit coincides approximately with the hilly country of Chota Nagpur and Western Bengal.

The Mongoloid type of the Himalayas, Nepal, Assam, and Burma, represented by the Kanets of Lahul and Kulu; the Lepchas of Darjeeling and Sikkim; the Limbus, Murmis and Gurungs of Nepal; the Bodo of Assam; and the Burmese. The head is broad; complexion dark, with a yellow tinge; hair on face scanty; stature short or below average; nose fine to broad, face characteristically flat; eyelids often oblique.

The Dravidian type extending from Ceylon to the valley of the Ganges, and pervading Madras, Hyderabad, the Central Provinces, most of Central India and Chota Nagpur. Its most characteristic representatives are the Paniyans of Malabar and the Santals of Chota Nagpur. Probably the original type of the population of India, now modified to a varying extent by the admixture of Aryan, Scythian, and Mongoloid elements. In typical specimens the stature is short or below mean; the complexion very dark, approaching black; hair plentiful, with an

occasional tendency to curl; eyes dark; head long; nose very broad, sometimes depressed at the root, but not so as to make the face appear flat. This race, the most primitive of the Indian types, occupies the oldest geological formation in India, the medley of forest clad ranges, terraced plateau, and undulating plains which stretch roughly speaking, from the Vindhyas to Cape Comorin. On the east and the west of the peninsular area the domain of the Dravidian is conterminous with the Ghats, while further north it reaches on one side to the Aravallis, and on the other to the Rajmahal Hills. Where the original characteristics have been unchanged by contact with Indo-Aryan or Mongoloid people, the type is remarkably uniform and distinctive. Labour is the birthright of the pure Dravidian whether hoeing tea in Assam, the Duars, of Ceylon, cutting rice in the swamps of Eastern Bengal or doing scavenger's work in the streets of Calcutta, Rangoon and Singapore, he is recognizable at a glance by his black skin, his squat figure, and the negro-like proportion of his nose. In the upper strata of the vast social deposit which is here treated as Dravidian these typical characteristics tend to thin and disappear, but even among them traces of the original stock survive in varying degrees.

The areas occupied by these various types do not admit of being defined as sharply as they must be shown on an ethnographic map. They melt into each other insensibly; and although at the close of a day's journey from one ethnic tract to another, an observer whose attention had been directed to the subject would realise clearly enough that the physical characteristics of the people had undergone an appreciable change, he would certainly be unable to say at what particular stage in his progress the transformation had taken place.



TOWN AND COUNTRY.

The percentage of the urban population to the total is 13 which shows an increase of 2 per cent. since the last census, due partly to the natural increase of the pre-existing urban population and partly to migration from rural areas. The percentage of urban population ranges from 2.8 in Assam to 26.0 in Bombay which is the most urbanised of the major provinces. Compared to this, the urban population in France is 49 per cent., in Northern Ireland 50.8 per cent., in Canada 53.7 per cent., in the U. S. A. 56.2 per cent. and in England and Wales 80 per cent.

DISTRIBUTION OF RURAL AND URBAN POPULATION.

	1941.		1931.		Percentage of total Population.					
	Places.	Population. (Million)	Places.	Population. (Million)	1941	1931	1921	1911	1901	1891
Total Population	658,595	389·0	666,924	338·1	100	100	100	100	100	100
Rural Areas	655,892	339·3	664,444	300·7	87	89	89	89	90·6	90·1	90·5
Urban Areas	2,703	49·7	2,480	37·4	13	11	10·2	9·4	9·9	9·5

The Chart below gives at a glance the changes in India's population in the decade 1931-41—the total, sex, urban, rural and literacy.

COMMUNITIES.

Religion as a census criterion of differentiation had considerable drawbacks and was in 1941 replaced by the concept of community. The community tables represent the answers of the citizens to the question on community origin. In some fields a certain degree of overlap exists, notably where tribes are concerned, since where tribal origin was returned in answer to the main question, this was the basis of tabulation. In some areas, however, *e.g.*, notably Assam, Christianity claims many adherents, and had the ordinary course of sorting been possible, these overlaps would have been followed up and a full picture presented. This is one of the many ways in which the contracted tabulation gave rise to considerable difficulties. The table below gives the communities returned, but the figure of Christians refers only to those who in answer to the question about origin declared themselves Indian Christians. The number of persons professing Christianity is, however, considerably more than this number and, for example, in Assam alone 319,000 persons would have to be added to this figure, and indications are that Christians in this province have increased by 60% over the decade.

The figure for tribes, therefore, gives the number of persons of tribal origin, a point of considerable importance. It does not cover religion or the degree of assimilation.

Community.	British India (millions)	States (millions)

Christians	3·5	2·8
Others	1·2	1·0

Distribution of Communities.—Hindus largely predominate in the centre and south of India, and in the Madras Province they are no less than 87 per cent. of the population. Hindus are in the majority in Bihar, Orissa, the United Provinces, the Central India tracts, Rajputana and Bombay. Muslims monopolise the North-West Frontier Province, Baluchistan and Kashmir and are considerably in excess in the Punjab and Eastern Bengal and Sind. They form about 34 per cent. of the population of Assam, 15 per cent. in the United Provinces. The Sikhs are localised in the Punjab and the Jaina in Rajputana, Ajmer-Merwara and the neighbouring States. The tribes are chiefly found in Bihar, Orissa, the Central Provinces and Assam, but Bengal, Madras, Rajputana, Central India also returned a considerable number under this head. More than half of the total number of Christians reside in South India including the Hyderabad State. The remainder are scattered over the continent, the larger numbers being returned in the Punjab, the United Provinces, Bengal, Bihar and Bombay. The Parsees and Jews are chiefly residents of the Bombay Presidency.

The Christian community now numbers just 6.3 millions of persons in India or 1.7 per cent. of the population. This constitutes an increase of 6 per cent. over the last census. Nearly 60 per cent. of Christians are returned from the Madras Province and its States, and the community can claim 40 persons in every 1,000 of the population of Madras and as large a proportion as 29 per cent. in Cochin and 32 per cent. in Travancore. Elsewhere the Christians are scattered over the larger Provinces and States of India, the Punjab, Bihar and Orissa.

MAIN STATISTICS OF THE INDIAN EMPIRE.

The Census.

The latest Census of India was taken on March 1, 1941. The population according to it is 390 millions. The following percentages of increase in population in particular areas indicate the extent to which it has grown since the census of 1931 placed the population of India at 338.1 millions.

Areas.	Percentage of increase in population.
British India.	
Madras	11.6
Bombay	15.9
Bengal	20.3
U. P.	13.7
Punjab	20.5
Bihar	12.3
C. P.	9.7
Assam	18.3
Orissa	8.8
N. W. F. P.	25.2
Sind	16.7
Baluchistan	8.2
Indian States.	
Baroda	16.6
Kashmir	10.3
Hyderabad	13.2
Mysore	11.8
Cochin	18.1
Indore	14.2
Manipur (Assam)	14.9
Gwalior	13.7
Deccan States	13.3
Orissa States	12.7
Rajputana States	16.1

On the occasion of the Census of 1931 the Congress Party had declared a boycott of the Census, while during the Census of 1941 all parties worked zealously to ensure correct recording by enumerators. During the Budget debates in March, 1941, allegations were made by several members of the Assembly that the Census operation had been vitiated by communal over-zealousness of citizens and of enumerators. Mr. M. W. M. Yeatts, C.I.E., I.C.S., Census Commissioner for India, defended his staff against criticism of partiality and in the course of an interesting review of the remarkable achievement of enumerators said:—"The Indian census is a thing of which the country should be very proud, very proud indeed. When I was in America in 1939, I was rather interested to find that two Indian administrative achievements were comparatively well-known and appreciated. One of them was the Survey of India and the other was the Census. There is here a population of 380 millions—a fifth of the world. Your census from A to Z costs you under 50 lakhs. This is only made possible by the people of the country coming forward and taking their unpaid share. Just think what it would cost if you were to pay these men. In America they pay their men four cents a head. The American census for a third of our population costs 12 crores, that is 24 times the cost of the Indian census. The English cost of census is Rs. 150 per thousand. The Indian figure comes to under 15. If you paid your enumerators one anna per head you would add 2½ crores to the cost of the census. If you paid them one pice per head you would add 624 lakhs to the whole cost. You had nearly 3 million enumerators last time. Now you have a million and a half at least. You are able to conduct this so cheaply because the people of this country take this inquiry on their shoulders. That is an enormously creditable thing and one that our people should realise. It is a very advanced position for this great country—that this big social inquiry should be carried on by the people and within their financial resources. It is a much more advanced position than is the case in some countries that are considered to be ahead of us.....Strictly speaking you could say that the census is the most truly all-India effort that we have. As for the men who have taken census, I must say that I have great regard for the Indian enumerator..... Take the ordinary basis of enumeration in a village. Really half the village may take part because things like determining age will often be settled after consultation with the older grown-up people, the stand-by in the village who remember what happened fifty years ago. Very largely it is a public operation and it is a very good thing that it should be so."

Mr. Yeatts broke new ground in many directions and the census of 1941 was a very different phenomenon from that of previous decades. The one-night theory was abandoned in favour of a period system to give full scope for the economical and efficient use of the widely differing provincial systems. It has to be remembered here as everywhere that India's census is unpaid. The number of enumerators as a consequence was more than halved in British India and approximately half for the whole country. The old schedule of former days was abandoned and the enumeration carried out directly on to the slips which were later sorted to produce the tables. These slips themselves represented another radical departure, since they carried no words in any language and could therefore be run off by the hundred millions at a single press in Calcutta. A location code was devised which enabled district and other identifying detail to be printed on the slip in the course of its preparation.

For the first time direct enumeration was undertaken beyond the north-west frontier in Dir, Chitral, Swat and Kurram by applying to these areas the full census system. Separate scrutiny was conducted of the Migratory Powindas in the north-west. The most interesting innovation is the taking of 1/50 random samples of the entire population. These samples are to be kept at the headquarters of each province, or census unit, and can be used for ascertaining, for instance, as to what proportion of the populations is supported by agriculture and make other deductions.

For reasons of economy the Government of India did not sanction the full grant of expenses with the result that although Census has been carried out on an elaborate scale the results are not to be tabulated except for variation of population. Tables giving such important information as age, or means of livelihood, or literacy by age are not to be prepared at present. Thus insurance companies and local bodies interested in social services will not get the help they used to receive from the Census Report. It is expected that a large number of Indian States will not follow the example of British India and that they will arrange for the full course of tabulation.

Certain general conclusions drawn from the Census operation may be mentioned. The need for simple literacy is appreciated all over the country and literacy shows the most marked rise in the case of women amounting to several hundred per cent. There has been a definite movement towards towns and especially larger towns and industrial centres. Public health measures initiated early in this century have begun to show results in lower infantile mortality, longer life and better public health.

Previous censuses included Burma and Aden the figures for which have been removed now. The census took place on the night of 26th February 1941, revealing an Indian population as below —

India	.. .. ..	338·1 millions
British territory	.. ..	256·8 millions
States	.. .. ..	81·3 millions

The present figures of 390, 295·8 and 93·2, show increases of 50 millions over the whole country and 39 millions in British India.

The following small table shows the percentage rate of increase between 1891 and 1941 for India, Provinces and States.

	Percentage Increase (1891-1941)
India	39·1
Provinces	38·9
States	39·8

CENSUS OF INDIA, 1941—Population of Provinces and States.

(Figures are in thousands).

Provinces, States or Agency.	1941. Population.	Males.	Females.	1931. Population.	1931 to 41 Variation.

‡ 1891–1931.

AGE AND SEX.

The table below shows the age distribution of 10,000 males and females of the Indian population by 10-yearly age groups at the last two censuses:—

Age-group.	1931.		1921.		Age-group.	1931.		1921.	
	Males.	Females.	Males.	Females.		Males.	Females.	Males.	Females.
0—10 ..	2,802	2,889	2,673	2,810	40—50 ..	968	891	1,013	967
10—20 ..	2,086	2,062	2,087	1,896	50—60 ..	561	545	619	606
20—30 ..	1,768	1,856	1,610	1,766	60—70 ..	289	281	347	377
30—40 ..	1,431	1,351	1,461	1,398	70 and over.	115	125	160	180
					Mean age ..	23·2	22·8	24·8	24·7

The mean age in India is only 23·02, as against 30·6 in England and Wales. The rate of infant mortality in India in the decade 1921-31 shows an appreciable reduction on the rate of the previous decade, even if allowance be made for the heavy mortality of the influenza years. It is in the towns that the highest infantile mortality is found. The table below shows the rates from 1925 to 1930 for presidency towns and certain provincial capitals.

INFANTILE MORTALITY RATES PER 1,000 LIVE-BIRTHS DURING

City.	1925.	1926.	1927.	1928.	1929.	1940.	1941.
Bombay ..	248	[illegible]	[illegible]	267·9	212·2	201·5	211·4
Calcutta ..	230	241·8	262·7	218·6	205·4	212·5	..
Madras ..	227	218·5	223·8	222·1	211·6	205·7	208·9
Lucknow ..	224	221·4	223·0	226·4	212·2	214·4	134·3
Lahore ..	..	..	..	..	..	..	..
Nagpur ..	261	283·5	234·6	261·2	226·2	294·6	218·8
Delhi ..	196	170·0	187·4	150·0	169·9	173·8	185·9
Karachi ..	151	167·0	142·2	149·6	135·7	156·8	127·8
Ahmedabad ..	280	303·4	280·2	284·0	267·4	310·2	133·2
Hyderabad (Sind.) ..	202	198·2	205·1	192·6	182·4	259·1	220·6
Rangoon ..	252	243·2	..	..	..	..	..

Special causes contribute to the high mortality on infants in India.

Owing to the custom of early marriage, cohabitation and child-birth commonly take place before the woman is physically mature and this, combined with the primitive and insanitary methods of midwifery, seriously affects the health and vitality of the mother and through her of the child. If the child survives the prenatal and natal chances of congenital debility and the risks of child-birth, it is exposed to the dangers of death in the early months of life from diarrhœa or dysentery. According to the Executive Health Officer of Bombay city, by far the greater number of infantile deaths are due to infantile debility and malformation, including premature birth, respiratory diseases coming next, then convulsions, then diarrhœa and enteritis.

Sex Ratio.—The figures of the population of India by sexes, as recorded by the latest census, show a further continuation of the steady fall in the proportion of females to males that has been going on since the beginning of this century. This shortage of females is characteristic of the population of India as compared to that of most European countries. The female infant is definitely better equipped by nature for survival than the male, but in India the advantage she has at birth is probably neutralised in infancy by comparative neglect and in adolescence by the strain of bearing children too early and too often. A good deal of recent work on sex ratios has tended to the view that an increase in masculinity is an indication of declining population, but this is not the case in India as a whole. The all India ratio is 902 females for 1,000 males for Muslim and 944 females for 1,000 males for Hindus. The only provinces in which there is actually an excess of women over men are Madras and Orissa, though the Central Provinces can be added if Berar be excluded.

SOCIAL AND ECONOMIC CONDITIONS.

Literacy.—Literacy, by which was meant, until the 1931 census, ability to read a letter and write a reply, was in the 1941 census expanded to provide for a record of partial literacy, *i.e.* ability to read only. (See chart on page 29) According to the latest census, 120 out of every 1,000 of the population are now literate as against 95 ten years ago and less than 40 half a century ago. The increase in the case of India as a whole amounted to 70 per cent over 1931, of which the male increase was 60 and the female 150.

For the provinces the increase was 80 and for the States 70, with the sex components more or less the same. The most remarkable figures are returned by the Punjab which professes a 140 per cent increase to a present literacy of 13. This figure covers 110 increase for males and no less than 390 per cent for females. In the U.P. the literacy figure is below that of other areas and all major provinces and is still only 8 per cent for the whole population but the decade increase is 80 per cent all over, 70 for men and 170 for women. Even now, however, the percentage of literacy among women is only 2. Bombay leads the provinces, as it did in 1931, and shows also an increase of over 100 per cent to produce a 30 per cent literacy for males and 9 per cent for females. Bengal follows with 16 per cent all over, representing 25 for males and 7 for females. The percentages are on the total population. These figures are left far behind by Travancore and Cochin, which show a literacy figure over the whole population of 45 per cent, representing 56 for men and 34 for women. The latter figure is four times the highest from any province of British India.

Indian Roads.

India's road system may be briefly described as follows.

There exist four great trunk roads, stretching diagonally across the country, which form the framework with which most of the important subsidiary roads are linked. These trunk roads have been in existence for an immense period and are rich in historical association. The most famous is the ancient marching route—known as the Grand Trunk Road—which stretches right across the northern part of the country from the Khyber to Calcutta; the other three connect Calcutta with Madras, Madras with Bombay and Bombay with Delhi, and the four of them together account for about 5,000 out of the 95,000 miles of metalled road in India. None of these roads however can be considered safe "all weather" trunk roads according to modern standards. The Madras-Calcutta road in particular is far from being bridged throughout its entire length. The other three roads also require a great deal of improvement; on the Grand Trunk Road from Calcutta to the North-West Frontier, for example, there is as yet no road bridge over the river Sone in Bihar, and on all of them there are places where floods are liable to cause serious interruption to traffic.

Subsidiary Roads.—As regards the subsidiary roads, the best and most numerous are to be found in Southern India. As one would expect, the worst served regions are Rajputana, Sind and parts of the Punjab on the one hand, and Orissa and Bengal on the other, the former owing to its aridity and sparse population, and the latter because of the numerous unbridged and mostly unbridgeable waterways which dissect it. In addition there are numerous other parts of the country, such as the lower Himalayas, which suffer from a dearth of communications owing to the difficult terrain. Besides surfaced roads, there is a very large mileage of "kutcha" roads in India amounting to approximately 201,000 miles, some of which are good for motor traffic during the dry weather.

Road Development Committee.—On the whole it is reasonable to say that India's road system, even before the advent of motor transport, was altogether insufficient for her needs, and it is the increasing realisation of this fact that led to the appointment of the special Road Development Committee in 1927 whose functions were to examine the question of the development of road communications in view of the increasing use of motor transport and suggest ways and means of financing it. The recommendations put forward by the Committee were carefully considered by the Government of India, whose conclusions upon them were embodied in a resolution and provided that the increase from four to six annas per gallon in the import and excise duties on motor spirit, which had been effected in March 1929, should be maintained for a period of five years in the first instance, and that the additional duty should be allotted as a block grant for expenditure on road development, and credited to a separate Road Development Account, whose unexpended balances should not lapse at the end of the financial year.

Road Development Account.—The original resolution dealing with the disposal of the Road Development Account has since been amended twice, the resolution at present in force having been passed by the Legislative Assembly in February, 1937. Its main features may be described as follows. The special tax on petrol introduced in 1929 shall continue to be levied for road development, the proceeds of which, after retaining a reserve of 15% for administration, research and special grants-in-aid, shall be allocated for expenditure in the different provinces, Indian States, etc., in the ratio of the petrol consumption in the various areas. These sums may be spent on the construction, re-construction or substantial improvement of roads and bridges including the cost of preparation of road schemes—but not for ordinary road upkeep or maintenance—or interest and amortization charges on road loans sanctioned hitherto by the Government of India and also on administration of Provincial Boards of Communications and establishment connected with the control of motor transport. A new clause inserted in the present resolution lays down that "if in the opinion of the Governor

General in Council, the Government of any Governor's province has at any time :—

(*a*) failed to take steps as the Governor-General in Council may recommend for the regulation and control of motor vehicles within the province, or

(*b*) delayed without reasonable cause the application of any portion of the Road Fund allocated or re-allocated as the case may be for expenditure within the province, the Governor-General in Council may resume the whole or part of any sums, which he may at that time hold for expenditure in that province.

With the levy of a surcharge on petrol, the share of the petrol duty available for the Road Fund was increased from 2 annas to 2½ annas per gallon with effect from October 1, 1931. Upto the end of March 1944, the Fund had received about Rs. 21, crores and after transferring nearly Rs. 4 crores to the Reserve, the sum available for distribution to the Provinces, Minor Administrations and Indian States was roughly Rs. 17 crores (or Rs. 16 crores, excluding Burma's share prior to separation). Of this, the actual distribution up to 31st March 1944 to the provinces was Rs. 12·9 crores and to the Minor Administrations Rs. 67½ lakhs, as per details given in the accompanying statement.

Expenditure on Roads.—Upto the introduction of the Road Fund in 1929, all Provincial Roads were financed exclusively from the general revenues of the provinces and local roads from local revenues supplemented by provincial grants. The object of creating the Road Fund in 1929 was to supplement and not to replace the normal expenditure from provincial and local revenues, but unfortunately the ten years following the introduction of the Fund were marked by acute financial stringency, with the result that Provincial Governments and local bodies had to make drastic curtailments in the allotments made for roads from their revenue.

The effect of these curtailments was to starve the construction and development of feeder roads, as the Road Fund was originally being used exclusively for roads of inter-provincial and inter-district importance. The Government of India, however, subsequently laid down that at least 25 per cent. of the provincial shares in the Road Fund should be used on Feeder Roads and that not more than 25 per cent. can be used on roads which compete with the Railways.

Thus, in spite of the inauguration of the Central Road Development Fund, the total expenditure on roads suffered a decrease. The expenditure in 1938-39, which amounted to Rs. 602·1 lakhs in the Governors' Provinces, was Rs. 41·7 lakhs less than in 1928-29.

Revenue from Motor Transport.—The revenue from motor transport has steadily increased in recent years. In 1938-39, the total revenue of the Central Government and Provincial Governments from this source was Rs. 960 lakhs, representing an increase of Rs. 358 lakhs over the total road expenditure in the year.

Road Administration.—On the administrative side, roads are a provincial subject and may be divided into two main classes, Provincial Roads under the Public Works Department and Local Roads in charge of local bodies. The extent to which the administration of roads has been delegated to local bodies varies considerably from province to province but in British India as a whole about 80 per cent of the extra-municipal mileage is under the charge of District Boards or District Councils, including a certain mileage, mainly in the Central Provinces, which is termed "Provincial" but maintained under their agency. Within Municipal areas, all roads, other than sections of main roads passing through the towns, are controlled by the respective Municipalities.

Road Mileage.—The grand total of the mileage of extra-Municipal roads maintained by public authorities in India including Indian States was 296,468 on March 31, 1943; of this the total mileage for Governors' Provinces amounted to 218,066, for Centrally administered areas 8,057 and for Indian States 70,345.

The total mileage of roads with modern surface, either bituminous or cement roads, was 15,121 and the total mileage of waterbound macadam roads was 79,963, making a total mileage of roads which were either modern surfaced or waterbound macadam of 95,051.

The total mileage of lower types of roads was 201,414. These roads are of three types: firstly, roads with artificially admixed granular material, gravel, moorum, etc. on natural soil; secondly, roads of natural soil which are motorable in fair weather; and thirdly, roads of natural soil which are unmotorable.

The total mileage of roads that are motorable was thus 221,690, out of which 126,374 miles were motorable throughout the year, and the remaining 95,316 miles motorable in fair weather.

Out of the 226,123 miles of roads in British India, no less than 178,008 miles of roads were maintained by local bodies, while the P.W.D. and M.E.S. maintained 48,115 miles.

The province with the greatest road mileage was Madras with 38,047, out of which, however, only 104 was modern surfaced, while the province with the greatest mileage of modern roads was the Punjab with 4,983 miles, out of a total provincial mileage of 25,245.

There are, in addition, the roads maintained by Municipalities, the length of which is approximately 18,463 miles made up of 10,840 miles of metalled roads and 7,593 miles of unmetalled roads.

New Road Building Programme.—Considerable interest has been aroused during the past few months in the need for an extensive programme of road development in India, both for the purpose of assisting the transition from war to peace—it being necessary to find employment for thousands of ex-soldiers, thousands of motor vehicles and large quantities of road making machinery now in use by the Army—and for fostering the economic advancement of the country. In December 1943 the Chief Engineers of the various provinces and important Indian States met in conference at Nagpur and recommended that the country should be ready for a programme involving the improvement of the entire road system and designed to increase the road mileage to 400,000. This is estimated the cost roughly Rs. 300 crores according to pre war values. Post-war values, the Chief Engineers estimate, will be roughly 40 per cent above former levels, in which case the cost of the programme would be Rs. 450 crores. This programme is split into two parts—one a

short term programme for the immediate needs arising out of the war and the other a long term programme for economic advancement. The provinces are engaged in preparing road plans in accordance with this recommendation. If this scheme is carried through, the country's road mileage, on completion of the programme, will be as under: National Highways 18,000; Provincial Highways 72,000; Major District Roads 60,000; other District Roads 100,000 and village Roads 150,000.

National Highways. The Central Government propose, as part of their contribution towards post-war development in the provincial field and as part of a concerted plan for the co-ordinated development of land transport as a whole, and without prejudice to the future constitutional position, to accept liability for the construction and maintenance of the main trunk roads known as National Highways within British India with effect from 1st April 1947. Of the 18,000 miles of National Highways at present delineated, 15,000 are in British India and the remaining 3,000 in Indian States.

In view of the Central Government's proposal to accept liability for expenditure on National Highways, the question whether they should continue the allocation of grants from the Central Road Fund to the provinces has been recently raised. The 'position' is that over 60 per cent. of the proceeds of motor transport taxation goes into the general revenues of the Central Government, even after the distribution of the Road Fund, and the Provincial Governments while meeting all the road expenditure receive (inclusive of the Road Fund allotments) less than 40 per cent. of the road transport revenue. It has therefore been urged upon the Government of India by those interested that the transfer of National Highways to the Centre should not affect the Road Fund allocations to the provinces.

Allocations made from the Central Road Fund and expenditure incurred therefrom upto the end of 1943-44:

The Government of India.

The impulse which drove the British to India was not conquest but trade. The Government of India represents the slow evolution from conditions established to meet trading requirements. On September 24, 1599, a few years before the deaths of Queen Elizabeth and Akbar, the merchants of London formed an association for the purpose of establishing direct trade with the East and were granted a charter of incorporation. The Government of this Company in England was vested in a Governor with a General Court of Proprietors and a Court of Directors. The factories and affairs of the Company on the East and West Coasts of India, and in Bengal, were administered at each of the principal settlements of Madras (Fort St. George), Bombay and Calcutta (Fort William), by a President or Governor and a Council consisting of the senior servants of the Company. The three "Presidencies" were independent of each other and subordinate only to the Directors in England.

Territorial Responsibility Assumed.

The collapse of government in India consequent on the decay of Moghul power and the intrigues of the French on the East Coast forced the officers of the Company to assume territorial responsibility in spite of their own desires and the insistent orders of the Directors. Step by step the Company became first the dominant, then the paramount power in India. In these changed circumstances the system of government by mutually independent and unwieldy councils of the merchants at the Presidency towns gave rise to grave abuses. Parliament intervened, and under the Regulating Act of 1773, a Governor-General and four councillors were appointed to administer the Presidency of Fort William (Bengal), and the supremacy of that Presidency over Madras and Bombay was for the first time established. The subordinate Presidencies were forbidden to wage war or make treaties without the previous consent of the Governor-General of Bengal in Council, except in cases of imminent necessity. Pitt's Act of 1784, which established the Board of Control in England, vested the administration of each of the three Presidencies in a Governor and three councillors, including the Commander-in-Chief of the Presidency Army. The control of the Governor-General-in-Council was somewhat extended, as it was again by the Charter Act of 1793. Under the Charter Act of 1833 the Company was compelled to close its commercial business and it became a political and administrative body holding its territories in trust for the Crown. The same Act vested the direction of the entire civil and military administration and sole power of legislation in the Governor-General-in-Council, and defined more clearly the nature and extent of the control to be extended over the subordinate governments. After the Mutiny, there was passed, in 1858, an Act transferring the Government of India from the Company to the Crown. This Act made no important change in the administration in India, but the Governor-General, as representing the Crown, became known as the Viceroy. The Governor-General was the sole representative of the Crown in India; he was assisted by a Council, composed of high officials, each of whom was responsible for a special department of the administration.

Functions of Government.

The functions of the Government in India are perhaps the most extensive of any great administration in the world. It claims a share in the produce of the land and in some provinces it has restricted the alienation of land from agriculturists to non-agriculturists. It undertakes the management of landed estates where the proprietor is disqualified. In times of famine it undertakes relief work and other remedial measures on a great scale. It manages a vast forest property and is the principal manufacturer of salt and opium. It owns the bulk of the railways of the country, and directly manages a considerable portion of them; it has constructed and maintains most of the important irrigation works; it owns and manages the post and telegraph systems; it had until 1st April 1926 the monopoly of the Note issue, and it alone can set the mints in motion. It lends money to municipalities, rural boards, and agriculturists and occasionally to owners of historic estates. It controls the sale of liquor and intoxicating drugs and has direct responsibilities in respect to police, education, medical and sanitary operations and ordinary public works of the most intimate character. The Government has also close relations with the Indian States which collectively cover more than one-third of the whole area of India and comprise more than one-fifth of its population. The distribution of these great functions between the Government of India and the provincial administrations has fluctuated. It was definitely regulated by the Reform Act of 1919, and the democratic principle then widely implanted is greatly developed in the constitutions for the Provinces and the centre enacted by the Imperial Parliament in 1935.

THE REFORMS OF 1919 AND 1935.

Great changes were made in the system of government in British India by the Government of India Act, 1919, which, together with the rules framed under it—almost as important in their provisions as the Act itself—came into general operation in January 1921, having received the Royal Assent on 23rd December 1919. (For detailed particulars see *The Indian Year Book*, 1936-37 and preceding years). Still vaster changes in the direction of Indian Self-Government and of Dominion Status were brought about by the Government of India Act, 1935, which received the Royal Assent on 2nd August 1935. The new Act embodied two main principles—(1) Provincial Autonomy, with a Government responsible to an elected Legislature in every Province, and (2) at the centre a Responsible Government of India, based on a federation of British Indian Provinces and Indian States. Detailed provisions for the whole scheme are made in the Act of 1935, which includes 321 sections and 10

schedules and is the largest and most complex legislative enactment of the kind ever negotiated on to a statute book.

The new Constitutional provisions relating to the Provincial Governments were brought into force on 1st April 1937. Under the provisions of the Act the States should enter Federation by executing Instruments of Accession. The federal programme has now been suspended, and the administration at the centre is carried on in accordance with provisions for the Transitional Period which have been included in part XIII of the Act of 1935.

THE PROVINCES.

The following are under the Act of 1935 the Governors' Provinces of British India (there being besides these Provinces certain Chief Commissioners' Provinces):—Madras, Bombay, Bengal, the United Provinces, the Punjab, Bihar, the Central Provinces and Berar, Assam, the North-West Frontier Province, Orissa, Sind. The Act recognises Berar as being under the sovereignty of H. E. H. the Nizam of Hyderabad whose Heir Presumptive is elsewhere created Prince of Berar and the Act specially provides for its administration along with the Central Provinces as one Governor's Province. The Act creates Orissa and Sind as separate Governors' Provinces and provides for the separation of Burma from India and for its constitution as a separate country under the Crown. The Act gives powers for the creation of other Governors' Provinces.

The Constitution provides for the exercise of the executive authority of a Province (which extends to matters included in the Provincial and Concurrent Legislative Lists) on behalf of His Majesty by the Governor. It also provides for a "Council of Ministers to aid and advise the Governor in the exercise of his functions except in so far as he is by or under this Act required to exercise his functions or any of them in his discretion." The Governor chooses his Ministers, who hold office during his pleasure and he is directed by his Instrument of Instructions to select such as are likely to have the confidence of the Legislature and is enjoined to accept their advice except in special cases for which other provision is made in the Act.

The following special responsibilities are laid upon the Governor:—

(*a*) the prevention of any grave menace to the peace or tranquillity of the Province or any part thereof;

(*b*) the safeguarding of the legitimate interests of minorities;

(*c*) the securing to, and to the dependents of, persons who are or have been members of the public services of any rights provided or preserved for them by or under the Act and the safeguarding of their legitimate interests;

(*d*) the securing in the sphere of executive action of the purposes for which the provisions of chapter III of Part V of the Act are designed to secure in relation to legislation (these provisions are concerned with the prevention of legislative discrimination against British subjects in regard to taxation, trade professional business and qualifications);

(*e*) the securing of the peace and good government of areas which by or under the provisions of the Act are declared to be partially excluded areas;

(*f*) the protection of the rights of any Indian State and the rights and dignity of the Ruler thereof; and

(*g*) the securing of the execution of orders or directions lawfully issued to him under Part VI of the Act by the Governor-General in his discretion (i.e., concerning agency functions in behalf of the Central Authority, inter-provincial co-operation in certain matters and so forth).

"If and in so far as any special responsibility of the Governor is involved he shall in the exercise of his functions exercise his individual judgment as to the action to be taken." Where the Governor is required by the Act to act in his discretion or to exercise his individual judgment he is placed under the control of the Governor-General in the latter's discretion.

The Provincial Legislatures.—The Act provides that there shall for every Province be a Provincial Legislature consisting of His Majesty represented by the Governor and (*a*) in the Provinces of Madras, Bombay, Bengal, the United Provinces, Bihar and Assam two Chambers and (*b*) in the other Provinces one Chamber, the two Chambers being called the Legislative Council and the Legislative Assembly and where there is only one Chamber the Legislative Assembly. Every Legislative Council is to be a permanent body not subject to dissolution but as near as may be one-third of its members are to retire in every third year. Every Legislative Assembly of every Province unless sooner dissolved is to continue for five years. An amending Act, passed in 1941, extended the life of the first Legislative Assemblies under the Act till twelve months after the War, but subject to earlier dissolution by the Governor.

The Houses of Legislature are elected bodies; with special electoral provisions for communal and other particular interests, and are based on a considerably wider franchise than was provided by the Act of 1919.

Special provisions are made for cases in which the Governor finds himself unable to assent to Bills passed by the Legislature.

The Governor of a Province is given power to promulgate ordinances if, when his Legislature is not in session, he is satisfied that circumstances necessitate immediate action and under certain other conditions, and in certain circumstances and under prescribed conditions to enact Acts in his discretion.

Provision is further made to enable the Government to be carried on if at any time the Governor is satisfied that a situation has arisen in which the government of the Province cannot be carried on in accordance with the provisions of the Act.

Chief Commissioners' Provinces.—The following are by the Act constituted as Chief Commissioners' Provinces—British Baluchistan, Delhi, Ajmer-Merwara, Coorg, the Andaman and Nicobar Islands, Panth piploda. Provision is made for the possible creation of others. A Chief Commissioner's Province is to be administered by the Governor-General acting, to such extent as he thinks fit, through a Chief Commissioner to be appointed by him in his discretion.

DIVISION OF POWERS.

The Act provides for the institution of a Federal Court consisting of a Chief Justice of India and such other judges as His Majesty may deem necessary, the seat of the Court being Delhi and its original jurisdiction extending to disputes between the Federation, any of the Provinces or any of the Federated States, its appellate jurisdiction to include certain classes of appeals from the High Courts of British India and of the Indian States and appeals lying from it to His Majesty in Council. The Federal Court held its first sitting on 6th December 1937.

The Act also prescribes that the executive authority of the Federation in respect of railway construction, maintenance and operation shall be exercised by a Federal Railway Authority, for the establishment and activities of which it provides.

Provisions are made in the Act in relation to the recruitment and control of the Public Services and for the appointment of a Public Service Commission for the Federation and of one for each Province. The duties and powers of these Commissions in regard to the Services are laid down in the Act, which also provides that two or more Provinces may agree to have one Commission between them.

Provincial Legislation.—The Act provides for a new division of functions between the Central and Provincial authorities and the following is the new Provincial Legislative List, which came into operation on 1st April 1937:—

1. Public order (but not including the use of His Majesty's naval, military or air forces in aid of the civil power); the administration of justice; constitution and organisation of all courts, except the Federal Court, and fees taken therein; preventive detention for reasons connected with the maintenance of public order; persons subjected to such detention

2. Jurisdiction and powers of all courts except the Federal Court, with respect to any of the matters in this list; procedure in Rent and Revenue Courts.

3. Police, including railway and village police.

4. Prisons, reformatories, Borstal institutions and other institutions of a like nature, and persons detained therein; arrangements with other units for the use of prisons and other institutions.

5. Public debt of the Province.

6. Provincial Public Services and Provincial Public Service Commission.

7. Provincial pensions, that is to say, pensions payable by the Province or out of Provincial revenues.

8. Works, lands and buildings vested in or in the possession of His Majesty for the purposes of the Province.

9. Compulsory acquisition of land.

10. Libraries, museums and other similar institutions controlled or financed by the Province.

11. Elections to the Provincial Legislature subject to the provisions of this Act and of any Order in Council made thereunder.

12. The salaries of the Provincial Ministers, of the Speaker and Deputy Speaker of the Legislative Assembly, and, if there is a Legislative Council, of the President and Deputy President thereof, the salaries, allowances and privileges of the members of the Provincial Legislature; and, to such extent as is expressly authorised by Part III of this Act, the punishment of persons who refuse to give evidence or produce documents before Committees of the Provincial Legislature.

13. Local government, that is to say, the constitution and powers of municipal corporations, improvement trusts, district boards, mining settlement authorities and other local authorities for the purpose of local self-government or village administration.

14. Public health and sanitation; hospitals and dispensaries; registration of births and deaths.

15. Pilgrimages, other than pilgrimages to places beyond India.

16. Burials and burial grounds.

17. Education, including Universities other than those specified in paragraph 13 of List I.

18. Communications, that is to say, roads, bridges, ferries, and other means of communications not specified in List I; minor railways subject to the provisions of List I with respect to such railways; municipal tramways; ropeways; inland waterways and traffic thereon subject to the provisions of List III with regard to such waterways; ports, subject to the provisions in List I with regard to major ports; vehicles other than mechanically propelled vehicles.

19. Water, that is to say, water-supplies, irrigation and canals, drainage and embankments, water storage and water power.

20. Agriculture, including agricultural education and research, protection against pests and prevention of plant diseases; improvement of stock and prevention of animal diseases;

veterinary training and practice, pounds and the prevention of cattle trespass.

21. Land, that is to say, rights in or over land, land tenures, including the relation of landlord and tenant, and the collection of rents; transfer, alienation and devolution of agricultural land; land improvement and agricultural loans; colonization; Courts of Wards; encumbered and attached estates; treasure trove.

22. Forests.

23. Regulation of mines and oilfields and mineral development subject to the provisions of List I with respect to regulation and development under Federal control.

24. Fisheries.

25. Protection of wild birds and wild animals.

26. Gas and gasworks.

27. Trade and commerce within the Province; markets and fairs; money-lending and money-lenders.

28. Inns and innkeepers.

29. Production, supply and distribution of goods; development of industries, subject to the provisions in List I with respect to the development of certain industries under Federal control.

30. Adulteration of foodstuffs and other goods; weights and measures.

31. Intoxicating liquors and narcotic drugs that is to say, the production, manufacture, possession, transport, purchase and sale of intoxicating liquors, opium and other narcotic drugs, but subject, as respects opium, to the provisions of List I and as respects poisons and dangerous drugs, to the provisions of List III.

32. Relief of the poor; unemployment.

33. The incorporation, regulation and winding-up of corporations not being corporations specified in List I or Universities; unincorporated trading, literary, scientific, religious and other societies and associations; co-operative societies.

34. Charities and charitable institutions, charitable and religious endowments.

35. Theatres, dramatic performances and cinemas, but not including the sanction of cinematograph films for exhibition.

36. Betting and gambling.

37. Offences against laws with respect of any of the matters in this list.

38. Inquiries and statistics for the purpose of any of the matters in this list.

39. Land revenue, including the assessment and collection of revenue, the maintenance of land records, survey for revenue purposes and records of rights, and alienation of revenue.

40. Duties of excise on the following goods manufactured or produced in the Province and countervailing duties at the same or lower rates on similar goods manufactured or produced elsewhere in India:—

(*a*) alcoholic liquors for human consumption;

(*b*) opium, Indian hemp and other narcotic drugs and narcotics; non-narcotic drugs;

(*c*) medicinal and toilet preparations containing alcohol or any substance included in sub-paragraph (*b*) of this entry.

41. Taxes on agricultural income.

42. Taxes on lands and buildings, hearths and windows.

43. Duties in respect of succession to agricultural land.

43A. Estate duty in respect of agricultural land.

44. Taxes on mineral rights, subject to any limitations imposed by any Act of the Federal Legislature relating to mineral development.

45. Capitation taxes.

46. Taxes on professions, trades, callings and employments, subject, however, to the provisions of section 142A of the Act.

47. Taxes on animals and boats.

48. Taxes on the sale of goods and on advertisements.

48A. Taxes on vehicles suitable for use on roads, whether mechanically propelled or not, including tramcars.

48B. Taxes on the consumption or sale of electricity, subject, however, to the provisions of section 154A of the Act.

49. Cesses on the entry of goods into a local area for consumption, use or sale therein.

50. Taxes on luxuries including taxes on entertainments, amusements, betting and gambling.

51. The rates of stamp duty in respect of documents other than those specified in the provisions of List I with regard to rates of stamp duty.

52. Dues on passengers and goods carried on inland waterways.

53. Tolls.

54. Fees in respect of any of the matters in this list, but not including fees taken in any Court.

CONCURRENT LEGISLATIVE LIST.

There is also prescribed a concurrent Legislative List containing subjects in regard to which both the Central Government and the Provincial Governments enjoy legislative powers. Here it is:—

PART I.

1. Criminal law, including all matters included in the Indian Penal Code at the date of the passing of this Act, but excluding offences against laws with respect to any of the matters specified in List I or List II and excluding the use of His Majesty's naval, military and air forces in aid of the civil power.

2. Criminal Procedure, including all matters included in the Code of Criminal Procedure at the date of the passing of this Act.

3. Removal of prisoners and accused persons from one unit to another unit.

4. Civil Procedure, including the law of Limitation and all matters included in the Code of Civil Procedure at the date of the passing this Act; the recovery in a Governor's Province or a Chief Commissioner's Province of claims in respect of taxes and other public demands, including arrears of land revenue and sums recoverable as such, arising outside that Province.

5. Evidence and oaths; recognition of laws, public acts and records and judicial proceedings.

6. Marriage and divorce; infants and minors adoption.

7. Wills, intestacy, and succession, save as regards agricultural land.

8. Transfer of property other than agricultural land; registration of deeds and documents.

9. Trusts and Trustees.

10. Contracts, including partnership, agency, contracts of carriage, and other special forms of contract, but not including contracts relating to agricultural land.

11. Arbitration.

12. Bankruptcy and insolvency; administrators-general and official trustees.

13. Stamp duties other than duties or fees collected by means of judicial stamps, but not including rates of stamp duty.

14. Actionable wrongs, save in so far as included in laws with respect to any of the matters specified in List I or List II.

15. Jurisdiction and powers of all courts except the Federal Court, with respect to any of the matters in this list.

16. Legal, medical and other professions.

17. Newspapers, books and printing presses.

18. Lunacy and mental deficiency, including places for the reception or treatment of lunatic and mental deficients.

19. Poisons and dangerous drugs.

20. Mechanically propelled vehicles.

21. Boilers.

22. Prevention of cruelty to animals.

23. European vagrancy; criminal tribes.

24. Inquiries and statistics for the purpose of any of the matters in this Part of this List.

25. Fees in respect of any of the matters in this Part of this List, but not including fees taken in any Court.

PART II.

26. Factories.

27. Welfare of labour; conditions of labour; provident funds; employers' liability and workmen's compensation; health insurance, including invalidity pensions; old age pensions.

28. Unemployment insurance.

29. Trade unions; industrial and labour disputes.

30. The prevention of the extension from one unit to another of infectious or contagious diseases or pests affecting men, animals or plants.

31. Electricity.

32. Shipping and navigation on inland waterways as regards mechanically propelled vessels, and the rule of the road on such waterways carriage of passengers and goods on inland waterways.

33. The sanctioning of cinematograph films for exhibition.

34. Persons subjected to preventive detention under Federal authority.

35. Inquiries and statistics for the purpose of any of the matters in this Part of this List.

36. Fees in respect of any of the matters in this Part of this List, but not including fees taken in any Court.

An amending Act was passed in 1940 [introduced in Parliament in 1939] to make certain readjustments found necessary in the operation of the 1935 Act. To safeguard provincial exchequers taxes on mechanical or other road vehicles or on the sale or consumption of electricity were added to the provincial list. By an amending passed in 1939, it was provided *inter alia* that in the event of a war emergency being proclaimed by the Governor-General the Central Government may assume executive in addition to legislative authority over any field and can also with the specific sanction of the Governor General empower Federal officers to perform functions ordinarily the concern of provincial administrations.

THE CENTRAL GOVERNMENT.

The structural changes made by the Act of 1919 in the system of government outside the "Governors' provinces" were of comparatively minor scope, though considerable modifications were made in the relationship hitherto subsisting between the Provincial Governments on the one hand and the Government of India and the Secretary of State in Council on the other. The Act of 1935 provides for further extensive changes at the centre, but these will only come into force when the Indian States accede to Federation and meanwhile, at the Centre, the constitution established by the Act of 1919 prevails, subject to certain modifications required to bring it into harmony with the new conditions in the Provinces. One of these changes is the vesting of certain responsibilities in the Governor-General "in his discretion" which means that they are left in the charge of the Governor-General as distinct from that of the Governor-General in Council. The Act of 1935 has also taken the relations between the Crown and the States outside the purview of the Governor-General in Council and entrusted them to a new authority called His Majesty's Representative for the

exercise of the functions of the Crown in its relations with Indian States (Crown Representative for short). The offices of Governor-General and Crown Representative are held by the same person. The only concrete changes made in the constitution of the Central Government by the 1919 Constitution were the removal of the statutory bar to the appointment of more than six members of the Governor-General's Executive Council (which, however, had the far-reaching consequence that a majority of the members of the Council are now Indians) and the reconstitution in a much more enlarged representative and independent form of the central legislature. This became, like the Legislative Council in a Governor's province, a legislature with all the plenary powers generally given to such a body save such as are specifically withheld by the terms of the Act. It consists of two Chambers. The "Council of State" is a body of 58 members, including 32 elected and 26 nominated, of whom not more than 20 might be officials. The "Indian Legislative Assembly" consists of 141 members, of whom 102 are elected. Of the 39 nominated members, not fewer than one-third are required to be non-officials. The members of the Governor-General's Executive Council have not been made *ex-officio* members of either Chamber, but each of them has to be nominated a member of one or other Chamber, and can vote only in the Chamber of which he is a member. Any member of the Executive Council may, however, speak in either Chamber. The President of the Upper Chamber is appointed by the Governor-General. So also, for the first four years after the constitution of the Chamber, was the President of the Legislative Assembly. But after that period the Lower Chamber elected its own President and it elected its own Deputy-President from the outset. The normal lifetime of each Council of State is five years, and of each Legislative Assembly three years; but either Chamber, or both simultaneously, may be dissolved at any time by the Governor-General who has also the power to extend the lifetime of either Chamber in special circumstances.

Election.—The method of election for both Chambers is direct, and although the number of electors is considerably smaller than for the Provincial Councils, it is a great advance on the very restricted and for the most part indirect franchise established under the Act of 1909 for the unicameral central legislature which then existed. Generally speaking, the electoral scheme for the Lower Chamber is on the same model as that which the Act of 1919 prescribed for the Provincial Councils except that, *firstly*, the property qualification for voters (and consequently for candidates) is higher in order to obtain manageable constituencies, and past service with the colours is not *per se* a qualification for the franchise, and *secondly*, that the constituencies necessarily cover a considerably larger area than constituencies for the Provincial Council. The distribution of seats in both Chambers, and the arrangement of constituencies, are on a provincial basis; that is, a fixed number of the elective seats in each Chamber is assigned to representatives of each province and these representatives are elected by constituencies covering an assigned area of the province.

The following table shows the original allotment of the elective seats plus one since added for the North-West Frontier Province :—

	Legislative Assembly.	Council of State.
Madras	16	5
Bombay	16	6
Bengal	17	6
United Provinces ..	16	5
Punjab	12	4
Bihar and Orissa ..	12	3
Central Provinces ..	6	2
Assam	4	1
North-West Frontier Province	1	..
Burma	4	2
Delhi	1	..
	105	34

The Government of India Act, 1935, by separating Burma from India eliminated the Burma members.

Till 1937 Berar was represented by nomination. After the Commencement of the Government of India Act, 1935, the number of elected seats both in the Assembly and the Council of State have been increased by one and assigned to Berar.

Since the area which returned perhaps 80 members to a Provincial Council is the same as the area which returns perhaps 12 members to the Legislative Assembly—namely, the entire province in each case—it follows that on the direct election system this area must be split into constituencies which are much larger than the constituencies for the local Councils, and just as it is generally correct to say that the normal area unit for those rural constituencies for the latter which are arranged on a territorial basis was made in the district, it may be said that the normal area unit in the case of the Legislative Assembly is the Division (the technical term for the administrative group of districts controlled by a Divisional Commissioner).

The Franchise.—The general result of the first franchise arrangements under the Act was thus that there was in each province a body of electors qualified to vote for, and stand for election to, the Provincial Council, and that a selected number of these voters were qualified to vote for and stand for election to those seats in the Indian Legislative Assembly which were assigned to the province. The qualifications for candidature for the Indian Legislative Assembly were made the same in each province, *mutatis mutandis*, as for candidature for the Provincial Council, except that in the 2 provinces, so long as the candidate could show that he resides somewhere within the province, no closer connection with his particular constituency was insisted upon.

The franchise for the Council of State differs in character from that for the Provincial Council and the Indian Legislative Assembly. The concern of the framers of the Act and rules was to secure for the membership of this body a character as closely as possible approximating to a "Senate of Elder Statesmen" and thus to constitute a body capable of performing the function of a true revising Chamber. With this object, in addition and as an alternative to a high property qualification—adopted as a rough and ready method of enfranchising only persons with a stake in the country—the rules admit as qualifications certain personal attributes which are likely to connote the possession of some past administrative experience or a high standard of intellectual attainment. Examples of these qualifications are past membership of either Chamber of the Legislature as now constituted, or of its predecessor, or of the Provincial Legislature, the holding of high office in local bodies (district boards, municipalities and corporations), membership of the governing bodies of Universities, and the holding of titles conferred in recognition of Indian classical learning and literature.

Powers.—**The powers and duties of the Indian Legislature under the 1919 Act differed but little in character within the "central" sphere from those of the provincial Councils under the same Act within their provincial sphere, and it acquired the same right of voting supplies for the Central Government. But as no direct attempt was made to introduce responsible government at the centre, the step in that direction having been avowedly confined to the provinces, and as consequently the Executive Government of India remained legally responsible as a whole for the proper fulfilment of its charge to the Secretary of State and Parliament, it followed that the powers conferred on the Governor-General to disregard a decision of the Indian Legislature were less restricted than the similar power of the Provincial Governor; that is to say, they covered the whole field and were not confined in their application to certain categories of subjects.**

The new provisions, made in the Government of India Act, 1935, affecting the Government of India, were described in an earlier part of this chapter.

THE INDIA OFFICE.

The Act of 1919 made no structural changes in the role of the India Office in the administration of Indian affairs. Slight alterations were effected in the number and tenure of office of the members of the Secretary of State's Council, and some relaxations were made in the statutory rigidity which formerly bound their procedure and that of the Office in general. But provisions were made which undoubtedly as time went on had a material effect on the activities of the Office. A High Commissioner for India was appointed for the purpose of taking over, as the direct agent of the Government of India, that portion of India Office functions which is of the nature of agency, as distinct from administrative supervision and control. His functions relate mainly to the control of Indian Government Trade Commissioners in Europe and America; arrangements in connection with exhibitions and fairs outside India; sale and distribution of Central Government publications; representation of India on Inter-Empire Organisations and at Conferences; relief and repatriation of destitute Indians; purchase of stores outside India; provision of educational and study facilities for Indian students and Government officials on leave or deputation; recruitment of persons for special posts; and payment of leave salary and pensions of officers in Europe, etc. Concurrently with this change, it became possible to defray from British revenues the salaries of the Secretary of State and of the Parliamentary Under-Secretary, and that portion of the cost of salaries of India Office staff and general maintenance which was attributable to the exercise of its administrative as distinct from purely agency functions.

The Act of 1935 provides for the appointment by the Secretary of State of not less than eight (reduced to five by a subsequent amendment) nor more than twelve persons (between three and six after the establishment of Federation) whose duty it shall be to advise him on any matter relating to India on which he may desire their advice. It also prescribes that the salary of the Secretary of State and the expenses of his Department shall be paid out of monies provided by Parliament (after Federation). The Governor-General is given in his sphere of responsibility reserve powers corresponding with those already mentioned as being vested in the Governors of Provinces in theirs and in respect of them he is made responsible through the Secretary of State to Parliament. Until the establishment of Federation, the Secretary of State continues to exercise control both over the Governor-General in Council and the Governor-General in respect of his personal power.

PERSONNEL AND PROCEDURE.

The Governor-General and the members of his Executive Council are, under the Government of India Act 1919 as continued by the Act of 1935, pending the establishment of Federation, appointed by the Crown. No limit of time is specified for their tenure of office, but custom has fixed it at five years. During the war, the membership of the Executive Council was increased to 15. The members held charge of the portfolios of War; Finance; Home; Industries and Supplies; Commonwealth Relations; Law; Commerce; Information and Arts; War Transport; Posts and Air (Civil Aviation); Education, Health and Agriculture; Labour; Food; Planning and Development. As a result of discussions between the British Cabinet Mission, which visited India in 1946, and the principal Indian political parties, an Interim

Government at the centre was formed, first with Congress participation only, but subsequently as a Congress-League coalition. The portfolios are External Affairs, Home, Broadcasting and Information, Food and Agriculture, Industries and Supplies, Communications and War Transport, Labour, Commerce, Finance, Defence, Education, Health and Arts, Posts and Air, and Works, Mines and Power. This Council has formed preliminary to the drafting of a new Constitution by a Constituent Assembly. The Commerce Department deals generally with commerce, tariffs, company law, insurance and actuarial work, and with blue water shipping. The Department of Communications and War Transport deals with post and telegraphs, civil aviation, meteorology, roads, Ports, Inland navigation, Railways, Petrol rationing etc. The Department of Labour deals with labour subjects. In addition it assumes responsibility for labour in docks and for the administration of certain statutes affecting labour on the railways. It deals also with public works and irrigation, mines, technical education so far as that concern industry, printing and stationery and various general safety legislation and administration. Ecclesiastical affairs are placed under the Defence Department.

Until the formation of the Interim Government the Viceroy had been in charge of External Affairs, and the Commander-in-Chief in practice always a member of the Executive Council in charge of Defence. But these portfolios are now held by Cabinet Members of the Interim Government. The Council may assemble at any place in India which the Governor-General appoint. In practice it meets only in Delhi and Simla except for a meeting or two in Calcutta after Christmas when the Viceroy is usually in residence in the Bengal Capital.

In regard to his own Department each Member of Council is largely in the position of a Minister of State, and has the final voice in ordinary departmental matters. But any question of special importance, and any matter in which it is proposed to over-rule the views of a Provincial Government must ordinarily be referred to the Viceroy. Any matter originating in one department which also affects another must be referred to the latter, and in the event of the Departments not being able to agree, the case is referred to the Viceroy. The Members of Council meet more or less frequently as a Cabinet to discuss questions which the Viceroy desires to put before them, or which a member who has been over-ruled by the Viceroy has asked to be referred to Council. Important questions are decided at meetings of the Executive Council. If there is a difference of opinion in the Council the decision of the majority ordinarily prevails, but the Viceroy can over rule a majority if he considers that the matter is of such grave importance as to justify such a step. Each departmental office is in charge of a Secretary, whose position corresponds to that of a permanent Under-Secretary of State in the United Kingdom; but with these differences that the Secretary is present though he does not speak at Council meetings at which cases under his cognisance are discussed, that he attends on the Viceroy usually once a week and discusses with him all matters of importance arising in his Department, that he has the right of bringing to the Viceroy's notice any case in which he considers that the Viceroy's concurrence should be obtained to action proposed by the Departmental Member of Council, and that his tenure of office is normally limited to a term of five years. These powers and functions in relation to the Viceroy of the Secretaries are now sought to be curbed in the formation of the Interim Government and are at present practically in abeyance. The Secretaries have under them Joint, Deputy, Under and Assistant Secretaries, together with the ordinary clerical establishments. The Secretaries and subordinate officers are often, though by no means exclusively, members of the Indian Civil Service. The Government of India has its own Civil Service, quite distinct from that of the Provincial Governments, and officers serving under the Government of India are borrowed from the Provinces, or, in the case of specialists, recruited direct on contract.

Government of India Act, 1935.

The seeds of the Government of India Act, which was placed on the Statute Book in 1935, were sown as far back as in the autumn of 1930 when the Indian Round Table Conference met in London for the first time. Three sessions of the conference were held, and it concluded on December 24, 1932. Some months later the British Government published their proposals for the reform of the Indian constitution based on the largest measure of agreement reached at the three sessions of the Round Table Conference. These proposals were embodied in a White Paper (March 1933) which was referred to a Committee of the two Houses of Parliament. The Committee submitted its report in October 1934. Based on the recommendations of this Committee, the Government of India Bill was presented to Parliament in January, 1935. The Bill has since become law with a few changes in its passage through Parliament.

Federation.—The Act proposed to set up a Federation with limited responsibility at the Centre, and provide for autonomy to the eleven provinces composing British India.

Formally inaugurated in April 1937, the provincial part of the new constitution functioned for about two and a half years with a fair amount of smoothness, but at the end of that period it broke down in seven out of the eleven provinces by the refusal of the party in power to carry on the work of Government. Thereupon the Governors of those provinces assumed sole charge of the Administration aided by Advisers responsible to him. The constitution remained virtually suspended in those provinces. Subsequently, however, successful efforts were made to form stable ministries and today provincial autonomy is in force in all the eleven provinces.

The federal part of the constitution could not be inaugurated according to plan owing to diverse factors—the difficulties experienced by the Princes in acceding to Federation except on the fulfilment of certain conditions, the internal, political and communal differences in British India and, above all, by the declaration of war which militated against any major changes in the governmental machinery at the centre.

Suspension of the Federal idea.—The Viceroy openly announced that steps for the enforcement of the federal part of the constitution would remain suspended, although he also expressed the hope that conditions, internal as well as external, would so settle down as to permit of a reconsideration of the position at an early date. Apart from the war situation, which precludes any major undertaking relating to the Indian constitution, the steadily deteriorating internal political controversies have pushed into the background measures for the revival of the Federation envisaged by the Government of India Act. Indeed, present trends indicate that the 1935 Federation is virtually dead. There seems little prospect of a resurrection of the federal ideal of the Round Table Conference. The very principles underlying the structure of the Central Government—and even the Provincial Governments—have been challenged. Widespread and influential demands have been made for an examination *de novo* of the entire constitutional fabric, and these demands have been agreed to. A Constituent Assembly to frame a new Constitution for India is likely to meet shortly.

Provincial Governments.—The Provincial Constitution was suspended in seven out of eleven provinces as the indirect result of the war—the popular Ministries in those provinces having resigned on an issue somewhat connected with the war and rendered the formation of other Ministries in their places impossible owing to the numerical disposition of the party strength. The constitution was restored in one of the provinces, namely, Orissa, in the autumn of 1941, thanks to the successful efforts of the Opposition to wean away certain members from the obstreperous majority party. This Ministry fell in 1944 and the Governor was once again forced to take over the administration. Assam faded out of the picture during Christmas week in 1941. Following the resignation of one of his principal supporters in the Cabinet, the Premier of Assam resigned and the Governor, finding it impossible to form a stable Ministry, took over the reins of administration by invoking section 93 of the Government of India Act. Eight months later the same Premier succeeded forming a Coalition Ministry and obtaining adequate support for it. The constitution has again been functioning in Assam since August, 1942. Similarly in 1943 a Ministry was formed in the North-Western Frontier Province, where, too, the operation of section 93 of the Act was abrogated. Bengal, which had had a fairly good run of provincial autonomy, came under a cloud in 1944 when consequent on the failure of the Ministry to command the confidence of the legislature, the Governor applied section 93 to the province. Subsequent to General elections held in the cold weather of 1945-46, ministerial Government has now been restored in all the Provinces.

Amendments to the Act.—One of the changes made in recent years was effected by an alteration in the King-Emperor's Instrument of Instructions to the Governor-General. By virtue of the change thus effected the Governor-General is freed from the necessity of submitting for the signification of the Crown's pleasure any measure involving certain special responsibilities of the Governor-General. It has been laid down that the Governor-General need not so submit any measure or measures if he is satisfied that conditions created by the war have rendered it impossible or inexpedient to do so.

Similarly, in order to provide against possible constitutional complications that may arise from an interruption of communications between Great Britain and India, it has been laid down by amendments to the Government of India Act of 1935, passed by Parliament, that the Governor-General should have the power of making appointments to, and removal from, any office in India which under the original Act is exercisable

by His Majesty. The amendment also authorises the Governor-General to enact by notifications in the *Gazette of India* provisions which could be made by Orders in Council. The same Act removed the limited duration of six months which normally applies to Ordinances made by the Governor-General. These provisions have become inapplicable from the 1st April 1946.

In the summer of 1944 His Majesty's Government initiated some more changes in the Government of India Act of 1935. The amending bill sought, however, to make only certain minor technical adjustments in such matters as rotation of retirement of judges of High Courts and transfer of judges from one High Court to another. It permitted the Secretary of State for India to have a smaller number of Advisers than that laid down in the original Act. A further provision enabled the Viceroy and the Commander-in-Chief to go to England on leave more frequently than once in five years as provided for in the existing Act. Another clause dealt with the periodical renewal of the Upper House (in provinces which have a second chamber) which are permanent bodies renewable by one-third every three years. As the suspension of elections in Section 93 provinces would put the periodical renewal of the upper chambers out of gear, the amending clause treated the provisions of Section 93 as non-existent in this behalf, so that the one-third renewal in the Upper House could take place in proper sequence. This was done by extending the period of office of members of Legislative Councils in Section 93 provinces by the period for which Section 93 proclamations are in force plus on additional period up to 12 months to enable elections to be held at a suitable time in the year.

Attachment of States.—In order to validate a scheme of attaching the smaller Indian States to bigger States, to ensure better administrative facilities, Parliament in the spring of 1944 enacted a measure which marks a departure from some of the provision of the Government of India Act of 1935. For an understanding of the implications of this measure see chapter on "Chamber of Princes." The measure was called the India (Attachment of States) Act of 1944. Here is its text:—

1. At the instance, or with the consent of His Majesty's Representative for the exercise of functions of the Crown in its relations with Indian States, any Indian State not mentioned in divisions I to XVI of the table of seats appended to part 2 of the First Schedule to the Government of India Act, 1935 (as in force at the passing of this Act), may be attached to any other Indian State and in connection with the attachment, provision may be made for:—

(a) The exercise by, or transfer to Courts and officers of the second mentioned Indian State, with or without limitations or conditions, of any powers or jurisdiction in or in relation to the first mentioned State which were or could have been exercised by or on behalf of the Crown therein before attachment.

(b) The relinquishment, as a consequence of attachment, of any such powers or jurisdiction of the Crown as aforesaid; and

(c) The transfer of cases pending at the date of attachment before courts or officers of the Crown, and this sub-section shall have effect notwithstanding anything in the Foreign Jurisdiction Act of 1890, the Government of India Act of 1935, any other Act for the time being in force, or any Letters Patent, Orders in Council, or other instruments.

2. This section shall be deemed always to have had effect. Provided that His Majesty's Representative for the exercise of the functions of the Crown in its relations with Indian States may give such directions, if any, as he thinks proper for rendering valid or lawful anything done or omitted before the passing of this Act which would be invalid or unlawful by virtue of the provisions of this sub-section.

3. The Act may be cited as the India (Attachment of States) Act, 1944.

In March 1945 Parliament amended the Constitution Act to enable the Legislatures in India to authorise the Imposition of estate duty and provided for the manner in which the proceeds were to be distributed.

In October of the same year Parliament passed an Act to remedy the anomalous situation in which persons who had been on war service lost their voting rights in some cases by failing to retain their "residential qualification."

In February 1946 an amending Act authorised the Central Legislature, when a Proclamation of emergency under section 102 of the Constitution Act is in force, to make laws upon matters which are not included in any of the Legislative Lists.

In March of the same year an Act was passed by which the provision that there should be three Service Members in the Viceroy's Executive Council, and one Member with stated legal qualifications, was removed. This was to enable a "political" Government to be formed at the Centre made up entirely of non-officials.

By this time the war was over and it was proposed to revoke the Proclamation of emergency under section 104. But the Centre would then have lost their war-time powers in matters which normally fall within the Provincial sphere. As the economic dislocation created by the war still persisted, it was desired that, in the interests of a smooth transition from the conditions of war to those of peace, the emergency powers of the Centre in regard to certain matters should continue for some time more. The Parliamentary Act referred to above accordingly continued temporarily for a maximum period of 5 years certain powers in respect of foodstuffs and some substances essential for the civil population such as paper, textiles, iron and steel, etc.; unemployment among war-workers; and the requisitioning of land and buildings.

Federal Part.—The Federation which the Act, as it stands, provides differs from those in other parts of the world because its units are not homogeneous. The Indian States differ widely from the British India Provinces. These complications react upon the constitution. As Sir Samuel Hoare said in the House of Commons "they react, for instance, upon the provisions as to how the federation is to be formed, for it is obvious that the Princes

being voluntary agents, can only enter of their own volition. They react again upon the kind of executive and the kind of legislature that is proposed, each side of the federation obviously demanding adequate representation both in the government and in the federal legislature. They react again upon the relations between the two Federal Chambers, the Princes from the first attaching the greatest possible importance to the Chambers having equal powers. They react, further, upon the list of federal subjects, the Princes again rightly insisting that, apart from the functions of Government which they surrender to the Federation, there should be no interference in their internal sovereignty. These complications make a formidable list of difficulties."

Federal Executive.—The Act sets up a Federal Executive similar to the responsible executives in other federations of the Empire. The whole executive power of the Federation is conferred on the Governor-General, and his Ministers are appointed to "aid and advise" him and hold office during his pleasure. The Ministry shall consist of persons in whom the Legislature has confidence and the Governor-General shall dismiss them when they lose that confidence.

Governor-General: special powers. In contrast, however, with Dominion Constitutions the Governor-General of India is given special powers by the Act. In the first place the Departments of Foreign Affairs, Ecclesiastical Affairs and Defence are "reserved" and will be administered by him through the agency of counsellors; in the second place in all other departments he may act in certain cases and for certain purposes otherwise than on his ministers' advice.

The Act imposes upon him special responsibilities for:

(*a*) The prevention of any grave menace to the peace or tranquillity of India or any part thereof.

(*b*) The safeguarding of the financial stability and credit of the Federal Government.

(*c*) The safeguarding of the legitimate interests of the minorities.

(*d*) The securing to, and to the dependents of, persons who are or have been members of the public services of any rights provided or preserved for them by or under the Act and the safeguarding of their legitimate interests.

(*e*) The prevention of discrimination.

(*f*) The prevention of action which would subject goods of United Kingdom or Burmese origin imported into India to discriminatory or penal treatment.

(*g*) The protection of the rights of any Indian State and the rights and dignity of the rulers thereof.

(*h*) The securing that the due discharge of his functions with respect to matters with respect to which he is by, or under, the Act required to act in his discretion, or to exercise his individual judgment, is not prejudiced or impeded by any course of action taken with respect to any other matter.

The Federal Legislature.—The Federal Legislature will consist of two chambers: the Council of State and the Federal Assembly. The Council of State will consist of not more than 104 representatives of the federating Indian States and of 156 representatives of British India elected by the people, of whom six will be chosen by the Governor-General in his discretion. The Council of State is to be a permanent body with a provision that a third of its members should retire every third year. The representatives of British India are to be chosen on a communal basis, while those of the States will be appointed by the Rulers of the States concerned in accordance with the relative rank and importance of the State. (*See table at the end of this chapter for the composition of the British Indian half of the Council of State*)

The Federal Assembly will consist of not more than 125 representatives of the federating Indian States and of 250 representatives of British India mostly elected by the Provincial Legislatures by the lower House of the Provincial Legislatures wherever there are two Houses.

The Federal Assembly is to continue for five years from the date appointed for their first meeting after the expiration of which it will be dissolved. The distribution of seats here will also be on a communal basis. Thus, the Hindu, Muslim and Sikh seats will be filled by the representatives of those communities in the Provincial Assemblies voting separately for a prescribed number of communal seats. Depressed Classes will have representation from among the Hindu seats. Besides these three main groups, Europeans, Anglo-Indians, Indian Christians, representatives of commerce and industry, landholders, representatives of labour and women will have seats. (*See table at the end of this chapter for the composition of the British Indian half of the Federal Assembly.*)

An "annual financial statement" setting out the estimated receipts and expenditure of the Federation in respect of every financial year will be laid before both Chambers of the Federal Legislature. The estimates of expenditure will show separately the sums required to meet expenditure charged upon the revenues of the Federation, and the sums required to meet other expenditure proposed to be made from the revenues of the Federation. Items falling under the former category will not be submitted to the vote of the Legislature. With a view to the observance of the well-recognised principle of public finance that no proposal for the imposition of taxation or for the appropriation of public revenues should be made otherwise than on the responsibility of the Executive, it is provided in the Act that no demand for a grant is to be made unless recommended by the Governor-General.

The Federal Legislature alone may make laws upon any federal subject and the Provincial Legislature alone may make laws upon any subject treated as "concurrent"; but in case of conflict Federal legislation shall prevail unless the provincial law has been reserved for the consideration of the Governor-General and has received his assent.

The foregoing is a description of the framework of the Indian Federation as laid down in the Government of India Act. When half of the Indian States, are the basis of population and of representation in the Upper Federal Chamber, have acceded and after both Houses of Parliament have presented an address to His Majesty praying that the Federation may be brought into existence, a Royal Proclamation will give legal effect to the Federation of India.

New Provinces created by the Act.—The creation of a number of autonomous administrative units including two new ones, namely, Sind and Orissa, some of which have in recent years found it very difficult to make both ends meet, and the need for a strong Central Government presented some very difficult financial problems for the framers of the constitution. The allocation of sources of taxation and the settlement of heads of expenditure and debts, not only to enable the provinces progressively to develop but also to provide the Central Government with adequate funds to discharge its All-India responsibilities was the main problem. To secure a satisfactory solution of this problem the expert advice of Sir Otto Niemeyer was sought. His recommendations are summarised elsewhere in this volume.

The Government of India Act also establishes a Statutory Railway authority which will take over the executive authority of the Federation in respect of the regulation, construction, maintenance and operation of railways coming under the jurisdiction of the Federal Government. The powers which the Governor-General possesses of taking action in virtue of special responsibilities and in respect of the reserved subjects extend to the giving of directions to the Railway authority.

The Federal Court. Under the Act a Federal Court is to be established which will consist of a Chief Justice of India and such number of other Judges as His Majesty may deem necessary. The Federal Court will ordinarily sit in Delhi. It will have an original jurisdiction and an appellate jurisdiction the latter to appeals from High Courts in British India and in Federated States. Its original jurisdiction will extend to any dispute between any two or more of the following, namely, the Federation, any of the Provinces and any of the Federated States. Provision is also made for an appeal to the Judicial Committee of the Privy Council from a decision of the Federal Court.

The Act abolishes the Council of the Secretary of State for India and makes him a Minister of the Crown individually responsible for the exercise of all authority vested in the Crown in relation to the affairs of India. He will, however, continue to be a member of the Cabinet and of Parliament, to which bodies he will be responsible for his actions.

Provincial Constitutions.—As far as the provincial part of the Act is concerned, there are eleven Governors' provinces, namely, Madras, Bombay, Bengal, the United Provinces, the Punjab, Bihar, the Central Provinces and Berar, Assam, the N. W. F. Province, Orissa and Sind, with power to the Crown by Order-in-Council to create, if deemed necessary, a new Province, increase or diminish the area of any Province or alter the boundaries of any Province. The Provincial Executive is similar to that of the Federation in form.

In addition to the Governors' Provinces there are the following Chief Commissioners' Provinces: British Baluchistan, Delhi, Ajmer-Merwara, Coorg, the Andaman and Nicobar Islands which are now under Japanese occupation) the area known as Panth Piplida and such other Chief Commissioners' Provinces as may be created under the Act which will be administered by the Governor-General acting through a Chief Commissioner to be appointed by him.

The Provinces of Madras, Bombay, Bengal, the United Provinces, Bihar and Assam have two Chambers, Upper and Lower, namely, the Legislative Council and the Legislative Assembly, while the others have only one chamber, the Legislative Assembly. Representation in the Legislative Assembly is by separate electorates for each community based on the provisions of the Communal Award as modified by the Poona Pact of September 25, 1932, under which a number of seats out of the seats classified as general seats are reserved to the Depressed Classes. The life of the Provincial Legislature is the same as that of the Federal.

In provinces with bi-cameral legislatures the Upper House will see that the Lower House does not indulge in hasty and ill-conceived legislation due to the temporary majority of any party. But the deliberations of the Upper House will also be subject to examination by the Lower House.

While there are no nominated members and no officials in the Assembly all members of the Lower House are elected the Governor has the right to nominate some seats in the Provincial Council wherever one exists. (*See tables at the end of this Chapter for the Composition of the Provincial Councils and Provincial Assemblies.*)

Franchise. The constitution sets out the qualifications of electors. There are certain provisions of a general nature applicable to all Provinces while particular Provinces are dealt with separately. In some cases the payment of [illegible] is the qualification. The new constitution has extended the existing franchise [illegible] of the total population of British India. The Acts of 1915 and 1919 provided an electorate of approximately 3 per cent. of the total population, the franchise based mainly on a property qualification. Under the reformed constitution women have a much wider franchise, over 6,000,000 women voters as compared with 315,000 provided by the acts of 1915 and 1919. The Act of 1935 secures representation for women, for the Depressed Classes, for industrial labour and for special interests and for the bulk of the small landholders, small cultivators, urban ratepayers as well as a substantial section of the poorer classes.

Powers of Provincial Governments.—Under the old constitution the Provinces had no original or independent powers. The local Governments were under the superintendence,

direction and control of the Governor-General-in-Council and the Secretary of State for India. The first step which the new constitution took was to create provinces with independence of their own and to assign to them a certain exclusive share of the activities of Government. All subjects have been transferred to the control of the legislature. The subjects which are classified as provincial are as indicated above, exclusively dealt with by the Provincial Government which have power to make laws for peace and good government. There are no more "reserved" subjects. All subjects are "transferred." The administration of all these subjects have passed from the bureaucracy to the control of Ministers responsible to the legislature. Such subjects include public order, courts, police, prisons, education, health and sanitation, public works, agriculture, forests, land revenue, excise, tolls, unemployment and certain classes of taxation.

Generally the Ministers are entrusted with the administration of their own departments. Under the old constitution they were merely advisers of the Governor. Under the new Constitution they are effective executives Only in those spheres where the Governor retains a special responsibility does he have the right to act independently of the Ministers should he differ from their views. In addition there are a few matters, such as the appointment of Ministers, in which the Governor has the power to exercise his "discretion". In these matters he is not obliged to consult the Ministers at all. But normally such occasions are not frequent.

Both the Upper and Lower Houses have power to initiate legislation except that Money Bills can be initiated in the Lower House only. Should there be a difference of opinion between the two Houses with regard to a Bill the Governor has power to convene a joint session of the two Houses. Any Bill affirmed by the majority in the joint session shall be taken to have been duly passed.

Governors' Powers.—Under the new Constitution the Governor has almost the same special responsibilities as the Governor-General except the one relating to financial stability and credit. The Governor has, notwithstanding the advice of his Ministers, power to take whatever action he thinks necessary for the due discharge of his responsibility for preserving the peace and tranquillity of the Provinces.*

The following tables give the strength and composition of the Federal and Provincial Legislatures under the new constitution :—

THE COUNCIL OF STATE.

Representatives of British India.

Provinces or Community.	Total seats.	General seats.	Seats for scheduled castes.	Sikh seats.	Muslim seats.	Women's seats.

Note.—In Bombay seven of the general seats are to be reserved for Marathas.
In the Punjab one of the Landholders' seats is to be a seat to be filled by a Tumandar.
In Assam and Orissa the seats reserved for women are to be non-communal seats.

GOVERNMENT OF INDIA.

VICEROY AND GOVERNOR-GENERAL OF INDIA.

His Excellency Field Marshal The Right Hon'ble Viscount Wavell of Cyrenaica and Winchester, G.C.B., G.M.S.I., G.M.I.E., C.M.G., M.C., 20th October 1943.

PERSONAL STAFF OF THE GOVERNOR-GENERAL.

Secretary to the Governor-General (Personal) and Private Secretary.—G. E. B. Abell, C.I.E., O.B.E., I.C.S.

Deputy Private Secretary.—I. D. Scott, I.C.S.

Assistant Private Secretary.—Major C. W. B. Rankin, M.B.E.

Assistant Secretary. W. L. Harrison, M.B.E.

Military Secretary.—Col. D. H. Currie, C.B.E., M.C., D.C.M.

Dy. Mily. Secy.—Major C. D. Mackenzie M.B.E., M.C., Seaforth Highlanders.

Assistant Secretary M.S.V.'s Office.—F. R Sanger, M.B.E.

Surgeon.—Lt.-Col. H. Williamson, O.B.E M.B.B.S. (Durham), M.R.C.S. (Eng.), M.R.C.P. (Lond.), F.R.C.S. (Edin.), I.M.S. (Retd.).

Assistant to Surgeon.—Major F. E. Buckler I.M.D. (B.A.).

Comptroller of the Household.—Major D. H Walker, Black Watch.

Aides-de-Camp. Capt. I. H. M. Fitz Roy Coldstream Guards; Capt. J. W. Brooke, 10th Hussars; Capt. J. W. Scott, Grenadier Guards Capt. I. J. Burnaby Atkins, Black Watch.

Indian Aides-de-Camp. Risaldar-Major and Hony. Capt. Muzaffar Khan, Sardar Bahadur, O.B.I., I.A.C.; Risaldar Sher Mohd. Khan, PAVO Cavalry.

Honorary Aides-de-Camp. Rear Admiral A R. Rattray, C.B., C.I.E., R.I.N. Hony. Naval A.D.C.; Major (Hony. Lt.-Col.) P. G. Bray, The Nagpur Rifles, A.F.(I); Lt.-Col. (Hony. Col.) E. P. O'Connor, V.D., Gen. List, A.F. (I), Lt.-Col (Hony. Col.) W. H. Grice, E.D., A.F. (I), Officer Comdg. Calcutta Light Horse; Major (Hony. Lt.-Col.) A. A. Campbell, O.B.E., E.D., Officer Comdg., East Coast Bn., A.F.(I); Lt.-Col. (Hony. Col.) L. S. Addard, A.F.(I); Lt.-Col. (Hony. Col.) P. S. Clarke, M.C., V.D., B.B. & C.I. Rly. Regt. A.F.(I); Lt.-Col. (Hony. Col.) R. B. Fairclough, M.C., E.D., Genl. List, A.F. (I); Lt.-Col. (Hony. Col.) W. A. Bell, E.D., I.F. Genl. List, A.F.(I); Lt.-Col. (Hony. Col.) J. P. Baggs, E.D., Comdg. The Calcutta and Presidency Bn., C.F. (I); Maj. (Hon. Lt.-Col.) D. MacAulay, E.D., O.C., Eastern Bengal Railway Bn. A.F.(I); Lt.-Col. (Hony. Col.) A. E. Ingledew, D.S.M., The Chota Nagpur Regt., A. F. (I).

Honorary Indian Aides-de-Camp.—V. N. Parameswaran Pillai, Maj.-Genl. in, and G.O.C., Travancore State Forces; Syed Ahmed-el-Edroos Bahadur, C.I.E., O.B.I., Major-General and Commander, H.E.H. the Nizam's Regular Forces; Shiv Nath Misra, Sardar Bahadur O.B.E., O.B.I., Lt.-Col. in and Staff Officer, Gwalior State Forces; Balwant Singh Sindhu, Bahadur, C.B.E., I.S.O., O.B.I., Brig. in, and Brigade Commander, Patiala Infantry; Subedar-Major (Hony. Capt.) Daljat Singh, Sardar Bahadur, O.B.I., I.O.M., M.L.A., late 9th Jat Regiment; Subedar-Major (Hony. Captain) Gulab Shah, Sardar Bahadur, O.B.I., late 3/10th Baluch Regiment; Risaldar-Major (Hony. Captain) Jaffar Hussain, late Governor-General's Bodyguard; Subedar-Major (Hony. Captain) Bhikham Singh, Sardar Bahadur, M.B.E., M.C., O.B.I., I.D.S.M., late 12th Frontier Force Regiment; Risaldar-Major (Hony. Capt.) Mehtab Singh, late Governor-General's Bodyguard, Risaldar-Major (Hony. Captain) Mohammad Zaman, Bahadur, O.B.I., late Probyn's Horse; Risaldar-Major and Hony. Captain Muzaffar Khan, late Governor-General's Bodyguard; Risaldar Major (Hony. Capt.) Lall Singh, Sardar Bahadur, M.B.E. O.B.I., late Probyn's Horse; Risaldar Major (Hony. Capt.) Raghbir Singh, Sardar Bahadur, M.B.I., O.B.I., I.D.S.M., I.A.

Honorary Surgeons.—Col. (T./Brigadier) H. G. Winter, M.C., late R.A.M.C.; Lt.-Col. (T./Col.) (I. Brig.) F. Harris, C.B.E., M.C., M.B., R.A.M.C.; Lt.-Col. (T./Col.) G. Moulson, F.R.C.S. (Edin.), R.A.M.C.; Col. V. N. Agate, M.B.B.S. (Bom.), L.M. (Dub.), I.M.S.; Col. N. Briggs, M.R.C.S. (Eng.), L.R.C.P. (Lond.), D.P.H. (Eng.), I.M.S.; A./Maj.-Genl. S. Arnott, C.B.E., D.S.O., M.D., late I.A.M.C., Brit. Service; Col. E. Cotter, C.I.E., M.B., B.Ch. (N.U.I.), D.P.H. (Lond.), I.M.S.; Col. R. A. [illegible], O.B.E., M.R.C.S., M.R.C.P., I.M.S. Col. D. Clyde, C.I.E., M.D. (Glas.), D.P.H. (Eng.), I.M.S., Col. F. C. Chandler, M.C., late R.A.M.C., Brit. Service.

Honorary Civil Surgeons.—Dr. P. Kutumbayya, B.A., M.D. (Mad.), M.R.C.P. (Lond.); Khan Bahadur Dr. Mohd. Abdul Hamid, M.B.B.S. (Alld.), M.D. (Luck.), M.R.C.P. (Lond.); Dr. D. D. Variava, O.B.E., M.B.B.S (Bom.), F.R.C.S.E.; Rai Bahadur Dr. Prem Nath Dogra, M.B.B.S. (Pb.), T.D.D. (Wales).

MEMBERS OF THE INTERIM GOVERNMENT.

The Hon'ble Pandit Jawaharlal Nehru, Vice-President and Member, (External Affairs and Commonwealth Relations).

The Hon'ble Sardar Vallabhbhai Patel, (Home and Information and Broadcasting).

The Hon'ble Sardar Baldev Singh, (Defence).

The Hon'ble Dr. Rajendra Prasad, (Food and Agriculture).

The Hon'ble Mr Liaquat Ali Khan, (Finance).

The Hon'ble Dr. John Matthai, (Industries and Supplies).

The Hon'ble Mr. C. Rajagopalachari, (Education and Arts).

The Hon'ble Mr. Asaf Ali, (Transport and Railways).

The Hon'ble Mr Jagjivan Ram, (Labour).

The Hon'ble Mr. C. H. Bhabha, (Works, Mines and Power).

The Hon'ble Mr. I. I. Chundrigar, (Commerce).

The Hon'ble Mr. Ghazanfar Ali Khan, (Health).

The Hon'ble Mr. Abdur Rab Nishtar, (Communications).

The Hon'ble Mr. Jogendra Nath Mandal, (Legislative).

SECRETARIAT OF THE GOVERNOR GENERAL.

(PERSONAL).

Secretary to the Governor-General (Personal), G. E. B. Abell, C.I.E., O.B.E., I.C.S.

Dy. Private Secretary, I. D. Scott, I.C.S.

Asst. Private Secretary, Major C. W. B. Rankin, M.B.E.

Asstt. Secretary, W. L. Harrison, M.B.E.

(PUBLIC)

Secretary, Y. A. Godbole, C.S.I., C.I.E., I.C.S.
Under Secretary, C. P. Scott, I.C.S.

(REFORMS).

Reforms Commissioner, Rao Bahadur V. P. Menon, C.S.I., C.I.E.
Dy. Secy., E. C. Gayner, M.B.E.
Under Secretary, C. Ganesan.
Asstt. Secretary, P. S. Subramanian.

CABINET SECRETARIAT.

Secretary, Sir Eric Coates, C.S.I., C.I.E., I.C.S.
Joint Secretary, H. M. Patel, C.I.E., I.C.S.
Establishment Officer, Sir Alan Lloyd, C.S.I., C.I.E.
Deputy Secretary (Military), Brig. H. L. Wyndham, D.S.O.
Deputy Secretary (Civil), Osman Ali, I.C.S.
Under Secretary (Civil), Wazir Ali.

Under Secretaries (Military), Maj. G. G. Bewoor and Maj. L. B. O. Tugwell.
Asstt. Secretary, E. C. Donoghue.
W. A. C (I) Staff Officer, S/Comdr. G. G. Carroll.
Supdts., Rai Sahib Durga Pershad Mathur and Hari Krishna Tandon.

SECRETARIAT.

DEPARTMENT OF EDUCATION.

Member-in-Charge, The Hon'ble Mr. C. Rajagopalachari.
Secretary, Sir John Sargent, C.I.E., M.A., D.Litt.
Deputy Secretary, Dr. D. M. Sen, O.B.E., M.A., Ph.D.
Deputy Educational Advisers, Ashfaque Hussain, B.A. (Oxon.), Bar-at-Law; Dr. B. K. Byram, M.A., Ph.D.; Dr. S. R. Sen Gupta, B.Sc., Ph.D., A.M.I.E.
Officer on Special Duty, Mrs. K. Taimni, B.A., T.D. (Lond.).
Assistant Secretaries, Ram Lal, M.A.; H. S. Verma; Som Datt.
Secretary, University Grants Committee, Dr. P. Narasimhayya, M.A., Ph.D.
Assistant Educational Advisers, Dr. Akhtar Husain, D.Litt.; Dr. A. M. D'Rozario, M.Sc., Ph.D.; Dr. Imdad Hussain, M.A., Ph.D.; G. K. Chandiramani, B.E., A.M.I.E. (India); A. M. Ashraf, M.A.
Private Secy. to the Hon. Member, Dr. M. H. Rehman, B.A. (Hons.), D. Litt.
Education Officers, Mrs. Prema Johari, M.A., L.T., T.D.; Miss Dorothy Bose, M.A. (Lond.); K. P. Lukose, M.A., (Oxon.); Dr. N. S. Junankar, M.A., Ph.D.; K. L. Joshi, M.A.; P. Gangulee, M.A.; Dr. G. F. Lakhani, B.A., Ph.D.; K. B. Krishna Rao, B.A., B.E., M.I.E.; B. S. Kesavan, M.A. (Lond.)
Personal Asst. Secy., T. S. Krishna Moorthy, M.Sc.
Assistant Education Officers, Nauhria Ram, M.A.; Abdul Qaiyum, M.A.; Muzamil Ali, M.A.; B. B. Sen, M.Sc.; S. P. Dutta, B.Mech.; D. K. Hingorani, M.A., T.D., Rai Sahib Thakar Das Sindhwani; S. A. Rizavi, B.A. (Hons.).

MEMBERS OF THE COUNCIL OF STATE.

President :—The Honourable Sir Maneckji Byramji Dadabhoy, K.C.S.I., K.C.I.E., LL.D., BAR-AT-LAW.

Nominated - Including the President- (26).

(a) *Officials* :—

The Hon'ble Mr. Abdur Rab Nishtar; The Hon'ble Shri Rajendra Prasad ; The Hon'ble Mr. Ghazanfar Ali Khan ; The Hon'ble Sardar Baldev Singh ; The Hon'ble Mr. C. H. Bhabha ; His Excellency Field-Marshal Sir Claude John Eyre Auchinleck, G.C.B., G.C.I.E., C.B., C.S.I., D.S.O., O.B.E., A.D.C. ; The Hon'ble Mr. Y. N. Sukthanker, C.I.E. ; The Hon'ble Sir Eric Conran Smith, K.C.I.E., C.S.I. ; The Hon'ble Mr. K. V. K. Sundaram ; The Hon'ble Mr. Shamaldhari Lal, C.I.E. ; The Hon'ble Mr. D. D. Warren, C.I.E., M.C. ; The Hon'ble Mr. A. V. Pai, C.I.E., O.B.E. ; The Hon'ble Dr. D. M. Sen, O.B.E. ; The Hon'ble Sir Cyril Edgar Jones, K.C.I.E., C.S.I. ; The Hon'ble Mr. M. W. M. Yeatts, C.S.I.

(b) *Non-Officials*— (13).

The Hon'ble Sir David Devadoss ; The Hon'ble Diwan Bahadur Sir K. Ramunni Menon ; The Hon'ble Sir Rahimtoola Chinoy ; The Hon'ble Sir Josna Ghosal, C.S.I., C.I.E. ; The Hon'ble Rai Bahadur Sir Satya Charan Mukherji, C.B.E. ; The Hon'ble Mr. Mohendra Lal Das ; The Hon'ble Raja Charanjit Singh ; The Hon'ble Mr. Khurshid Ali Khan, C.I.E., M.B.E. ; The Hon'ble Sir Maneckji Byramji Dadabhoy, K.C.S.I., K.C.I.E., LL.D., BAR-AT-LAW (President) ; The Hon'ble Brigadier Sir S. Hissam-ud-din Bahadur, C.I.E.; The Hon'ble Sardar Bahadur Sir Sobha Singh, O.B.E. ; The Hon'ble Sardar Bahadur Nawab Assadullah Khan Raisani, C.I.E.

Elected-Non-Officials—32.

The Hon'ble Sir N. Gopalaswami Ayyangar, C.S.I., C.I.E. ; The Hon'ble Mr. M. Ct. M. Chidambaram Chettyar ; The Hon'ble Mr. M. Thirumala Row ; The Hon'ble Saiyad Mohamed Padshah Sahib Bahadur ; The Hon'ble Mr. Govindlal Shivlal Motilal ; The Hon'ble Sir Shantidas Askuran ; The Hon'ble Sir Suleman Cassum Haji Mitha, C.I.E., J.P. ; The Hon'ble Mr. Manockji Nadirshaw Dalal ; The Hon'ble Khan Bahadur Ali Buksh Mohamed Hussain, C.B.E. ; The Hon'ble Mr. J. M. B. Gibbons ; The Hon'ble Rai Bahadur Satyendra Kumar Das ; The Hon'ble Mr. Surpat Singh ; The Hon'ble Mr. Susil Kumar Roy Chowdhury ; The Hon'ble Moulvi A. Z. M. Razai Karim ; The Hon'ble Abdool Razak Hajee Abdool Suttar ; The Hon'ble Raja Yuveraj Dutta Singh of Oel & Kaimarah; The Hon'ble Pandit Hirday Nath Kunzru ; The Hon'ble Haji Syed Mohamed Hussain ; The Hon'ble Chaudhri Niamatullah ; The Hon'ble Sardar Sir Buta Singh, O.B.E. ; The Hon'ble Khan Bahadur Chaudhri Attaullah Khan Tarar ; The Hon'ble Maharjadhiraja Sir Kameshwar Singh, K.C.I.E. of Darbhanga ; The Hon'ble Rai Bahadur Sri Narain Mahta ; The Hon'ble Mr. Nikunja Kishore Das ; The Hon'ble Mr. Hossain Imam ; The Hon'ble Mr. V. V. Kalikar ; The Hon'ble Mr. Brijlal Nandlal Biyani ; The Hon'ble Mr. Prakash Narain Sapru ; The Hon'ble Flight Lieut. Rup Chand ; The Hon'ble Khan Bahadur Keramat Ali ; The Hon'ble Mrs. Radha Bai Subbarayan ; The Hon'ble Mr. H. D. Townend.

The Province of Assam which, as shown on the map, covers a total area of 67,334 sq. miles, excluding Tribal territory, encloses Indian States with an extent of 12,320 sq. miles, deducting which the nett area of British territory is 55,014 sq. miles. It is formed of the Assam or Brahmaputra valley, and the Surma valley and portions of the hills which surround these valleys on the North, East and South or separate the valleys from one another. To the West lie the plains of Bengal.

Population.—*British territory.*—The total population of the Province (British territory) in 1941 was 10,204,733, of which nearly 4½ millions were Hindus, over 3½ millions Muslims, 2½ millions belonged to tribal peoples 43 per cent. of the population were recorded as speaking Bengali, 21 per cent. Assamese: other languages spoken in the province are Hindi, Uriya, Mundari, Nepali and a great variety of languages classified under the general heading of the Tibeto-Burman languages.

Agricultural Products.—The river basins are naturally fertile and present in the main few difficulties to the cultivator. Rice is the staple food crop, nearly 5,550,002 acres in 1944-45 being devoted to this crop. Rainfall being high, the problem in general is to dispose of the surplus water and to control the action of floods rather than irrigation in the usual sense. Tea and jute are the most important crops grown for export. The area under tea consists of 442,392 acres in 1944-45. About 52,703 acres are devoted to sugarcane. A good deal of short staple cotton is grown in the hills.

Meteorological Conditions.—Rainfall is everywhere abundant, and ranged from 51·22 to 284·07 inches in 1938, leaving aside the highest recorded rainfall in this part of India which was the maximum reached at Cherrapunji in the Khasi Hills (569·50); this is one of the wettest places in the world. Temperatures are moderate. Earthquakes of considerable severity have taken place, by far the worst being that which occurred in 1897.

Accounts of the petroleum occurrences in Assam have been published in the memoirs of the Geological Survey of India. The petroleum localities in this province are confined to a curved belt of country along the basins of the Brahmaputra and the Surma. This belt is traceable over a distance of some 800 miles from N. E. Assam through Cachar and Chittagong to the Arakan coast, where it has a S. S. E. trend.

Mines and Minerals.—The only minerals in Assam worked on a commercial scale are coal, limestone and petroleum oil. The most extensive coal measures hitherto worked are in the Naga Hills and the Lakhimpur districts. Important deposits also exist in the Garo Hills. Limestone is quarried in the Khasi and Jaintia Hills. Petroleum is worked only in Lakhimpur and Cachar, and has only been refined in Lakhimpur.

Manufactures and Trade.—Silk is manufactured in the Assam valley, also cotton weaving as a cottage industry, women playing a predominent part. In this valley there are no caste weavers but in the Surma valley they carry on a brisk manufacture on commercial scale. These handloom products find ready market on account of great scarcity of mill made goods. Tea is of course the main industry, but there is a large petroleum mining concern, and also some coal mines. There is Parker Cement Factory at Sylhet and a big match manufacturing concern at Dhubri. Boat-building, brass and metal and earthenwares, and limestone burning, cane and bamboo work, furniture making, sola hat, smithy, brick making, mustard oil pressing, rice and saw mills and other industries but agriculture employs about 80 per cent. of the population. Assam carries on a considerable trade with the adjoining hill tribes and countries.

Communications.—Much of the trade of Assam is carried by river. The extensive system of rivers makes the province less dependent upon roads than other parts of India but there has been much advance in recent years in road communication. A fleet of steamers maintained by the India General Navigation Company and the Rivers Steam Navigation Company plies on the rivers in both Valleys. An alternate day service of passenger-boats runs between Goalundo and Dibrugarh. There are two trunk roads on either bank of the Brahmaputra most of which are metalled or gravelled. There are excellent metalled roads from Shillong to Gauhati, Shillong to Sylhet, Shillong to Cherrapunji, and also between Dimapur, on the Bengal & Assam Railway (A.B. zone) and Imphal, the capital of the Manipur State. The Government of Assam had in 1928 carried out a considerable programme of road improvement and another programme which aimed at the improvement of nearly 300 miles of road either by metalling or gravelling and the construction of 12 big bridges is complete. In September, 1937, a further road improvement programme totalling Rs. 1,05,25,000 was drawn up, from which 22 schemes amounting to Rs. 41,11,054 were selected as a priority class. The Government of India have approved a programme under which 15 at these priority class schemes amounting to Rs. 32,00,000 is being financed from the Road Fund. The work on some of these projects is already completed. Besides, the Government of India have asked the Government of Assam to prepare another road improvement programme totalling Rs. 35 lacs. In addition to the above the Government of Assam have decided to spend Rs. 4,23,000 out of the Provincial Motor Taxation Road Fund on the improvement of secondary or feeder roads. Several such roads have already been improved. *Kutcha* roads are being maintained by means of mechanical plant which has proved successful in maintaining, throughout the year, a surface fit for motor vehicles. Motor traffic has increased on all sides and the demands for better roads have been insistent. The open mileage of railway has also shown a steady improvement and several branch lines to the Bengal Assam Railway (A.B. zone) system have been added in recent years. The main Bengal Assam Railway (A.B. zone) line runs from Chittagong Port, in Bengal, through the North Cachar Hills to Tinsukia, a station on the Dibru-Sadiya Railway, and connects the Surma and Brahmaputra Valleys. A branch of the line runs from Badarpur to Silchar at the Eastern end of the Surma Valley and another runs west down the Assam Valley from Lumding to Pandu where it effects a junction with the Bengal Assam Railway (A.B. zone). The Bengal Assam Railway (E.B. zone) connects Assam with the Bengal system *via* the Valley of the Brahmaputra. Railhead is now at Rangapara north of Tezpur. Both Assam Bengal Rly. and Eastern Bengal Rly. have been amalgamated from 1-4-42 and have been named Bengal Assam Rly.

THE FINANCES OF ASSAM.

In common with the other Provinces of India, Assam secured substantial financial autonomy under the Reform Act of 1935. The present financial position for 1946-47 is set out in the following table :—

Administration.—The province of Assam was originally formed in 1874 in order to relieve the Lieutenant-Governor of Bengal of part of the administration of the huge territory then under him. In 1905, as the result of further deliberations, it was decided to add to the small Province of Assam the eastern portion of its unwieldy neighbour and to consolidate those territories under a Lieutenant-Governor. The Province of Eastern Bengal and Assam as then constituted was again broken up on the 1st of April, 1912; the Eastern Bengal Districts were united with the Bengal Commissionerships of Burdwan and the Presidency to form the Presidency of Bengal under a Governor-in-Council, Bihar, Chota-Nagpur and Orissa were formed into a separate province, while the old Province of Assam was re-constituted under a Chief Commissioner.

Under the Indian Reforms Act of 1919 the Province was raised in status to that of administration by a Governor-in-Council and was thereby ranked with the older major provinces of India.

The capital is Shillong, partly in British and partly in Khasi State territory, which has for a number of years been growing rapidly and is now in parts over-crowded. The town has grown up on somewhat rustic lines in very beautiful country on the slopes of the Shillong Range which rises above it to a height of 6,450 feet above the sea. It was destroyed in the earthquake of 1897 and has been rebuilt with methods of construction more fitted to withstand the shocks of earthquake.

GOVERNOR.

His Excellency Sir ANDREW GOURLAY CLOW, K.C.S.I., C.I.E., I.C.S.

Sir Henry J. Knight, K.C.S.I., C.I.E., I.C.S. (Offg.)

PERSONAL STAFF OF HIS EXCELLENCY THE GOVERNOR.

Secretary, R. W. Godfrey, I.P.

Asstt. to the Secretary to the Governor of Assam, Rai Saheb Dineen Ch. Das.

Military Secretary, Major T. B. Alder.

Aide-de-Camp, Lieut. R. C. N. Clapham.

Honorary Aide-de-Camp, Major T. E. Holbrook.

Honorary Aide-de-Camp, Lt.-Col. J. Turnbull, M.C., E.D.

Honorary Aide-de-Camp, Sardar Bahadur Subedar-Major Nainsing Mall, Bahadur, I.D.S.M., O.B.I.

Honorary Aide-de-Camp, Subedar Sundar Sing Chhatri.

COUNCIL OF MINISTERS.

Hon'ble Srijut Gopinath Bardoloi, M.A., B.L.

Hon'ble Mr. Basanta Kumar Das, B.L.

Hon'ble Srijut Bishnu Ram Medhi, M.Sc., B.L.

Hon'ble Maulavi Abdul Matlib Mazumdar, M.A., B.L.

Hon'ble Mr. Baidyanath Mookherjee, B.A.

Hon'ble Rev. J. J. M. Nichols-Roy, B.A.

Hon'ble Srijut Rammath Das, B.L.

Hon'ble Mr. Debeswar Sarmah, B.L., Speaker.

Mrs. Romily Khongmen, B.A., Dy. Speaker.

SECRETARIES, ETC., TO GOVERNMENT.

Chief Secretary, Sir Harlod Dennehy, C.S.I., C.I.E., I.C.S.

Secretary to Government, Finance and Revenue Departments, A. G. Patton, C.I.E., I.C.S.

Secretary to Government, Education and Local Self-Government Departments, A.H.S. Fletcher, M.B.E., I.C.S.

Secretary to Government in the Judicial Department, Legislative Department and Secretary to the Assam Legislative Council, S. Sen, I.C.S.

Secretary to Government in the Department of Supply, S. K. Datta, I.C.S.

Secretary to the Government in the Finance and Revenue Departments, S. J. Duncan.

Deputy Assistant Secretary to Government, Finance Department, Rai Sahib Dilip Chandra Das.

Deputy Secretary to Government in the Education and Local Self-Government Departments, C. K. Bhuyan, B.Sc., B.A., B.L.

Secretary to the Legislative Assembly, Annada Kanta Barua, B.A.

Secretary to Government in the Public Works Department, F. E. Cormack, B.Sc., C.I.E., I.S.E. Also Chief Engineer.

Joint Secretary to Government in the Home Department, R. C. R. Cumming, I.P.

Under Secretary to Government in the Departments, under the Chief Secretary, N. K. Rustomji, I.C.S.

Under Secretary to Government in the Education and Local Self-Government Departments, Anwar Hussain, B.A., A.C.S.

Director of Publicity, T. T. S. Hayley, I.C.S., Capt. R. G. St. Dowse (Offg.).

Under Secretary to Government in the P.W.D., Rai Sahib Jogesh Chandra Das, also Asst. Chief Engineer.

Additional Asst. Chief Engineer, Rai Sahib S. P. Choudhry, B.E.

Secretary Provincial Transport Authority, K. R. Chaudhuri, I.P.

Parliamentary Secretary, Maulavi Abdur Rashid, M.L.A.

Accounts Officer under the Government of Assam in the Department of Supply, Rai Sahib K. M. De.

Deputy Director of Supply (Accts.), J. K. Dutta Roy.

Under Secretary to Govt. in the L.S.G. (Industries—Textile) Dept., N. N. Das, A.C.S.

Under Secretary to the Govt. in the Department of Supply (Ex officio), Jnanendra Kumar Dutta. Also Asst. Director of Supply.

Registrar, Assam Secretariat (Civil), Ismail Ali Choudhuri.

Secretary to Govt., Planning and Development, M. H. Hussain, I.C.S.

Asstt. Secy. to Govt., Planning and Development, C. Isvot.

Registrar, Assam Secretariat (P.W.D.), K. R. De.

ASSAM REVENUE TRIBUNAL.

Member, S. P. Dead, C.I.E., I.C.S.

ASSAM PUBLIC SERVICE COMMISSION.

Chairman, Sir Keith Cantlie, C.I.E., I.C.S. (Retd.).

Members, Rai Bahadur Heramba Prasad Barua, M.A., B.L.; Majduddin Ahmad, M.A.

Superintendent, S. C. Bhattacharyya, B.A.

Advocate-General, Pareshlal Shome, B.L.

HEADS OF DEPARTMENTS.

Director of Land Records & Surveys, I. G. Registration etc., R. R. Dias, A.C.S.

Director of Industries and Registrar of Co-operative Society & Village Authorities, M. Mitra, I.C.S.

ASSAM LEGISLATIVE COUNCIL.

President.—The Hon'ble Mrs. Zubeida Ataur Rahman.

Deputy President.—Monomohon Chaudhury

ELECTED MEMBERS.

Rai Bahadur Apurba Kumar Ghosh, M.A., B.L. (*Goalpara General*); Satyendra Mohon Lahiri, M.A., B.L. (*Hills General*); Kamala Prasad Agarwala, B.L. (*Darrang General*); Rai Bahadur Joharmall Agarwalla (*Nowgong General*), Krishna Nath Sarma (*Sibsagar General*); Rai Bahadur Rameshwarlall Saharia (*Lakhimpur General*); Rai Bahadur Hem Chandra Dutt, B.L. (*Cachar General*); Upendra Nath Navis (*Kamrup General*); Monomohon Chaudhury (*Sylhet West General*); Benode Lal Das (*Sylhet East General*); Khan Sahib Maulavi Abul Khair (*Lower Assam Valley Muhammadan*); Khan Bahadur Maulavi Rukunuddin Ahmed, B.L. (*Upper Assam Valley Muhammadan*); Maulavi Abdul Mayeed Choudhury (*Surma Valley East Muhammadan*); Khan Bahadur Maulavi Gous Uddin Ahmed Chaudhury (*Surma Valley Central Muhammadan*); Dewan Maulavi Md Azrat Chaudhury (*Surma Valley North-West Muhammadan*); Khan Bahadur Maulavi Abdur Rahim Chaudhury, B.L. (*Surma Valley South-West Muhammadan*); W. R. Gawthrop (*Assam Valley European*); H. Emblen (*Surma Valley European*).

NOMINATED MEMBERS.

The Hon'ble Mrs. Zubeida Ataur Rahman; Jogendranath Gohain, B.L.; Romesh Chandra Das, M.A., B.L.; Bhimbor Deori, B.L.

The Bengal Province.

The Province of Bengal comprises the Burdwan and Presidency Divisions, the district of Darjeeling and the Rajshahi, Dacca and Chittagong Divisions. The area of the Province is 82,876 square miles, with a population of 61,460,377. Included in the geographical unit of Bengal are the Indian States of Cooch Behar and Tripura, which are in direct political relationship with the Government of India. The area of the British territory is 77,442 square miles. The general range of the country is very low, and a great fertile plain extends southward from Jalpaiguri to the forests and swamps known as the Sunderbans, which lie between the area of cultivation and the Bay of Bengal.

The People.

Of the inhabitants of the Province 33,371,688 or 54·3 per cent. are Mahomedans and 25,801,724 Hindus. These two major religions embrace all but 3·72 per cent. of the population.

Bengali is spoken by ninety-two per cent. of the population of the Province and Hindi and Urdu by 3·7 per cent.

Industries.

According to the census of 1941, 131,000 persons were engaged in agriculture, pasture and raising dairy produce while 1,676,000 persons were engaged in the cultivation of special crops. The area under jute in 1943 was 2,146,000 acres against 3,356,000 in the previous year. Bengal is the most important rice-producing area in Northern India, and it is computed that the 29,439,800 acres devoted to this crop represents some 88 per cent. of the total area under food crops (excluding tea) of the Province. Other crops include barley, wheat, pulses and oil-seeds. Sugar is produced both from the sugar-cane and from the date-palm, and tobacco is grown for local consumption in nearly every district of Bengal. The area under tea in 1943-44 was 199,900 acres. There were 311 plantations employing a daily average of just under 200,000 labourers.

Manufacture and Trade.—Agriculture is the principal industry of Bengal. In addition to this there are the jute mill industry, the tea industry (confined to the districts of Jalpaiguri including the Dooars and Darjeeling), the coal mining industry and the sugar industry. The jute mills in and around Calcutta and in the riparian tracts of the districts of Howrah and Hooghly constitute the principal manufacturing industry of the Province.

The jute industry has suffered a succession of ups and downs since it showed the first signs of improvement in 1934-35 after the succession of bad years which started in 1928-29 as a result of excessive production both of raw jute and the manufactures therefrom. Voluntary restriction of growing was the cause of improvement, but it did not last for long and coincided with a falling off in demand for jute goods so that the mills found themselves overstocked in the next few years. Working hours in mills were then restricted under the Bengal Jute Ordinance of 1938 and there was an easing of the crisis. Prior to the outbreak of war raw jute prices showed considerable fluctuation and the demand for jute goods also increased; so the Ordinance was withdrawn, only to be replaced soon after by a voluntary restriction agreement among the mills as wartime shipping restrictions made themselves felt and first European, and later Far Eastern, markets were lost. Once again raw jute production started to exceed demand, and only a further agreement between the mills and the Bengal Government, whereby the former undertook to purchase a stipulated quantity at minimum rates, and a slight increase in demand for Middle East operations during 1941 helped to stave off another difficult situation. On the whole 1942 was a more prosperous year despite the difficulties of transport and increasing war demands on the industry, but in 1943 two other problems were added to these—food for labour and shortage of coal, while the increasing value of food crops also lead to short sowing of jute. Large orders from America helped to offset the otherwise poor year which might have been expected, but it was apparent that some form of rationalisation or still more agreements would be necessary to restore the balance. The Jute industry played a big role in World War II—all mills working to full capacity. Post-War prospects are good, the first quarter of 1946 brought large orders to Bengal.

The trade of Bengal during 1939-40 since when the publication of figures has been stopped, showed an improvement over the previous year. The value of Bengal's exports during this period was almost double that of her imports and was the highest recorded since 1929-30. Imports of private merchandise rose from Rs. 51·39 crores in 1938-39 to Rs. 56·12 crores in 1939-40 while exports increased from Rs. 78·89 crores in 1938-39 to Rs. 105·49 crores in 1939-40. Despite its many uncertainties and difficulties, the year 1939-40 was an exceptionally favourable one for the trade of Bengal. Although no figures are available the war years have undoubtedly been less favourable, though the fact that Bengal has served as a large supply base for India's war effort has served to relieve the situation quite considerably.

Administration.

The present form of administration in Bengal dates from January 1937. In 1912 the Government of the Province underwent an important change, when, in accordance with the Proclamation of His Majesty the King-Emperor at Delhi, the Province was raised from the status of a Lieutenant-Governor to that of a Governor-in-Council, thus bringing it into line with the Presidencies of Madras and Bombay. In 1921, under the Reform Scheme, the Local Government was reconstituted, certain of the departments being placed under the control of Ministers appointed from among elected members of the Legislative Council. There were normally four members of the Executive Council in charge of the "reserved subjects," and three Ministers, who were in charge of the "transferred subjects." With the enforcement of the Government of India Act of 1935 on April 1, 1937, complete provincial autonomy came into being. The entire administration vested in the Governor, assisted by a Council of

Ministers holding office during his pleasure but answerable to a wholly elective legislature comprising two houses. Except in regard to his special responsibilities, the Governor corresponds to a constitutional monarch. The services no longer find a place in the legislatures and are subordinate to the Ministers. Dyarchy has disappeared and there is complete responsible Government.

The unit of administration is the District Magistrate and Collector. As Collector he supervises the gathering of the revenue and is the head of all the Departments connected with it, while as District Magistrate he is responsible for the administration of criminal justice in the district. The immediate superior of the District Magistrate is the Divisional Commissioner. Commissioners are the channels of communication between the local officers and the Government. In certain revenue matters they are, in their turn, subject to the Board of Revenue in Calcutta; in other matters they are under the direct control of Government.

Justice.

The administration of justice is entrusted to the High Court of Calcutta, which consists of the Chief Justice (who is a Barrister) and 19 Puisne Judges, including three additional judges who are Barristers, Civilians or Vakils. Below the High Court are the District and Additional Judges, the Small Causes Court and Subordinate Judges and Munsifs. Of these officers, the District and Additional Judges and a certain number of Subordinate Judges are also endowed with the powers of a Criminal Court while the remainder have jurisdiction in Civil matters only. Criminal Justice is administered by the High Court, the Courts of Session and the Courts of the various classes of Magistrates. On its appellate side, the High Court disposes of appeals from the order of a Court of Session, and it also confirms, modifies or annuls sentences of death passed by Sessions Courts. Calcutta has six Stipendiary Presidency Magistrates, including one temporary Additional Magistrate in charge of the Traffic Court. One of the Presidency Magistrates is in charge of the Children's Court and is helped by Hony. Women Magistrates. It has also two Municipal Magistrates and it possesses a Court of Small Causes with Judges who dispose of cases of the class that are usually heard in County Courts in England.

In addition a number of Union Benches and Courts have been established in selected rural areas for the disposal by honorary agency of petty criminal cases and civil disputes.

Local Self-Government.

By Bengal Act III of 1884, and its subsequent amendments, which hitherto regulated municipal bodies in the interior, the powers of Commissioners of municipalities were increased and the elective franchise was extended. Bengal Act III of 1884 was repealed by Act XV of 1932 by which material changes have been introduced, *e.g.*, the franchise of the electors has been further widened, women have been enfranchised, the proportion of elected commissioners has been increased and the term of office of the Commissioners has been extended from three to four years. Municipal expenditure now comprises a large number of objects, including water supply, public works, maintenance of hospitals, dispensaries and educational institutions, veterinary institutions, employment of health officers, vaccinators and sanitary inspectors, the training and employment of female medical practitioners, the provision of model dwelling houses for the working classes, the holding of industrial, sanitary and health exhibitions and the improvement of breed of cattle. The Commissioners also have large powers in regard to the water supply and the regulation of buildings.

The Municipal Government of Calcutta is governed by Act III of 1923. This Act, which replaces Act III of 1899, makes the Corporation paramount in matters relating to municipal administration. The Act provides for the appointment of a Mayor, who replaces the chairman of the old Act, a Deputy Mayor, an Executive Officer, and two Deputy Executive Officers, all elected by the Corporation. The appointments of the Chief Executive Officer and the six other principal officers of the Corporation are subject to the approval of Government. The total number of councillors is 93 with 5 Aldermen elected by the Councillors. Of the 93 seats, 85 are elected, of which 22 are reserved for Muhammadans. Eight of the councillors are nominated by Government and the rest elected by the general or special constituencies. In order to improve the insanitary and congested areas of the city, the Calcutta Improvement Trust has been created with extensive powers. In the *mofussil*, district and local boards exercise considerable powers, with regard to public works, education and medical relief. Latest available statistics show that there are 26 district and 40 local boards, of which 3 District Boards and 1 Local Board are presided over by non-official chairmen. Their finances show receipts totalling over Rs. 145 lakhs and expenditure of over Rs. 124 lakhs per annum.

Bengal Act V of 1919 introduces the new system of self-government by the creation of village authorities vested with the powers and duties necessary for the management of village affairs and entrusted with powers of self-taxation. The new village authority, called the union board, replaces gradually the old chaukidari panchayats and the union committees and deals with the village police, village roads, water supply, sanitation, primary schools and dispensaries. The Act also empowers Government to create out of the members of the union boards, village benches and courts for the trial of petty criminal and civil cases arising within the union. The Act has been extended to all districts in the Province and up to March 1943 5,164 Union Boards were actually constituted. The total income of these bodies during 1944-45 was Rs. 114 lakhs; from receipts for union rates was, however, Rs. 86 lakhs, the total expenditure was Rs. 94 lakhs.

Public Works.

The Public Works Department consists of Public Works and Railway Departments and is under the charge of the Secretary to Government in the Department of Communications and Works and Buildings.

The Public Works Department deals with questions regarding the construction and maintenance of public buildings and also regarding roads, bridges, etc.

The Railway Department deals with questions regarding acquisition of lands required by the several Railways, the alignment of new lines of Railways, and with Tramway projects.

There is a Chief Engineer who is the principal professional adviser to Government.

Marine.

The Marine Department deals with questions connected with the administration of the port of Calcutta and the Government Dockyard, Narayanganj, and inland navigation, including the control and administration of Government launches except the police launches.

Irrigation.

The Irrigation Department deals with irrigation, navigation, flood protection by means of embankments and drainage, the latter including relief from congestion of drainage by regulating the available supplies of water to suit the requirements of agriculture combined with the supply of water for irrigation in cases in which a supply is available.

Police.

The Bengal Police force comprises the Military Police, the District Police and the Railway Police. The Bengal Police are under the control of the Inspector-General of Police, the present Inspector-General being a member of the Imperial Police Service. Under him are Deputy Inspectors-General for the Dacca range, the Rajshahi range, the Presidency range, the Burdwan range and the Bakarganj range, and also one Deputy Inspector-General in Charge of the C.I.D. and the Intelligence Branch. Each district is in charge of a Superintendent, and some of the more important districts have one or more Additional Superintendents. The Railway Police is divided into three distinct charges, each under a Superintendent. The cadre comprises Assistant Superintendents, Deputy Superintendents, Inspectors, Sub-Inspectors, Sergeants, Assistant Sub-Inspectors, Head Constables and Constables. There is also a Village Police, composed of daffadars and chowkidars, who receive a monthly salary which is collected from the villages or unions by the Panchayat or Union Board. There is a training college and school at Sardah in the district of Rajshahi where newly appointed officers and men of the Bengal Police learn their duties. The Calcutta City Police is a separate force maintained by Government under a Commissioner who is responsible direct to Government. The Commissioner has under him Deputy Commissioners, Assistant Commissioners, Inspectors, Sub-Inspectors, Sergeants, Assistant Sub-Inspectors, Head Constables and Constables. A school for the training of recruits for the Calcutta Police force has been established at Calcutta. The annual cost of the Police is over 300 lakhs.

Public Health

The head of the Medical Directorate is the Surgeon General with the Government of Bengal. In the districts the Civil Surgeons are responsible for medical work. According to the latest statistics available there are 59 hospitals and dispensaries in Calcutta, 11 of which are supported by the Government and 1,514,528 persons were treated at these institutions of whom 174,668 were in-patients. In the Mofussil districts there are 1,902 hospitals and dispensaries, the number of patients treated in them as well as in several huts, fairs, melas, subsidised and temporary dispensaries and in various medical centres was 12,201,360, of whom about 30 per cent. were malaria cases. The nursing services are still very inadequate, there being only 3,333 registered nurses and midwives despite the fact that there are 16 training centres. Some improvement in this respect may now result as World War II is now over and trained nurses and assistants are returning to the Province from war service. The percentage of deaths to indoor patients treated was 8.05.

Education.

Educational institutions in Bengal are controlled by the Department of Education, the two Universities of Calcutta and Dacca, the Board of Intermediate and Secondary Education, Dacca, district boards, municipalities, district school boards and a number of religious and philanthropic societies. The control of general education as also of engineering education is ultimately vested in the Minister of Education, whereas medical education is controlled by the Department of Local Self-Government, and agricultural, technical and industrial education by the Department of Agriculture and Industries. The Director of Public Instruction is the executive head of the Department, assisted by an Assistant Director, another Assistant Director for Muhammadan Education, three Special Officers for Primary, Scheduled Caste and Secondary Education and a Reader and Secretary, Text Book Committee. Each division is in charge of a Divisional Inspector assisted by a certain number of Additional or Second Inspectors and Assistant Inspectors for Mahommedan Education according to the requirements of the several divisions. Similarly the administrative charge of the primary education of each district is in the hands of a District Inspector assisted by Sub-Divisional Inspectors and Sub-Inspectors of Schools, the latter class of officers being in some instances helped by officers of humbler status called Assistant Sub-Inspectors and Inspecting Pandits and Maulvis.

In 1946 there were in the Presidency 61,249 educational institutions with a total of 3,035,267 scholars, distributed as follows:—

	Institutions.	Scholars.
Recognised Institutions for Males.		
Universities	2	3,382
Arts Colleges	51	32,115
Professional Colleges ..	17	6,067
High Schools	1,338	361,017
Middle Schools	2,111	215,107
Primary Schools ..	40,736	2,551,772
Special Schools	3,768	183,564
Recognised Institutions for Females.		
Arts Colleges	11	1,979
Professional Colleges ..	2	51
High Schools	119	31,764
Middle Schools	189	22,938
Primary Schools ..	11,184	429,281
Special Schools	102	7,778
Unrecognised Schools.		
Males	1,509	76,134
Females	150	18,318

The Universities of Calcutta and Dacca, established in 1857 and 1921, respectively, are administered by the Chancellor (the Governor of Bengal), the Vice-Chancellor (appointed by Government) and a number of ex-officio, elected and nominated fellows. The University of

Calcutta maintains a Law College, called University Law College, Calcutta. Dacca University also has a Law Department attached to it. Calcutta University is mainly an examining body, but has now made itself responsible for advanced teaching for which purpose it employs an agency which is mainly distinct from the staffs of the affiliated Colleges. The University at Dacca is of the residential type. The Board for Secondary and Intermediate Education at Dacca conducts the Matriculation and Intermediate Examinations for the students of Institutions at Dacca and also the Islamic Matriculations and Intermediate Examinations. Of the 62 arts colleges 14 are maintained by Government, 26 are aided and 22 are unaided; of High schools 49 are maintained by Government, 3 by Municipal Boards, 787 are aided and 618 unaided. For Middle schools the figures are 6, 44 by District Boards, 5, 1,913 and 332; for Primary schools 97, 9,444, 545, 36,807 and 4,987; and for Special schools 194, 7, 5, 2,419 and 1,245.

The Education of Europeans is mainly conducted by private agency, assisted by Government grants. Government however maintain a special Inspector, and also a school for boys and a school for girls (both residential) at Kurseong.

THE FINANCES OF BENGAL.

After a sequence of deficit budgets for several years, Bengal looked forward hopefully to an improvement in her financial position as a direct result of the special steps taken by the Central Government and by Parliament through the India Act to alleviate Bengal's plight. Under Provincial Autonomy she was better off to the extent of Rs. 75 lakhs a year than before. In the year 1935-36, despite the grant from Central revenues of an amount equal to half the proceeds of the jute export duty, the budget showed a deficit of Rs. 51¾ lakhs. The Niemeyer report, however, as subsequently implemented, gave a further sum of Rs. 42 lakhs annually from an increased share in the jute export duty, and also an annual relief of Rs. 33 lakhs by cancelling the Province's accumulated debt to the Centre. Thus Bengal was able to face the future with more confidence. The Budget for the year 1937-38 was a surplus Budget. The year 1938-39, however, marked the beginning of another sequence of deficit budgets. The budget for 1941-42 revealed a deficit estimated at more than a crore of rupees. Although the finances of the Province, as revealed in the revised estimates and actuals of the preceding years, show a continuous improvement, the expenditure of the Province appears to have reached a stage where, it may be said, the Government are living well beyond their means. The year 1943-44 was marked by a considerable rise in income, but unfortunately flood and famine not only served to hamper normal development but resulted in heavily increased expenditure on relief and reconstruction measures. Another deficit resulted, but discussions were instituted for assistance from the Central Government, as the outlook was even worse for 1944-45. The assistance received, however, proved inadequate to stop the rot, which was aggravated by economic conditions. A further request for assistance from the Centre was made but the Province continued to budget for a deficit in 1945-46 and in 1946-47. The 1946-47. budget was prepared by H. E. the governor and his Advisers. The new government, elected in April, 1946, presented a new Budget in July 1946.

ESTIMATED REVENUE FOR 1946-47.

(The figures are in Thousands of Rupees.)

Heads of Revenue.	Revised Estimate 1945-46. Rs.	Budget Estimate 1946-47. Rs.

IV—ANGLO-INDIAN.

L. R. Pentony, R. E. Platel, Edna May Ricketts and G. C. D. Wilks (*Anglo-Indian*).

V—EUROPEAN.

J. A. Powell (*Burdwan Division*); G. Wilkinson (*Hooghly-cum-Howrah*); D. C. Bethune Pilkington, S. K. Sawday, A. F. Stark and W. C. Wordsworth (*Calcutta and Suburbs*); A. Bruce Smith (*Presidency Division*); W. D. Simpson (*Rajshahi Division*); D. G. Smyth-Osbourne (*Darjeeling*); J. N. Smart (*Dacca Division*); A. C. Walton (*Chittagong Division*).

VI—INDIAN CHRISTIAN.

Daniel Gomes (*Calcutta-cum-Presidency Division*); R. A. Gomes (*Dacca Division*).

VII—COMMERCE AND INDUSTRY.

F. F. M. Ferguson, A. W. Taylor, R. Haywood, D. Gladding, J. R. Walker, H. R. Hodge and C. W. Miles (*Bengal Chamber of Commerce*); H. R. Norton, M. B. E., and N. Stokes (*Calcutta Trades Association*); D. I. Duff and I. G. Kennedy (*Indian Jute Mills Association*); R. A. H Stevenson and E. E. Corstorphine (*Indian Tea Association*); R. B. Whitehead (*Indian Mining Association*); A. K. Ghose and Bimal Comar Ghose (*Bengal National Chamber of Commerce*); Debi Prosad Khaitan (*Indian Chamber of Commerce*); Anandilall Poddar (*Maruari Association*); M. A. H. Ispahani (*Muslim Chamber of Commerce*).

VIII—LANDHOLDERS'.

Sir Uday Chand Mahatab, Maharajadhiraj Bahadur of Burdwan (*Burdwan Landholders*); Maharaja Sris Chandra Nandy (*Presidency Landholders*); Narendra Singh Singhi (*Rajshahi Landholders*); Shitangshu Kanta Acharjee of Mymensingh (*Dacca Landholders*); Kumar Arun Chandra Sinha (*Chittagong Landholders*).

IX—LABOUR.

(i) *Trade Union Labour.*

Jyoti Basu (*Railway Trade Union*); Dr. A. M. Malik (*Water Transport Trade Union*).

(ii) *Factory and Colliery Labour.*

Dr. Suresh Chandra Banerji (*Calcutta and Suburbs Registered Factories*); Niharendu Dutt-Mazumdar (*Barrackpore Registered Factories*); Sibnath Banerjee (*Howrah Registered Factories*); A. M. A. Zaman (*Hooghly-cum-Serampore Registered Factories*); Debendra Nath Sen (*Colliery Coal Mines*).

(iii) *Tea Garden Labour.*

Ratanlal Brahmin (*Darjeeling Sadar*).

X—UNIVERSITY CONSTITUENCIES.

Dr. Syamaprasad Mookerjee (*Calcutta University*); Fazlur Rahman (*Dacca University*).

BENGAL LEGISLATIVE COUNCIL.

President : The Honourable Sir Bijoy Prasad Singh Roy, K.C.I.E.

Deputy President : Vacant.

Bijoy Singh Nahar; Biren Roy; Satish Chandra Jana; Rai Sahib Jagendra Nath Roy; Biswas Nath Ray; Nagendra Nath Mahalanobish; Rai Brojendra Nath Maitra Bahadur; Hemendra Kumar Das; Dr. Kumud Sankar Ray, M.P.; Lalit Chandra Das; Haji Md. Yusuf; Abdul Rashid; Khan Bahadur Sheik Fazal Elahi; Khan Bahadur M. A. Momin, C.I.E., Khan Sahib Mobarak Ali Khan; Khan Bahadur Mukhlesur Rahman; Abdul Latif; Dr. Kasiruddin Talukdar; Sultan Uddin Ahmed-Reajuddin Bhuiya, Khan Bahadur Abdul Hamid Choudhury, Khan Bahadur Ghyashuddin Pathan; Moazzim Ali Choudhury (Lal Mia); Syed Fazle Rabbi Choudhury; Khan Bahadur Syed Abdur Rashid Choudhury; Khan Bahadur Abdul Gofran; Nur Ahmed; George Morgan, C.I.E.; J. L. Nelson; F. C. J. Steuart; Amulyadhone Roy; Hon'ble Sir Bijoy Prasad Singh Roy, K.C.I.E.; Birendra Kishore Roy Choudhury; Kamini Kumar Dutta; L. P. S. Bourne; Hamidul Huq Choudhury; Khan Bahadur Saiyed Muazzamuddin Hosain; Bankim Chandra Dutta; Abdullah-al-Mahmud; Mungturam Jajpuria; Hari Das Mazumdar; Alhadj Khan Bahadur Shaikh Muhammad Jan; Humayun Z. A. Kabir; Moulana Md. Akrum Khan; Khan Bahadur Moulvi Wahiduzzaman; Khan Bahadur A. M. Shahoodul Hoque; T. B. Nimmo; Rai Dhirendra Lal Barua Bahadur; Latafat Hossain; D. J. Cohen, O.B.E.; Mrs. Labanyaprova Dutta; (11 seats are still vacant).

Bihar.

As in the case of Bombay Presidency, the province known hitherto as Bihar and Orissa has suffered a territorial diminution owing to the constitution of the Orissa Division as a separate province. The following details therefore appertain to the new Bihar province after the separation of Orissa as from April 1, 1936.

Bihar lies between 20°-30' and 27°-30' N. latitude and between 82°-31' and 88°-26' E. longitude and includes the provinces of Bihar and Chota Nagpur, and is bounded on the north by Nepal and the Darjeeling district of Bengal; on the east by Bengal and the Bay of Bengal; on the south by the new province of Orissa; and on the west by the United Provinces of Agra and Oudh and the Central Provinces.

The area of the territories which constitute the Governorship of Bihar is 69,348 square miles. The States in Chota Nagpur which were included in the Province have since the 1st April 1933 been transferred to the control of the Resident, Eastern States and no longer form part of the Province. Chota Nagpur is a mountainous region which separates them from the Central Indian Plateau. Bihar comprises the valley of the Ganges from the spot where it issues from the territories of the Governor of the United Provinces of Agra and Oudh till it enters Bengal near Rajmahal. South of Bihar lies Chota Nagpur. Following the main geographical lines there are four Civil Divisions with headquarters at Patna, Muzaffarpur (for Tirhut), Bhagalpur and Ranchi (for Chota Nagpur). The headquarters of Government are at Patna. The new capital which lies between the Military Cantonment of Dinapore and the old civil station of Bankipore is known as "Patna," the old town being called "Patna City."

The People.

The Province has a population of 36,340,151 persons. Even so with 521 persons per square mile, Bihar is more thickly populated than Germany. There are only four towns, which can be classed as cities, namely, Patna, Gaya, Jamshedpur and Bhagalpur. During the last ten years the population of Patna has been steadily increasing. Hindus form an overwhelming majority of the population. Though the Muhammadans form about one-tenth of the total population they constitute more than one-fifth of urban population of the province. Animists account for 5·7 per cent. These are inhabitants of the Chota Nagpur plateau and the Santal Parganas, the latter district being a continuation of the plateau in a north-easterly direction.

Industries.

Although there is a great deal of mineral wealth in Chota Nagpur and important industries are developing in connection with it, still for the bulk of the population of the province agriculture continues to be the basic occupation. Over 80 per cent. of the population depends wholly on Agriculture, while only 7.8 depends on industries.

The soil throughout the whole of that portion of the Indo-Gangetic plain lying within the provincial boundaries is extremely fertile, particularly in North Bihar, in parts of which the density of the population is more than 900 people to the square mile. The province occupies a transitional position between Bengal with its damp climate so suitable for the paddy crop and the provinces to the north and west where large irrigation schemes have had to be provided to enable the soil to produce its bounty. As in Bengal, rice is by far the most important crop as it occupies normally an area of approximately 12 million acres or about 52 per cent. of the net cropped area of the province. In 1942-43 the area under rice was 9,291,200 acres. As canal irrigation is available only in the Sone valley and to a moderate extent in Champaran District, the importance of the south-west monsoon to the province of Bihar cannot be overestimated.

In addition to the rice crop, however, other grain crops are grown on a tolerably large scale. Of the monsoon cereals, maize is grown in a normal area of about 16 lakhs of acres while in the cold weather wheat and barley are extensively grown and occupy approximately 13 lakhs of acres. The cultivation of oilseeds like castor, mustard and linseed forms a large and important part of the agriculture of Bihar, the normal area under spring oilseeds being estimated at more than 17 lakhs of acres. The areas under maize, wheat, barley and spring oilseeds in 1943-44 were 1,513,100 acres, 1,220,800 acres, 1,279,100 acres and 1,504,300 acres respectively.

After the United Provinces, Bihar is the most important white sugar area in India, some 26 per cent. of the total production of white sugar in the country being turned out in Bihar factories. The importance of the agricultural aspect of the industry cannot be overestimated as nearly 4 crore of rupees have been paid to the growers in the past season 1942-43 for cane purchased and crushed by the factories. Apart from this, numbers of young graduates and a large labour force find employment at the factories from year to year. The number of factories in the province has risen from 12 in 1931-32 to 31 at the present time.

Jute is also an important crop and is confined almost entirely to the Purnea district on the Bengal border where about 95 per cent. of the total crop in the province is produced. The total area under the jute crop was 202,200 acres in 1943-44 but little of the produce is manufactured within the province.

Tobacco is a crop of increasing importance in the province and one which is likely to expand in importance. The area under the crop in 1943-44 was 110,000 acres. There are two factories at present in the province.

Manufactures.

Opium was formerly, with indigo, the chief manufactured product of Bihar, but in consequence of the agreement with the Chinese Government the Patna Factory has been closed. At Monghyr the Peninsular Tobacco Company have erected one of the largest cigarette factories in the world and as a result tobacco is being grown much more extensively. The Tata Iron and Steel Works at Jamshedpur in Singhbhum district are also one of the largest in the world and numerous subsidiary industries are springing up in their vicinity. The most important of these are the Tinplate Company of India, Agricultural Implements, Ltd., Enfield Cable Company of India, Enamelled Ironware, Limited, and Indian Steel Wire Products. The population of Jamshedpur is rapidly approaching 100,000 and it consumes 1½ million

tons of coal annually. This part of the province has also some of the richest and most extensive iron mines in the world and supplies the iron and steel works in both Bengal and Bihar with raw materials, but the raising of coal is still the most important of the mineral industries in the province. The coalfields in the Manbhum District have undergone an extraordinary development in the past twenty years, while valuable new fields are being developed at Ramgarh, Rokaro and Karanpura in Hazaribagh. This same district is the most important mica mining centre in the world both on account of the quality as well as the size of its output. Manbhum, Palamau, Ranchi, the Santal Parganas and Gaya are also the chief centres for the production of lac and the manufacture of shellac, the latter of which is exported from India to the value of ten crores annually. Cement is the other important industry of the province which is produced from the limestones available in Palaman and Shahabad.

Administration.

The Province on first constitution was administered by a Lieutenant-Governor-in-Council, thus being unique in India as the only Lieutenant Governorship with a Council. Under the Reform Act of 1919 it was raised to the status of a Governorship, with an Executive Council and Ministers. The principles of the provincial administration are fully explained elsewhere.

Public Works.

The Public Works Department in the Province of Bihar consists of two separate branches, *viz.*:—(1) the Buildings and Roads which includes Railways, and Public Health Engineering Branches and (2) Irrigation and Electric Branches. There are two Chief Engineers. Chief Engineer I who is also secretary to Government is in charge of the Buildings and Roads. Chief Engineer II who is temporary at present, is also additional secy. to Government and is in charge of the Irrigation and Electric branches of the P.W. Dept. In addition to this, there is another Deputy Secretary to Government and also a non-technical Assistant Secretary in the Irrigation and Electric branch. The Electrical work of the Province is carried out by an Electric Inspector and Electrical Engineer and a staff of subordinates; while the Public Health Engineering works are looked after by the S. E. Public Health Engineering Department who is in charge of the P. H. Engineering Department and a staff of subordinates.

The post-war Road Development & Planning is carried out by an Engineer as special officer and a staff of subordinates.

Justice.

The administration of justice is controlled by the High Court of Judicature at Patna. In the administration of civil justice below the High Court are the District Judges as Courts of Appeal, the Subordinate Judges and the Munsiffs. The jurisdiction of a District Judge or Subordinate Judge extends to all original suits cognisable by the Civil Courts. It does not, however, include the powers of a Small Cause Court, unless these be specially conferred. The ordinary jurisdiction of a Munsif extends to all suits in which the amount or value of the subject matter in dispute does not exceed Rs. 1,000 though the limit may be extended to Rs. 4,000. On the criminal side the Sessions Judge hears appeals from Magistrates exercising first class powers while the District Magistrate is the appellate authority for Magistrates exercising second and third class powers. The District Magistrate can also be, though in point of fact he very rarely is, a court of first instance. It is usual in most districts for a Joint Magistrate or a Deputy Magistrate to receive complaints and police reports, cases of difficulty or importance being referred to the District Magistrate who is responsible for the peace of the district. In the Santal Parganas and in the Chota Nagpur Division the Deputy Commissioners and their subordinates hear rent suits. In the Santal Parganas the Deputy Commissioner and his subordinates also exercise civil powers.

Land Tenure.

Almost the whole of the province of Bihar is covered by the permanent Settlement of 1793. A number of estates are held direct by Government, having come into the direct management of Government in various ways. Other estates are managed temporarily by the Board of Revenue under the Court of Wards Act, while in Chota Nagpur a number of estates are managed by Managers appointed under the Chota Nagpur Encumbered Estates Act. There are two Tenancy Acts in force in the Province:—In Bihar the Bihar Tenancy Act is in force. This is the same as the Bengal Tenancy Act, 1885, with a number of important differences consequent on recent amendments of the Act. In Chota Nagpur, which is largely inhabitated by aboriginal peoples, the Chota Nagpur Tenancy Act, 1908, an Act specially adopted to their requirements, is in force. It has also recently undergone several important amendments beneficial to the people of Chota Nagpur. There is a third tenancy system in the Santal Parganas where the tenancy law is contained in Regulation III of 1872 and II of 1886 and the record-of-rights prepared in the settlement. Finally in a small part of South Bihar where there is a large aboriginal population a special chapter of the Bihar Tenancy Act designed to prevent alienation of land by aborigines is in force.

Throughout the province a system of periodic settlements is in vogue. In these settlements the maps and cadastral ledgers are revised and fair rents settled. In many districts the settlement records are now out of date and in one or two it is nearly 40 years since the last settlement was undertaken.

In the greater part of the Santal Parganas and in many parts of Chota Nagpur the headmen system prevails. The usual practice is that the headmen are responsible for the collection of the rents and their payment to landlords after deduction of a percentage as their remuneration. Special steps have been taken in the settlements to record the rights and duties of the headmen, and the special rights and privileges of certain privileged classes of tenants among the aboriginals.

Police.

The Departments of Police, Prisons and Registration are each under the general direction of Government, supervised and inspected by an Inspector-General with a staff of assistants. The Commissioner of Excise and Salt is also Inspector-General of Registration.

Under the Inspector-General of Police are three Deputy Inspectors-General and 24 Superintendents. There are also 24 Assistant Superintendents of Police and 48 Deputy Superintendents. The force is divided into the District Police, the Railway Police and the Military Police. There is a college for the training of officers and two Schools for the training of recruit constables. Both the institutions have selected Police officers on their staff. A Criminal Investigation Department has also been formed for the collection and distribution of information relating to professional criminals and criminal tribes whose operations extend beyond a single district and to control, advise, and assist in investigations of crime of this class and other serious action which its assistance may be invoked. There are 11 companies of Unmounted Military Police and seven troops of Mounted Military Police which are maintained as reserves to deal with serious and organised disturbances and perform no ordinary civil duties. The Unmounted Military Police is under the charge of a commandant who is an officier of S.P.'s rank.

Education.

The position of education in the Province, with the numbers attending schools, is set out in the section Education and the tables attached thereto (*q. v.*) showing in great detail the educational status of the administration. The mass literacy movement which has been inaugurated in Bihar for the education of adults is an interesting feature of the educational programme of the province.

There is a University at Patna, whose functions are described under the Indian Universities. (*q. v.*)

Medical.

The Medical Department is under the control of the Inspector-General of Civil Hospitals who is a Member of the Indian Medical Service. Under him there are 16 Civil Surgeons who are responsible for the medical work of the districts at the headquarters of which they are stationed. 57 hospitals & Dispensaries are maintained by Government in addition to 632 Dispensaries maintained by Local bodies, Railways, private persons, etc. 6,138,988 patients including 1,17,757 in-patients were treated in all the dispensaries in 1943. The total income of the dispensaries maintained by Government and Local Bodies including that of the private aided institutions amounted to Rs. 38,31,194/8.

There is a large mental hospital for Europeans at Ranchi receiving patients from Assam, Bihar, Bengal, Baluchistan, the C. P., the N.W.F.P., Orissa, the Punjab and the United Provinces and another similar institution for Indians for the treatment of mental patients from Bihar, Orissa and Bengal. A sanatorium has been established at Itki in the district of Ranchi for the treatment of tuberculosis. There is a Medical College at Patna with a large and well equipped hospital attached to it including an institute for Radium treatment. There is a Medical School at Darbhanga which also has a large hospital attached to it. Centres for anti-rabic treatment have been opened at Patna and other suitable places in the province.

The province has a laboratory for the preparation of cholera phage and bacterio-phage which are supplied to other provincial Governments also for use in the prevention of epidemics.

ADMINISTRATION.

Governor.

His Excellency Sir Hugh Dow, K.C.S.I., C.I.E., I.C.S.

Personal Staff.

Secretary to Governor, D. H. Crofton, M.B.E., I.C.S.

Military Secretary to Governor, J. B. Hodgson.

Aide-de-Camps, Captain P. G. L. Jessop, The Queen's Regiment and Ft./Lt. G. A. Turner, D.F.C., R.A.F.

Honorary A. D. Cs., Lt.-Col. W. N. R. Kemp, Lieut. N. Sinha & Risaldar Major & Hony. Capt. Abdul Latif, Khan Bahadur, O. B. I., I.D.S.M.

Secretariat.

Chief Secretary to Government, Political and Appointment Departments, J. Bowstead, M.C., O.I.E., I.C.S.

Secretary to Government, Finance Department, J. S. Hardman, O.B.E., I.C.S.

Secretary to Government, Supply & Price Control Dept., K. S. V. Raman, I.C.S.

Secy. to Govt. Rev. & Labour Dept., F. F. A. Taylor, I.C.S.

Secretary to Government, Judicial Department, T. G. N. Ayyar, I.C.S.

Chief Eng. & Secretary to Government, P.W.D., A. E. Green, O.B.E., M.C., I.S.E.

Second Chief Engineer & Addl. Secy. to Govt., P.W.D., W. G. Came, C.I.E.

Dy. Chief Engineer, and Dy. Secy. to Govt., Irrigation, W. L. Murrell, O.B.E., I.S.E.

Secretary to Government, Education, Dev. & Emp. Departments, C. K. Raman, I.C.S.

Secretary to Government, Local Self-Government Department, B. C. Mukharji, I.C.S.

Secretary to Government, Legislative Department, T. G. N. Ayyar, I.C.S.

Public Service Commission (for Bihar, C.P. and Berar and Orissa), E. A. C. Perkin, O.I.E., I.P. (Rtd.); *Chairman*; Abdul Latif Khan, B.A., L.L.B. and Rajandhari Sinha, O.I.E., *Members*; Dr. H. C. Seth, M.A., Ph.D. (Lond.), *Secretary*.

GOVERNORS OF BIHAR.

Lord Sinha of Raipur, P.C., K.C. ..	1920	Sir Thomas Alexander Stewart, K.C.I.E., K.C.S.I., I.C.S.	1939
Sir Henry Wheeler, K.C.S.I., K.C.I.E., I.C.S.	1921	Sir Thomas George Rutherford, K.C.S.I., K.C.I.E., I.C.S.	1943
Sir Hugh Lansdown Stephenson, K.C.S.I., K.C.I.E.	1927	Sir Robert Francis Mudie, K.C.I.E., C.S.I., C.I.E., O.B.E., I.C.S.	1943
Sir James David Sifton, K.C.S.I., K.C.I.E., I.C.S.	1932	Sir Thomas George Rutherford, K.C.S.I., K.C.I.E., I.C.S.	1944
Sir Maurice Garnier Hallett, G.C.I.E., K.C.S.I., I.C.S.	1937	Sir Hugh Dow, K.C.S.I., C.I.E., I.C.S. ..	1946

BIHAR LEGISLATIVE ASSEMBLY.

Speaker : The Hon'ble Mr. Vindhyeshwari Prasad Varma, B.A., B.L.

Deputy Speaker : Deva Saran Singh.

Secretary : Raghu Nath Prashad, M.A., B.L.

Asstt. Secretary : Bisheswar Prasad.

BIHAR LEGISLATIVE COUNCIL.

President: The Hon'ble Sir Rajivaranjan Prasad Sinha, Kt., M.A.

Deputy President: Vacant.

Secretary: Raghu Nath Prasha l, M.A., B.L.

Assistant Secretary: Bisheswar Prasad.

The Hon'ble Sir Rajivaranjan Prasad Sinha, Kt., M.A. (*North Patna Division General*); Suraj Narain Singh (*Gaya General*); Jayadeva Narain Sinha (*Saran cum Champaran General*); Rai Bahadur Maheshwar Prasad Narayan Singh (*Muzaffarpur General*); Ganga Nand Singh (*Darbhanga General*); Ramjiwan Himat Singka (*Monghyr cum Santal Parganas General*), Naresh Mohan Thakur (*Bhagalpur cum Purnea General*); Rai Bahadur Satis Chandra Sinha (*Hazaribagh cum Manbhum General*); Rai Sahib Nalini Kumar Sen (*Ranchi and Palamau cum Singhbhum General*); Muhammad Mahmood (*Patna cum Shahabad Muhammadan*), Saiyid Muhammadul Mehdi (*Gaya cum Chota Nagpur Division Muhammadan*); Saiyid Mobarak Ali (*Tirhut Division Muhammadan*); Jamilur Rahman (*Bhagalpur Division Muhammadan*); Alan Campbell Combe (*Bihar European*); Rai Brijraj Krishna (*Elected by the Bihar Legislative Assembly*); Shyama Prasad Sinha (*Elected by the Bihar Legislative Assembly*); Gajindra Narayan Singh (*Elected by the Bihar Legislative Assembly*); Puneydeo Sharma (*Elected by the Bihar Legislative Assembly*); Shah Muhammad Umair (*Elected by the Bihar Legislative Assembly*); Radha Govind Prashad (*Elected by the Bihar Legislative Assembly*); Devendra Nath Samanta (*Elected by the Bihar Legislative Assembly*); Boniface Lakra (*Elected by the Bihar Legislative Assembly*); Abdul Malik (*Elected by the Legislative Assembly*); H. B. Chandra (*Elected by the Legislative Assembly*); Srimati Saraswati Devi (*Elected by the Legislative Assembly*); Rai Sahib Samuel Purti (*Nominated*); Mrs. Nayama Khatoon Haider (*Nominated*); Chandrika Ram (*Nominated*); Jaideva Prasad (*Nominated*).

The Bombay Province.

Consequent on the separation of Sind from the Bombay Province as from April 1, 1936, Bombay has suffered a diminution territorially and otherwise. The following details relate to Bombay minus Sind.

The Bombay Province now stretches along the west coast of India, from Gujerat in the North to Kanara in the South. It has an area of 76,443 square miles and a population of 20,849,849. Geographically included in the Province but under the Government of India is the first class Indian State of Baroda, with an area of 8,176 square miles and a population of 2,855,010. There are no States in political relations with the Government of Bombay, as they are all now under the Government of India.

The Province embraces a wide diversity of soil, climate and people. In the Province there are the rich plains of Gujarat, watered by the Nerbudda and the Tapti, whose fertility is so marked that it has long been known as the Garden of India. South of Bombay City the Province is divided into two sections by the Western Ghats, a range of hills running parallel to the coast. Above Ghats are the Deccan Districts, south of these come the Karnatic districts. On the sea side of the Ghats is the Konkan, a rice growing tract, intercepted by creeks which make communication difficult.

The People.

The population varies as markedly as soil and climate. Gujarat has remained true to Hinduism although long under the dominion of powerful Mahomedan kings. Here there is an amplitude of caste divisions, and the people, who although softened by prosperity, are amongst the keenest trading races in the world. The Deccan peasant has been seasoned by adversity; the saying goes that the Deccan expects a famine one year in every three, and gets it; the population is much more homogeneous than in Gujarat, and thirty per cent. are Mahrattas. The Karnatic is the land of the Lingayets, a Hindu reforming sect of the twelfth century, and in the Konkan there is a large proportion of Christians. Three main languages are spoken, Gujarati, Marathi and Kannada with Urdu a rough *lingua franca* where English has not penetrated. The main castes and tribes number five hundred.

Industries.

The principal industry is agriculture, which supports sixty-four per cent. of the population. In Gujarat the soils are of two classes, the black cotton soil, which yields the famous Broach cottons, the finest in India, and alluvial, which under careful cultivation in Ahmedabad and Kaira makes, splendid garden land. The dominant soil characteristic of the Deccan is black soil, which produces cotton, wheat, gram and millet, and in certain tracts rich crops of sugarcane. The Konkan is a rice land, grown under the abundant rains of the submontane regions, and in the south the Dharwar cotton varies with Broach as the best in India. There are no great perennial rivers suitable for irrigation, and the harvest is largely dependent upon the seasonal rainfall; supplemented by well irrigation. A chain of irrigation works, consisting of canals fed from great reservoirs in the region of unfailing rainfall in the Ghats, is gradually being completed, and this will ultimately make the Deccan immune to serious drought. More than any other part of India the Province has been scourged by famine and plague. The evils have not been unmixed, for tribulation has made the people more self-reliant, and the rise in the values of all produce, synchronising with a certain development of industry, has induced a considerable rise in the standard of living. The land is held on what is known as the ryotwari tenure, that is to say, each cultivator holds his land direct from Government under a moderate assessment, and as long as he pays this assessment he cannot be dispossessed.

Manufactures.

Whilst agriculture is the principal industry, others have no inconsiderable place. The mineral wealth of the Province is small and is confined to building stone, salt extracted from the sea, and a little manganese. But the handicrafts are widely distributed. The handloom weavers produce bright-coloured saris, and to a diminishing extent the exquisite kincobs of Ahmedabad and Surat. Bombay silverware has a place of its own, as well as the brass work of Poona and Nasik. But the tendency is to submerge the indigenous handicrafts beneath industry organised on modern lines. Bombay is the great centre in India of the textile trade. This is chiefly found in the local Parel city, Bombay, and in Ahmedabad.

Number of Looms in Bombay Island.	66,164
Number of Spindles in Bombay Island.	28,03,496
Number of hands employed in the Textile Industry in Bombay Island (daily average)	1,22,510
Consumption of Cotton by the Mills in Bombay Island (in candies of 784 lbs.)	7,46,620
Number of Spindles in Ahmedabad.	18,16,583
Number of Looms in Ahmedabad ..	43,309
Number of Spindles in Sholapore Dist.	2,90,040
Number of Looms in Sholapore Dist.	6,980
Number of Spindles in the Bombay Province (excluding Bombay Island and Ahmedabad)	12,86,886
Number of Looms in the Bombay Province (excluding Bombay Island and Ahmedabad)	25,043

Administration.

With the introduction of Provincial Autonomy on April 1, 1937, the administration of the province has been largely altered at the top. Excepting unusual circumstances, there is now a Governor and a council of ten Ministers to aid and advise him in all matters except in so far as he is required by the Government of India Act to exercise his function in his discretion. The executive power of the province extends to all matters in which it may legislate. The Ministers are appointed and dismissed by the Governor in his discretion, he fixes their salaries until determined by the legislature. The Governor, as in other Provinces, has certain special responsibilities and these extend to (*a*) the prevention of menace to the peace or tranquility of his province or any part thereof; (*b*) the safeguarding of the legitimate interests of minorities; (*c*) the safeguarding of the rights of civil servants past and present and their dependants; (*d*) the securing in the executive sphere of protection against discrimination; (*e*) the securing of the peace and good government of areas declared to be partially excluded areas; (*f*) the safeguarding of the rights of states and the rights and dignity of any ruler; and (*g*) the securing of the execution of orders given to him under Part VI of the Act (dealing with administrative relations) by the Governor-General in his discretion.

The Governor is assisted by a special secretariat staff presided over by a Secretary whose emoluments are fixed in his discretion.

In the legislative sphere the Governor is assisted with two chambers, known as the Bombay Legislative Assembly and the Bombay Legislative Council. The Council is a permanent body. One-third of the members retire each three years and the Assembly, unless sooner dissolved, lasts for five years. The strength of the Assembly is 175 members of whom 30 are Muslims, 3 Indian Christians, 2 Anglo-Indians, 8 Europeans, 2 landholders, 7 Commerce and Industry, 7 Labour, 1 University and the remaining 120 are Hindus including 15 Scheduled castes and 7 Marathas. There are also six women.

The Legislative Council will contain not less than 29 and not more than 30 members of whom not less than three and not more than four shall be nominated by the Governor. Twenty will be elected by the General Constituencies, 5 by Muslims and 1 by Europeans. The senior of the Civilian Secretaries is entitled the Chief Secretary. The Government is in Bombay from November to the end of May; and in Poona from June to November; but the Secretariat is always in Bombay. Under the Local Government the Province is administered by three Commissioners, namely, the Commissioner for the Northern Division, with headquarters at Ahmedabad, the Central Division at Poona, and the Southern Division at Belgaum. Each district is under a Collector, usually a Covenanted Civilian, who has under him one or more Civilians as Assistant Collectors, and one or more Deputy Collectors. A collectorate contains on an average from eight to ten talukas, each consisting of from one to two hundred villages whose whole revenues belong to the State. The village officers are the patel, who is the head of the village both for revenue and police purpose; the talati or kulkarni, clerk and accountant; the messenger and the watchman. Over each taluka or group of villages is the mamlatdar, who is also a subordinate magistrate. The charge of the Assistant or Deputy Collector contains three or four talukas. The Collector and Magistrate is over the whole District. The Commissioners exercise general control over the Districts in their Divisions.

Justice.

The administration of justice is entrusted to the High Court sitting in Bombay, and comprising a Chief Justice, who is a barrister, and ten puisne judges, either Civilians, Barristers, or Indian lawyers and three additional judges. Of the lower civil courts, the court of the first instance is that of the Subordinate Judge recruited from the ranks of the local lawyers. The Court of first appeal is that of the District or Assistant Judge, or of a first class subordinate judge with special powers. District and Assistant Judges are Indian Civilians, or members of the Provincial Service or the Bar. In cases exceeding Rs. 5,000 in value an appeal from the decision of the Subordinate or Assistant Judge and from the decision of the District Judge in all original suits lies to the High Court. District and Assistant Judges exercise criminal jurisdiction throughout the Province but original criminal work is chiefly disposed of by the Executive District Officers and Resident and City Magistrates. Capital sentences are subject to confirmation by the High Court. In some of the principal cities Special Magistrates exercise summary jurisdiction (Bombay has six Presidency Magistrates, as well as Honorary Magistrates exercising the functions of English Justices of the Peace) and a Court of Small Causes, corresponding to the English County Courts.

Local Government.

Local control over certain branches of the administration is secured by the constitution of local boards and municipalities, the former exercising authority over a District or a Taluka, and the latter over a city or town. These bodies are composed of members either nominated by Government or elected by the people, who are empowered to expend the funds at their disposal on education, sanitation, the construction of roads and tanks, and general improvements. Their funds are derived from cesses on the land revenue, the toll, ferry funds and local taxes. The tendency of recent years has been to increase the elective and reduce the nominated element, to allow these bodies to elect their own chairmen, whilst larger grants have been made from the general revenues for water supply and drainage.

The Bombay Municipal Boroughs Act of 1925 works further advance in the matter of local Self-Government in the Province. The Act provides more adequate basis for Municipal Administration in the larger cities of the Bombay Province. The larger municipalities are now styled as Municipal Boroughs which are now 27 in number. The executives of these Borough

Municipalities are invested with larger powers than hitherto exercised. Another important change introduced by the Act was the extension of municipal franchise to occupiers of dwellings or buildings with annual rental values of Rs. 12 or with capital value of not less than Rs. 200.

Public Works.

The Public Works Department is under the control of a Chief Engineer who acts as Secretary to the Government. Under him are Superintending Engineers in charge of Circles and Executive Engineers in charge of divisions, and the Electrical Engineer.

There is a chain of protective irrigation works, originating in reservoirs in the Ghat regions. The principal works are the Nira Canals fed by Lake Whiting impounded by the Lloyd Dam at Bhatgar, the Pravara Canals fed by Lake Arthur Hill, impounded by Wilson Dam at Bhandardara, the Mutha Canals fed by Lake Fife at Khadakvasla, the Godavari Canals fed by Lake Beale at Nandur Madhmeshwar and the Gokak Canal. The Mutha Canals and the Gokak Canal were completed in 1896-97, the Nira Left Bank Canal in 1905-06, the Godavari Canals in 1915-16 and the Pravara Canals in 1926-27. The Nira Right Bank Canal which has been under construction since 1912 is practically completed. The Wilson Dam at Bhandardara, the second highest yet constructed by Engineers the world over, was opened by His Excellency the Governor on 19th December 1926. The Lloyd Dam at Bhatgar which is 5,333 feet in length, 190 feet in height and 124 feet in width was opened by H. E. Sir Leslie Wilson on 27th October 1928. It cost Rs. 172 lakhs. It is remarkable as being the largest Dam in volume hitherto constructed and contains 2½ million cubic feet of masonry. The Assuan Dam in Egypt is popularly supposed to be the largest Dam in existence but that contains 19 million cubic feet. It cost also nearly 50 per cent. more than the Lloyd Dam. An idea of the magnitude of the Lloyd Dam can be gathered from the fact that if a wall 6 feet high and 15 inches thick were constructed from the masonry in the Dam it would stretch a distance of 520 miles, say from Bombay to Nagpur. These projects will irrigate certain tracts most liable to famine.

Police.

The Police Force is divided into 3 categories, viz., District Police, Railway Police and the Bombay City Police. The District and Railway Police in the Province proper are for the purpose of control under the Inspector-General of Police who is assisted by three Deputy Inspectors-General, of whom two are in charge of Ranges and the third is in charge of the Criminal Investigation Department and the Finger Print Bureau. The executive management of the Police in each district and on Railways in the Province proper as well as in Sind is vested in a Superintendent of Police under the general direction of the Magistrate of the District concerned except in the case of the Railway Police. For the purposes of effective supervision over the investigation and prevention of crime, some of the larger districts are divided into one or more sub-divisions each under a Sub-Divisional Officer who is either an Assistant Superintendent of Police, or an Inspector of Police, or a Deputy Superintendent of Police. Sub-Inspectors are the officers in charge of Police Stations and are primarily responsible under the law, for the investigation of offences reported at their Police Stations. Officers appointed directly to the posts of Assistant Superintendents of Police, Deputy Superintendents of Police, Inspectors and Sub-Inspectors undergo a course of training at the Central Police Training School at Nasik before being posted to Districts for executive duty. The Bombay City Police is a separate force under the Commissioner of Police who is directly responsible to Government.

Education.

Education is imparted partly through direct Government agency, and partly through the medium of grants-in-aid. Government maintain Arts Colleges at Bombay, Andheri, Ahmedabad and Dharwar; the Grant Medical College, the Poona College of Engineering, the Agriculture College, Veterinary College, School of Art, Law College and a College of Commerce. Most of the secondary schools are in private hands. The primary schools are maintained by Local Authorities, with a grant-in-aid. The Bombay Municipality is responsible for primary education in Bombay City (*q. v.*, Education).

The total number of institutions at the end of the year 1943-44 was 22,154. Of these 21,849 were recognised and 305 unrecognised. Of the recognised 19,628 are for males and 2,181 for females. The recognised institutions consisted of 21 Arts and Science Colleges excluding the University School of Economics and Sociology, 17 Professional Colleges, 958 Secondary Schools, 19,437 Primary Schools and 1,376 Special Schools.

There are 21,657 towns and villages in this Province. Of these, 13,323 possessed schools but there are still some 90 large villages without Schools. The area served by a town or village with school was 5.5 square miles.

There were 1,846,741 pupils under instruction at the end of the year 1943-44 as compared with 1,809,784 in 1942-43. The number of pupils in recognised institutions was 1,824,047 and in unrecognised institutions was 22,694 as compared with 1,790,090 and 19,644 respectively in 1942-43. The percentage of pupils in recognised institutions to the total population of the Province was 8·75 as against 8·51 in the preceding year. Of the 1,824,047 pupils under instruction in recognised institutions, 1,536,743 were boys and 287,304 were girls.

The total expenditure on Public Instruction increased from Rs. 494.2 lakhs to Rs. 548·5 lakhs during 1943-44. Out of this amount 40·5 per cent. was met from Provincial Revenues, 17.2 per cent. from Local Funds, 30·0 per cent. from fees and 12·3 per cent. from other sources.

The Educational Department is administered by a Director, with an Inspector in each Division and a Deputy or Assistant Inspector in each district.

Higher education in the Province is controlled by the Bombay University which was established in 1857. The constitution of the University has recently undergone, however, considerable changes in virtue of a new enactment known as the Bombay University Act of 1928. This Act altered the whole constitution of the University so as to make it adequately representative with a view to bringing into closer association with the public the industrial, commercial and civic life of the people of the Province to enable it to provide greater facilities for higher education in all branches of learning including Technology and to undertake on a larger scale than heretofore post-graduate teaching and research, while continuing to exercise due control over the teaching given by colleges affiliated to it from time to time. The new University Department of Chemical Technology was formally inaugurated by His Excellency the Governor of Bombay on 15th November 1933. The authorities of the University, as now constituted, are chiefly the Chancellor, Vice-Chancellor, the Syndicate, the Academic Council and the Senate. The Senate consisting of fellows is the supreme governing body of the University. The number of fellows are 144 of whom 40 are nominated by the Chancellor and 11 are ex-officio. The Academic Council consisting of educational experts deals with all purely academical questions. This body works in collaboration with the Syndicate which is the principal executive of the University.

Medical.

The Medical Department is in the charge of the Surgeon-General who is a member of the I. M. S., and Public Health in that of the Director of Public Health, who is usually a non I.M.S. Officer. Civil Surgeons stationed at each district headquarters are responsible for the medical work of the district; whilst sanitation is entrusted to one of the Assistant Directors of Public Health. Four large hospitals are maintained by the Government in Bombay, and the accommodation in them has been recently increased. The total number of beds available in all the Hospitals and dispensaries in the Province including private Institutions is 8,000 roughly. Well-equipped hospitals exist in all important up-country stations. Over 3,891,745 persons including 215,514 in-patients were treated during the year 1943. The Province contains 5 Lunatic Asylums and 14 institutions for the treatment of lepers. Vaccination is carried out by a staff under the direction of the Director of Public Health. Sanitary work has received an immense stimulus from the large grants made by the Government from time to time.

Two important schemes have been recently sanctioned for providing medical relief in rural areas.

The first relates to the extension of a former scheme for subsidising medical practitioners in six selected rural centres. Government have now decided to open, in all, 50 centres for medical aid in the Province by giving subsidies to private medical practitioners. The subsidy will be given to Allopathic medical practitioners and to some Ayurvedic and Unani practitioners.

Finance.

With the introduction of Provincial Autonomy, the financial arrangements have been revised. There is a clear cut division between the finances of the Federation and those of the Provinces.

The provincial sources of revenue in addition to grants from federal taxation now include taxes raised by the local Government on land, as land revenue; taxes on land and buildings, hearths and windows; taxes on agricultural income and duties in respect of succession to agricultural land, duties of excise on goods manufactured or produced in the province and countervailing duties on goods produced or manufactured elsewhere in India, being alcoholic liquors for human consumption; opium, Indian hemp and other narcotic drugs and narcotics; non-narcotic drugs; medicinal and toilet preparations, containing alcohol or any of the above substances, other excises being federal; taxes on mineral rights subject to any federal restrictions imposed in respect of mineral development; capitation taxes; taxes on professions, trades, callings, and employments; taxes on animals, boats, the sale of goods, advertisements, on luxuries including entertainments, amusements, betting and gambling; cesses on the entry of goods into a local area; dues on passengers and goods carried on inland waterways; tolls; stamp duties in respect of documents not included in the federal list.

Director of Information.—S. A. Ayer.

Commissioner of Labour.—S. V. Joshi, B.A. (Cantab.), J.P.

Labour Officer, Bombay.—N. A. Mehtan, M.B.E., J.P.

Sheriff.—A. A. Jasdenwala.

GOVERNORS OF BOMBAY

Sir Abraham Shipman	1662
Died on the Island of Anjediva in Oct. 1664	
Humfrey Cooke	1665
Sir Gervase Lucas	1666
Died, 21st May 1667.	
Captain Henry Gary (*Officiating*) ..	1667
Sir George Oxenden	1668
Died in Surat, 14th July 1669.	
Gerald Aungier	1669
Died in Surat, 30th June 1677.	
Thomas Rolt	1677
Sir John Child, Bart.	1681
Bartholomew Harris	1690
Died in Surat, 10th May 1694.	
Daniel Annesley (*Officiating*)	1694

Sir John Gayer	1694
Sir Nicholas Waite	1704
William Aislabie	1708
Stephen Strutt (*Officiating*)	1715
Charles Boone	1715
William Phipps	1722
Robert Cowan .. .. Dismissed.	1720
John Horne	1724
Stephen Law	1729
John Geek (*Officiating*)	1742
William Wake	1742
Richard Bourchier	1750
Charles Crommelin	1760
Thomas Hodges .. .. Died, 23rd February 1771.	1767
William Hornby	1771
Rawson Hart Boddam	1784
Rawson Hart Boddam	1785
Andrew Ramsay (*Officiating*)	1788
Major-General William Medows	1788
Major-General Sir Robert Abercrombie, K.C.B. (*a*).	1790
George Dick (*Officiating*)	1792
John Griffith (*Officiating*)	1795
Jonathan Duncan .. .. Died, 11th August 1811.	1795
George Brown (*Officiating*)	1811
Sir Evan Nepean, Bart.	1812
The Hon. Mountstuart Elphinstone ..	1819
Major-General Sir John Malcolm, G.C.B.	1827
Lieut.-General Sir Thomas Sidney Beckwith, K.C.B. Died, 15th January 1831.	1830
John Romer (*Officiating*)	1831
The Earl of Clare	1831
Sir Robert Grant, G.C.H. .. .. .. Died, 9th July 1838.	1834
James Farish (*Officiating*)	1838
Sir J. Rivett-Carnac, Bart.	1839
Sir William Hay Macnaghten, Bart. (*b*) .	..
George William Anderson (*Officiating*) ..	1841
Sir George Arthur, Bart., K.C.H.	1841
Lestock Robert Reid (*Officiating*) ..	1841
George Russell Clerk	1847
Viscount Falkland	1848
Lord Elphinstone, G.C.H., P.C.	1850
Sir George Russell Clerk, K.C.B. (2nd time)	1863
Sir Henry Bartle Edward Frere, K.C.B.	1867
The Right Hon. William Robert Seymour Vesey FitzGerald.	1862
Sir Philip Edmond Wodehouse, K.C.B. ..	1872
Sir Richard Temple, Bart., K.C.S.I. ..	1877
Lionel Robert Ashburner, C.S.I. (*Acting*) ..	1880
The Right Hon. Sir James Fergusson, Bart., K.C.M.G.	1880
James Braithwaite Peile, C.S.I. (*Acting*) ..	1885
Baron Reay	1885
Baron Harris	1890
Herbert Mills Birdwood, C.S.I. (*Acting*) ..	1895
Baron Sandhurst	1895
Baron Northcote, C.B.	1900
Sir James Monteath, K.C.S.I. (*Acting*) ..	1903
Baron Lamington, G.C.M.G., G.C.I.E. ..	1903
J. W. P. Muir-Mackenzie, C.S.I. (*Acting*) .	1907
Sir George Sydenham Clarke, G.C.M.G., G.C.I.E. (*c*).	1907
Baron Willingdon, G.C.I.E.	1913
Sir George Ambrose Lloyd, G.C.I.E., D.S.O. (*d*)	1918
Sir Leslie Orme Wilson, P.C., G.C.I.E., C.M.G., D.S.O.	1923
Sir Henry Stanley Lawrence, K.C.S.I., held office for 3 months and two days for Sir Leslie Wilson.	
Sir Frederick Hugh Sykes, P.C., G.C.I.E., G.B.E., K.C.B., C.M.G.	1928
Sir Ernest Hotson, K.C.S.I., O.B.E., I.C.S., acted for six months for Sir F. H. Sykes.	
The Rt. Hon. Michael Herbert Rudolf Knatchbull, Lord Brabourne, G.C.I.E., M.C.	1933
Sir Robert Bell, K.C.S.I., C.I.E., I.C.S., acted for four months for Lord Brabourne.	
Sir Lawrence Roger Lumley, G.C.I.E., T.D.	1937
Sir John Colville, G.C.I.E., T.D.	1943
Sir Andrew Clow, K.C.S.I., C.I.E., I.C.S., acted for 3 months for Sir John Colville.	

(*a*) Proceeded to Madras on duty in Aug. 1793 and then joined the Council of the Governor-General as Commander-in-Chief in India on the 28th Oct. 1793.

(*b*) Was appointed Governor of Bombay by the Honourable the Court of Directors on the 4th Aug. 1841 but, before he could take charge of his appointment, he was assassinated in Cabul on the 23rd Dec. 1841.

(*c*) Afterwards (by creation) **Baron Sydenham.**

(*d*) Afterwards (by creation) **Baron Lloyd.**

BOMBAY LEGISLATIVE ASSEMBLY.

Speaker.—The Hon'ble Mr. Kundanmal Sobhachand Firodia.

Muhammad-Hussein Abdulsattar (*Sholapur District, Mohammadan Rural*), Haji Noormohamed Ahmed (*Bombay City North and Bombay Suburban District, Muhammadan Urban*); Ahmedmiya Sharumiya (*Ahmedabad District, Mohammadan Rural*); Chenbassappa Jazadevappa Ambli (*Bijapur South, General Rural*); Shanmukhappa Ningappa Angadi (*Belgaum South, General Rural*); Dr. Krishna Bhimrao Antrolikar (*Sholapur City, General Urban*); Muhammad Mohsin Muhammad Bhaiji (*Kolaba District, Mohammadan Rural*), Prabhakar Kondaji Bhatkar (*Ahmednagar South, General Rural*), Shalikram Ramchandra Bhartiya (*West Khandesh East, General Rural*); Laxman Babaji Bhingardeve (*Sholapur North-East, General Rural*); Dattatray Malhar Bidkar (*North East, General Rural*); Sitaram Hirachand Birla (*East Khandesh West, General Rural*); Courtenay Parker Bramble (*Bombay City cum Bombay Suburban District, European*); Sayad Manzur Hussain Muharaksha Bukhari (*East Khandesh District, Muhammadan Rural*); B. R. Chakravartiyan (*Poona cum Ahmednagar, Indian Christian*), Dargin Mafia Chanchar (*Kolaba District, General Rural*); Chunnisingh Kalyansing Chandele (*Sholapur City, Textile Labour*); Chandulal Parekh (or Parikh) (*Ahmedabad Millowners' Association, Commerce and Industry*); Bhan Govind Chaudhari (*West Khandesh West, General Rural*); Yeshwant Balwant Chavan, B.A., LL.B. (*Satara North, General Rural*); Dr. Chhotalal Jivabhai Patel (*Kaira District North, General Rural*); Ismail Rahimtulla Chandrigar (*Ahmedabad City, Muhammadan Urban*); C. B. Cooper (*Ahmednagar, European*); Fatehsinhji Bharatsinhji Dabhi (*Kaira District, General Rural*); Narayan Keshav Dalvai (*Belgaum South, General Rural*); Shripad Amrit Dange (*Bombay City, and Suburban District, Labour*); Krishnaji Vyas Dawoor (*Kolaba District, General Rural*); The Hon'ble Mr. Dhanjishaw Nasarwanji Desai (*Bombay Sub-Division, General Rural*), Hargovind Vrajlal Desai, B.A., LL.B. (*Surat City, General Urban*); Khandubhai Desai (*Ahmedabad Textile Labour*); The Hon'ble Mr. Morarji Ranchhodji Desai (*Surat District, General Rural*); Bhagwantray Dhanekar De Bavade (*East Khandesh East, General Rural*); Datto Appaji Deshmukh (*Thana cum Nasik, General Rural*); Hari Desaji Gadre (*West Khandesh West, General Rural*); Dewa Bhikha (*Surat City, General Urban*); Bhimappa Devappa Dhanna (*Sholapur North-East, General Rural*); Ardeshir Jamshedji Dumasia (*Bombay North, General Rural*); Dr. Joseph Alban D'Souza (*Bombay City, European*); K. BOMBAY LEGISLATIVE COUNCIL.

President : The Hon'ble Mr. Mangaldas Mancharam Pakvasa.

Deputy President : Ramchandra Ganesh Soman.

Sir Abdul Latif Haji Hajrat Khan ; R. R. Bakhale (*Nominated*) ; Dattatraya Venkatesh Belvi, B.A., LL.B. (*Sholapur cum Belgaum cum Bijapur, General Rural*) ; Madhavrao Gopalrao Bhosle (*East Khandesh cum West Khandesh, General Rural*) ; Sir Currimbhoy Ebrahim, Bart. (*Bombay City cum Bombay Suburban District, Muhammadan Urban*), Vishnu Vaman Bandekar (*Thana cum Nasik cum Ahmednagar, General Rural*) ; Professor Sohrab R. Davar, Bar-at-Law, J.P. (*Bombay City cum Bombay Suburban District, General Urban*), Narsingrao Shivrawrao Desai (*Dharwar cum Kanara, General Rural*) ; V. S. Dongre, B.A., Bar-at-Law (*Nominated*) ; Ratnal Mulji Gandhi (*Bombay City cum Bombay Suburban District, General Urban*) ; P. D. Ghorlikar (*Nominated*) ; Mahadeshwar Gangadhar Gopal (*Dharwar cum Kanara, General Rural*) ; Dr. K. A. Hamied, B.Sc., M.A., Ph.D. (Berlin), A.I., P.E.C.S. (London), (*Bombay City cum Bombay Suburban District, Muhammadan Urban*) ; Nagappa Bandappa Kadadi (*Sholapur cum Belgaum cum Bijapur, General Rural*) ; Sir Behram Nauroji Karanjia (*Bombay City cum Bombay Suburban District, General Urban*) ; Kashinath Mannalal (*Thana cum Nasik cum Ahmednagar, General Rural*) ; Aziz Gafoor Kavi (*Southern Division, Muhammadan Rural*), Dr. Ganesh Sakharam Mahajani, M.A., Ph.D. (*Poona cum Satara, General Rural*) ; Ramchandra Narayan Mandlik (*Kolaba cum Ratnagiri General Rural*) ; Mrs. Hansa Jivraj Mehta (*Bombay City cum Bombay Suburban District, General Urban*) ; The Hon'ble Mr. Mangaldas Mancharam Pakvasa (*Broach and Panch Mahals cum Surat, General Rural*), Mangaldas Bhikhabhai Patel (*Ahmedabad cum Kaira, General Rural*) ; Somasing Dhansing Patil (*East Khandesh cum West Khandesh, General Rural*) ; Chandulal Surajmal *alias* Bhikhabhai Satia (*Ahmedabad cum Kaira, General Rural*) ; Shantilal Harjiwan Shah, B.A., LL.B. (*Broach and Panch Mahals cum Surat, General Rural*) ; S. J. Shaikh (*Northern Division, Muhammadan Rural*) ; Ramchandra Ganesh Soman (*Poona cum Satara, General Rural*) ; Sir Frederick Stones, Kt., O.B.E. (*Presidency, European*) ; Vasantrao Madhavrao Vedak (*Kolaba cum Ratnagiri General Rural*).

The Central Provinces and Berar.

The Central Provinces and Berar composed a great triangle of country midway between Bombay and Bengal. Their area is 1,18,710 sq. miles, of which 80,766 are British territory proper, 17,809 (*viz.* Berar) held on perpetual lease from H.E.H. the Nizam and the remainder held by Feudatory Chiefs. The population is 16,813,584 in C. P. British Districts and Berar. Various parts of the Central Provinces passed under British control at different times in the wars and tumult in the first half of the 19th century and the several parts were amalgamated after the Mutiny, in 1861, into the Chief Commissionership of the Central Provinces. Berar was, in 1853, assigned to the East India Company as part of a financial arrangement with H.E.H. the Nizam for the maintenance of the Hyderabad Contingent, and was leased in perpetuity to the Central Provinces in 1903, as the result of a fresh agreement with H.E.H. the Nizam.

The Country.

The Central Provinces may roughly be divided into three tracts of upland, with two intervening ones of plain country. In the northwest, the Vindhya plateau is broken country, covered with poor and stunted forest. Below its precipitous southern slopes stretches the rich wheat growing country of the Nerbudda valley. Then comes the high Satpura plateau, characterised by forest-covered hills and deep water-cut ravines. Its hills decline into the Nagpur plain, whose broad stretches of "deep" black cotton soil make it one of the most important cotton tracts of India and the wealthiest part of the C. P. proper. The Eastern half of the plain lies in the valley of the Wainganga and is mainly a rice growing country. Its numerous irrigation tanks have given it the name of the "lake country" of Nagpur. Farther east is the far-reaching rice country of Chhattisgarh, in the Mahanadi basin. The south-east of the C. P. is again mountainous, containing 24,000 square miles of forest and precipitous ravines, and mostly inhabited by jungle tribes. The States of Bastar and Kanker lie in this region. Berar lies to the south-west of the C. P. and its chief characteristic is its rich black cotton-soil plains.

The People.

The population of the province is a comparatively new community. Before the advent of the Aryans, the whole of it was peopled by Gonds and other primitive tribes and these aboriginal inhabitants fared better from the Aryans than their like in most parts of India because of the rugged nature of their home. But successive waves of immigration flowed into the province from all sides. The early inhabitants were driven into the inaccessible forests and hills, where they form nearly a quarter of the whole population of the Central Provinces being found in large numbers in all parts of the province, particularly in the south-east. The main divisions of the newcomers are indicated by the language divisions of the province. Hindi brought in by the Hindustani-speaking peoples of the North, prevails in the North and East, Marathi in Berar and the West and centre of the Central Provinces. Hindi is spoken by 56 per cent. of the population and is the *lingua franca*. Marathi by 31 per cent. and Gondi 7 per cent. The effects of invasion are curiously illustrated in Berar, where numbers of Moslems have Hindu names, being descendants of former Hindu officials who on the Mahomedan invasion adopted Islam rather than lose their positions. The last census shows that a gradual Brahmanising of the aboriginal tribes is going on. The tribes are not regarded as impure by the Hindus and the process of absorption is more or less civilising.

Industries.

When Sir Richard Temple became first Chief Commissioner of the C. P., the province was land locked. The only road was that leading in from Jubbulpore to Nagpur. The British administration has made roads in all directions, the two trunk railways between Bombay and Calcutta run across the province and in the last few years a great impetus has been given to the construction of subsidiary lines. These developments have caused a steady growth of trade and have aroused vigorous progress in every department of life. The prime industry is, of course, agriculture, which is assisted by one of the most admirable agricultural departments in India and is now receiving additional strength by a phenomenal growth of the co-operative credit movement. The land tenure is chiefly on the malguzari, or landlord system, ranging with numerous variations, from the great Feudatory chiefships, which are on this basis, to holdings of small dimensions. A system of land legislation has gradually been built up to protect the individual cultivator. Berar is settled on the Bombay raiyatwari system. 16,088 square miles of the C. P. is Government Reserved forest; in Berar the forest area is about 3,335 square miles, the total forest area being one-fifth of the whole Province. The rugged nature of the greater part of the country makes forest conservation difficult and costly. Excluding forest and waste, 67 per cent. of the total land is occupied for cultivation; for the two most advanced districts in the Central Provinces, the proportion averages 81 per cent., while the average figure for the Berar Districts is 77 per cent. The cultivated area has extended almost continuously except for the temporary checks caused by bad seasons. Rice is the most extensive single crop of the Central Provinces, covering nearly 3½ per cent. of the cropped area. Wheat comes next with over 13 per cent., then pulses and other cereals used for food and oil-seeds with nearly 5½ per cent., and cotton nearly 4 per cent. In Berar cotton is 32 per cent. and juar 37 per cent., respectively. And then come pulses and other cereals and oil-seeds of the cropped area. In agriculture more than half the working population is female.

Commerce and Manufactures.

Industrial life is only in its earliest development except in one or two centres, where the introduction of modern enterprise also on the

railway routes has laid the foundations for great future developments of the natural wealth of the province. Nagpur is the chief centre of a busy cotton spinning and weaving industry. The Empress Mills, managed by Messrs. Tata Sons Ltd., were opened there in 1877 and the general prosperity of the cotton trade has led to the addition of many mills here and in other parts of the province.

The largest numbers engaged in any of the modern industrial concerns are employed in manganese mining which in 1942 employed 29,398 persons and raised 6,43,773 tons. Then follow coal mining with an output of 18,36,522 tons and 17,350 persons employed, the Jubbulpore marble quarters and allied works, the limestone quarries and the mines for pottery clay, soapstone, etc.

The total number of factories of all kind legally so described was 1,705 and 1,217 in 1,941 and 1945 respectively the latest period for which returns are available and the number of people employed in them 1,09,869 and 1,10,263 respectively. The same economic influences which are operative in every progressive country during its transition stage are at work in the C. P. and Berar, gradually sapping the strength of the old village industries, as communications improve and industries are fading away, a large development of trade has taken place.

Administration.

The administration of the Central Provinces and Berar is conducted by a Governor who is appointed by the Crown. He is assisted by eight Secretaries and six Under-Secretaries. Under the provisions of the Govt. of India Act, 1935, the administration is conducted by a Governor with a council of ministers, chosen and summoned by him and sworn as members of the council

This Province, which has a unicameral Legislature, consists of 112 members distributed as follows :—

Class of constituency or constituencies—		
General Urban	10	No. seats.
General Rural	74	84
Muhammadan Urban	2	
Muhammadan Rural	12	
Women	3	
Anglo-Indian	1	seat.
European	1	,,
Backward areas & Tribes.. ..	1	,,
Commerce	2	seats.
Landholders	3	,,
Labour	2	,,
University	1	seat.

Of the 84 General seats 20 seats are reserved for members of the Scheduled castes.

The C. P. are divided for administrative purposes into three divisions and Berar constitutes a division. Each of these is controlled by a Commissioner. The divisions are sub-divided into districts, each of which is controlled by a Deputy Commissioner, immediately subordinate to the Commissioner. The principal heads of Provincial departments are the Commissioner of Settlements and Director of Land Records, the Chief Conservator of Forests, the Inspector-General of Civil Hospitals, the Director of Public Health, the Inspector-General of Police, the Inspector-General of Prisons, the Director of Public Instruction, the Excise Commissioner and Superintendent of Stamps and Inspector-General of Registration, and Registrar-General of Births, Deaths and Marriages, the Director of Agriculture, the Regi-trar of Co-operative Societies, the Director of Industries, the Legal Remembrancer, the Director of Veterinary Services and a Chief Engineer, Public Works Department, Buildings and Roads and Irrigation Branches, Commissioner of Food Supplies and Post-war Reconstruction Commissioner. The Deputy Commissioners of districts are the chief revenue authorities and District Magistrates and they exercise the usual powers and functions of a district officer. The district forests are managed by a forest officer, over whom the Deputy Commissioner has certain powers of supervision, particularly in matters affecting the welfare of the people. Each district has a Civil Surgeon, except Melghat, Drug and Balaghat where there are Assistant Surgeons) who is generally also Superintendent of the District Jail except at Central Jails at Nagpur and Jubbulpore and District Jails at Raipur, Narsinghpur and Akola where there are whole time Superintendents and whose work is also in various respects supervised by the Deputy Commissioner. The Deputy Commissioner is also Marriage Registrar and manages the estates of his district which are under the Court of Wards. In his revenue and criminal work the Deputy Commissioner is assisted by (a) one or more Assistant Commissioners, or members of the Indian Civil Service ; (b) one or more Extra Assistant Commissioners, or members of the Provincial Civil Service, including a few Anglo-Indians and (c) by Tahsildars and Naib Tahsildars, or members of the Subordinate service. The district is divided for administrative purposes into tahsils, the average area of which is 1,500 square miles. In each village a lambardar or representative of the proprietary body is executive headman.

Justice.

The High Court of Judicature at Nagpur, which was established in January 1936, is the highest court of appeal in civil cases, and also the highest court of criminal appeal and revision for the Central Provinces and Berar including proceedings against European British subjects and persons jointly charged with European British subjects.

Subordinate to the High Court are the District and Sessions Judges (9 in number) each of whom exercises civil and criminal jurisdiction in a Civil and Sessions district comprising one or more Revenue districts. The civil staff below the District and Sessions Judge consists of civil Judges of the first and second class.

Local Self-Government.

Municipal Administration was first introduced under the Punjab Municipal Act and the Municipality of Nagpur dates from 1864. Several revising Acts extend its scope and the C. P. Municipalities Act passed towards the end of the year 1922 has considerably increased the powers of the Municipal Committees. The C. P. Municipalities Act has also been extended to Berar. Viewed generally, municipal self-government is considered to have taken root successfully. The larger towns have municipalities, there being 82 such bodies in the Province.

Under the Central Provinces Local Self-Government Act passed in 1920 as amended in 1931 there is a local board for each tahsil and a district council for each district excepting Hoshangabad, Chhindwara and Saugor districts each of which has two district councils. The local board consists of elected representatives of circle. The constitution of the district council is a certain proportion of elected representatives of local boards, and of members selected by these representatives. If the members elected on the local board or the district council do not include a Muslim, a Harijan and a woman, the elected members of the local board of the district council as the case may be have to select a Muslim, a Harijan or a woman as may be required to be a member, and if they fail to do so the Provincial Government can appoint a Muslim, a Harijan or a woman as may be required.

The district councils in the Central Provinces have power of taxation within certain limits and local boards derive their funds in allotments from the District Councils. The new Central Provinces Local Self-Government Act has also been applied to Berar. The office bearers of all the district councils, and with few exceptions of local boards, also are non officials.

Rural education, sanitation, medical relief and rural communications are among the primary objects to which these bodies direct their attention, while expenditure on famine relief is also a legitimate charge upon the District Council funds.

The Central Provinces Village Panchayat Act was passed in the year 1920. So far 1,089 Panchayats have been established. As the result of a recommendation of a Committee appointed in 1925 to look into the question of Panchayats, a Village Panchayat Officer was appointed to guide the developments of the Panchayat system. This post was kept vacant on account of financial stringency for more than two years. It has now been filled in with effect from the 24th May 1933. The post was again kept in abeyance with effect from the 29th December 1944. Government has recently decided to revise the post.

Public Works.

The Public Works Department, which comprises Buildings and Roads and Irrigation Branches, is under the control of the Chief Engineer. There are two Superintending Engineers who between them supervise the work of both branches. The Province is fairly well served by a network of roads, but in a number of cases they are not fully bridged and are therefore impassable to traffic at times during the rains.

State irrigation was introduced early in the present century mainly as a result of the recommendations of the Irrigation Commission (1901-03). During the last forty five years a sum of Rs. 7.25 crores has been expended on the construction of irrigation works, of which the more important are the Wainganga, Tandula-Mahanadi, Kharung and Maniari canals.

Three works, viz., the Mahanadi and Wainganga Canals and the Asola Mendha tank, were sanctioned originally as productive works and the remainder were all sanctioned as unproductive works. The three works sanctioned as productive have all failed to justify their classification in that category and have now been transferred to the unproductive list. The conditions in the province are such that irrigation works cannot be expected to be productive and their construction is justified only on account of their value as a protection against famine. The normal area of annual irrigation is at present about 7,25,000 acres, mainly rice and the income from these works more than covers the expenditure incurred on their maintenance and management.

Police.

The police force was constituted on its present basis on the formation of the Province, the whole of which including the Cantonments and the Municipalities, is under one force. The strength is equal to one man per nine square miles of area. The superior officers comprise an Inspector-General, whose jurisdiction extends over Berar, three Deputy Inspectors-General, for assistance in the administrative control and supervision of the Police force, including the Criminal Investigation Department, and the usual cadre of District Superintendents of Police, Assistant and Deputy Superintendents and subordinate officers. On railways special Railway Police are employed under the control of two Superintendents of Railway Police with headquarters at Raipur and Hoshangabad. There is a Police College under the control of a Superintendent of Police at Saugor and Constable's Schools under the control of Deputy Superintendents at Nagpur and Jubbulpore. A special Armed Force of 3,547 men is distributed over the headquarters of eight districts, for use in dealing with armed disturbers of the peace in whatever quarter they may appear. There is a small force of Mounted Police consisting of 1 Head Constable and 7 Constables for the escort of His Excellency the Governor. The Central Provinces has no rural police as the term is understood in other parts of India. The village watchman is the subordinate of the village headman and not a police official and it is considered very desirable to maintain his position in this respect.

During the war there has been an expansion of the District Police and the special Armed Force and the formation of a battalion of special armed constabulary.

Education.

The Education Department of the Central Provinces and Berar is administered by a Director of Public Instruction assisted by (i) a Personal Assistant, (ii) two Deputy Directors of Public Instruction—one for Primary and Secondary education and the other for Technical Education, the former being assisted by two

Technical Assistants, (*iii*) an Officer on Special Duty for Post-War Reconstruction Scheme, (*iv*) an Officer-in-charge of Muslim Education, (*v*) six Divisional Superintendents of Education each assisted by a Personal Assistant, (*vi*) nineteen District Inspectors of Schools assisted by eighty-seven Assistant District Inspectors of Schools, and (*vii*) two Inspectresses of Schools, assisted by six District Inspectresses of Schools and five assistant District Inspectresses of Schools.

The Director of Public Instruction is no longer the Secretary to Government in the Education Department. The Education Department has now an I.C.S. Secretary like other Departments of Government and an officer of the Education Department acts as Under Secretary.

Schools are divided into (*a*) schools for general education and (*b*) schools for special education. The latter are schools in which instruction is given in a special branch of technical or professional education. The main division of schools for general education is into Primary and Secondary. In the Primary Schools teaching is conducted wholly in recognised Indian languages of the province and these schools are known as Primary Schools. The Secondary Schools are divided into Middle and High Schools. The former may be either Middle Schools in which instruction is given (*a*) wholly in a recognised Indian language or (*b*) mainly in a recognised Indian language with the option of English as an additional language, or Indian English Middle Schools in which instruction is given in a recognised Indian language but English is a compulsory subject. In the High School classes instruction is given through the recognised Indian language since 1922 but for the convenience of pupils whose mother tongue is not a recognised Indian language of the locality as also for those who otherwise desire to learn through English, a few English medium sections are still maintained. For administrative purposes, schools are further divided according to their management into schools under public management and schools controlled by private bodies. The former consist of (*a*) schools controlled by Government and (*b*) schools controlled by Local Bodies or Boards. The latter consist of (*a*) schools which are aided by grant from Government or from Local Funds and Municipal Funds and (*b*) unaided schools. All schools under public management, all aided schools and all unaided recognised schools conform in their courses of study to the standards and syllabi prescribed by the Education Department or by the Board of High School Education in the Central Provinces and Berar. They are subject to inspection by the departmental officers and to the general rules governing schools of this type. They are "recognised" by the Department and their pupils may appear as candidates for any prescribed public examination for which they are otherwise eligible. Unrecognised schools do not follow the rules of the Department, nor are they subject to inspection by the Department. Their pupils *may* not appear as candidates at any of the prescribed public examinations without the previous sanction of the Department. Primary Education is mostly under the Control of District Councils, Municipal Committees and Notified Area Committees. The Primary Education Act empowers local authorities to introduce compulsion and this is in force in several areas.

Among the schools for special education are the Government Engineering School, Nagpur, and three Government Schools of Handicraft and twelve aided Industrial Schools. The Engineering School teaches upto the diploma standard in Civil, Mechanical and Automobile Engineering and is affiliated to the Nagpur University. The Schools of Handicrafts Industrial Schools have recently been transferred to the Education Department from the Commerce and Industry Department and teach carpentry, Blacksmithy, Tailoring, Shoemaking, cotton-weaving, carpet and durrie making, toy making and lacquer work, cane and basket manufacturing. They are under the Administrative control of the Director of Public Instruction, who is assisted by an Inspector of Industrial Schools.

Higher Education is under the control of the Nagpur University of which the following are constituent colleges:—at Nagpur: Morris College, the National College, the College of Science, Hislop College, the Laxmi Narayan Technological Institute, City College, the Agriculture College (under the Agriculture Department), the University College of Law, the Central College for Women; and the University Training College (for teachers); at Jubbulpore: the Robertson College, the Hitkarini City College, the Spence Training College (for teachers) and the Hitkarini Law College; at Amraoti: the King Edward College; at Wardha: the Commerce College; at Akola: the Berar Arts College; at Raipur: the Chhattisgarh Arts College and at Bilaspur: the Sheo Bhagwan Rameshwar Lal Arts College. There is also a Medical School at Nagpur under the Medical Department.

Secondary Education is under the control of the Board of High School Education, on which the University is represented. The Director of Public Instruction is the *Ex-officio* Chairman of the Board and is assisted by a Secretary. The High School Certificate awarded by the Board qualifies for entrance to the University.

Medical.

The Medical and Public Health services of the Province are respectively controlled by the Inspector General of Civil Hospitals and Director of Public Health. The Medical Department has made some progress since the year 1911. A striking advance has been made in recent years with urban sanitation and the opening of a Medical School at Nagpur in 1914 supplies a long felt need. The principal medical institutions are the Mayo Hospital at Nagpur (opened in 1874) with accommodation for 222 in-patients; the Victoria Hospital at Jubbulpore (opened in 1886) with accommodation for 170 in-patients; the Daga Memorial (Dufferin) Hospital and the Mure Memorial Hospital at Nagpur and the Lady Elgin Hospital and the Crump children's hospital at Jubbulpore, these last four being for women and children and can together accommodate 270 in-patients.

In addition to these, hospitals for women exist at Chhindwara, Gondia, Saugor Khandwa, Amraoti, Murtizapur, Shegaon and Khamgaon and at all district headquarters where no separate women's hospitals exist, sections have been opened at the main hospitals for the treatment of women by women doctors. The Mayo Hospital at Nagpur was provincialised in 1923, the Irwin Hospital at Amraoti in 1925, the Victoria Hospital at Jubbulpore in 1926 and the Silver Jubilee Hospital at Raipur in 1928. In accordance with recent policy 174 out of 233 local fund dispensaries have been transferred to the administrative and executive control of local bodies. With the object of bringing medical relief within easy reach of the rural population, Government has sanctioned (*i*) subsidising 22 medical practitioners (allopathic) one in each district council (4); (*ii*) subsidising 83 vaidyas and hakims one in each tahsil (35); (*iii*) establishment of 83 Ayurvedic and Unani dispensaries in each tahsil (46). (The figures in brackets indicate the number in actual operation at present). The Province has one Mental Hospital at Nagpur. Four tuberculosis clubs have been opened at Nagpur, Jubbulpore, Raipur and Amraoti during the year 1937 and 40 beds have been reserved at the Pendra Road Sanitorium for the treatment of patients sent by Government. There is a great deal of eye disease in the province and the problem is receiving special attention. The Central Provinces and Berar Blind Relief Association is doing propaganda work and helping the blind. So far 25 assistant medical officers have been given training in eye work for six months at the Mayo Hospital, Nagpur. These specially trained officers are posted to eye centres in the Province. Anti-rabic treatment is now available at 12 centres in the province, *viz.*, Nagpur, Jubbulpore, Raipur, Akola, Wardha, Hoshangabad, Saugor Chanda, Chhindwara, Khandwa, Yeotmal and Amraoti. Intensive efforts are being made to convert the Robertson Medical School at Nagpur upto college standard and it is hoped to be ready in 1946. Nurses training schools exist in all hospitals in the Province and these are being enlarged and improved as fast as staff permits. Arrangements are in hand to transfer the Mental Hospital, Nagpur, to new buildings in Chhindwara.

Public Health.

The Public Health services of the province are controlled by the Director of Public Health. In 1939, a separate cadre of Sub-Assistant Health Officers was sanctioned by the Government. An appreciable advance has been made in rural sanitation. The Public Health Department is mainly concerned with the uplift of the masses and in raising the health conscience of the people in rural areas. The principal institutions working under the Department are :—

1. The Central Provinces Vaccine Institute which was founded in the year 1913. Here, small-pox vaccine lymph is manufactured for the whole province and the neighbouring feudatory states. Vaccinators are also trained at the institute.
2. Public Health Institute established in the year 1928 undertakes the examination both chemical and bacteriological, of samples of water and food stuffs under the Food Adulteration Act. Classes to train sanitary inspectors and other employees of the Municipal committees and personnel of other Government departments in anti-malaria courses have been opened. Facilities also exist for the examination of pathological specimen and clinical material of indigent cases of infectious diseases free of charge.
3. There is a Health School at Nagpur, where Health Visitors are trained.
4. The problem of leprosy is being tackled in the province and the department has a leprosy specialist who is in charge of treatment, propaganda and survey work. There are 27 leprosy Assistant Health Officers who are running 56 leprosy centres. Of these, 6 centres are run by the British Empire Leprosy Relief Association (Provincial Branch).
5. There are 82 Assistant Health Officers in charge of epidemic dispensaries (One in each Tahsil).
6. One mechanised travelling dispensary in charge of an Assistant Health Officer with a trained compounder is working under the department. The dispensary visits roadside villages and renders medical aid to the aboriginals.
7. A scheme for eradicating the disease of Yaws is in operation in Chanda and Bilaspur districts where the incidence of Yaws is high. The results are satisfactory.
8. A Nutrition officer has been appointed. The first task of this officer is to carry out diet surveys on standard lines, gauge the extent of mal-nutrition and to tackle other problems concerning Nutrition
9. The following sections have been opened as post-war measures :—
   (*i*) Maternity and child welfare Section under Assistant Director of Public Health (M. & C.W.) to reduce infant and maternal mortality in the province.
   (*ii*) Malaria section under A.D.P.H. (Malaria) to reduce the incidence of Malaria in the province by carrying out malaria surveys and control measures.
   (*iii*) Public Health Engineer section to assist municipalities in preparing water drainage, town planning and housing schemes and the district councils with regard to the provision of adequate water supply in rural areas.

Vaccination is compulsory in 105 towns and 16,843 villages out of a total of 119 towns and 38,985 villages respectively.

FINANCES OF THE CENTRAL PROVINCES.

ESTIMATED REVENUE FOR 1946-47.

Principal Heads of Revenue.

	Rs.
Taxes on Income other than Corporation Tax	98,20,000
Salt	....

The Madras Province.

The Madras Presidency occupies the whole southern portion of the Peninsula, and, excluding the Indian States, all of which have now come under the direct control of the Government of India, has an area of 124,363 square miles. It has on the east, on the Bay of Bengal, a coast line of about 1,250 miles; on the South on the Arabian Sea, a coast line of about 450 miles. In all this extent of coast, however, there is not a single natural harbour of any importance; the ports, with the exception of Madras, and perhaps of Cochin and Vizagapatam are merely open roadsteads. A plateau, varying in height above sea-level from about 1,000 to about 3,000 feet and stretching northwards from the Nilgiri Hills, occupies the central area of the Presidency; on either side are the Eastern and the Western Ghats, which meet in the Nilgiris. The height of the western mountain-chain has an important effect on the rainfall. Where the chain is high, the intercepted rain clouds give a heavy fall, which may amount to 153 inches on the seaward side, but comparatively little rain falls on the landward side of the range. Where the chain is low, rain-clouds are not checked in their westward course. In the central table land on the east coast the rainfall is small and the heat in summer excessive. The rivers, which flow from west to east, in their earlier course drain rather than irrigate the country; but the deltas of the Godavari, Kistna and Cauvery are productive of fair crops even in time of drought and are the only portions of the east coast where agriculture is not dependent on a rainfall rarely exceeding 40 inches and apt to be untimely.

Population.

The population of the Presidency was returned at the census of 1941 as 49,840,561, an increase of 5,181,826 over the figure of 1931. The increase was not uniform. The districts which had suffered most in 1921 tended to show large increases in 1931—Bellary and Agencies were marked illustrations. As a natural corollary to an increase in population the Presidency density has risen. Hindus account for 86·2 per cent. of the Madras population, Muhammadans 7 per cent. and Christians 4 per cent. The actual number in other communities is inconsiderable. The vast majority of the population is of the Dravidian race and the principal Dravidian languages, Tamil and Telugu are spoken by 19 and 18 million persons respectively. 40 per cent. of the population talk Tamil, 37½ per cent. Telugu, 7·9 per cent. Malayalam, Oriya, Kanarese, Hindustani, Tulu follow in that order with percentages above 1.

Government.

The executive authority of the Province is exercised on behalf of His Majesty by the Governor. He is aided by a Cabinet of 13 Ministers.

Agriculture and Industries.

The principal occupation of the province is agriculture engaging about 68 per cent. of the population. The principal food crops are rice, cholam, ragi and cumbu. The Industrial crops are cotton, sugarcane and groundnut. The agricultural education is rapidly progressing in the Presidency. The activities of the Agricultural Department in matters educational consist in the running of two colleges one at Coimbatore affiliated to the University of Madras, and another at Bapatla in the Guntur District affiliated to the Andhra University, four farm labourers, schools and numerous demonstration farms. As it was found that the present course of middle school education does not satisfy the needs of the ryots, the only school maintained by the department at Taliparamba was closed with effect from 1st April 1932. Short practical courses in farm management and allied subjects have been instituted at the Agricultural College. While paddy which is the staple food of the population, occupies the largest cultivable area, cotton and sugarcane are by no means inconsiderable crops of the province and are receiving close attention at the hands of the local agricultural authorities. The area under cotton irrigated and unirrigated was 1,670,141 acres in 1944-45 and, as in the case of paddy, efforts are being made to produce better strains of cotton suited to different localities by means of both selection and hybridization. From existing good staple areas, improved varieties have been systematically introduced. A special feature of the agricultural activities in the Presidency is the large industry which the planting community have built up, contributing substantially to the economic development of the province. They have organised themselves as an unregistered body under the title of "The United Planters' Association of South India," on which are represented coffee, tea, rubber and a few other minor planting products. The aggregate value of seaborne trade of the Presidency which was Rs 82 58 crores in 1936-37 and Rs 88 49 crores in 1937 38, and Rs 79 04 crores in 1938-39, Rs 82·89 crores in 1939-40, Rs.75 48 crores in 1940-41, 76 34 crores in 1941-42 and 66-51 crores in 1942-43. As in other provinces, the forest resources are exploited by Government. There are close upon 18,778 square miles of reserved forests.

Sixty-six spinning and weaving mills were at work during 1944-45 with 6,993 looms and 15,15,704 spindles. The number of jute mills at work was four. At the close of the year 1936 the number of the other factories in the Presidency was 1,762. These consisted of oil mills, rope works, tile works, etc. Tanning is one of the principal industries of the Presidency. Exports of tanned hides declined from 9,029 tons valued at Rs.213·98 lakhs to 6,095 tons valued at Rs.149·34 lakhs. The manufacturing activities which are under the direction of the Department of Industries are mainly

confined to the production of soap and shark liver oil. There are a number of indigenous match factories run on cottage lines. It is slowly becoming recognised that the Madras Presidency is one of the most suitable parts of India for sugarcane cultivation and that the several deep-rooted varieties of cane which have been evolved at Coimbatore and require very little water are especially suited for the conditions which obtain in several areas of the Presidency where they grow better than in the north. The departments of Industries and Agriculture assist the development of the sugar industry by demonstration of the methods of manufacture of white sugar by centrifugals by getting trained sugar technologists, by the award of scholarships and by investigating schemes for starting sugar factories.

Education.

There were at the end of the official year 1944-45 about 37,500 public institutions, ranging from village primary schools to arts and professional colleges, their total strength being about 34,30,212. Special efforts are being made to provide education for boys belonging to the communities eligible for help by the Labour Dept. The total expenditure of the province on Education is in the neighbourhood of Rs. 8.32 lakhs. The principal educational institutions in the province are the Madras, Andhra and Annamalai Universities, the Presidency College, the Christian College, the Loyola College, the Pachaiyappa's College, the Law College, the Queen Mary's College for Women and the Government Muhammadan College, Madras; the St. Joseph's College, Trichinopoly; the American College, Madura; the St. Aloysius College, Mangalore; the Government College, Kumbakonam; the Ceded Districts College, Anantapur; the Government College, Rajahmundry; the Victoria College, Palghat; the Government College, Mangalore, the Government Brumin College, Tellicherry the Government College, Coimbatore; the Agricultural College, Coimbatore; the Veterinary College, Madras; the Madras Medical College, the Stanley Medical College, Royapuram (Madras); the Andhra Medical College, Vizagapatam; the Engineering College at Madras (Guindy); the Teachers' College, Saidapet; the Lady Willingdon Training College for Women, Madras and the Government Training College, Rajahmundry.

Local Administration.

Local bodies in the Madras Presidency are administered under the following Acts:—

The Madras City Municipal Act, 1919, was amended by a comprehensive Amendment Act in 1936 and the main changes effected by the Amending Act which was brought into force on 21st April 1936, were as follows:—

(1) the redistribution of the existing thirty divisions into forty territorial ones;

(2) the provision for a Deputy Mayor;

(3) the provision for aldermen;

(4) the increase in the maximum strength of the council from 50 to 68 members consisting of 60 elected councillors, five aldermen elected by the council and not more than three special councillors appointed by Government for special subjects;

(5) the reservation of three special seats for the members of the Scheduled Castes and two for Labour;

(6) the widening of the franchise;

(7) the abolition of the system of representation of minority communities by nomination;

(8) the provision for better control over thatti and hutting grounds;

(9) the provision for the levy of a tax on advertisements;

(10) the fixing of the minimum and maximum rates of levy of the property tax at 15% and 20 per cent. respectively of the annual value of buildings and lands, and

(11) the constitution of a new Taxation Appeals Standing Committee with a Chairman appointed by Government.

Of the two seats reserved for labour, one is to be elected by a non-union labour electorate and the other by union labour electorate.

By an Act of 1939 simultaneous triennial elections to all the forty divisions in the city were introduced.

The Madras District Municipalities Act, 1920, as amended by Madras Act X of 1930; and

The Madras Local Boards Act, 1920, as amended by the Madras Act XI of 1930.

The amending Act of 1930, which came into force on the 26th August 1930, provide, *inter alia*, for the abolition of the system of nominations to local bodies, for the inclusion of village panchayats within the scope of the Madras Local Boards Act with a view to making the village the unit of local self-government, for direct elections to district boards, for the creation of a municipal and local boards service for the Presidency of Madras, for the removal of the disqualification of women as such in respect of elections to municipal councils and for the cessation of office of the President of a district board or Chairman of a Municipal Council on a motion of non-confidence being passed against him by a prescribed majority. The Acts have undergone subsequent amendments. Taluk Boards have been abolished with effect from the 1st April 1934.

In the interests of administration, commissioners have been appointed to all the Municipalities in the presidency and these have replaced non-official chairmen as executive authorities.

Under an Amending Act of 1934, the taluk boards were abolished with effect from 1st April 1934. This step was undertaken as these bodies became financially embarrassed. Their functions have been entrusted to district boards; with a view to avoid extreme centralisation of administration of district boards, it was decided to bifurcate them. Up to the end of 1936, the number of district boards bifurcated was four. Eight district boards were bifurcated in 1936.

But, it was actually found later on that many of the bifurcated district boards were financially unstable so much so that the Government had to have recourse to a reversal of the policy of bifurcation and to amalgamate all of the bifurcated district boards.

By an Act of 1935, the local boards in the presidency have been divided into three groups for the purpose of elections, so that elections will be held to a third of the local boards every year. The object of this legislation was administrative convenience.

By an Act of 1936 ordinary courts of law have been debarred from issuing injunctions restraining proceedings which are being or about to be taken for the conduct of elections to local bodies and preparation of electoral rolls in connection therewith.

By an Act of 1938 the franchise of the territorial constituencies of the Madras Legislative Assembly were assimilated to that of the local bodies in the Province of Madras, inclusive of the Corporation of Madras with a view to widen the franchise of local bodies and to effect economy in the cost of preparation of the electoral roll of local bodies.

By an Act of 1939 Chairman or Vice-Chairman of Municipal Council and Presidents and Vice-Presidents of local board who have been removed were made ineligible for election to either of the said offices for a period of six months from the date of removal or until the date on which notice of the next ordinary election is published.

By Acts passed in 1940 and 1941 persons who are in arrears of any kind due to any local body inclusive of the Corporation of Madras are disqualified from standing for election or holding office as a member thereof.

By an Act of 1941, a new provision was made in the Madras Local Boards Act 1920 enabling the Government to supersede District boards upto a period of three years.

By an Act of 1942 the term of office of Councillors and Aldermen of the Corporation of Madras, of Councillors of Municipalities and of members of District Boards which expired on 1st Nov. 1942 was extended to 1st November 1943 and power was also taken by the Provincial Government to advance or postpone the date.

By the same Act the Provincial Government have taken power to appoint, when reconstituting, all members of such Councils and District Boards as were under supersessions or dissolution on the date on which the Act came into force or will be superseded or dissolved after such date, to determine the term of their office, to reduce the strength of the reconstituted Municipal Council, District Board and to alter or abolish the reservation seats for any community or for women.

The Municipal Engineers in some of the Municipalities and the Electrical Engineers in some of the Municipalities and Punchayets have also been constituted into separate services known as the Madras Municipal Engineering Service and the Madras Local Authorities Electrical Engineers Service respectively. The existing system of control and supervision of the Local Fund Engineering Department was reorganised in 1940 and the Chief Engineer (Communications) known as Chief Engineer (Highways) from 1st April 1946, was made the head of the District Board Engineering Service and three posts of Superintending Engineers were created. These constitute important steps in improving the status and conditions of some of the main services of local board employees.

A Provincial Highways Department has been formed from 1st April 1946. The main roads in charge of District Boards and Municipal Councils have been transferred to the Highways Department for maintenance from the said date. The Chief Engineer (Highways) and six Superintending Engineers (Highways) supervise not only the works on Highways Department roads but also the road works Boards and Municipal Councils. The Divisional Engineers of the Highways Department are ex-officio District Board Engineers. Assistant Engineers of the Highway Department are lent to District Boards to attend to District Board works.

By the amendment Acts of 1943—

(a) The provisions of the City Municipal Act relating to the powers of the standing committee in respect of establishment, were placed on a line with the M.D.M. and M.L.B. Acts prohibiting these committees from considering any proposals for the amendment of the establishment schedule except at the instance of the executive authority.

(b) The M.D.M. Act was amended in a comprehensive manner removing certain administrative difficulties which were found necessary.

(c) Power was vested in the Board of Revenue to resume an endowment the management of which had been transferred to a local board and provision was also made for fixing the rent value of lands in proprietary estates for a triennium instead of for every year.

(d) Power was taken for the appointment of executive officers to panchayets.

By the amendment Acts of 1944—

(a) Power was taken for the Collector to appoint any member of a local board or municipal council as president or vice-president or chairman and vice-chairman respectively when presidents, vice-presidents, or chairmen or vice-chairmen are absent on account of their being detained in prison.

(b) Power was taken for Govt. to direct any municipal council to levy property tax at such rates and with effect from such dates as may be specified in the order, if the finances of the council are not enough to discharge its obligations.

Co-operation.

The year 1943-44 was one of marked progress. The number of societies increased from 15,207 to 15,540, their membership from 14,51,942 to 16,22,853, the working capital from Rs.2,858·15 lakhs to Rs.3,068·33 lakhs, the loans issued from Rs.1,515·12 lakhs to Rs.2,027·10 lakhs and the divisible profits from Rs.45·75 lakhs to Rs.60·38 lakhs. The collections by Central Banks were very good and the percentage of overdues was 13·88 as against 18·44 in 1942-43 which itself was the lowest for the preceding 17 years. There was a shrinkage in the loan business of Land Mortgage Banks, agricultural credit societies and sale societies. The year witnessed a remarkable expansion of the activities of Co-operative Stores. The sales turnover of both the primaries and the wholesales reached the peak figure of Rs.13½ crores. There were 1,198 primary stores with 692 branches or depots. Their purchases and sales amounted to Rs.806·96 lakhs and Rs.832·36 lakhs as against Rs.215·75 lakhs and Rs.208·49 lakhs, respectively, in the previous year. The trade of the wholesales also recorded a striking increase, the purchases and sales amounting to Rs.554·43 lakhs and Rs.518·93 lakhs against Rs.96·36 lakhs and Rs.80·05 lakhs, respectively, in 1942-43. Some of the important features of the working of the stores were their participation in schemes of statutory rationing and procurement, their sales to non-members (60 per cent), formation of stores societies for the benefit of industrial labourers and extension of the consumers' movement in rural areas.

The total deposits and borrowings of the Madras Provincial Co-op. Bank fell from Rs.292·27 lakhs to Rs.272·27 lakhs on account of the bank's cautious policy in accepting deposits. There was a marked increase in its loan business (from Rs.56·04 lakhs to Rs.101·33 lakhs). By virtue of its position as the apex bank, the Provl. Bank continued to guide, supervise and control the financial policy of central banks. The working capital of central banks increased from Rs.673·16 lakhs to Rs.750·53 lakhs. Their total profits substantially increased from Rs.3·83 lakhs to Rs.5·04 lakhs. On account of the conditions created by the War the loans issued by the Madras Co-op. Central Land Mortgage Bank Ltd., decreased from Rs.23·66 lakhs in 1942-43 to Rs.18·26 lakhs in 1943-44. The maximum amount for which Government have guaranteed the debentures of the Bank is Rs.350 lakhs. The value of debentures in circulation at the end of 1943-44 was Rs.285·50 lakhs. No new series of debentures was issued by the Bank during the year. Government continued to give short-term advances to the Bank, whenever required.

Law and Order.

The Superior Court for Civil and Criminal Judicial work in the Presidency is the High Court at Madras, which consists of a Chief Justice and fifteen puisne judges of whom two are temporary. The existing order provides for a maximum of 15 puisne Judges. For the administration of criminal justice there are 31 Sessions Judges in the Mufassal (including 6 for agency tracts). Additional and Assistant Sessions Judges being provided to assist Courts in which the work is heavy. Then there are the District Magistrate, the Subordinate Magistrates and Honorary Magistrates. The administration of civil justice is carried on by 26 District Judges, and 34 Subordinate Judges and 140 District Munsifs. In the Presidency Town there are a City Civil Court consisting of two Judges and a Small Cause Court consisting of a Chief Judge and two other Judges. Madras is a litigious province and the records show one suit for every 200 persons in 1944. The Police department is under an Inspector-General who has six deputies, four in charge of ranges of the Presidency, one in charge of the Railway Police and the Criminal Investigation Department and one in charge of the Madras City Police as Commissioner of Police. There is also a Deputy Inspector-General of Police, Administration, in the Inspector-General's office to assist the latter in his office work. A Superintendent is stationed at each district. The sanctioned strength of the Permanent Police Force is 26,847 including the Malabar Special Police.

MADRAS BUDGET.

North-West Frontier Province.

The North-West Frontier Province, as its name denotes, is situated on the north-west frontier of the Indian Empire It is in form an irregular strip of country lying north by east and south by west and may generally be described as the tract of country, north of Baluchistan, lying between the Indus and the Durand boundary line with Afghanistan. To the north it extends to the mountains of the Hindu Kush. From this range a long broken line of mountains runs almost due south, dividing the province from Afghanistan, until the Sulaiman Range eventually closes the south of the Province from Baluchistan. The greatest length of the province is 408 miles, its greatest breadth 279 miles and its total area about 39,276 square miles, a little more than half of Bombay, or more than three-fifths of the size of England without Wales. The territory falls into three main geographical divisions: the Cis-Indus district of Hazara; the narrow strip between the Indus and the Hills, containing the Districts of Peshawar, Mardan, Kohat, Bannu and Dera Ismail Khan, and the rugged mountainous regions on the north and west between those districts and the border line of Afghanistan. Hazara and the five districts in the second division contain 14,280 square miles. The mountain regions, north and west, are occupied by tribes subject only to the political control of H. E. the Governor in his capacity as Agent to the Governor-General. The area of this tract is roughly 24,986 square miles and in it are situated, from north to south, the political agencies severally known as the Malakand, Khyber, Kurram, North Waziristan and South Waziristan Agencies. Each of the Deputy Commissioners of the six administered districts is responsible for the management of political relations with certain tribes or sections of the tribes across the frontier. A few hundred miles of the trans-border territory are internally administered by the Political Agents but the bulk of the trans-border population is free from any internal interference, so long as offences are not committed and the tribes observe the conditions on which allowances are paid to many of them.

The key to the history of the people of the N.-W. F. P. lies in the recognition of the fact that the valley of Peshawar was always more closely connected politically with Eastern Iran than with India, though in pre-Mahomedan times its population was mainly Indian by race. Early history finds the Iranians dominating the whole Indus valley. Then came the Greek invasion under Alexander the Great, in B.C. 327, then the invasions of the Sakas, and of the White Huns and later the two great waves of Mahomedan invasion. Last came the Sikh invasion beginning in 1818. The Frontier Territory was annexed by the British in 1849 and placed under the control of the Punjab Government. Frequent warfare occurred with the border tribes. The most serious phases of these disturbances were the war provoked by the aggression of Afghanistan in 1919 and the protracted punitive operations against the Waziris and Mahsuds in 1919-1920. These have resulted in the establishment at Razmak, a position dominating the Mahsud Waziri country, of a permanent garrison of 10,000 troops drawn mostly from stations lying in the plains immediately below the hills. A circular road from Bannu, through Razmak to Sararogha, Jandola and back to the Derajat provides communications transport with this force and facilitates its mobility. The effect of this measure has been a marked improvement in the internal peace of the Tribal area.

The separation of the Frontier Province from the Punjab was aimed at achieving the double object of securing closer and more immediate control and supervision of the Frontier by the Supreme Government and of making such alterations in the personnel and duties of frontier officials as would tend to the establishment of improved relations between the local British representatives and the independent tribesmen. The province was eventually removed from the control of the Punjab administration in 1901. To it was added the political charge of Dir, Swat and Chitral, the Political Agent of which had never been subordinate to the Punjab. The new Province was constituted under a Chief Commissioner and Agent to the Governor-General, with headquarters at Peshawar, in direct communication with the Government of India in the Foreign and Political Department. In April 1932 the Province was constituted a Governor's Province. In political questions there is no intermediary between the Governor and the local officer; an arrangement designed to secure both prompt disposal of references and the utilisation of the expert knowledge of frontier conditions for which the head of the administration is selected. The advisability of re-uniting the Province with the Punjab was much discussed in certain Indian political circles and as a result of the views expressed upon the matter in the Legislative Assembly the Government of India in 1922 appointed a Committee of officials and non-officials to investigate it. The Committee, presided over by Mr. D. de S. Bray, M.L.A., Joint Foreign Secretary, toured the Frontier Province and the Punjab and heard numerous witnesses. Its members were Messrs. Raza Ali, M.C.S., T. Rangacharia, Chandhri Shahabuddin, N. M. Samarth and K. B. Abdur Rahim Khan, members of the Legislative Assembly, M. N. Bolton, I.C.S. (Foreign Dept.) and A. H. Parker, I.C.S. (Punjab) (members). The inquiry developed practically into a contest between Mahomedans and Hindus on communal lines. The Hindus, allied in sympathy with their co-religionists in the Punjab, demanded the reunion of the administered districts of the Province with the Punjab or, if that were not attainable then the placing of the judicial administration of the Province under the Punjab High Court at Lahore. The Mahomedans on the other hand claimed the right of their Province

to a status corresponding with that enjoyed by other Provinces of India and to immediate reforms initiating and providing for progress along that line. The Hindus argued that a separate Pathan Province on the Frontier would cause a dangerous sentimental division from the rest of India, with leanings towards the allied racial elements outside British India. The answer to that was that a contented Pathan Province would be a valuable buttress against hostile feeling across the Border. The Committee's deliberations ended in disagreement, the two Hindu members writing each a separate report favourable to the Hindu viewpoint already explained, and the majority of the Committee, comprised of all its other members, recommending advance on a Provincial basis. Their principal recommendations were for—

Retention of the Settled Districts and Tribal Tracts as a separate unit in charge of a minor administration under the Government of India;

Early creation of a Legislative Council for the Settled District and appointment of Member of Council and Minister;

Appointment of a second Judicial Commissioner which has since been sanctioned and reform of the judicial administration in various directions, including interchange of officers with the Punjab, so that the members of the Service in the smaller Province should have the advantage of experience in the larger one.

"If (concluded the Majority) the Pathan nationality is allowed self-determination and given scope for that self-development within the Indian Empire under the Reforms Scheme, after which it is now striving, we are assured that with a contented Frontier population India can face with calm resolution the future that the Frontier has in store for her."

The People.

The total population of the N.-W.F.P. (1941) is 5,415,666, made up as follows:—

Hazara	796,230
Trans-Indus Districts ..	2,241,837
Trans-Border Area ..	2,377,599

This last figure also include estimated population for these parts of the Agencies and district tribal territory where no census was taken. There are only 632·3 females per 1,000 males in the towns and 887·6 females per 1,000 males in rural areas.

This disproportion of the sexes cannot at present be explained in the N.-W.F.P. any more than in other parts of Northern India where it also appears. The discrepancy is greater here than in any other Province of India. There is no ground for believing that the neglect of girls in infancy has any effect in causing the phenomenon. On the other hand, the female population has to face many trials which are unknown to men. The evils of unskilled midwifery and early marriage are among them. Both the birth and death-rates of the Province are abnormally low. The birth-rate in the administered districts, according to the last available official reports, is 25·6 and the death-rate 21·9.

The dominant language of the Province is Pashtu and the population contains several lingual strata. The most important sections of the population, both numerically and by social position, are the Pathans. They own a very large proportion of the land in the administered districts and are the ruling race of the tribal area to the west. There is a long list of Pathan, Baluch, Rajput and other tribal divisions. Gurkhas have recently settled in the Province. The Mahomedan tribes constitute almost the whole population, Hindus amounting to only 5 per cent. of the total and Sikhs to a few thousands. The occupational cleavage of the population confuses ethnical divisions.

(Under the North-West Frontier Province Law and Justice Regulation of 1901), custom governs all questions regarding successions, betrothal, marriage, divorce, the separate property of women, dower, wills, gifts, partitions, family relations such as adoption and guardianship, and religious usages and institutions, provided that the custom be not contrary to justice, equity or good conscience. In these matters the Mahomedan Law where the parties are Mahomedans, and Hindu Law where the parties are Hindus, is applied in so far as that law has not been altered or abolished by any legislative enactment and is not opposed to the provisions of the Regulation and has moreover not been modified by any custom.

The climatic conditions of the N.-W.F.P. which is mainly the mountainous region, but includes the Peshawar Valley and the river in tracts of the Indus in Dera Ismail Khan District, are extremely diversified. The latter district is one of the hottest areas of the Indian continent, while on the mountain ranges the weather is temperate in summer and intensely cold in winter. The air is generally dry and hence the annual ranges of temperature are frequently very large. The Province has two wet seasons, one the S.W. Monsoon season, when moisture is brought up from the Arabian Sea and the Bay of Bengal: the other in winter, when storms from Mesopotamia, Persia and the Caspian Districts bring widespread rain and snowfall. Both sources of supply are precarious and not infrequently either the winter or the summer rainfall fails almost entirely.

Trade and Occupations.

The population derives its subsistence almost wholly from agriculture. The Province is practically without manufactures. There is no considerable surplus of commercial products for export. Any commercial importance which the province possesses it owes to the fact that it lies across the great trade route which connect the trans-border tribal territories and the marts of Afghanistan and Central Asia with India, but the influence of railways is diminishing the importance of these trading interests. The new roads in Waziristan

are already largely utilised by the Tribal inhabitants for motor traffic. Prices of agricultural produce have in recent years been high, but the agriculturists, owing to the poor means of communication, have to some extent been deprived of access to Indian markets and have therefore been unable to profit by the rates prevailing. On the other hand, high prices are a hardship to the non-agricultural classes. The effects of recent extensions of irrigation have been important. Land tenures are generally the same in the British administered districts as in the Punjab. The cultivated area of the land amounts to 25 per cent. and uncultivated 75 per cent.

The work of civilisation is now making steady progress, both by the improvement of communications and otherwise. Relations with the tribes have generally improved, trade has advanced, free medical relief has been vastly extended, police administration has been reformed and the desire of people for education has been judiciously and sympathetically fostered, though in this respect there is complaint against the limitations imposed by financial embarrassments. In the British administered districts the total percentage of male scholars to the total male population is 5·0 and that of female scholars to the total female population is 1·6 for the year 1942-43. 25 per cent. males and 7 per cent. females of the total population are returned as literates. The figures for males denote a very narrow diffusion of education even for India. Those for females are not notably low, but they are largely affected by the high literacy amongst Sikh women, of whom 13·3 per cent. are returned as literate. The inauguration of a system of light railways throughout the Province, apart from all considerations of strategy, must materially improve the condition of the people and also by that means strengthen the hold of the administration over them. The great engineering project of the Upper Swat River Canal, which was completed in 1914, and the lesser work of the Paharpur Canal, also completed a few years ago, will bring ease and prosperity to a number of peasant homes.

Administration.

The administration of the North-West Frontier Province is conducted by H. E. the Governor and Agent to the Governor-General with the Council of four ministers as follows :—

(1) Hon'ble Dr. Khan Sahib (Chief Minister).
(2) Hon'ble Lala Mehr Chand Khanna (Minister for Finance).
(3) Hon'ble Q. Ataullah Khan (Minister for Revenue).
(4) Hon'ble Muhd. Yaha Jan Khan (Minister for Education).

(1) Officers of the Indian Political Service.
(2) Officers of the Indian Civil Service.
(3) Members of the Provincial Executive and Judicial Service.
(4) Members of the Subordinate Civil Services.
(5) Superintendents and Assistant Superintendents of Police.

(6) Officers recruited for the service of departments requiring special knowledge—Militia, Engineering, Education, Medicine and Forestry.

The cadre posts reserved for officers coming under the 1st head above are :—

Administration ..	Chief Secretary, Revenue and Divl. Commr.		
	Secretary, Development Departments.		4
	Home Secretary.		
	Dy. Commissioners	6	11
	Political Agents ..	5	
	Asst. Commissioners and Asst. Political Agents.		14
Hon'ble the Judicial Commissioners' Court & District Judges.	The Hon'ble Judicial Commissioner.		
	The Hon'ble Addl. Judicial Commissioner.		
	Three District and Sessions Judges.		8
	Two Additional District and Sessions Judges.		
	One Senior Sub Judge, Peshawar.		

The districts under the Deputy Commissioners are divided into from two to three subcollectorates in charge of tahsildars, who are invested with criminal and civil and revenue powers, and are assisted by naib-tahsildars, who exercise only criminal and revenue powers. Some sub-divisions are in charge of Assistant or Extra Assistant Commissioners. The village community characteristic of some parts of India is not indigenous among the Pathans. Its place as a social unit is to some extent taken by the tribe, which is held together by the ties of kinship and ancient ancestry, real or imaginary. Modern municipal local government has been introduced in the towns. There are also district boards. The district is the uniform police, medical and educational administration and the ordinary staff includes a District Superintendent of Police, a Civil Surgeon, the Superintendent of Jail and a District Inspector of Schools. The Province forms a single educational circle and only possesses one forest division, that of Hazara. The P. W. D. of the Province carries out duties connected with both Irrigation and Buildings & Roads. It is organised in two circles (in all seven Divisions) under a Chief Engineer, P.W.D. who is also *ex-officio* Secretary to H. E. the Governor. The administration of the civil police force of the districts is vested in an Inspector-General. There is a special force of Frontier Constabulary. Of the Agencies only Kurram and Tochi Valley pay land revenue to the British Government. The revenue administration of all six administered districts is controlled by the Revenue and Divisional Commissioner. For the administration of civil and criminal justice there are three Civil and Sessions districts each presided over by a District and Sessions Judge. The two Judicial Commissioners are the

controlling authority in the Judicial branch of the administration and their Courts are the highest criminal and appellate tribunals in this Province.

FINANCES.

In order to meet the excess in expenditure over the income of the Provinces a subvention of Rs. one crore per annum is given by the Government of India out of Central Revenues.

Budget.

A deficit of Rs. 15,45,000 is anticipated in the budget estimates of the Province for 1946-47. The total revenue for 1946-47 is expected to yield Rs. 2,63,29,000 and expenditure is estimated at Rs. 27,84,000.

The estimates for expenditure include capital expenditure totalling Rs. 2,21,000 on account of Irrigation Works (83,000), and Commutation of Pension (1,38,000) which is being met from revenue. If these items of capital are excluded there would be a deficit of Rs. 1,32,400 only.

The total provincial balance at the end of 1946-47 is estimated at Rs. 1,20,56,000.

The Administration.

The principal officers in the present Administration are :—H. E. the Governor and Agent to the Governor General.—

H. E. Sir Olaf Caroe, K.C.S.I., K.C.I.E., I.C.S. (Assumed charge 3-3-46).

Secy. to the Governor—Hon. C. R. Latimer, I.C.S.

Judl. Commissioner—Hon. K. B. Muhd. Ibrahim Khan, B.A., LL.B.

Judge, Judl. Commrs. Court—R. S. L. Ram Labhaya, B.A., LL.B.

Rev. & Divl. Commr.—L. W. Jardine, C.I.E., I.C.S.

Under Secy. Rev.—S. S. B. Amir Singh.

Under Secy. Local Self Govt.—K. S. Ataullah Jan.

Ch. Secy.—Lt.-Col. D. G. H. de la Farugue, I.P.S.

Commr. & Secy. to Govt. Dev. Depts.—Lt.-Col. G. L. Mallam, C.I.E., Bar-at Law.

Director of Civil Supplies and Jt. Secretary—Major G. H. Cooke, O.B.E.

Home Secretary—A. N. Mitchell, O.B.E., I.C.S.

Financial Secretary—A. P. Low, O.B.E., I.C.S.

Adv. General and Secy. to Govt., Leg. Dept.—Malik Khuda Bakhsh Khan, B.A., LL.B.

Under Secy. Dev. Dept. (I)—P. T. Duncan, I.C.S.

Under Secy., Dev. Depts.—Sh. Abdul Hamid Khan.

Under Secy., Finance—L. Devi Dyal Bhatia, B.A.

Asst. Secretary (Poll.)—B. Tek Chand.

Indian Personal Asst. to H. E. the Govr.—K. S. Ghulam Sarwar Khan.

Registrar, Civil Secretariat, N.W.F.P.—R. S. Sita Ram Dutt.

Secretary, Public Works Dept.—Col. W. G. Lang-Anderson, O.B.E., R.E.

Inspector General, Civil Hospitals—Col. P. H. S. Smith, O.B.E., I.M.S.

Inspector General of Police—H. J. Vickers, C.B.E., I.P.

Commandant Frontier Constabulary—O. G. Grace, C.I.E., O.B.E., I.P.

Director of Public Instruction—K. B. Shah Alam Khan, M.A., LL.B.

Superintendent, Archaeological Survey—A. Ghosh, M.A.

Dist. and Sessions Judge—K. B. Muhd. Safdar Khan, B.A., LL.B.

Addl. Dist. and Sessions Judge—K. S. Abdul Ghafur Khan, B.A.

2nd Addl. Dist. and Sessions Judge, Peshawar—Arbab Taj Muhd. Khan, B.A. LL.B.

Dist. and Sessions Judge, D. I. Khan—K. S. Abdul Latif Khan.

Dist. and Sessions Judge, Hazara—L. Gur Charan Das, B.A.

Resident and Political Agents.

Lt.-Colonel K. C. Packman, C.I.E., Resident in Waziristan.

K. B. Nawab Sh. Mahbub Ali Khan, O.B.E., Dir, Swat and Chitral.

Major S. M. Khurshid, Khyber.

Major Sir B. D. G. Bromhead, Bart, O.B.E., North Waziristan.

Major J. O. S. Donald, South Waziristan.

Major G. A. Cole, Kurram.

Deputy Commissioners.

Major A. J. Dring, C.I.E., Peshawar.

Major H. D. Ruston, Hazara.

R. H. D. Lowis, O.B.E., Kohat.

Capt. Allahabad Khan, Offg.

A. Woollet, I.C.S., Bannu.

K. B. Muhd. Dilawar Khan, M.B.E., D. I. Khan.

Lt.-Col. W. C. Leeper, O.B.E., Mardan.

Former Chief Commissioners.

The Hon'ble Lieutenant-Colonel Sir Harold Deane, K.C.S.I., from 9th November 1901 to 3rd June 1908. Died 7th July 1908.

The Hon. Lieutenant-Colonel Sir George Roos-Keppel, G.C.I.E., K.C.S.I., from 4th June 1908 to 9th September 1919.

The Hon'ble Sir Alfred Hamilton Grant, K.C.S.I., K.C.I.E., from 10th September 1919 to 7th March 1921.

The Hon'ble Sir John Loader Maffey, K.C.V.O., C.S.I., C.I.E., I.C.S., from 8th March 1921 to 6th July 1923.

The Hon'ble Sir Horatio Norman Bolton, K.C.I.E., C.S.I., I.C.S., from 7th July 1923 to 30th April 1930.

The Hon'ble Sir Steuart Pears, K.C.I.E., C.S.I., I.C.S., from 10th May 1930 to 9th September 1931.

The Hon'ble Lieut.-Col. R. E. H. Griffith, C.I.E., from 10-9-30 to 17-4-32.

Former Governors.

H. E. Sir Ralph Griffith, K.C.S.I., C.I.E., from 18th April 1932 to 1st March 1937.

H. K. Sir George Cunningham, G.C.I.E., K.C.S.I., K.C.I.E., O.B.E., from 2nd March 1937 to 2nd March 1946.

NORTH-WEST FRONTIER PROVINCE LEGISLATIVE ASSEMBLY.

Elected Members.

SPEAKER.

The Hon'ble Nawabzada Allah Nawaz Khan, Bar-at-Law. (D.I. Khan South Muhdn. Rural).

DEPUTY SPEAKER.

L. Girdhari Lal Puri (*Peshawar East—General Rural*).

HON. MINISTERS.

The Hon'ble Dr. Khan Sahib (*Hashtnagar South, Muhdn. Rural*); The Hon'ble Lala Mehr Chand Khanna (*Peshawar Cantonment, General Urban*); The Hon'ble Qazi Atta Ullah Khan (*Amazai, Muhdn. Rural*); The Hon'ble Muhd. Yaha Jan Khan (*Peshawar City, Muhdn. Urban*).

PARLIAMENTARY SECRETARIES.

Mian Jaffar Shah (*Nowshera South, Muhdn. Rural*); S. Ishar Singh (*Hazara-Mardan, Sikh Rural*); Khan Abdul Qayum Khan, B.A., LL.B. (*Upper Pakhli, Muhd. Rural*); Metha Madan Lal, B.A., LL.B. (*Peshawar West, General Rural*); Syed Qaim Shah, B.A., LL.B. (*Hashtnagar North, Muhdn. Rural*).

MEMBERS.

Khan Abdul Aziz Khan (*Utmannama, Muhdn. Rural*); Khan Abdullah Khan (*D. I. Khan North Muhdn Rural*); Khan Abdul Latif Khan (*Lakki West, Muhd. Rural*); Khan Abdul Qayum Khan Bar-at-Law (*Peshawar City, Muhdn. Urban*); Arbab Abdur Rahman Khan (*Doaba Daudzai, Muhdn. Rural*); K. B. Raja Abdur Rahman Khan (*Abbottabad East, Muhdn. Rural*); Malik Akbar Ali Khan (*Bannu West Muhdn. Rural*); Khan Ali Badshah (*Hangu, Muhdn Rural*); Khan Ali Gohar Khan (*Lower Pakhli, Muhdn. Rural*); Khan Amin Jan Khan Khalils (*Muhdn. Rural*); Khan Sahib Asadullah Jan Khan (*Kulachi, Muhdn. Rural*); L. Bhanju Ram Gandhi, B.A., LL.B. (*D. I. Khan Town, General, Urban*); Khan Habibullah Khan, B.A., LL.B. (*Lakki East, Muhdn. Rural*); Raja Haider Zaman Khan (*Haripur South, Muhdn. Rural*); Khan Sahib Sultan Hassan Ali Khan (*N.W.F.P., Landlords*); Khan Bahadur Jalaluddin Khan (*N.W.F.P. Towns*); L. Kanwar Bhan (*D.I. Abbas Khan (*Mansehra North, Muhdn. Rural*); Lt.-Col. Nawab Sir Muhd. Akbar Khan (*Kamalzai, Muhdn. Rural*); Khan Muhd. Aslam Khan (*Teri North, Muhdn. Rural*); Khan Muhd. Farid Khan (*Tanawal, Muhd. Rural*); Arbab Muhd. Sharif Khan (*Bara Mohmands, Muhdn. Rural*); Khan Muhd. Yakub Khan (*Bannu East, Muhdn. Rural*); Syed Muhd. Yakub Shah (*Nowshera North, Muhdn. Rural*); Khan Bahadur Muhd. Zaman Khan (*Haripur North, Muhdn. Rural*); Khan Muhd. Zarin Khan (*Baizai, Muhdn. Rural*); Khan Munfatuallah Khan (*Razzar, Muhdn. Rural*); Khan Bahadur Mian Mushtarraf Shah (*Peshawar Land holders*); S. Partap Singh (*Peshawar, Sikh Rural*); Shahin Shah (*Kohat, Mohdn. Rural*); Nawab Qutabuddin Khan (*Tank, Muhdn. Rural*); Sardar Ram Singh (*Southern Districts, Sikh Rural*); Khan Sahib Gul Khan Teri South (*Muhdn. Rural*); Khan Sardar Bahadur Khan (*Haripur Central, Muhdn. Rural*); Mahasha Shiv Ram Hazara (*General Rural*); Captain Zain Muhd. Khan, S.B., O.B.I. (*Abbottabad West, Muhdn. Rural*).

Orissa.

Like Sind, Orissa was constituted a separate Province on April, 1, 1936, by the Government of India (Constitution of Orissa) Order, 1936. Whereas Sind was a separate geographical, ethnological and linguistic unit inside the administrative boundary of the Bombay Presidency, the new Province of Orissa is the result of partial amalgamation of various Oriya-speaking peoples who had till then belonged to three separate Provinces, *viz.*, Madras, Bihar and Orissa and Central Provinces.

People.

The Oriyas are an intensely patriotic and chivalrous people who bear great love for their culture and language. They trace their traditions as far back to the days of Mahabharata when there was the ancient kingdom of Utkal embracing a wide territory. Through successive conquests and annexations in known history, the Kingdom of Kalinga, the later name of Utkal, extended in the 12th Century from the Ganges in the North to the River Godavari in Madras Presidency in south. Besides this, the kingdoms in far south upto the banks of river Cauvery bore allegiance to the Kings of the Ganga dynasty of Orissa. Tradition goes that the Oriyas of those days were a great heroic race and their maritime traders established colonies in Java, Bali and Sumatra, etc., in the East Indies and in Martaban coast in Burma. The ruins of Orissan architecture found in these places fully bear out the tradition. The art, architecture and literature of the period also were of a very high order. The temples of Lord Jagannath at Puri, of Sun-God at Konarak and that of Siva at Bhubaneswar and the stone embankments of Rivers Mahanadi and Kathjori at Cuttack are still considered to be marvels of Engineering skill surpassed by none. Puri still remains the greatest spiritual centre of the Hindu world.

Orissa lost its independence in 1565 A.D. and the country was broken up. The dismembered people under the alien rule gradually lost race consciousness, although common language and literature continued to act as a link. Orissa, ceded to the Mahrattas by

Alivardi Khan in 1751, was conquered by the British in 1803. In 1804, a Board of two Commissioners was appointed to administer the Province but in the following year it was designated the District of Cuttack and was placed in charge of a Collector, Judge and Magistrate. In 1823 it was split up into three regulation districts of Cuttack, Balasore and Puri, and non-regulation Tributary States were administered by their own chiefs under the aegis of British Government. Angul, one of these tributary states, was annexed in 1847 and with the Khondmals, ceded in 1835 by the Tributary chief of the Baudh state, constituted a separate non-regulation district Sambalpur was transferred from the Central Provinces to Orissa in 1905. These districts formed an outlying tract of the Bengal Presidency till 1912 when they were transferred to Bihar constituting one of its divisions under a Commissioner. Natural Orissa, considered as a linguistic and cultural whole, had long been divided between Bihar, Central Provinces and Madras.

Race consciousness was, however, revived with the spirit of education under the British regime and after the great famine of 1866, Sir Stafford Northcote suggested the separation of Orissa from Bengal. The proposal was turned down but the patriotic fervour underlying the new move persisted and gave rise to a series of demands.

The first stage of success was achieved in 1912 when the Orissan portion separated from Bengal, together with the district of Sambalpur separated from Central Provinces, was amalgamated with Bihar to form what came to be known as the Province of Bihar and Orissa. Although the position of Oriyas and the states of Orissa improved the new Province of Bihar and Orissa, it fell far short of the expectations of Oriyas and the advocates of Oriya unity continued to press their claim for the formation of Orissa into a distinct administrative unit. The late Mr. Montague and Lord Chelmsford saw the reasonableness of this claim and generally favoured the redistribution of Provinces on a linguistic basis for the success of responsible Government. They left it, however, to the Provincial Governments concerned to formulate opinions and make concrete proposals after the advent of the Montford constitution in 1920.

The Bihar and Orissa Legislative Council endorsed the idea of amalgamation but the Madras Council held an inconclusive debate. The Madras Government, was against the surrender of any of its territory while the Central Provinces Government had an open mind.

The Government of India then appointed what is called the Phillip-Duff Committee to make local inquiries with a view to ascertaining the attitude of the Oriya-speaking people in the north of the Madras Presidency on a question of their union with Orissa. Messrs. C. L. Phillip and A. C. Duff reported that there was "a genuine, long-standing and deep-seated desire on the part of the educated Oriya classes of the Oriya speaking tracts for amalgamation of these tracts with Orissa under one administration."

The next stage came with the appointment of the Simon Commission in 1927. A sub-committee of the Commission presided over by Major Atlee recommended the creation of a separate administrative unit for Orissa, agreeing with the Oriyas' contention that under the autonomous conditions proposed by the Commission, the Oriyas would be an ineffective minority in Madras, Bengal, Bihar and Orissa and Central Province.

Round Table Conference.

When the idea of a federation of autonomous units dawned at the first Round Table Conference, the Oriyas' demand was presented in a crystallised form by the Maharaja (then Raja) of Parlakimedi who asked for a separate Province for Orissa. "We want a separate Province of our own", he said, "on the basis of language and race so that we can be a homogeneous unit with feelings of contentment and peace to realise, and be benefited by, the projected reforms and look forward to the day when the United States of India will consist of small federated states based on common language and race."

The Oriyas' demand derived adventitious support from the strength of the Muslim claim for the constitution of Sind as a separate Province. Those who backed up the case of Sind could not oppose the Oriyas' claim, which, therefore, came to be recognised at the Round Table Conference.

In September, 1931, the Government of India appointed the O'Donnel Committee to examine and report on the financial and other consequences of setting up a separate administration for Orissa and to make recommendations regarding the boundaries in the event of separation. The Committee recommended the creation of a new Province including the Orissa division, Angul, the Khariar Zamindari of the Raipur district and the greater part of the Ganjam district and the Vizagapatam agency tract. According to the Committee, the new Orissa Province was to have an area of 32,681 sq. miles and a population of about 8,174,000. On the question of financial and other consequences of separation, the Committee made recommendations generally on the lines of the Sind Committee.

In January, 1936, an Order-in-Council was issued by His Majesty's Government Constituting Orissa as a separate Province to be brought into line with other provincial units on the inauguration of provincial autonomy on April 1, 1937.

Population.

The area of the Province is 32,198 sq. miles with a total population of 8,728,544 (Census 1941). The figures of the classification of the population by community are: Hindus (excluding scheduled castes) 5,594,535; scheduled castes, 1,238,171; Muslims, 146,301; Christians (including Anglo-Indians and Europeans) 27,690; Budhists, 454; Sikhs, 232; Jains, 139; Parsees, 13; Jews, 3; and tribes, 1,721,006.

The Principal language of the Province is Oriya, though Bengali in the North and Telugu in the South are understood. The principal

occupation of the people is agriculture. Oriyas are becoming more and more industrial-minded but at present less than 10 per cent of the population is engaged in industries most of which are of the cottage type.

Administration.

Sir John Austen Hubback, K.C.S.I., I.C.S., was appointed the first Governor of the infant province and held the governorship from 1-4-36 to 31-3-1941, when Sir William Hawthorne Lewis succeeded him. The third and the present Governor, Sir Chandulal Madhavlal Trivedi, K.C.S.I., I.C.S., assumed office on 1-4-1946.

The Governor is assisted in the administration by his Council of Ministers and other Secretariat staff.

Orissa maintains a joint cadre with Bihar in respect of officers of all India Services.

Provincial Autonomy.—The first general elections under the constitution which established Orissa as a separate Province resulted in a clear majority for the Congress party. Out of 56 elective seats in the Assembly (four are nominated, making a total of 60) the Congress counted 36 as its adherents. The Governor thereupon summoned the leader of the Congress party to form a ministry but the latter, in obedience to the directions of the party headquarters, declined unless he was given certain assurances by the Governor (see Chapter on Indian National Congress). After a prolonged controversy this point was amicably settled and the Congress Party leader formed a cabinet. Late in 1937, the Legislature decided that the capital of the Province should be located at Cuttack-Choudwar.

The working of Self-Government in the infant Province was threatened with interruption twice in 1938 once early in the year and later in the summer. The former did not relate directly to Orissa but the latter did. In the latter, Sir John Hubback wished, for reasons of health, to go home on leave. In his place, the Revenue Commissioner, the senior most Civilian of the Province, was appointed to act for a period of four months. The Premier opposed this appointment on the ground that it was bad in principle and derogatory to the prestige of the ministry to ask it to work under a Governor who till the other day took his orders from the ministry and would continue to do so on his reversion to his substantive post. The Orissa Premier's complaint was taken up by the Congress and Mahatma Gandhi. An all India crisis was threatened on this issue but it was averted through the goodness and self-sacrifice of Sir John Hubback who postponed his leave.

Thus assured of a period of peaceful progress, the Province continued to be administered by the Congress Ministry for a number of months till the autumn of 1939 when its fortunes were blighted by the political crisis which overtook all the Congress governed Provinces. The Orissa ministry resigned along with other Congress cabinets and there being no prospect of formation of an alternative Government with any reasonable chance of stability, the Governor, as in other similar Provinces, assumed charge of the entire Province under section 93 of the Government of India Act, 1935. By a resolution in Parliament in April, 1940, this act of emergency was approved and the period of its operation extended by a year. In the absence of a ministry, the Governor administered the province with aid of an Adviser.

With the object of replacing the Governor's rule by a popular administration to undertake the task of marshalling the resources and manpower of the province for an all out effort against the Axis-powers, the opposition party led by the Maharaja of Parlakimedi joined hands with a number of seceders from the Congress party and formed a ministry which assumed office on November, 24, 1941. The ministry had to pass through many difficulties including several motions of non-confidence. But following the famous August 1942 resolutions of the All-India Congress Committee, the majority of the congress M.L.A's were arrested and detained. A period of stress followed. There was an India-wide shortage of food grains; free trade in grain was established by the Central Government which led to a drain from the Province of its available food grains in surplus areas to such an extent that in certain areas death due to mal-nutrition and starvation increased. The distress caused by famine in Orissa was not publicised as was that in Bengal but, nevertheless, it was there.

In summer, 1944, the United Nationalist Party's coalition ministry broke up and the Province once again came under section 93 of the Government of India Act, 1935, and was administered by two Advisers, viz., S. L. Marwood, C.I.E., I.C.S., and B. K. Gokhale, C.I.E., I.C.S. The Advisers' rule lasted nearly 1½ years when the second general elections under the new constitution took place. At this time all the Congress M. L. A's. were released all over India to ease the political deadlock prevailing in the country for the preceding four years. As a result of the new elections, the Congress Party captured 40 out of 56 elective seats (including 4 seats for scheduled caste) in a house of 60 members. A special feature of the elections was the defeat of Congress by the Communist Party over the only labour seat for which the latter contested.

Sri Harekrishna Mahtab, formerly a member of the All India Congress Working Committee was elected leader of the Congress Ministerial Party and formed the present ministry under his premiership. His cabinet consists of five members, viz:

Sri Harekrishna Mahtab.—Home, Finance and Planning and Reconstruction Departments.

Sri Nityananda Kanungo.—Development, L.S.G., Law and Commerce Departments.

Sri Naba Krishna Choudhury.—Revenue and Supply and Transport Department

Sri Lingaraj Mishra.—Education and Health Departments.

Sri Radhakrishna Biswasray.—Labour and Public Works Department.

Education.

Rapid strides have been made in education in the last five years. The number of High Schools in this period has at least been doubled.

A separate University by the name of the Utkal University was established towards the end of 1944 with the Maharaja of Mayurbhanj as its Pro-chancellor and Dr. Prankrishna Parija, D.Sc., I.E.S, F.N.I. as its first Vice-Chancellor. Government now maintains five first grade colleges including one Women's College, one Training College, one Sanskrit College and one Medical College. Besides, there are two aided Colleges in the Cuttack town, including Stewart European College and two more in Ganjam in addition to one College run by the Patna State. Female education has been given more importance in recent years as a result of which the province now has Government Girls' High Schools in every district and M. E. Schools in every sub-division and important thanas. Active steps are being taken to convert the existing Engineering School into a Mechanical and Electrical Engineering College and to start a Polytechnic. Till recently the primary teachers were paid very meanly for which the primary education in general has suffered. Compulsory Primary Education has yet to be introduced.

Public Health.

There is a Health School at Cuttack to train Health Inspectors. Very recently the organisation of the department has been taken up. It was so long practically neglected. The principal town of the province has no drainage of the same or sanitary and water-supply installations. The roads are to be widened to carry on the modern traffic without accidents. The coastal districts are malarious and anti-mosquito campaigns are being extended. Incidence of leprosy, tuberculosis and venereal diseases have increased lately. T. B. Clinics and Venereal diseases clinics are being started to check effectively these dangerous diseases. There is a T. B. Sanatorium at Serango managed privately by Mission authorities. Puri and Berhampur towns have water supply system.

Besides the Government General Hospital at Cuttack, there are State Hospitals in the District Headquarters and Sub-divisional Headquarters Hospitals are being provincialised.

It has been decided that in the course of next two years Government would open 100 more dispensaries and would take over management of dispensaries run by local bodies.

Besides the Maternity and Child Welfare Centre at Cuttack, there is a hospital at Berhampur. The medical aid to women is superintended by an W. M. S. Officer lent by the Lady Dufferin Fund.

Orissa has no separate mental hospital of its own but shares it at Kanke with Bihar and Bengal.

Local Self-Government.

Local Self-Government in the Province as well as the Revenue Laws have not yet been unified and consequently three northern coastal districts followed the Bihar laws, 2 South Orissa districts the Madras laws, and the western district of Sambalpur the Central Provinces laws. This has resulted in the unsatisfactory administration of the self-governing institutions. Plans are however, included in the Post-war five year plan to remodel and improve the conditions of the local bodies.

Irrigation and Public Works.

More than half of Orissa Plains form the delta of the rivers Mahanadi, Brahamani and Baitarani with their numerous branches and is therefore open to the scourge of frequent high floods. It inherited several canals, constructed in the days of East India Company for combined navigation and irrigation purposes, which are not so well suited for irrigation purposes to which they are exclusively utilized now-a-days. According to the latest figures available, Government spend nearly 25 lakhs of rupees annually for the maintenance of canals and their protective embankments and receive in return a revenue of about 10 lakhs of rupees only. Thus the irrigation system in Orissa is a losing concern from the limited point of view of Government's finances, but from the wider view point of the national food resources it doubtless fulfils a useful purpose.

Lately many small scale irrigation projects have been taken up under the Grow More Food Scheme with financial assistance from the Centre.

In the post-war Five-year Plan, an ambitious scheme has been included, on the model of the Tennessee Valley Authority in the U. S. A., to control the water supply in the Mahanadi and ensure irrigation and generation of electric energy in Sambalpur, thus eliminating the threat of flood and altogether turning the flood-devastated coastal Orissa into a Granary. The Mahanadi Valley scheme is estimated to cost 15 crores of rupees and is to be built in three stages. The Central Government will finance the scheme. Already the foundation stone of the first dam has been laid at Hirakud in Sambalpur. The working will be done jointly by the Engineers of Orissa, C.P., Central Government and the Orissa States.

The decision in 1937 of the Orissa Legislative Assembly to establish the capital at Cuttack has since been revised and it has been decided in an Assembly Resolution of September 1946 that the capital will be situated in a new spacious site near Bhubaneswar, the famous Hindu Shrine. Accordingly necessary staff has been employed and the construction work is about to start. The place will be connected with Cuttack by a direct road with bridges over the rivers. Construction of several national highways and Provincial Trunk roads has also started. It is hoped that after ten years, there would be no village in the Province with a population over 100 which will not be connected to an all weather roads.

Agriculture and Industry.

Agriculturally and industrially Orissa is a backward region. It has suffered as the result of being tacked to one or the other of many provinces for administrative purposes. This explains why there are no big factories in Orissa, although there are a large number of indigenous cottage industries bespeaking the people's artisanship. Among the cottage industries may be mentioned handloom industries, brass, bell metal, silver filigree, cutlery, wood and paper pulp and horn articles. Handloom clothes of special artistic designs manufactured by Orissa weavers are very much appreciated

and find ready sale outside the Province and in foreign countries. The silver filigree articles manufactured at Cuttack and its suburbs display the exquisite artistic skill. The excellent designs and unique workmanship of the artists have secured attention in international markets. Sugarcane and Jute are two important commercial crops in Orissa and areas under both these are already increasing. The Orissa forests can supply a large quantity of valuable timber and fuel. Creeks, estuaries and rivers are rich in fish and prawn. The two well-known sources of supply are the extensive chilka Lake and the Puri Coast. On an average 10,000 mds. of cured fish and 60,000 mds. of fresh fish are exported to Calcutta every year from these places.

The chief mineral resources of Orissa are iron, coal, limestone, manganese and mica. Iron ore is most e found in Mayurbhanj, Keonjhar, and Bonai States. The deposits in Orissa are remarkab for the large quantity of very rich ore they contain. More than 60% of the Ore extracted in India comes from these areas of Orissa for which there is a ready demand from the Tata Iron and Steel Works in Jamshedpur and Messrs. Biard & Co. of Calcutta. Orissa does not boast of such extensive coal mines as those of Bengal and Bihar, but coal has been found in Angul, Sambalpur and in the States of Gangpur, Talcher and Athamalik. Talcher has the largest coal fields and they are being progressively exploited. Among the big industrial concerns of Orissa may be mentioned the Orient Paper Mills, Ltd., Sambalpur, the Sugar Factory at Rayagada in Koraput District and the Durga Glass works, at Barang in Cuttack district.

On the formation of the Province on 1-4-1936, the Agriculture and Industries Departments together with the Departments of Co-operative and Animal Husbandry remained in charge of the Revenue Commissioner till November, 1936 when they were taken over by the Director of Development. A separate post of Director of Agriculture was created from 1-4-45 primarily to cope with the abnormally increased work as a result of the Food Production Campaign. The post of Director of Development was abolished in June 1946 and for the Departments of Industry, Co-operative and Veterinary Services three separate Heads of Departments namely Director of Industries, Registrar of Co-operative Societies and Director of Veterinary services have been created.

Budget 1946-47.—The estimated revenue of the Province for the year is Rs. 4,05,87,000, principal items of this being Income tax 39 lakhs, Land Revenue 51 lakhs, Excise 81 lakhs, Stamps 23 lakhs, Forest 16 lakhs, Industries 7 lakhs, Works 5 lakhs, Subvention from the Centre 40 lakhs and extraordinary receipts 1.14 lakhs.

Receipts other than Revenue receipts, *e.g.*, Loan money, Civil Deposits, Reserve Bank Remittances and Inter-Provincial suspense accounts are calculated at Rs. 13,68,01,000. This together with the opening balance of Rs. 37,50,000 make up a total of Rs. 18,11,38,000 for budget purposes.

Against this the total expenditure charged to revenue is estimated at 4,55,29,00 for the year, the main items of which are detailed below in lakhs of rupees.

Land Revenue 4.5, Excise 13.5, Forest 11.2, Registration 2, Appropriation for reduction of debt 17, General Administration 50 6, Justice 8.7, Jails 7.5, Police 45.5, Education 65.9, Medical 29 7, Public Health 11 8, Agriculture 25, Veterinary 8, Co-operation 4.4, Industries 11, Miscellaneous 6 8, Civil works 62 9 and Pensions 13 8.

The total expenditure not charged to revenues is estimated at 13,32,09,000.

Of the total sum of Rs. 1,88,81,789 included as new expenditure in the Budget, a sum of Rs. 1,13,83,000 represent expenditure in connection with execution of post-war schemes.

The Budget thus reveals a deficit of Rs. 19,52,000.

ADMINISTRATION

GOVERNOR.

His Excellency Sir Chandulal Madhavlal Trivedi, K.C.S.I., I.E., O.B.E., I.C.S.
Secretary to His Excellency the Governor.—B. Mukherji, I.C.S. (*also the military Secretary*).
Aid-de-Camp.—Lt. R. E. Norman Smith.

SECRETARIES.

Revenue Commissioner.—S. L. Marwood.
Chief Secretary (Home and Finance).—A. H. Kemp, I.C.S.
Secretary, Revenue Department.—Rai Bahadur P. C. Das.
Secretary, Development Department.—H. Lal, I.C.S.
Secretary, Education and Health and L.S.G. Department.—M. Azfar, O.B.E., I.C.S.
Secretary, Law Department.—R. L. Narasimham, I.C.S.
Secretary, Supply and Transport Department.—B. Sivaraman, O.B.E. I.C.S.
Secretary, Public Works Department.—Khan Bahadur A. Karim, I.S.E.
Secretary, Legislative Assembly.—Giridhari Dhal.

Orissa Legislative Assembly.

Orissa has a single chamber and has no Legislative Council. The Assembly consists of a house of 60 members of which four are nominated, two are women, one is labour, two are landholders, one is Indian Christian, one is commerce, four are muslims and the remaining 45 are general seats.
Speaker :—The Hon'ble Mr. Lalmohan Patnaik.
Dy. Speaker :—Mrs. A. Lakshmi Bai.

ORISSA LEGISLATIVE ASSEMBLY.

SPEAKER:—The Hon. Sri Mukunda Prasad Das.
DEPUTY SPEAKER:—Sri Nanda Kishore Das.

Elected Members.

Gouranga Charan Das (*West Cuttack Sadr. General*); Bijoyananda Patnaik (*Central Cuttack Sadr. General*); Bhairab Chandra Mohanty (*North Cuttack Sadr. General*); Kanhu Charan Das (*North Cuttack Sadr. General*); Sarangadhar Das (*East Cuttack Sadr. General*); The Hon'ble Mr. Nityananda Kanungo (*South Cuttack Sadr. General*); Dinabandhu Sahu (*Central Kendrapara General*); The Hon'ble Mr. Nabakrushna Choudhury (*North Kendrapara General*); Rajakrishna Bose (*East Kendrapara General*); Gadadhar Datta (*East Jajpur General*); Santanu Kumar Das (*East Jajpur General*); Dwarikanath Das (*West Jajpur General*); Madan Mohan Patnaik (*North Jajpur General*); Hrushikesh Tripathy (*Angul District General*); Jayakrishna Mohanty (*East Puri Sadr. General*); Lokanath Misra (*South Puri Sadr. General*); The Hon'ble Mr. Lingaraj Mishra (*North Puri Sadr. General*); Purnananda Samal (*North Puri Sadr. General*); Panamali Patnaik (*East Khurda General*); Satyabadi Nanda (*West Khurda General*); Surendra Nath Das (*Central Balasore Sadr. General*); Kailash Chandra Mohanty (*South Balasore Sadr. General*); Karunakar Panigrahi (*North Balasore Sadr. General*); The Hon'ble Mr. Harekrishna Mahatab (*East Bhadrak General*); Bhagabat Sahu (*West Bhadrak General*); Brundaban Chandra Das (*West Bhadrak General*); Bodhram Dube (*Sambalpur Sadr. General*); Mohan Singh (*Sambalpur Sadr. General*); Lall Ranjit Singh (*West Baryarh General*); Lakshminarayan Misra (*East Bargarh General*); Bisi Ganda (*East Bargarh General*), Raja Artatran Deo (*Kharion General*); Dinabandhu Behera (*Ghumsur General*); Jagannath Mishra (*Kudala General*), Narayan Panda (*Chatarpur General*), Madhu Sudan Mohapatra (*Aska Surada General*), Iswar Naiko (*Aska Surada General*); Uma Charan Patnaik (*Berhampur General*); Somanath Panda (*Berhampur General*), Narayanmurty Gade (*Berhampur General*); Narayan Patra (*Ballipada Khondmals General*); Ananta Tripathy (*Parlakimedi General*); Sadasiba Tripathy (*Nowrangapur General*), Radhamohan Sahu (*Jeypore Malkangiri General*); The Hon'ble Mr. Radhakrishna Biswasroy (*Koraput General*); Maulavi Muhammad Yusuf (*Cuttack Sadr. Muhammadan*); Maulavi Sayed Fazle Haque (*North Cuttack-cum-Angul Muhammadan*); Maulavi Muhammad Khan (*Balasore-cum-Sambalpur Muhammadan*); Maulavi Latifur Rahaman (*South Orissa Muhammadan*); Srimati Priyambada Devi (*Cuttack Town Women's*); Srimati A. Lakshmi Bai (*Berhampur Town Women's*); The Hon'ble Mr. Lal Mohan Pattanaik (*Orissa Indian Christian*); Ghanashyam Das Thirani (*Orissa Commerce and Industry*); Sailendra Narayan Bhanj Deo Tikayat *East Orissa Landholders*); Rai Bahadur Lokanath Misra (*West Orissa Landholders*); Baidyanath Rath (*Orissa Labour*), Lakshminarayan Sahu, Miss Anne Catherine Munro; Antarjami Mallick; Godavarthi Ramadas.

The Punjab.

The Punjab or land of the five rivers, is so called from the five rivers by which it is enclosed, namely, the Jhelum, Chenab, Ravi, Beas and Sutlej. Together with the North-West Frontier Province and the Indian State of Jammu and Kashmir which lie to the north, the Punjab occupies the extreme north-western corner of the Indian Empire, and with the exception of the above-mentioned province comprises all of British India north of Sind and Rajputana and west of the river Jumna. Previous to October 1912, the Punjab with its feudatories embraced an area of 136,330 square miles and a population at the Census of 1911 of 24,187,750 (inclusive of 28,587 trans-frontier Baluchis), that is to say, about one-thirteenth of the area and population of the Indian Empire. But the formation of a separate province of Delhi reduced the area and population of the Punjab by about 450 square miles and 380,000 souls, respectively. The total population of the Province in 1931, including the Baloch tribes on the border of the Dehra Ghazi Khan District, was 28,490,857 of whom 4,910,005 were in the Indian States.

Physical Features.

The greater part of the Punjab consists of one vast alluvial plain, stretching from the Jumna in the east to the Suleman Range in the west. The north-east is occupied by a section of the Himalayas and the Salt Range forms its north-western angle. A few small spurs of the Aravalli mountain system traverse the extreme south-east and terminate in the Ridge at Delhi. The Punjab may be divided into five natural divisions. The Himalayan tract includes an area of 22,000 square miles, with a scanty population living scattered in tiny mountain hamlets. The Salt Range tract includes the districts of Attock, Rawalpindi and Jhelum and part of Shahpur district. Its physical configuration is broken and confused and the mountainous tracts of Murree and Kahuta approximate closely in characteristics to the Himalayan tract. Except in the hills, the rainfall leaves little margin for protection against distress in unfavourable seasons and irrigation is almost unknown. Skirting the base of the hills and including the low range of the Siwaliks, runs the narrow sub-montane tract. This tract, secure in an ample rainfall, and traversed by streams from the hills, comprises some of the most fertile and thickly populated portions of the province. Its population of over four millions is almost agricultural and pastoral but it includes one large town in Sialkot. Of the plains of the Punjab, the eastern portion covers an area of some 36,000 square miles with a population of 10½ millions. East of Lahore, the rainfall is everywhere so far sufficient that cultivation

is possible without irrigation in fairly favourable seasons, but over the greater part of the area the margin is so slight that, except where irrigation is employed, any material reduction in the rainfall involves distress, if not actual famine. Within the eastern plains lie the large cities of Lahore and Amritsar, and the population in comparison with the western Punjab is largely urban. The western plains cover an area of 59,000 square miles, with a population of a little over six millions. The rainfall in this area, heaviest in the north and east and decreasing towards the west and south is everywhere so scanty that cultivation is only possible with the aid of artificial irrigation or upon the low-lying river-banks left moist by the retreating floods. In this very circumstance, these tracts find their security against famine, for there cultivation is almost independent of rain, a failure of which means nothing worse than a scarcity of grass. So little rain is sufficient, and absolute drought occurs so seldom that the crops may be said never to fail from this cause. The western plains embrace the great colony areas on the Chenab and Jhelum Canals which now challenge the title of the eastern plains as the most fertile, wealthy and populous portions of the province. Multan and Lyallpur are the largest towns in the western area. Owing to its geographical position, its scanty rainfall and cloudless skies, and perhaps to its wide expanse of untilled plains, the climate of the Punjab presents greater extremes of both heat and cold than any other portion of India. The summer, from April to September, is scorchingly hot, and in the winter, sharp frosts are common. But the bright sun and invigorating air make the climate of the Punjab in the cold weather almost ideal.

States.

The Indian States of the Punjab were formerly in the political charge of the Punjab Government. In 1921, however, the thirteen most important States, including Patiala, Bahawalpur, Jind and Nabha, were formed into a separate "Punjab States Agency" under the control of the Agent to the Governor-General, Punjab States. The only States remaining in the charge of the Punjab Government were the Simla Hill States, for which the Deputy Commissioner of Simla was Political Officer, and three small States in the Ambala Division, Kalsia, Pataudi and Dujana, which were supervised by the Commissioner of Ambala. From 1st October 1936 with the formation of a new Political Agency at Simla all these States have been transferred to the Punjab States Agency.

The People.

Of the population roughly one-half is Mahomedan, three-eighths Hindu and one-eighth Sikh. Socially the landed classes stand high, and of these the Jats, numbering nearly five millions, are the most important. Roughly speaking, one-half the Jats are Mahomedan, one-third Sikh and one-sixth Hindu. In distribution they are ubiquitous and are equally divided between the five divisions of the province. Next in importance come the Rajputs, who number over a million and a half. The majority of them are Mahomedans by religion about a fourth are Hindus and a very few Sikhs. They are widely distributed over the province. Both Jats and Rajputs of the Punjab provide many of the best recruits for the Indian Army. In fact all the agricultural classes of the Punjab, except in the south-western districts, made a magnificent response to the appeal for recruits in the great war and the province's contribution of upwards of 400,000 men to the man power of the Empire speaks for itself. The Gujars are an important agricultural and pastoral tribe, chiefly found in the eastern half of the province and in the extreme north-west. In organisation they closely resemble the Jats and are often absorbed into that tribe. There are many minor agricultural tribes, priestly and religious castes (Brahmans, Sayads and Kureshis), most of whom are landholders, the trading castes of the Hindus (Khatris, Aroras and Banias), the trading castes of the Mahomedans (Khojas, Parachas and Khakhas), and the numerous artisan and menial castes. There are also vagrant and criminal tribes, and foreign elements in the population are represented by the Baluchis of Dera Ghazi Khan and neighbouring districts in the west, who number about half a million and maintain their tribal system, and the Pathans of the Attock and Mianwali districts. Pathans are also found scattered all over the province engaged in horse-dealing labour and trade. A small Tibetan element is found in the Himalayan districts.

Languages.

The main language of the province is Punjabi, which is spoken by more than half the population. Western Punjabi may be classed as a separate language, sometimes called Lahndi, and is spoken in the north and west. The next most important languages are Western Hindi, which includes Hindustani and Urdu (the polished language of the towns), Western Pahari, which is spoken in the hill tracts; and Rajasthani, the language of Rajputana. Baluchi, Pushto, Sindhi and Tibeto-Burman languages are used by small sections of the population.

Agriculture.

Agriculture is the staple industry of the province affording the main means of subsistence to 65·5 per cent. of the population. It is essentially a country of peasant proprietors. About one-sixth of the total area in British districts is Government property, the remaining five-sixths belonging to private owners, and a large part of the whole area is so situated that it cannot be brought under cultivation without extensive irrigation. Since 1900, several big irrigation projects have been put into execution and irrigation facilities provided to large tracts of barren land, as a result of which many colonies have sprung up. The Lower Chenab Canal has brought under plough about 2.9 million acres most of which was formerly waste land. Similarly the Lower Jhelum and Lower Bari Doab Canals are responsible for 1.3 and 1.5 million acres respectively. The Sutlej Valley Canals and Haveli Canals command 3.8 and 1.8 million acres respectively. Large areas in the hills and elsewhere which are unsuited to cultivation are preserved as forest lands, the total extent of

which is about 6,000 square miles. Of the crops grown, wheat is the most important and the development of irrigation has led to a great expansion of the wheat area. Next in importance to wheat is gram. Other important staples are barley, rice, millets, maize, oilseeds (rapetoria and sesamum), cotton and sugarcane. In the canal colonies large areas of American cotton are grown but in the other cotton-growing districts the short staple indigenous varieties are predominant. The country being preponderantly agricultural, a considerable proportion of the wealth of the people lies in live-stock. Large profits are derived from the cattle and dairy trades and wool is a staple product in Kulu and Kangra and throughout the plains generally. The production of hides and skins is also an important industry.

Industries.

The Punjab has witnessed a steady growth of industrial enterprise during the last decade and now it occupies a position of considerable importance in the industrial framework of the country. The number of factories registered under the Factories Act, 1934 stood at 1265 in 1945 and is expected to record a further increase in the current year. The registered factories can be divided into two categories, *viz.*, seasonal and perennial. Cotton ginning and pressing factories form more than 90% of the total number of seasonal factories, the remaining are engaged in tea, rice husking, sugar and fruit canning. Among the perennial factories the most important are textile mills, foundries and engineering workshops, hosiery mills, paper and cement factories, flour mills, rubber factories, chemicals including turpentine, matches, paints and varnishes, petroleum refineries, sports goods and glass works. The two largest textile mills are situated at Lyallpur and Okara respectively, about a dozen smaller others being divided amongst Amritsar, Lahore and Bhiwani. Excepting one large up-to-date wool spinning and weaving mill at Dhariwal the woollen and silk textile industries are mainly confined to Amritsar. Ludhiana is the centre for the hosiery industry of the Punjab which occupies perhaps the foremost position in the whole of India and Sialkot enjoys international fame on account of its sports goods and surgical instruments. Other industrial concerns of note in the province are two absorbent cotton and antiseptic dressing factories; three glass factories and several carpet factories at Amritsar, stationery and drawing materials factories at Lahore and metal foundries at Batala and Lahore; a turpentine and rosin factory at Jallo; a pulp and paper mill, a starch factory and a sugar mill at Abdullapur; two plywood factories one at Shahdara and the other at Ludhiana; factories for the manufacture of nuts and bolts at Jullundur and Ludhiana; a factory for the hydrogenation of vegetable oils at Lyallpur; a factory for the manufacture of machine tools at Batala; steel re-rolling mills at Lahore, Amritsar, Khanna, Sargodha and Ludhiana; cement factories at Wah and Dandot; tanneries at Wazirabad, Sialkot and Jullundur; factories for the manufacture of electrical and scientific apparatus at Lahore, Amritsar and Ambala, for chemical and pharmaceutical products at Amritsar, Rawalpindi and Lahore and for sewing machines at Lahore.

Several new lines of manufacture have been introducted as a result of the opportunities afforded by the last war. A big new factory for the production of footwear has come into existence near Lahore, the manufacture of cycle parts and accessories has been taken up at Lahore and Sialkot, the production of machine tools has been initiated in several workshops and three wood screws factories and one grinding wheels factory have been established at Amritsar and Chheharta. In the manufacture of ammonium Chloride and other salts of ammonia the Punjab can claim to be pioneer; potassium chloride; potassium dichromate and potassium nitrate have also been recently added to the list of chemicals prepared in the province.

The small scale and cottage industries form a heterogenous group comprising industries of a most varied character and of different sizes and forms of organisation. Handloom weaving probably ranks the foremost among the cottage industries. Woollen blankets and rugs are also produced on the handlooms in considerable quantities, but silk weaving has recently suffered a decline owing to the shortage of yarn. Other cottage industries of commercial importance are iron safes at Gujranwala; veterinary and surgical instruments and hospital furniture at Sialkot and Lahore, pottery making at Gujrat; glue industry at Rewari; Ivory carving at Amritsar, Hoshiarpur and Chiniot; copper and brass utensils at Jagadhri, Gujranwala, Panipat and Rewari, cutlery at Nizamabad, Wazirabad and Ramnagar and wooden toys at Jullundur and Hoshiarpur. Workers in gold and silver are fairly numerous. The Sericulture industry is expanding gradually and a large number of agriculturists in submontane tracts are taking an increasing interest in silk worm rearing and reeling operations. There is a Punjab Arts and Crafts Depot at Lahore which provides a market for artistic wares of craftsmen and helps to secure improvement in design and workmanship.

The Punjab has four promising oil fields at Khaur, Dhulain, Charata and Joya Mair. The Attock Oil Company is engaged in extracting and refining mineral oils in western Punjab and Rawalpindi District.

Administration.

Prior to the amendment of the Government of India Act in 1919 the head of the administration was a Lieutenant-Governor, drawn from the ranks of the Indian Civil Service. Under the Act of 1919 the province was raised to the status of a Governorship, with an Executive Council and Ministers, the Governor-in-Council being in charge of the Reserved Subjects and the Governor with his Ministers of the Transferred Subjects. With the introduction of part III of the Government of India Act, 1935, this Executive Council has been substituted by a Council of Ministers and the Legislative Council by an enlarged Legislative Assembly with wide powers of legislation and control. The business of Government is carried on through the usual Secretariat which consists of five Secretaries, designated (1) Chief, (2) Home, (3) Finance, and (4) Medical and Local Government Departments, (5) Electricity and Industries

Deptts., three Deputy Secretaries, three Under-Secretaries, and three Assistant Secretaries. In the Public Works Department, there are five Chief Engineers (Secretaries except in the case of Electricity Branch) one in the Buildings and Roads Branch, one in the Electricity Branch and three in the Irrigation Branch while the Legal Remembrancer is also the Secretary to Government in the Legislative Department. The head of the Police Department is Joint Secretary and of the Education Department a Secretary to Government. The Government stay in winter in Lahore and summer (from the middle of May to the middle of October) in Simla. Under the Governor, the province is administered by five Commissioners (for Ambala, Jullundur, Lahore, Rawalpindi and Multan) who exercise general control over the Deputy Commissioners—29 in number—each of whom is in charge of a district.

The principal heads of Department in the province are the three Financial Commissioners (who are the highest Court of Revenue jurisdiction, and heads of the departments of Land and Separate Revenue and of Agriculture and the Court of Wards), the five Chief Engineers, the Inspector-General of Police, the Director of Public Instruction, the Inspector-General of Prisons, the Inspector-General of Civil Hospitals, the Director of Public Health, the Chief Conservator of Forests, the Directors of Agriculture and Industries, the Inspector-General of Registration, the Registrar of Co-operative Credit Societies and Joint Stock Companies and the Legal Remembrancer.

Justice.

The administration of justice is entrusted to a High Court, which is the final appellate authority in civil and criminal cases, and has powers of original criminal jurisdiction in cases where European British subjects are charged with serious offences and original civil jurisdiction in special cases. The Court sits at Lahore and is composed of a Chief Justice and ten Puisne Judges (either civilians or barristers). Subordinate to the High Court are the District and Sessions Judges (22 in number) each of whom exercises civil and criminal jurisdiction in a civil and session division comprising one or more districts. In districts in which the Frontier Crimes Regulation is in force the Deputy Commissioner on the finding of a Council of Elders (Jirga) may pass sentence up to seven years' imprisonment.

Local Government.

Local Government is secured in certain branches of the administration by the constitution of District Boards, each exercising authority over a district of a Corporation at Lahore or of Municipal, Town, and Notified Area Committees each exercising authority over an urban area, and of Panchayats, each exercising authority over a revenue estate or a compact group of revenue estates. The funds of District Boards are derived from a cess on the land revenue of the district supplemented by Government grants, profession and other taxes and miscellaneous fees, and those of the Lahore Corporation and Municipal, Town, and Notified Area Committees from octroi or terminal tax and other forms of taxation, from Government grants and from rents and miscellaneous fees. The Panchayat system is an attempt to revive the traditional village community organisation, the elected committee or Panchayat possessing certain powers in respect of taxation, local option, civil and criminal justice, the abatement of nuisances and other matters. In order to modernise the towns of the province, the Punjab Town Improvement Act, 1922, which provides for the constitution of Improvement Trusts, has been extended to nine important towns.

Police.

The Police force is divided into District Police, Railway Police, Criminal Investigation Department and Provincial Additional Police. The combined force is under the control of the Inspector-General, who is a member of the gazetted force and has under him seven Deputy Inspectors-General five in charge of ranges comprising several districts one in charge of the Criminal Investigation Department and of the Finger Print Bureau at Phillaur and another as Deputy Inspector-General, Technical and Training. There is a Police Training School at Phillaur controlled by a Principal of the rank of Superintendent of Police. The Railway Police is under an Assistant Inspector-General. The Provincial Additional is controlled by a commandant. The District Police are controlled by Superintendents each of whom is in charge of a district and has under him one or more Assistant Superintendents or Deputy Superintendents.

As a war measure the creation of a Civic Guard has also been effected and it is proposed to continue it at a reduced strength. It is under the control of an Assistant Inspector-General of Police.

Education.

Rapid strides have been made in education in the Punjab during the last two decades. The advance has not been confined to any one form of education but is spread over all grades and varieties. In addition to institutions maintained in all parts of the province by private enterprise, Government itself maintains seventeen arts colleges (including two for Europeans and four for women), five normal schools for males, twelve training classes, and combined institutions for females, one hundred and seventy-four secondary schools for boys and girls and fifty-eight centres for vocational training. Apart from these institutions for general education, Government maintains nine higher grade professional institutions, *viz.*, the King Edward Medical College, de Montmorency College of Dentistry and Veterinary College at Lahore, the Agricultural College at Lyallpur, the College of Engineering and Technology at Moghalpura, the Central Training College, Lahore, the Lady Maclagan Training College for Women, Lahore, Glancy Medical College, Amritsar and the Chelmsford Training College at Ghoragali, and one school, *viz.*, the Engineering School at Rasul. In addition there are forty-two technical and industrial schools (thirty-one for males and eleven for females) scattered over the province.

The Department of Education is in the charge of the Minister for Education, who is assisted in the work of administration by the Director of Public Instruction.

Medical.

The Medical Department is controlled by the Inspector-General of Civil Hospitals, Punjab, who is an officer of the Indian Medical Service holding the rank of Colonel. He is assisted by a Deputy Inspector-General of Civil Hospitals Punjab, an I. M. S. Officer of the rank of a Major, an Assistant Inspector-General of Civil Hospitals, Punjab, who is an Officer of the Provincial Civil Medical Service of the rank of a Civil Surgeon; a Lady Assistant Inspector-General of Civil Hospitals, Punjab, who is senior Member of the Women's Medical Service (Indian) and a Personal Assistant of Gazetted rank.

Public Health.

The following personnel of the Punjab Public Health Deptt., are responsible for the control of disease and for the carrying out of work designed to improve the health of the people :—

Headquarters staff :—

Director of Public Health, Assistant Director of Public Health, Epidemiology, and two Assistant Epidemiologists, Provincial Public Analyst, Superintendent, Punjab Vaccine Institute, Provincial Leprosy Officer, Tuberculosis Medical Officer, Entomologist, Statistical Officer, Inspectress, Health Centres and two Assistant Inspectresses.

Public Health work is organised in 3 "Ranges" each in charge of an Assistant Director of Public Health. The 29 districts of the Punjab are included in these Ranges.

The basic public health staff for a District is

1 District Medical Officer of Health, 4 Sanitary Inspectors, 1 Superintendent of Vaccination, 16 Vaccinators.

The basic district staff is reinforced from the following cadres organised for special work :—

A Public Health Corps concerned primarily with the control of epidemic disease and sanitation in villages.

There are 28 units in the corps each consisting of :—

1 Sub-Assistant Health Officer, 1 Sanitary Inspector, 2 Sanitary Supervisors, 12 Sanitary Patrols (Labourers).

One such unit is normally attached to each district.

An anti-malaria organisation of 14 units, each consisting of :—

1 Sub-Assistant Health Officer, 1 Entomological Assistant, 5 Anti-malaria Supervisors, 25 Anti-malaria Patrols.

Problems relating to nutrition are investigated by specially trained staff which includes :—

1 Nutrition Officer, 1 Lady Doctor, 1 Sub-assistant Health Officer, 2 Sanitary Inspectors.

Increasing effort is being directed towards ensuring that food-stuffs sold throughout the Province are of good quality. Forty Government Food Inspectors are employed, in addition to those appointed by local bodies, who regularly sample whole-sale and retail stocks. Samples are examined at a Headquarters Laboratory also at the four Divisional Laboratories at Ambala, Jullundur, Multan and Rawalpindi.

Government has recently expanded materRy & child welfare work. There are now throughout the Province 124 maternity & child welfare centres staffed by fully trained lady health visitors, who supervise the training and work of indigenous dias. One hundred and ten additional centres are being formed.

A special organisation for the prevention and treatment of Hookworm disease is in operation in the areas in which this disease is prevalent.

The following personnel carry out the work :—

Consisting of 1 Medical Officer, 2 Sanitary Inspectors, Eight units each consisting of :—

1 Sub-Asstt. Surgeon, 1 Dispenser.

A Field Epidemiological Unit for the investigation of outbreaks of epidemic and other disease. The nature of the disease is determined by the collection and examination of pathological material, an endeavour is made to trace the disease to its source and advice regarding appropriate preventive measures is given. The personnel include :—

1 Entomologist, 2 Sub-Assistant Health Officers, 1 Field Assistant, 6 Sanitary Supervisors, 12 Sanitary Patrols, 2 Laboratory Assistants, 2 Laboratory Attendants.

An Anti-leprosy cadre consisting of :—

1 Provincial Leprosy Officer, 1 Assistant Leprosy Officer, under the P.L.O., 1 Assistant Leprosy Officer, for Kangra, 1 Assistant Leprosy Officer, for Kulu, 1 Nurse Dai.

Leprosy surveys are undertaken and measures instituted for the control of the disease.

The following institutions contribute to the control of disease and the training of health personnel :—

The Epidemiological Bureau—Bacteriological & Pathological laboratories Training of Sanitary Inspectors and Vaccinators. Production of Vaccine Lymph.

The Punjab Vaccine Institute Bacteriological & Pathological laboratories. Training of Sanitary Inspectors and Vaccinators. Production of Vaccine Lymph.

The Punjab Health School—Training of lady health visitors.

Whole-time Municipal Medical Officers of Health are employed in the following towns :—

Lahore, Amritsar, Rawalpindi, Ferozepore, Jullundur, Multan, Sargodha, Lyallpur, Ludhiana and Kasur.

All District & Municipal Medical Officers of Health are Inspectors under the Factory Act and are responsible for ensuring that the rules laid down for safeguarding the health of workers are observed.

There is a Public Health Branch of the Public Works Deptt., which is concerned with the planning and carrying out of work in connection with the provision of water-supplies and drainage and sewerage schemes in towns and villages. This organisation consists of a Chief Engineer who is a Secretary to Government, 2 Superintending Engineers and the following additional personnel :—

Executive Engineers 8, Sub-Divisional Officers 19, Subordinates 50.

Administration.

Governor, H. E. Sir Evan Meredith Jenkins, K.C.S.I., K.C.I.E., I.C.S.

Personal Staff.

Secretary, G. M. Brander, C.I.E., I.C.S.
Military Secretary, Major L. A. J. Roffey.
Aides-de-Camp: Captain H. J. G. Eyre and Captain A. R. N. Davies.
Indian Aides-de-Camp: K. S. Hony. Lt. Muhammad Sarwar Khan, Bahadur, O.B.I., Hony. Asstt. Recruiting Officer, late 1-15th Punjab Regiment, Chanda Singh, Hony. Capt. S. B., I.O.M., Late 12th F. F. Reg. and Bhagi, Subedar Major and Hony. Lt., O.B.I.

Members of the Council of Ministers.

The Hon'ble Malik Sir Khizar Hayat, K.C.S.I., O.B.E. (*Premier*).

The Hon'ble Sardar Swaran Singh, B.A., LL.B. (*Minister of Development*).

The Hon'ble Mr. Bhim Sen Sachar, B.A., LL.B. (*Finance Minister*).

The Hon'ble Nawab Sir Muzaffar Ali Qizilbash (*Minister of Revenue*).

The Hon'ble Chaudhri Lahri Singh, B.A., LL.B. (*Minister of Public Works*).

The Hon'ble Mian Muhammad Ibrahim Barq (*Minister of Education*).

Civil Secretariat.

Chief Secretary, H. D. Bhanot, C.S.I., C.I.E., I.C.S.
Secretary, Medical and Local Government Department, E. A. R. Eustace, O.B.E., I.C.S.
Secretary, Post War Reconstruction Department, Akhter Hussain, O.B.E., I.C.S.
Secretary, Civil Supplies Department, P. N. Thapar, C.I.E., I.C.S.
Secretary, Finance Department, B. R. Tandon, C.I.E., I.C.S.
Home Secretary, A. A. MacDonald, C.I.E., O.B.E., I.C.S.
Secretary, Electricity And Industries, K. V. F. Mortan, I.C.S.
Additional Secretary, Civil Supplies Department, N. M. Buch, O.B.E., I.C.S.
Financial Commissioners, A. C. M. MacLeod, C.I.E., I.C.S. (*Revenue*); P. Marsden, C.I.E., I.C.S. (*Development*); Ram Chandra, C.I.E., M.B.E., I.C.S. (*Colonies*).

Public Works Department.

Irrigation Branch.

Secretary (Northern Canals), F. F. Haigh.
Secretary (Southern Canals), D. K. Khanna.
Secretary (Western Canals), E. L. Protheroe.

Buildings and Roads Branch.

Secretary, H. A. Harris, I.S.E.

Public Service Commission.

Punjab and N. W. F. Provinces (Joint).—P. W. Marsh, C.S.I., C.I.E., I.C.S. (Rtd.), *Chairman*. K. B. Mohd. Zarifkhan, P.C.S.; K. B. Nawab Muzaffar Khan, C.I.E.; S. B. S. Mohan Singh, C.I.E.; Ch. Bharat Singh, B.A., LL.B., *Members*. S. A. Kureshi, I.C.S., *Secretary*.

Miscellaneous Departments.

Director of Agriculture, Malik Sultan Ali Noon, I.A.S.
Director of Land Records and Inspector-General of Registration, K. B. Sardar Haji Hafiz Ghulam Hassan Khan Leghari.
Director of Public Instruction, W. H. F. Armstrong, I.E.S.
Inspector-General of Police, E. W. C. Wall, C.I.E., I.P.
Chief Conservator of Forests, Gotley, C.I.E., D.S.O., I.F.S.
Inspector-General of Civil Hospitals, Col. D. Clyde, I.M.S.
Director of Public Health, K. B. Dr. Abdul Hamid Butt, M.B.B.S., D.P.H., D.T.M.&H. (Eng.).
Inspector-General of Prisons, Lt.-Col. G. A. Khan.
Accountant-General, P. D. Pande.
Postmaster-General, K. B. Mohd. Zaman Khan.

Lieutenant-Governors of the Punjab.

Sind.

Sind is one of the two provinces created in 1936, the other being Orissa. Unlike the latter, which has been carved out on a linguistic basis from three older provinces, Sind was a compact unit and was considered a province within a province even before its separation. From the point of view of geography, ethnology and language, Sind has greater affinity to the Punjab than to Bombay. Nevertheless it has been attached to the Bombay Presidency administratively ever since its conquest by Sir Charles Napier in 1843.

The demand for its separation into a distinct political entity is of comparatively recent origin. It was only about a dozen years ago that Muslim leaders started the demand that Sind, where the Muslims are in an overwhelming majority, should have separate administrative machinery under the next reformed constitution, so that it might be a counterblast to provinces where the Hindus are in a majority. What was started as a bargaining point in inter-communal negotiations has now become an accomplished fact.

The Muslim delegation at the first Round Table Conference put forward the demand in London in the winter of 1930. The question was referred to a committee which accepted the principle of separation, suggested an expert inquiry to ascertain the financial aspect of the separation, and threw the burden of proving the feasibility of separation on those who asked for it. An expert inquiry was held and it drew a gloomy picture of the financial future of Sind. Its findings can best be summarised by its remark, "There is thus obviously no question of Sind standing surety for the Barrage—the problem is whether the Barrage can stand surety for Sind."

Demand for Separation.

A conference of representatives of the people of Sind met in 1932 to devise measures to meet the financial objections to the separation. Wide divergence of opinion prevailed at this conference, whose chairman eventually submitted a report according to which the annual deficit of the new province for the first six years of its life would be Rs. 80 lakhs, the revenue from the Barrage being eaten up by interest charges. Roughly from 1945 onwards, there would be a surplus from the Barrage to help the province. Based on this assumption the authorities set about perfecting the administrative machinery in preparation for the inauguration of the new regime.

With the stage set for the advent of the new province, an Order-in-Council was issued in January, 1936, announcing that the new province would start on its career on April, 1, 1936, and creating transitional machinery for the conduct of government till provincial autonomy is inaugurated in accordance with the provisions of the Government of India Act, 1935.

Of a permanent character are those provisions of the Order-in-Council which sever Sind from Bombay and settle the liabilities of the parent and the infant in respect of development loans incurred during the joint family period. Lands forests, buildings, property, etc., will pass to the province where they are situated. Arrears of taxes will belong to the province where the taxed property is situated or the taxed transaction took place. Of the outstanding Bombay Irrigation Debt incurred before April 1, 1921, Rs. 2,74,96,384, including Rs. 73,687 of the debt on account of the Lloyd Barrage and Canals system, will be borne by Sind, and the rest by Bombay. Of the debt incurred on account of the Lloyd Barrage and Canals system, all except the portion relating to the Nasirabad section (which is chargeable neither to Bombay nor to Sind) will be borne by Sind. The outstanding Bombay debt on account of the Bombay Development Scheme will be the debt of Bombay alone. Other loan works will be chargeable to the province where the works are located.

It is also understood that the Central Government will have to come to the rescue of Sind by providing the funds to meet the deficit in the first few years. In order to make arrangements for such a subvention to Sind and Orissa and for other weak provinces and generally to adjust the financial relations between the Central and the provinces under the provincial autonomy scheme, Sir Otto Niemeyer, a financial expert, was asked to conduct an inquiry. He completed his investigations and submitted his report, according to which Sind gets a cash subvention of Rs. 105 lakhs for a period of ten years, after which the aid will be progressively decreased. While on the subject of help from the centre, it may be mentioned that, according to the Niemeyer recommendations, Sind will get after the first five years of provincial autonomy 2 per cent. of the distributable portion of the income-tax revenue.

Population.

Sind has an area of 48,136 sq. miles and a population of 4,535,008. Of this, the Hindus (including Scheduled castes) number 1,229,926 and the Muslims 3,208,325. The rest of the population is made up of 20,209 Christians, 31,011 Sikhs; 3,687 Jains; 3,838 Parsis; 1,082 Jews and 36,930 others. According to the Census of 1941, 389,333 males and 90,020 females in the Province of Sind are literate, representing 15.6% and 4.4% of the total male and female population respectively. 138,249 Muslim males and 16,416 Muslim females; 231,869 Hindu males and 64,498 Hindu females are literate. The language of the Province, Sindhi, though it bears many marks of Arabic and Persian influence and is written in Perso-Arabic script, is nearer the original Sanskrit than any other Indian language. The Hindus are far more advanced than the Muslims and enjoy a virtual monopoly of the trade of the province. As against 263 Hindu literate males per 1,000, only 44 Muslims per 1,000 are literate; 51 per 1,000 literate Hindu females compare against five literate Muslim females. The number of those literate in English are 119 per 10,000—186 per 10,000 males and 24 per 10,000 females.

Out of every 100 workers in Sind 59 are engaged in agriculture and animal husbandry. Ten per cent. are engaged in manufacturing industries, most of which are, however, of the cottage type, there being very few factories in Sind.

The cultivable area of the province is mostly commanded by the recently constructed Sukkur Barrage and Sind canals, which, with other canals and the Indus river itself, supply water to 7,500,000 acres. The Barrage works have cost nearly 24 crores of rupees. The Sindhi agriculturist is gradually becoming alive to the perennial regulated supply of irrigation and his outlook is becoming brighter. The rapidity with which lands supplied by the Barrage system are being taken up augurs well for the success of the scheme and the prosperity of the province as a whole. Already there has been a growth in the production of long staple cotton, all of which is easily absorbed by Indian textile mills.

Lloyd Barrage.

The Barrage owes its existence largely to the zeal of the late Lord Lloyd, the then Governor of Bombay, whose name it bears. Started in July 1923, it was completed in January 1932. It was the completion of the dream of many an engineer and an almost incredible boon to the cultivator, who formerly carried on his agricultural operations in a haphazard manner being unable to depend on the proverbial vagaries of the Indus. What it means to the Sindhi, the world alone knows, for the Barrage has converted—or hopes to convert—a waterless desert into a smiling garden flowing with milk and honey

The magnificence of the achievement that is the Lloyd Barrage can be imagined when it is realised that it is a huge water regulator consisting of 66 spans, each sixty feet wide, the openings being regulated by steel gates, each weighing fifty tons. The Barrage is about a mile long, about five times the length of London Bridge. Thousands of miles of new channels were excavated varying in width from 346 feet in the case of main canals to only two or three feet in the case of water courses. The total length of Government channels which were excavated was over 6,000 miles, and that of water courses over 30,000 miles. The total length is thus some 36,000 miles, which means about 1½ times the circumference of the earth.

The total quantity of earthwork involved, excluding that for the watercourses was 628 crores cubic feet of earthwork which means a solid column measuring 100 feet by 100 feet extending to a height of over 115 miles.

The function of the Barrage is to head up the river at Sukkur and from that to distribute it all the year round according to requirements of cultivators. The distribution is made through seven great canals, regulated through regulators on both banks of the river—four on the left bank, three on the right. Those on the left bank are Rohri, the Eastern Nara, the Khairpur Feeder East and the Khairpur Feeder West. Those on the right bank are the North Western Canal, the Rice Canal and the Dadu Canal.

The total number of openings in all the canal Head Regulators is 55, each being of 25 feet span and each opening being equipped with three electrically operated gates. The total discharge of water into all the canals is approximately 45,763 cusecs or 285,100 gallons per second. The total length of all irrigation channels including old and new watercourses is 54,300 miles. To accomplish this staggering feat, excavation of earthwork to the extent of 7,500,000,000 cubic feet was involved, as much as would fill a drain 14 feet wide and four feet deep, dug round the equator. It was estimated that the ultimate area of annual cultivation on the scheme would be over 5,000,000 acres and this would be under various crops approximately as follows:

Wheat 2,440,000 acres; cotton 850,000 acres; rice 625,000 acres; *jawari*, *bajri*, etc., 635,000 acres; and oilseeds 410,000 acres.

This denoted in produce would mean the following approximate quantities:

Wheat 1,133,000 tons; cotton 549,000 bales; rice 447,000 tons; *jawari*, *bajri*, etc., 271,000 tons; and oilseeds 117,000 tons.

Inter-communal Co-operation.

Politically, the province is backward. Only the Hindu minority is politically minded, the Muslims owning allegiance to personalities rather than to principles. The Hindus are openly afraid of Muslim dominance and of being ousted from public life. On the other hand, there is growing evidence of a desire on the part of the Muslim community to reassure the minority in regard to the continued enjoyment of its rights. Leaders of both communities are working for the creation of an understanding between the two which will bring about an area of inter-communal co-operation and goodwill so necessary for the successful working of the reformed constitution under unfavourable financial conditions.

Karachi.

No account of Sind will be complete without a reference to its capital, Karachi. It is a comparatively new town, for according to known facts it was as recently as 1729 that a few traders of the neighbouring State of Kalat migrated to the "Kalachi" the land of the sand-dunes. It was several years later that its potentialities as a harbour were realised by the British—Sir Charles Napier, the Conqueror of Sind, is said to have forecast that Karachi would some day become the "Glory of the East." Recent developments in Karachi hold out fresh hopes of this prediction being fulfilled, for with the growth of aviation, Karachi, which is on the main line of Imperial aerial communication between London and Australia right across India, is bound to become a vital airport, if it is not already one. In addition to being the capital of Sind, Karachi is the outlet for the products of the Punjab. If the Barrage becomes all that is expected of it, Karachi may have to handle in 1960 a very large portion of the produce mentioned above of the Barrage produce as also the produce from 429,800 acres of Dubari cropped land. That this is not altogether Utopian is evident from the fact that within seven years of the commencement of Barrage operations, that is, by the end of 1941 the following acres were under cultivation in the Barrage Zone: 1,078,468 acres under wheat, 859,888 acres under cotton and 598,811 acres under rice.

Government House.

GOVERNOR

H. E. Sir Francis Mudie, K.C.S.I., K.C.I.E., O.B.E., I.C.S.

J. M. Phelps, I.C.S., *Secretary to H. E. the Governor.*

Major F. E. Nevin, 2nd Royal Lancers, *Military Secretary to H. E. the Governor.*

Lt. F. J. G. Shearburn, 13th D.C.O. Lancers, I.A.C., *Aide-de-Camp to H. E. the Governor.*

SECRETARIAT STAFF.

A. P. LeMesurier, I.C.S., *Chief Secretary to the Government of Sind.*

G. W. McElhinny, I.C.S., O.B.E., J.P., *Revenue Commissioner and Secretary, Revenue Department.*

S. G. Mustafa, I.S.E., *Chief Engineer and Secretary to Government, Public Works Department.*

M. P. Mathrani, O.B.E., B.E., I.S.E., *Joint Chief Engineer & Joint Secretary to Govt., Public Works Department.*

D. R. C. Halford, I.C.S., *Secy., Finance Department.*

B. R. Patel, I.C.S., *Secretary to Government and Director of Civil Supplies, Sind.*

Nazir Ahmed, I.C.S., *Enforcing Officer, Sind, Deputy Secretary and Additional Director of Civil Supplies.*

V. D. C. Evans, I.P., *Enforcement Officer and Deputy Secretary, Department of Food and Civil Supplies.*

G. S. Kehar, B.A., *Deputy Secretary, Home and Political Services and General Administration.*

N. B. Shah, B.E., I.S.E., *Deputy Secretary, Public Works Department.*

Muhammad Moosa Sahibo, B.E., I.S.E., Class I, *Addl. Dy. Secy. to Govt., Public Works Dept.*

Muhammad Yakub Khaliqdad Khan Agha, B.A., *Revenue Assistant Commissioner.*

Muhammad Hashim Haji Rajabali Alias, *General Assistant Commissioner.*

Bulchand R. Kirpalani, B.A., *Addl. Assistant Commissioner.*

H. B. Hingorani, *Deputy Secretary, Legal Department and Remembrancer of Legal Affairs.*

Shamdas K. Hiranandani, Bar-at-Law, *Personal Assistant to R. L. A., Sind.*

A. F. D'Souza, B.A. (Hons.), *Assistant Secretary to Govt. Political Services and General Administration Departments.*

Rai Sahib N. V. Raghavan, B.A., LL.B., J.P., *Examiner, Local Fund Accounts and under Secy. to Govt., Finance Dept.*

A. B. Hannah, Asstt. Secy., *Home Department.*

Lekhraj M. Tejwani, *Assistant Secretary, Public Works Department.*

B. Vasudeva Rao, B.A., *Asstt. Secy., Finance Dept.*

T. G. Narayanan, B.A., *Addl. Asstt. Secy., Finance Dept.*

Bhagwan R. Ramchandani, B.A., *Addl. Asstt. Secy. to Govt., Public Works Dept.*

S. D. Hukmani, B.E., I.S.E., Class II, *Asstt. Exec. attached to the P. W. D. Department.*

A. M. Rahu, B.A., LL.B., *Assistant Secretary, General Department.*

As a sequel to the unprecedented situation that arose in the Sind Assembly, which was without a Speaker or a Deputy Speaker or anyone willing to perform the duties of Speaker, His Excellency the Governor dissolved the Assembly in September 1946. It has been decided by the Government to hold a fresh general election in December, 1946.

The United Provinces.

The United Provinces lies in practically the centre of Upper India. It is bounded on the north by Tibet, on the north-east by Nepal, on the east and south-east by Bihar, on the south by two of the Chota-Nagpur States of the Central India Agency and the Saugor district of the Central Provinces, and on the west by the States of Gwalior, Dholpur, Bharatpur, Sirmoor, and Jubbal, and by the provinces of Delhi and the Punjab. Its total area amounts to 106,247 square miles, to which may be added the area of the three Indian States of Rampur, Tehri-Garhwal and Benares with an area of 6,276 square miles, giving a total of 112,523 square miles. The total population according to the 1941 census is 56,346,456.

The Province, originally termed the North-Western Provinces and so amalgamated in 1877, was named the United Provinces of Agra and Oudh in 1902 and received its present designation on April 1, 1937. It includes four distinct tracts of country: portions of the Himalayas, including the Kumaon division which consists of three hill districts, two of which are entirely in the hills and one is half in the sub-montane belt, the sub-Himalayan tract, the great Gangetic plain, and portions of the hill systems of Central India including Bundelkhand. The Gangetic plain is protected by an extensive canal system, which though somewhat liable to run short of water in extremely dry years, is of great benefit in all ordinary years and years of limited drought. The first two of these tracts are infertile and support a very sparse population and the Central Indian plateau is almost equally infertile, though better populated. The soil of the Gangetic plain, however, possesses an extreme fertility and here the density of population varies from 542 persons per square mile in the west to 555 in the centre and 753 in the east, which gives the Province as a whole a greater population pressure on the soil than any other Province in India save Delhi and Bengal. In the south there are low rocky hills, broken spurs of the Vindhya mountains, covered with stunted trees and jungle, and in the north the lower slopes of the Himalayas, clothed with dense forest, affording excellent big and small game shooting, and rising beyond in a tangled mass of ridges, ever higher and higher, until it reaches the line of the eternal snows, but the greater part of the province consists of level plain, teeming with highly-cultivated fields and watered by three rivers—the Ganges, Jumna and Gogra.

Administration.

The Province was until the close of 1920 administered by a Lieutenant-Governor chosen from the ranks of the Indian Civil Service. Under the Reform scheme the Province was raised to the status of a Governor-in-Council, the Governor being assisted by two members of the Executive Council in charge of the Reserved Subjects and two Ministers in charge of the Transferred Subjects. With effect from April 1, 1937, provincial autonomy was inaugurated in this Province and a Cabinet of 6 Ministers to assist the Governor was formed, under the G. I. Act of 1935. This Ministry remained in office from July 17, 1937 to November 3, 1939. But after the outbreak of the European War it resigned and the powers of administration were assumed by the Governor under section 93 of the G. I. Act of 1935. He appointed 3 Advisors from November 4, 1939, and a fourth one from September 14, 1943, to assist him in the administration of the Province. The medium for the transaction of public business is the Secretariat, the staff of which consists of 13 Secretaries (including Chief Secretary), and 12 Deputy Secretaries including one Deputy Legal Remembrancer who is *ex-Officio* Deputy Secretary in the Judicial Department. There are also six Under-Secretaries including one Assistant Deputy Legal Remembrancer who is *ex-Officio* under Secretary in the Judicial Department and one Secretary, Council of Physical Culture who is *ex-Officio* under Secretary in the Education Department and 11 Assistant Secretaries. The Chief Secretary is in charge of Appointment, General Administration, Secretariat Establishment and Accounts, and Ecclesiastical Departments; the Finance Secretary deals mainly with the Finance Department; the Revenue Secretary is in charge of the Revenue, and Scarcity Departments; the Education Secretary is in charge of the Education Department; the L. S. G. Secretary is in charge of the Local Self-Government, Municipal, Medical and Public Health Departments; the Judicial Secretary and Legal Remembrancer is in charge of the Judicial, (Civil) and Legislative Departments and perform the duties of Legal Remembrancer; the Public Works Secretary is in charge of the Buildings and Roads and Irrigation, Forest and Transport Departments. The Industries Secretary is in charge of the Industries, Excise and Labour Departments. The Information Secretary is in charge of the Information and Rural Development Departments. The Secretary, Agricultural Department is in charge of the Agriculture Department. The Secretary, Home Department is in charge of the Home Department (Criminal), Home Department (Jails) and Home Department (Police). There is one Secretary, who is in charge of the Civil Supplies and Rationing Departments. The Secretary, Department of Economics and Statistics, is also Economic Adviser to Government. There are also a Commissioner, Food and Civil Supplies and a Commissioner for Rationing. The Commissioner for Rationing has under him a Deputy and an Assistant Commissioner for Rationing. There are in addition two Deputy Directors, Supply and Rationing. Government spends the cold weather, October to April, in Lucknow and Allahabad, mostly in Lucknow, though the Secretariat remains throughout the year at Lucknow. The Governor and some of the Secretaries and Deputy Secretaries spend part of the hot weather in Naini Tal, but during the monsoon the Governor tours the plains, as he does also in the cold weather. The Board of Revenue is the highest court of appeal in revenue and

rent cases lying within its jurisdiction, being the chief revenue authority in the province. There are forty-nine British districts, thirty-seven in Agra and twelve in Oudh, average area 2,213 square miles and average population a million. Each district is in charge of a District Officer, termed a Magistrate and Collector in Agra, a Deputy Commissioner in Oudh and Kumaon and Superintendent in Dehra Dun district. The districts are grouped together in divisions. Each division is under a Commissioner, except the Kumaon division, the charge of which is held by the Deputy Commissioner, Naini Tal, in addition to his duties. There are ten divisions having an average area of nearly 10,600 square miles and an average population of nearly 5 millions. The districts are sub-divided into *Tahsils*, with an average area of 518 square miles and an average population of 236,000. Each ***Tahsil*** is in charge of a ***Tahsildar***, who is responsible for the collection of revenue, and also exercises judicial powers. *Tahsils* are divided into ***parganas*** which are units of importance in the settlement of land revenue. Subordinate to the ***Tahsildars*** are ***naib tahsildars*** and ***kanungos***. Ordinarily there are three ***kanungos*** and one ***naib tahsildar*** to a ***tahsil***. The ***Kanungos*** supervise the work of the ***patwaris***, or village accountants, check their papers and make such inquiries as may be entrusted to them by superior Officers. For judicial purposes (revenue and criminal), the District Officer assigns a sub-division, consisting of one or more *tahsils*, as the case may be to each of his subordinates, who may be covenanted civilians (Joint and Assistant Magistrates and Assistant Collectors) or members of the Provincial Service (Deputy Collectors and Magistrates).

Manufactures.

The province is not rich in minerals. Iron and copper ore are found in the Himalayan districts. There were mines of importance there formerly, but owing to high cost of production and inaccessibility, most of them have been closed. Coal field exist in the district of Mirzapur in Tehsil Sanghrauli on the border of Rewa State. Gold is found in minute quantities by washing the sands in some of the rivers in the hills. Lime stone is found in the Himalayas and in the districts of Etawah and Banda, and stone is largely quarried in the Mirzapur district. Cottage and artistic industries, however, abound in U.P. Cotton is ginned and spun throughout the Western districts of the province as a home industry; and weaving by means of handlooms is carried on in most districts. Chief handloom weaving centre are Tanda (Fyzabad), Benares, Mau (Azamgarh), Mubarakpur, Azamgarh, Mau Aima (Allahabad), Gorakhpur, Maghar (Basti), Khalilabad (Basti), Bara Banki, Sandila (Hardoi), Etawah, Amroha (Moradabad), Meerut, Sikandrabad (Bulandshahr), Deoband (Saharanpur), Sikandrarao (Aligarh), and Dhampur (Bijnor). Cawnpore is the chief centre for cotton spinning and weaving mills. According to the latest figures available, 2,650 persons are employed in cotton, ginning, cleaning and pressing factories and 56,016 in spinning and weaving mills. The number of actual handloom weavers is about 250,000. Silk weaving used to be confined to Benares (where the famous 'Kimkhab' brocade is made) but considerable work is now done at Etawah, Sandila, Mau (Azamgarh) and Bilaspur (Pilibhit). Embroidery work is done at Lucknow, where the noted 'Chikan' work of cotton on muslins is produced, and in Benares, where gold and silver work is done on silk, velvet, crepe and georgette. Benares uses local gold thread for embroidery work and 'Kimkhab' weaving. Gorakhpur has lately specialised in the manufacture of crepe and turkish towels. The glass industry is important at Bahjoi, Balawali, Sasni, Hathras, Harangau, Shikohabad, Makhanpur, Naini (Allahabad), Ghaziabad and Benares State. Firozabad is the chief centre of manufacturing glass bangles in India. Moradabad is noted for its lacquered brass work, Benares for brassware engraving and repousse; Farrukhabad, Pilkhawa (in Meerut district) and Muttra for their calico prints and Agra for its durries and marble and alabaster articles; porcelain wares are now made at Khurja and glazed pottery at Chunar and Meerut; Clay figures of men and fruits at Lucknow; carpets at Mirzapur and Bhadohi (Benares State) and cotton carpet at Shahjahanpur and leather goods in Cawnpore, Agra, Lucknow and Meerut.

The making of brass utensils at Mirzapur Farrukhabad, Hathras, Moradabad, Shamli (Muzaffarnagar), Benares, Bahraich and Oel (District Kheri), the carving and inlay work of Nagina and Saharanpur; the art silk industry of Tanda (Fyzabad), the lock and brass fittings industry at Aligarh, Cutlery at Qiamganj and Hathras, the copper utensil industry of Almora, the durries of Khairabad (Sitapur), Cawnpore Agra and Bareilly, the pottery at Nizamabad (District Azamgarh) and the Ivory work of Lucknow and manufacture of scissors at Meerut also deserve mention.

As a result of World War II blanket making has developed on a large scale in the districts of Muzaffarnagar, Meerut, Najibabad (Bijnor), Mirzapur and Bhadohi (Benares State) and the manufacture of locks, safety and split pins and other miscellaneous iron articles at Aligarh. The weaving of tweeds has developed as a new industry in Almora district.

Cawnpore is the chief industrial centre. It has tanneries, leather goods factories, soap factories, oil mills, cotton, woollen and Jute mills, engineering workshops, alluminium utensil factories, hosiery factories, plastic products, starch factories, glue refinery, chemical and pharmaceutical works, ordnance factories and other mills. The Cawnpore Woollen Mills is the largest in India. Lucknow possesses an important paper-mill and also a cotton mill. There are cotton, ginning and pressing factories at Aligarh, Meerut, and Bareilly and cotton mills at Agra, Hathras, Benares, Cawnpore, Moradabad and Aligarh. There are now 69 Sugar Factories in the province producing sugar by vacuum process. They are situated in Gorakhpur, Rohilkhand, Meerut, Lucknow, Fyzabad, Benares and Allahabad divisions. A certain amount of sugar is also made by the open pan process and a large quantity of gur is made in the villages. Excellent furniture is made at Bareilly mostly on cottage lines.

There is a paper factory, a straw-board factory and a cigarette factory at Saharanpur. Attars and perfumes are made at Lucknow, Kanauj and Jaunpur. Dayalbagh (Agra) has a tannery, a leather goods factory, a textile factory, a hosiery factory, a dairy, a chemical and soap factory and a factory for manufacturing doors, bolts, lanterns, electrical goods, fountain pens, chemical balances, etc. Fountain pens are made in Cawnpore, Lucknow and Benares. Shoe laces and elastics are made in Cawnpore. Scientific balances and instruments are made at Benares and Dayalbagh (Agra).

There is a plywood factory at Sitapur, a straw-board factory at Meerut, a bonemeal at Lagarwara (Unao) and at Hapur (Meerut), a turpentine and rosin factory, a match factory, a catechu factory and a bobbin factory at Butterbuckganj (Bareilly); brushes are manufactured in Cawnpore, Agra and Meerut, cardboard boxes at Cawnpore and Lucknow. Acids are manufactured at Agra and Ghaziabad and power-alcohol at Meerut. Chemical and pharmaceutical works are at Cawnpore and Amausi (Lucknow). Vegetable ghee is manufactured at Cawnpore, Begamabad and Ghaziabad (District Meerut). Tin canisters are made at Agra and Ghaziabad.

Important trade centres are Cawnpore, Allahabad, Mirzapur, Benares, Lucknow, Meerut, Aligarh, Hathras, Muttra, Agra, Farrukhabad, Moradabad, Chandausi, Bareilly, Saharanpur, Muzaffarnagar, Ghaziabad, Khurja, Gorakhpur, Ghazipur, Pilibhit, Shahjahanpur and Hapur.

Agriculture.

The chief industry is agriculture, which is the principal source of livelihood of a little over 70 per cent of the population and a subsidiary source of income to a further 8 per cent. The soils of the province fall into three groups; the valley soils of the Himalayas, the main alluvium and the Central Indian alluvium; the chief characteristic soil or the Central Indian alluvium is the black soil, with a lighter variant, though here also there are light loams and gravel. The Himalayan soils are of local origin and vary with the nature of the rock from which they have been formed, whilst the main alluvium soils are sand, clay and loam, the loam being naturally the most productive. The soil naturally yields excellent crops of rice, millet, maize, linseed, mustard, cotton, wheat, barley, sugarcane, pulses and potatoes, rice being grown mostly in low-lying heavy clays, and potatoes on the higher valleys. The greater part of the province is highly cultivated. The rainfall varies from 50 to 70 inches in the hills to 40 to 50 inches in the Benares and Gorakhpur Divisions, while the Agra Division receives only about 25 to 30 inches annually. Drought seriously affected Bundelkhand and the Agra Divisions in the past; better drainage and irrigation facilities have effected considerable improvement. In the latter area, however, shortage of water in the canals and the general lowering of the water level still continue to react against full agricultural returns. Steps are being taken to increase the amount of water passing down the canals.

The price of rice rose more or less steadily till August, when the maximum price was attained, followed by an almost steady decline. The maximum price of wheat was attained during February and declined thereafter till May, but rose again in June and remained more or less stationery thereafter. As regards barley and gram, the prices rose more or less steadily till October, when these attained the peak level, but declined thereafter. The price of *arhar dal* rose till February, thereafter continued to decline more or less steadily till June, then again rose till October, when it attained the peak level, but fell in the subsequent months.

There was some increase in the area under wheat as compared with the corresponding figures for the preceding year, the average outturn being uncertain. Although there was a slight decrease in the area under rice, there was an increase in the average outturn. There was a slight decrease in the area under cotton but marked decrease in that under sugar cane, as compared with the corresponding figures for the previous year. The average outturn for cotton remained more or less stationary, but that for sugarcane showed a slight increase.

Land is held on Zamindari tenure in Agra and Taluqdari tenure in Oudh. The principal land owners in Oudh are the Taluqdars, some of whom own very large estates. The area held in Taluqdari tenure amounts to 54 per cent of the total area in Oudh.

The People.

The population is mainly Hindu. The 1941 census has disclosed slight variations in the communal percentages. The Hindus were 83·27 per cent as against 84·4% in 1931, the Muslims numbering 15·28% as against 15% at the previous census. The total of all other communities was 1·44% comprising of Indian Christians, Anglo-Indians, other Christians, Sikhs, Jains, Parsees, Buddhists, Jews, Tribes other than scheduled castes, and of persons who declared themselves as belonging to no caste or religion. Among the Hindus are included scheduled castes, caste Hindus and Arya Samajists.

The three main physical types are Dravidian, Aryan and Mongoloid, the latter being confined to the Himalayan and sub Himalayan districts and the former to South Mirzapur and Bundelkhand, whilst the high caste Aryans frequent the western district of the Province. Most of the people, however, show a mixed Arya-Dravidian origin.

The ordinary spoken language of the Province is Hindustani, written in Nagri and Persian characters. There are distinct literatures in Hindi and Urdu languages respectively and a certain proportion of residents in urban areas, irrespective of their religion, speak and write in Urdu which has a close relationship with Persian and Arabic.

Local Self-Government.

The main units of local self-government are the district and municipal boards, which have non-official Chairmen. Most of the

municipal boards having an annual income of Rs. 50,000 or over have executive officers to whom certain administrative powers are reserved. The administrative functions of the municipal and district boards are performed by the Chairman and Executive Officer or the Secretary, but the boards themselves are directly responsible for most of the administration. The district boards obtain 43.76 per cent. of their income from Government grants. The other chief sources of income are the local rate levied from the land owners and the tax on circumstances and property imposed by some of the boards. The United Provinces Motor Vehicles Taxation Act came into force with effect from January 1st, 1936. The tax realised under this Act is also utilized in the payment of grants to local authorities for purposes of expenditure on the construction, maintenance and improvement of roads. The chief source of municipal income is the octroi or terminal tax and toll which is an octroi in modified form. Local opinion is strongly in favour of indirect as opposed to direct taxation for municipal purposes.

Justice.

Justice is administered by the High Court of Judicature at Allahabad in the portion of the province known as Agra and by the Chief Court sitting at Lucknow in the portion of the province known as Oudh. They are the final appellate authorities in both criminal and civil cases. The former consists of a Chief Justice and ten permanents, and one Additional Judge, six of whom are Indians and the latter consists of a Chief Judge and three permanent and one addl. judges, two of whom are Indians. There are 36 posts of district and sessions judges of which nine are held by officers not belonging to the Indian Civil Service as they have been listed to the provincial service and the bar. Usually they exercise appellate jurisdiction in civil and criminal cases and in certain conditions in cases under the United Provinces Tenancy Act. The High Court has extraordinary original jurisdiction. The Chief Court's original jurisdiction was abolished in 1930 by an Act of the Provincial Legislature. District Officers and their assistants, including tahsildars, preside in criminal courts as magistrates and as collectors and assistant collectors, in rent and revenue courts and dispose of a good deal of the work. Honorary magistrates and honorary assistant collectors who function in all the districts also deal with criminal, revenue and rent cases. Stipendiary Revenue officers have been appointed temporarily all over the Province to assist in the disposal of rent and revenue case work. Kumaon has been brought under the Civil jurisdiction of the High Court from 1st April 1926. The deputy and assistant commissioners exercise inferior civil powers in this division which has no separate civil courts. In the rest of the province there are civil judges, judges of small cause courts and munsifs who dispose of a large number of civil suits. The jurisdiction of a civil judge extends to all original suits without pecuniary limit and a munsif can hear cases ordinarily of a value not exceeding Rs. 2,000 and if specially empowered up to Rs. 5,000. Appeals from munsifs always lie to the district judge while those from the civil judges go to the High Court or the Chief Court, except in cases of a value of Rs. 5,000 or les which are heard by the district judge. Sma cause court judges, ordinarily try suits to th value of Rs. 500 but the Senior Judges of Sma Causes are empowered to try suits of a civ nature of which the value does not exce Rs. 1,000. There are also honorary munsif whose jurisdiction is limited to Rs. 200, an village munsifs whose jurisdiction is fixed a Rs. 20.

Public Works Department.

The Public Works Department (Buildings an Roads and Irrigation Branches), is in the port folio of the Hon'ble Minister for Public Work and Irrigation and the post of Secretary t Government in this department is held by member of the Indian Civil Service.

The Buildings and Roads Branch is adminis tered by three Chief Engineers, two on th Administrative side and one for Post-W Planning. The Province is divided into circles and 23 divisions. Each circle is in th charge of a Superintending Engineer and eac division is under an Executive Engineer. Th Branch of P.W.D. is entrusted with the main tenance of all Provincial metalled and unmetalle roads and the construction of all department buildings (except those of Irrigation Branc each costing more than Rs. 7,500.

The Buildings and Roads Branch has increas to more than thrice its size since the outbre of the war and has now undertaken an exten programme of Road and Building construct The road construction scheme is proposed to spread over 10 years in 3 phases of 2, 3 an years respectively and would cost nearly crores. Roads have been classified into classes. (1) National Highways—These wo traverse several Provinces or States and would of National importance. (2) Provincial Hi ways—These would be main roads runn along and across the length of the Province. Major District Roads—These would main serve the needs of each district and are be taken over from District Boards for reconstr tion. (4) Village and other District Road These would serve the villages and will m each village within reach of at least 5 to 6 m of a pucca road. On the completion of Phase Programme (1946-49) which is estimate cost 15.5 crores the province will have 9 miles of metalled roads 4,491 miles of unmet roads and 500 miles of cement concrete trac

In the Post War Building Scheme 410 bu ings costing about 3 crores are proposed to constructed throughout the Province d 1946-47. The important buildings to be tak up for construction are mostly of Medi Animal Husbandry, Agricultural and Ed tional Departments, i.e. (1) new Medical Col at Agra, (2) Extension of Medical Colle Lucknow, (3) Veterinary College at Fyzabad, Nurses Training Centre at Cawnpore, (5) Colon tion Scheme, (6) Town and Village Hous Schemes, (7) Residences for councillors at Lu now, (8) Construction of certain Head of Dep ments at Lucknow.

The Buildings and Roads Branch has recently opened a section which will deal with Soil Stabilization and its uses in the construction of new roads at a low cost.

The Irrigation branch is administered by three Chief Engineers. The province is divided into circles and divisions.

The Irrigation Branch administers the various Irrigation works in the province as well as the Ganges Canal Hydro-electric Grid, the Tube-Well Irrigation scheme, and the Fyzabad Electricity and Gogra Pumping Schemes. The Ganges, the Eastern Jumna, the Agra Canals, and the Ganges Canal Hydro-Electric Grid are administered by the Chief Engineer (West) while the Sarda Canal, the Fyzabad Electricity and Gogra pumping schemes the Bundelkhand Canals and the Tube-well are administered by the Chief Engineer (East). The Project Circle, Irrigation Works, is under the administration of the Chief Engineer (Development).

The Canals and Tube-Wells, administered by the Irrigation Branch in the United Provinces irrigate over 50 lakhs acres annually.

The Sarda Canal, was opened in 1928 for introducing irrigation into Oudh. In November 1941 an extension, which includes 350 miles of new irrigating channels, was formally opened, making the total length of the main canal and branches, including distributaries, drainage cuts and escapes at on the system, 4,400 miles. The area irrigated is over 10 lacks of acres annually including over 24 lakhs acres sugarcane.

The Ganges Canal—Upper and Lower. The headworks of the former are situated at Hardwar in the Saharanpur district and of the latter at Narora in the Bulandshahr district. The Upper Ganges Canal came into operation in the year 1854-55, and its total mileage of channels is 3,914 miles. The area irrigated annually is about 15 lakhs of acres. The Lower Ganges Canal was opened in 1879-80 and the total mileage of its channels is 5,100 miles. This system irrigates nearly 11 lakhs of acres.

In connection with the Grow More Food Campaign a number of channels have been remodelled and improved, with a view to increasing their water supplies and thereby enabling them to irrigate larger areas. Projects for the construction of about 800 miles of new channels on the Sarda Canal and about 400 miles on the Upper Ganges, Lower Ganges, Eastern Jumna, Betwa, Dhasan and Gogra Canals have been prepared. Of these new channels approximately three-fourths have been completed and opened for irrigation. The additional yield of food grains on this account will be about 75,000 tons per annum.

The Ganges Canal Hydro-electric Grid supplies power for domestic, industrial and agricultural purposes to 14 districts in the west of the province, and to Shahdara in Delhi province. Seven of the ten available falls have been harnessed for generating electric energy and a station by steam power station has been constructed at Chandausi of 9,000 K.W. capacity, making a total of 28,900 K. Wa. available on the Grid. Besides supplying energy for lights and fans and minor industries to about 93 towns, the Grid provides power for irrigation pumping from rivers, tube-wells and open wells. In addition to the Chandausi steam station, the steam station at Harduaganj will shortly be in commission generating about 10,000 K.Ws. when in operation. Another hydro power station at Mohammadpur designed to generate about 9,000 K.Ws. is at present under construction. A large project for the extension of the transmission system of the Grid, which will enable the power generated at Mohammadpur power station to be utilised, is under consideration. This supply of cheap power from over 2000 sub-stations in the Grid is already having an important bearing on the economic disposal of crops and the development of industries in the urban and rural areas of the Grid zone.

The steam power station at Sohwal has a capacity of 2,500 Kilowatts. It supplies energy to the towns of Fyzabad and Ajudhia and for pumping 180 cusecs of water from the Gogra at Raunahi into a canal system 129 miles long, designed to irrigate 43,000 acres.

The United Provinces Government have various irrigation and power projects under consideration for the post-war period. Brief details of these projects on which investigations have advanced sufficiently are given below:—

Sarda Canal Hydro Electric Scheme: It is proposed to generate 12 miles of the Sarda Main Canal by combining the present falls on the existing channels into one drop of 59 ft. for generating 20,000 K.W. minimum at one power station with an installed capacity of 41,000 K.W. The station would, in the first instance, be linked with the Ganges Canal Hydro thermal system in which it will inject 10,000 K.W. Transmission lines will also be run into Pilibhit, Bareilly, Naini Tal, Shahjahanpur and Kheri districts where energy will be made available for domestic agricultural and industrial purposes. Investigations with regard to this scheme have been completed and construction work will start after the rains of 1945. It is anticipated that power from this power station will be available for consumption by 1949.

Nayar Dam Project: It is proposed to impound 1.4 million acre feet gross in the valley of the Nayar, a tributary of the Ganges 50 miles above Hardwar, by building a dam 650 ft. high across the gorge in the river near village Marora in Garhwal district. 0.8 million acre feet is expected to be available annually for irrigation draw off. Primary continuous power to the extent of 15,000 K.W. and secondary power amounting to 70,000 K.W. is also proposed to be generated at the dam site. Geological investigations with regard to rock at dam site are to be taken shortly and the project will take some seven years to complete.

Rihand Dam Project: It is proposed to impound 9 million acre feet gross in the Rihand basin in Singhrauli Pargana, Mirzapur district by a 284 feet high dam across a gorge near Pipri village. Power will be generated by the artificial head created by the storage dam at the power station situated immediately below it. The capacity of the installed plant is expected to be

150,000 K.W. The United Provinces Government are carrying on the investigations with regard to this site pending formation of the Sone Valley Corporation, the formation of which is under consideration at present.

In order to meet the growing demand for irrigation facilities in the Eastern Districts and to give benefit to an area which supplied a good many recruits to the Indian Army and labour Corps, Government propose to construct canals from Rapti and Kuana rivers which would serve Domariaganj, Basi, Basti, Khalilabad and the tehsils of Basti District and Bangaon Tehsil of Gorakhpur district, and from the Rohia and Danda rivers which will serve the areas bounded by Douri Nadi in the east, Rohin Nadi in the west and Lakimpur in the south, and Rohin Nadi and Railway line from Nautanwan to Nai Ket respectively. Nine pumps have also been purchased for installation at various places in Azamgarh District and a pumping scheme is under investigation from Gogta river near Sanawa which will serve Barabanki, Fyzabad, Sultanpur, Partabgarh, Jaunpur and Benares. The channels on the existing Gogra canal system are also being extended by 50 miles. It is also proposed to construct 100 tube-wells in the Basti and Gorakhpur districts, which would irrigate 24,000 acres of Rabi, 12,000 acres of sugarcane, and 6,000 acres of rice giving an additional yield of 210,000 maunds of food grains.

Besides the Eastern districts it is proposed to construct two Dams one on Shahzad river near Lalitpur in Jhansi District and the other on Karamnasa river near Silhot. The former will extend Irrigation in Shahzad Sajnam Doab and the Betwa Canal area and the latter will feed the proposed left and right Khajuri Canals and augment supplies on the Ghagar and Garai Canals systems.

The Ganges Valley State Tubewell Scheme which originally comprised 1656 tubewells is now being extended by the construction of 600 more additional tubewells to help the Grow More Food Campaign. These tubewells are spread over the districts of Moradabad, Bijnor, Budaun, Muzaffarnagar, Saharanpur, Meerut, Bulandshahr, Aligarh, and parts of Etah and Bareilly introducing irrigation on the volumetric system over approximately an area of 19,80,858 acres, under the ultimate development scheme, hitherto without any source of irrigation.

The Irrigation Branch also maintains a Research section which deals with problems of flowing water, silting troubles, scouring action below pucca works channel losses, model experiments of existing and proposed Canal works, etc.

Police.

The Police Force is administered by an Inspector-General, with five Deputy Inspectors-General, including one Deputy Inspector-General now known as D. I. G. Headquarters and Railways, and two temporary officers and two Assistants to I. G. of Police, 48 Superintendents including one S. P. Railways and one additional Superintendent of Police, 41 Assistant Superintendents and 73 Deputy Superintendents. There is a Police Training College at Moradabad under a Superintendent of Police as Principal. There is a C. I. D. forming a separate department with an Assistant Inspector-General (temporary) in charge and three Superintendents of Police. A Military Police section under the command of a Superintendent of Police assisted by one Assistant Commandant and one Adjutant has been added to the provincial police force. As a temporary measure an Anti-Corruption Department to eradicate corruption in the services has also been set-up under a Deputy Inspector-General of Police, assisted by three Superintendents and six Deputy Superintendents. The administration of the Jail Department is in charge of an Inspector-General of Prisons, who is an officer of the Indian Medical Service.

Education.

Education is maintained in part by the State and partly by means of grants-in-aid. There are five Universities, the four residential Universities of Allahabad, Lucknow, Aligarh (Muslim) and Benares (Hindu) and the affiliating University of Agra. The last named was established in 1927 besides eleven affiliated colleges situated outside the United Provinces. Agra University consists of twelve colleges, some of which were formerly associated with the Allahabad University on its external side. These colleges are the Agra and St John's Colleges at Agra, Christ Church, D.A.V. and Sanatan Dharma Colleges Cawnpore; the Meerut College, Meerut; the Bareilly College Bareilly; St. Andrew's College, Gorakhpur; The Balwant Rajput College, and the Agra Medical College, Agra; The Amar Singh K.E.M. Jat College, Lakhoti; and the Agricultural College Cawnpore. There are Intermediate Colleges and Anglo-Hindustani high and middle schools which prepare boys for the High School and Intermediate examinations conducted by the Board of High School and Intermediate Education, which prescribes courses for high school and intermediate education.

There are 49 Government High schools for boys and 13 for girls and 8 Government Intermediate Colleges for boys and one for girls the remainder are under private management and are aided by Government.

The Isabella Thoburn College and the Mahila Vidyalaya College at Lucknow, and the Women's College at Aligarh, impart University education to Indian girls. The Basant College for Women at Benares, the Gokuldas Hindu Girls' Intermediate College, Moradabad, Balika Vidyalaya Intermediate College, Cawnpore, Crosthwaite Girls' Intermediate College, Allahabad, Raghunath Girls' Intermediate College, Meerut, Prem Vidyalaya Girls' Intermediate College, Dayalbagh, Agra, Karamat Hussain Girls' Intermediate College, Lucknow, Mahadevi Kanya Pathshala, Dehra Dun, Kishori Raman Girls Inter College, Muttra, Tika Ram Girls' Intermediate College, Aligarh, Seksaria Theosophical Girls' College, Sitapur and Dwarka Prasad Girls' Intermediate College, Allahabad, teach upto these there are High Schools, English Middle and Hindustani Lower Middle Schools and Primary schools throughout the province for the education of Indian girls. The St. George Inter

College, Mussoorie, the St. Joseph's College, Naini Tal, Sherwood Inter College, Naini Tal and La Martiniere College, Lucknow, are well known institutions for European and Anglo-Indian children in the province which teach upto the Intermediate stage. All Saints' Diocesan College, Naini Tal has a Teacher's Training Department for Women teachers and also a Cambridge Higher Certificate Class. Besides these, there are many excellent educational institutions for European boys and girls both in the hills and plains which are attended by students from all over India. Government maintain Training Colleges for male teachers in Lucknow, Allahabad and Agra, and a Training Department is attached to the Lucknow Christian College. There are Training Departments attached to the Aligarh Muslim University and the Benares Hindu University. Government also maintains a Training College for Women Teachers at Allahabad. The Allahabad University has started a course leading to the M.Ed. degree but this is confined to those who have already obtained the diploma of L.T. or B.T. elsewhere.

There is a Department of Mining and Metallurgy in the Benares Hindu University where four years' courses of training are provided, leading to degrees in the two subjects. This is the only university in India where training in these two industrial subjects is available. There is a Technical Institute known as the Harcourt Butler Technological Institute and a Central Textile Institute at Cawnpore; a school of Art and Crafts at Lucknow; three Government Technical Institutes at Lucknow, Gorakhpur and Jhansi respectively; one Polytechnic Institute at Srinagar (Garhwal); five carpentry schools, one known as Central Wood Working Institute, Bareilly; others are at Allahabad, Fyzabad, Naini Tal and Dehra Dun; six weaving schools, one known as Central Weaving Institute at Benares, others at Mau (Azamgarh), Kairabad (Sitapur), Amroha (Moradabad), Muzzaffarnagar, and Bulandshahr and one Metal Working School at Aligarh; two Leather Working Schools at Cawnpore and Meerut, one Tanning School at Fatehpur; and one Brassware School at Benares known as Batuk Prasad Khatri Industrial Institute. There is also a Technical College and Leather Working School at Dayalbagh, Agra.

There is a Government Engineering College at Roorkee known as Thomason College and a school of Arts and Crafts in Lucknow. There are two Civil Engineering Schools At Lucknow. At the Benares Hindu University there is a five years' course in Electrical and Mechanical Engineering.

There is an Agricultural College at Cawnpore and three Agricultural Schools at Gorakhpur, Bulandshahr and Ghazipur. There is also a non-government Agricultural Institute at Allahabad and a non-government degree college in Agriculture at Agra and Lakhaoti (District Bulandshahr) and an Intermediate College in Agriculture at Baraut (District Meerut).

Education in Law is given at four residential Universities and at the Agra and Meerut Colleges and at the Dayanand Anglo-Vedic and Sanatan Dharama Colleges at Cawnpore, and at the Bareilly College. Instruction in Commerce for the B. Com. degree of the Agra University is given in the Sanatan Dharama and the D.A.V. Colleges at Cawnpore and in the St. John's College at Agra, Bareilly College, Bareilly, and Balwant Rajput College, Agra. A Commerce Department for the B.Com. degree is also attached to Allahabad, Benares and Lucknow Universities.

The King George's Medical College, Lucknow, which is managed by the Lucknow University, prepares candidates for the M.B.B.S. and higher degrees of the Lucknow University. There is also a Government Medical College at Agra which is affiliated to the Agra University. There is also a college of Ayurveda attached to the Benares Hindu University and a college of Unani Tib attached to the Muslim University, Aligarh. The Board of Indian Medicine, U.P. established by Government in 1926, prescribes courses and holds examinations for Ayurvedic and Unani Colleges affiliated to it. The Takmilut-Tib College and the state aided Unani Medical College at Lucknow, the Unani Medical College at Allahabad, the Rishikul Ayurvedic College, Hardwar, the Bundelkhand Ayurvedic College, Jhansi, the Kanya Kubja Ayurvedic College and the Mool Chand Rastogi Trust Ayurvedic College, Lucknow, the Darshanand Ayurvedic College, Benares, and the Lalit Hari Ayurvedic College, Pilibhit, are affiliated to it.

Public schools for secondary and primary Hindustani education are almost entirely maintained or aided by District and municipal boards and Hindustani education is administered through them and the expenditure of grants for Hindustani education is in their hands. Government maintains nine normal schools and seven Central Training Schools for the training of Hindustani teachers. There are also seven normal schools and three Central Training Schools for PTC for training of women Hindustani teachers. Each district has a Deputy Inspector of Schools who is the Secretary of the Education Committee of the district board, assisted by several Sub-Deputy Inspectors. There are ten Inspectors who supervise both Anglo-Hindustani and Hindustani education in their divisions.

Medical.

The Medical Department is in charge of an Inspector-General of Civil Hospitals who is assisted by two Deputy Inspectors-General of Civil Hospitals one of whom is specially in charge of women's hospitals and women doctors' Services, one assistant to the I.G.C.H. and one Personal Assistant. The Deputy Inspector-General of Civil Hospitals (Women) is also the Secretary of the Provincial Committee of the Countess of Dufferin Fund. A Civil Surgeon is in charge and is responsible for the medical work of each district and in a few of the larger stations he has an assistant. In two stations (Ranikhet and Roorkee) Medical Officers in military employ hold collateral civil charge. There are about 100 Provincial Medical Service officers in charge of important dispensaries and on the reserve list and a large number of Provincial subordinate medical service officers. Women's hospitals are in

charge of P.M.S. (W.) or P.S.M.S. (W.) Officers. Government have also instituted Provincial Nursing Service and a Sisters' and Nurses' Service which are controlled by a Superintendent of Nursing Services who work under the I.G.C.H. These services have been established with a view to providing trained nurses in the ratio of one nurse to five beds in district headquarters hospitals.

A new 'P.M.S. II', which also has a gazetted status, has been created. This will eventually replace the P.S.M.S. Medical Licentiates with satisfactory war service are being appointed to it at present and in future only medical graduates will be appointed to this service.

The best equipped hospitals for Indian patients are the Thomason Hospital at Agra, King George's Hospital and the Balrampur Hospital at Lucknow, the newly-constructed Hallett Hospital, Cawnpore, the Prince of Wales Dispensary and the Ursula Horsman Memorial Hospital, Cawnpore, King Edward VII Hospital, Benares, and the Civil Hospital at Allahabad (for Europeans, Anglo Indians and Indians living in European style). The Ramsay Hospital for Europeans at Naini Tal is a first-class institution and there are also the Dufferin and Women's Hospitals at various places for rendering medical aid to women. The King George's Medical College, Lucknow, and the Agra Medical College, Agra, are two of the best equipped colleges, in the country, with a staff of highly efficient professors, and the hospitals attached to the Colleges are the best equipped hospitals in the Province. The Queen Mary's Hospital for women and children is also attached to the King George's Medical College and provides clinical material for the instruction of students in midwifery and gynaecology. At Agra this is done at the Lady Lyall Hospital. There are sanatoria for British soldiers in the hills. The King Edward VII Sanatorium at Bhowali in the district of Naini Tal is an up-to-date and well-equipped institution for the treatment of European and Indian consumptives. There is also a Government T. B. clinic at Allahabad. An up-to-date T.B. Clinic is also attached to the King George's Hospital, Lucknow.

Arrangements have been made for about 175 Ayurvedic and 50 Unani dispensaries to work in villages, under the charge of qualified Vaids and Hakims under the Rural Development programme. A compounder has been engaged to assist. Forty-eight Fixed and sixteen Travelling allopathic dispensaries are also working under the Rural Development programme at suitable places in the country side. The duty of the medical officer appointed to the Rural Development Dispensaries is not only to provide medical aid in villages but also to inculcate habits of cleanliness and carry on propaganda to ensure personal hygiene and health. Government have also appointed one Unani and two Ayurvedic Inspectors to look to the proper working of the indigenous dispensaries. These Inspectors work under the Rural Development Officer, U.P.

The aim which has been kept in view in opening rural indigenous and allopathic dispensaries is to make available medical aid in villages situated in the interior of the districts.

Government also sanction every year grants for the treatment of eye diseases at certain centres in rural areas. A good number of patients suffering from cataract and other diseases have received treatment under the scheme.

There were about eighty subsidized dispensaries and thirty subsidized medical practitioners working at the end of December 1945.

Facilities for the training of Indian girls as nurses and midwives have been provided at almost all important hospitals in the Province.

The Government have established a Hospitals Fund to improve Medical facilities. A sum of rupees one crore and thirteen lakhs has so far been allotted to this fund. Applications for grants out of this fund are considered and sanctioned by Government from time to time but it is in the main being conserved for post-war developments, when articles of equipment and building materials will be much cheaper.

A systematic campaign has been undertaken and large funds allotted to bring the hospitals at District Headquarters and the Dufferin Hospitals to a direct level.

To tide over the difficulty of getting imported drugs a new pharmacopoea of indigenous drugs was introduced at hospitals and dispensaries and an Indigenous Drugs Factory was started at Agra. The factory is making good progress. Arrangements have also been made with the Director General, Indian Medical Service, to obtain supplies of medical stores from the Medical Stores Department. A Scheme was sanctioned to train 90 Compounders every year for hospitals and dispensaries in the Province and it is in operation now.

A scheme for the provincialisation of district headquarters hospitals (both men's and women's) was started by Government in 1944-45. Twenty-three men's hospitals and eighteen women's hospitals have so far been taken over under this scheme and the remaining hospitals are likely to be provincialised during 1946-47.

The Board of Indian Medicine, U.P., established by Government in 1926, advises Government for giving grants-in-aid to Ayurvedic and Unani Dispensaries. These aggregate about Rs. 50,000 every year. It also conducts Ayurvedic and Unani examinations of students studying at its affiliated Ayurvedic and Unani Colleges and awards diplomas to successful candidates. It also maintains a register of qualified vaids and hakims. Government also give aid to subsidised Ayurvedic and Unani dispensaries and practitioners in rural areas out of an allotment of Rs. 42,500. Government's object is to render medical aid through a system in which villagers have confidence.

A Blood Bank scheme has also been started. It is getting quite a good response.

Particular care has been taken in recent years to provide X-rays and cold storage plants at important hospitals at the expense of the Provincial Government.

THE FINANCES OF THE UNITED PROVINCES.

Chief Commissioner's Provinces.

AJMER-MERWARA.

Ajmer-Merwara is an isolated British Province in Rajputana, and is administered by a Chief Commissioner. The Province is divided into the Sub-divisions of Ajmer and Kekri and Beawar with a total area of 2,400 square miles and a population of 5,83,693. At the close of the Pindari war Daulat Rao Scindia, by a treaty, dated June 25, 1818, ceded the district to the British. Sixty-two per cent. of the population are supported by agriculture, the industrial population being principally employed in the cotton and other industries. The principal crops are maize, millet, barley, cotton, oil-seeds and wheat.

Chief Commissioner, H. R. Shevdasani, O.B.E., I.C.S., Bar-at-Law.

ANDAMAN AND NICOBAR ISLANDS.

This is a group of Islands lying in the Bay of Bengal. Port Blair, the chief town is 780 miles from Calcutta, 740 miles from Madras and 360 miles from Rangoon.

The Islands, which were administered by a Chief Commissioner, were occupied by the Japanese in March 1942. They were eventually reoccupied by the Allied forces in October 1945.

The Government of India decided to abolish the Andaman Islands as a penal settlement in 1945 and plans are now being prepared for the development of their resources by settlers.

The population of the Andamans is 20,000 and that of the Nicobars 11,000.

The Capital of Andaman Islands is Port Blair.

Chief Commissioner-Designate, N. Paterson.

The Islands are temporarily under military administration of the Allied occupation force. The civil authorities will take over as soon as order has been restored.

COORG.

Coorg is a small Province in Southern India, west of the State of Mysore. Area 1,593 square miles; population 168,726. Coorg came under the direct protection of the British Government during the war with Tippu. In May 1834, owing to misgovernment, it was annexed. The Province is directly under the Government of India and administered by a Chief Commissioner, whose headquarters is at Mercara. A Legislative Council consisting of 15 elected members and five nominated members was created in 1924. The chief wealth of the country is agriculture and especially the cultivation of coffee.

Chief Commissioner, Coorg, Dewan Bahadur K. Chengappa.

BALUCHISTAN.

Baluchistan is an oblong stretch of country occupying the extreme western corner of the Indian Empire. It is divided into three main divisions: (1) British Baluchistan with an area of 9,476 square miles consisting of tracts assigned to the British Government by treaty in 1879; (2) Baluchistan Leased and Tribal areas with an area of 44,345 square miles composed of tracts which have, from time to time, been acquired by lease or otherwise brought under control and placed directly under British officers; and (3) the Indian States of Kalat, Las Bela and Kharan with an area of 79,546 square miles. The Province embraces an area of 134,002 square miles and according to the census of 1941 it contains 857,835 inhabitants.

The country, which is almost wholly mountainous, lies on a great belt of ranges connecting the Safed Koh with the hill system of Southern Iran. It thus forms a watershed the drainage of which enters the Indus on the east and the Arabian Sea on the south while on the north and west it makes its way to the inland lakes which form so large a feature of Central Asia. Rugged, barren, sun-burnt mountains, rent by high chasms and gorges, alternate with arid deserts and stony plains, the prevailing colour of which is a monotonous sight. But this is redeemed in places by level valleys of considerable size in which irrigation enables much cultivation to be carried on and rich crops of all kinds to be raised.

The political connection of the British Government with Baluchistan commenced from the outbreak of the First Afghan War in 1839; it was traversed by the Army of the Indus and was afterwards occupied until 1842 to protect the British lines of communication. The districts of Kachhi, Quetta and Mastung were handed over to the Amir of Afghanistan and Political Officers were appointed to administer the country. At the close of the First Afghan War, the British withdrew and these districts were assigned to the Khan of Kalat. The founder of the Baluchistan Province as it now exists was Sir Robert Sandeman who broke down the close border system and welded the Baluch and Brahui Chiefs into a close confederacy. In the Afghan War of 1879 Pishin, Shorarud, Sibi, Zawara Valley and Thal-Chotiali were handed over by Yakub Khan to the British Government and retained at Sir Robert Sandeman's strenuous insistence.

Industries.

Baluchistan lies outside the monsoon area and its rainfall is exceedingly irregular and scanty. Shahrig, which has the heaviest rainfall, records no more than 14.72 inches in a year. In the highlands few places receive more than 10 inches and in the plains the average rainfall is about 5 inches, decreasing in some cases to 3. The majority of the indigenous population are dependent for their livelihood on agriculture, care of animals and provision of transport. The majority of the Afghan and the Baluch, as a rule, cultivate their own lands. The Brahuis dislike agriculture and prefer a pastoral life. Previous to the advent of the British, life and property were so insecure that the cultivator was fortunate if he reaped his harvest. The establishment of peace and security has been accompanied by a marked extension of agriculture which accounts for the increase in the numbers of the purely cultivating classes. The Mekran Coast is famous for the quantity and quality of its fish and the industry is constantly developing. Fruit is extensively grown in the highlands and the export is increasing.

Education is imparted in public schools of all kinds. There is a distinct desire for education amongst the more enlightened headmen round about Quetta and other centres; but on the whole education or the desire of it has made little or no advance in the outlying districts. Coal is mined at Sharigh and Harnai on the Sind-Pishin Railway and in the Bolan Pass. Chromite is extracted in the Zhob District near Hindubagh. Limestone is quarried in small quantities.

Administration.

The head of the local administration is the officer styled Agent to the Governor-General, Resident and Chief Commissioner. Next, in rank comes the Revenue Commissioner who controls the revenue administration and exercises the functions of a High Court as Judicial Commissioner of the Province. The keynote of administration in Baluchistan is self-government by the tribesmen, as far as may be, by means of their Jirgas or Councils of Elders along the ancient customary lines of tribal law, the essence of which is the satisfaction of the aggrieved and the settlement of the feud, not retaliation on the aggressor or the vindictive punishment of a crime. The district levies play an unobtrusive but invaluable part in the work of the Civil administration not only in watch and ward and the investigation of crime, but also in the carrying of the mails, the serving of processes and other miscellaneous work. In addition to these district levies there are ordinarily three Irregular Corps in the Province; the Zhob Militia, the Mekran Levy Corps and the Chagai Levy Corps. Fundamentally the Province is not self-supporting, the deficit being met from Imperial Funds.

Baluchistan Agency.

Agent to the Governor-General, Resident and Chief Commissioner in Baluchistan, Lt.-Col. H. M Poulton, C.I.E., I.P.S.

Revenue and Judicial Commissioner, Lt.-Col. C. S Searle, M.C.

Secretary to the Agent to the Governor-General, Resident and Chief Commissioner, Captain I. S. Chopra, M.B.E.

Under-Secretary to the Agent to the Governor-General, Resident and Chief Commissioner, Khan Bahadur Malik Bashir Ahmed Khan.

Secretary to the Agent to the Governor-General in the Public Works Department, Colonel G. H. Vaughan Lee, O.B.E.

Director of Food Supplies and Dy Secy., Revenue, to the Baluchistan Administration, Capt. H. P. Hall, I.P.S.

Dy. Director of Food Supplies, Khan Bahadur Shah Zaman Khan, I.P.S.

Political Agent and Deputy Commissioner in Quetta-Pishin, D. Y. Fell, I.C.S.

Assistant Political Agent and Assistant Commissioner in Quetta-Pishin, T. E. Rogers

Political Agent in Kalat and Political Agent in charge of the Bolan Pass, Major. T. Hickinbotham, C.I.E., O.B.E.

Political Agent in Chagai, Capt. R. D. Metcalfe, I.P.S.

Assistant for Mekran to the Political Agent in Kalat, Major O. J. Brown.

Political Agent and Deputy Commissioner, Sibi, Lt.-Col. N. S. Allington, M.C.

Assistant Political Agent and Colonization Officer, Nasirabad, Capt. W. P. Cranston, I.P.S.

Political Agent in Loralai, Major Abdur Rahim Khan, I.P.S.

Political Agent in Zhob, G. H. Emerson, I.C.S.

Chief Medical Officer and Inspector-General of Prisons in Baluchistan, Major H. A. Ledgard, I.M.S.

Civil Surgeon, Quetta Pishin, Vacant.

DELHI

The Capital of India.

The transfer of the capital of India from Calcutta to Delhi was announced at the Delhi Durbar on December 12, 1911. It had long been recognised as necessary, in the interests of the whole of India, to de-provincialise the Government of India, but this ideal was unattainable as long as the Government of India were located in one Province, and in the capital of that Province—the seat of the Bengal Government—for several months in every year. It was also desirable to free the Bengal Government from the close proximity of the Government of India which had been to the constant disadvantage of that Province. To achieve these two objects the removal of the capital from Calcutta was essential: its disadvantages had been recognised as long ago as 1868, when Sir Henry Maine advocated the change. Various places had been discussed as possible Capitals, but Delhi was by common consent the best of them all. Its central position and situation as a railway junction, added to its historical associations, told in its favour; and, as Lord Crewe said in his despatch on the subject, "to the races of India, for whom the legends and records of the past are charged with so intense a meaning, this resumption by the Paramount Power of the seat of venerable Empire should at once enforce the continuity and promise the permanency of British sovereign rule over the length and breadth of the country."

The foundation stone of the new capital was laid by the King-Emperor on December 15, 1911, the finally selected site being on the eastern slopes of the hills to the south of Delhi, on the fringe of the tract occupied by the Delhi of the past. The land chosen is free from liability to flood, has a natural drainage, and is not manworn. It is not cumbered with monuments and tombs needing reverent treatment, and the site is near the present centre of the town of Delhi. A Committee consisting of Surgn.-General Sir C. P. Lukis, Mr. H. T. Keeling, C.S.I., A.M.I.C.E., and Major J. C. Robertson, I.M.S., was appointed to consider the comparative healthiness of the site and of an alternative one to the North of the existing city. Their report, dated 4th March, 1913, stated that "the Committee, after giving full consideration to the various points discussed in the above note, is bound to advise the Government of India that no doubt can exist as to the superior healthiness of the southern site, the medical and sanitary advantages of which are overwhelming when compared with those of the northern site."

The Town Plan and Architecture.—A Town Planning Committee, appointed to advise Government, submitted its report in March, 1913, with a plan of the lay-out and work was begun

in accordance with that Report. The central point of interest in the lay-out, which gives the motif of the whole, is Government House and two large blocks of Secretariats. This Government centre was given a position at Raisina hill near the centre of the new city. Sir Edwin Lutyens is the architect for Government House and Sir Edward Baker for the Secretariats. The former building was estimated to cost approximately Rs. 140 lakhs and the latter groups were originally estimated to some Rs. 124 lakhs. The provision made in the design of the Secretariats for extensions in case if used has already partly been utilised. The Secretariat personnel has largely increased in the past few years and numerous additional rooms had to be provided to make room for Army Headquarters, which moved into the new capital at the end of the Simla season, 1929. To the east of the forum, and below it, is a spacious forecourt defined by an ornamental wall and linked on to the great main avenue or parkway which leads to Indrapurast. Across this main axis runs an avenue to the shopping centre. Other roads run in different directions from the entrance to the forum. The axis running north-east towards the Juma Masjid forms the principal approach to the new Legislative Chambers. They are officially described as the Council House and the road is named Parliament-street. The railway station for the new city finds its place about half way between the old and new cities off the road through Paharganj, which lies to the west of Old Delhi in the direction of The Ridge. The main roads or avenues range from 76 feet to 150 feet in width with the exception of the main avenue east of the Secretariat buildings where a parkway width of 1,175 feet has been allowed. The principal avenues in addition to the main avenues are those running at right angles to the main east to west axis.

In October, 1912, by proclamation, there was constituted an administrative enclave of Delhi under a Chief Commissioner. This enclave was entirely taken from the Delhi district of the Punjab and its total area is 573 square miles. On the basis of the Census of 1911, the population of the area originally included in the Province was 398,269 and of the new area 14,552, or a total of 412,821. The population of the Municipal town of Delhi was 2,29,144. The plans of the New Capital allow for a population within it of 70,000. Sites have been allotted for forty Ruling Princes and Chiefs to build houses for their own occupation during their visits to the Capital and several of these habitations have been erected.

There was, as regards architecture, a prolonged "battle of the styles" over Delhi. Finally, to use the language of the architect, it has been the aim "to express within the limit of the medium and of the powers of its users, the ideal and the fact of British rule in India, of which the New Delhi must ever be the monument." The inspiration of the designs is manifestly Western, as is that of British rule, but they combine with it distinctive Indian features without abandoning the architect's aim to avoid doing violence to the principles of structural fitness and artistic unity.

Cost of the Scheme.—It was at first tentatively estimated that the cost of the new capital would be four million sterling and that sum was given in the original despatch of the Government of India on the subject. Various factors afterwards increased the amount, the chief of these being the immense rise in prices after the war, and the Legislative Assembly were informed by Government on 23rd March 1921, that the revised estimates then amounted to 1,307 lakhs of rupees. This amount included allowances for building new Legislative Chambers and Hostels for Members of the Indian Legislature, which were not allowed for in the earlier estimates. The New Capital Enquiry Committee, in its report published in January, 1923, estimated the total expenditure at Rs. 1,292 lakhs including Rs. 42 lakhs for loss by Exchange. Actual expenditure upto approximately the end of 1929 was Rs. 14 crores. This may be taken as the figure for the completion of the main project.

The Project Estimate contains certain items such as land, residences, water supply, electric light and power, and irrigation on which recoveries in the form of rate or taxes will, in addition to meeting current expenditure, partially at any rate cover the interest on the capital outlay, whilst there are other items on which some return on account of the sale of leases, general taxes and indirect receipts is secured. The project, after being completed and closed, was re-opened in 1933-34. This became necessary owing to the need to increase residential accommodation for officers and staff and was facilitated by a period of cheap money. Government utilised the occasion for extending the residential accommodation for visiting member of the Indian Legislature. The expenditure on the construction of New Delhi is Rs. 21,91,15,501 upto the end of 1945-46. The population of the new City is 93,733 according to the 1941 Census. Practically all the building sites within it (except in a small area where shortcomings in drainage are a handicap) are taken up and the time for extending the layout has almost arrived.

Progress of the Work.—The construction of New Delhi was made at satisfactory speed, having regard to the curtailment of the Budget allotment in consequence of the Great War and the absence of officers and other establishments at the war. The Secretariats were so far advanced that there were transferred to them from Calcutta in October, 1924, the offices of the Accountant-General, Central Revenues, and the headquarters of the Royal Air Force in India were also housed in them in the winters of 1924-25 and 1925-26. The original programme of residential buildings for Government officers and staff of various grades were then nearly completed. The whole of the civil side of Government moved from Old Delhi into their quarters in the new Secretariats on coming down from Simla in November, 1926. All Government Departments, including the Army Departments and Army Headquarters and R. A. F. Headquarters, have their offices in the new Secretariats, of which the builders have already had to carry out the first section of the extension provided for in the architects' plans. H. E. the Viceroy took up his residence in the new Government House on December 28, 1929. His Excellency until then had resided during the Delhi season at Viceregal Lodge in Old Delhi. The Government of India in 1927 devoted

special consideration to the question whether their ordinary annual 5 months residence in Delhi should be extended each year to 7 months and early in 1928 decided in consultation with the India Office to endeavour to stay in Delhi for half of each year, the new order being introduced for trial in 1928 by keeping the Secretariat in New Delhi till mid-April and bringing it down from Simla again in mid-October. The experiment was not very successful and was not repeated till 1932-33, when Retrenchment Committees had strongly recommended a longer stay in Delhi in order to extract rent for a longer period from the seasonal official occupants of its residential buildings, the rents in Delhi being higher than those for residences in Simla. An early descent from Simla was postponed in the autumn of 1934 on account of a report by the Public Health Commissioner on the general unhealthiness of the Winter Capital in October. But various factors, including especially the increase in personnel in the Secretariat and consequential congestion of office and residential accommodation in Simla, are making the extension of the Delhi season unavoidable. The provision of considerable further housing accommodation both for offices and residences has become imperative. The only question is whether this should be undertaken both in Delhi and in Simla or in Delhi only. Pressed by sharp financial stringency, arising partly out of the emergency created by the institution of the Constitutional Reforms, the Government of India appear decisively moving in the direction of making Delhi an all-the-year-round Capital. Certain Departments are already now kept in Delhi throughout the year. The office personnel of others are kept in Delhi throughout the year.

There was in recent years an increase in malaria bearing mosquitoes and consequential fever in New Delhi. This led to a special inquiry in 1936. The inquiry showed that both Old and New Delhi were ringed about with prolific mosquito breeding places, one of the worst being the area utilized for sewage outfall. The water borne sewage of both Old and New cities as dealt with in a farm which, when the new city was built, was placed immediately outside its southern boundary. The Government of India after the 1926 inquiry were forced to adopt a new scheme for the removal of the farm to a more distant site and chose one some four miles further away from the city. Anti-malaria operations on a large scale, scientifically directed were simultaneously undertaken, the estimate of their cost being Rs. 14 lakhs. Improvements in the water supply of the new Capital with a view to a larger population being retained in it during the summer has also been effected.

When the residential buildings in New Delhi were, in the course of the original construction of the new city, about to be designed, the Government of India issued orders that they were to be "for cold weather occupation only." This rule was followed. The general principle embodied in the design of the houses was that of planning them to capture as much warmth from the sun as possible. Secretariat, residential bungalows and staff quarters are largely inappropriate for hot weather occupation.

Art Decorations.—The Government of India in 1927 approved a scheme for the encouragement of Indian artists by providing facilities for the decoration of certain buildings in New Delhi. The outlines of the scheme are briefly as follows. A certain number of domes and ceilings in the New Secretariat Buildings at Delhi suitable for decoration were selected. The various schools of art in India, as well as individual artists, were invited through local Governments, to send in by the beginning of March 1928 small scale designs for approval by a Committee. After approval by the Committee both as regards the design and colour the pictures were to be drawn out and painted to full size on canvas, and, if finally approved by the Committee, fixed according to the marouflage process *in situ*. Other techniques, such as fresco or tempera, were optional. Artists or schools of art, who sent in small scale drawings, had to bear the initial expense of preparing them. When these were approved by the Committee, the out-of-pocket expenses paid in addition to a suitable honorarium Government undertook to pay for the finished pictures done from approved sketches but give no guarantee that the finished paintings will permanently be preserved. Government intimated that historical or allegorical subjects would be given preference over religious ones and English artists living in India were barred from competition, the work being strictly reserved to Indian artists. Numerous artists submitted designs, especially those of Western India, and with such satisfactory results that the specially appointed Expert Committee approved of nearly all. A great deal of painting has now been completed and the work was continually progressing until the world-wide depression in recent years dried up funds.

All-India War Memorial.—H. R. H. the Duke of Connaught on 10th February, 1921, laid the foundation stone of an All-India War Memorial at the southern end of the Central Vista. The place chosen is a fine position in the centre of the circular Princes' Park and the construction of the building was for economy's sake proceeded with slowly. The memorial was formally inaugurated by Lord Irwin in February, 1931, in the presence of representatives of every unit of the army in India, of the Royal Air Force and of a large concourse of official and other spectators.

George V Memorial.—It was decided in 1936 to erect a memorial statue to His Late Majesty, King-Emperor George V, in Princes' place, the large park-like area lying between the All-India War Memorial and the Purana Qila. The origin of this proposal was a movement started among the Ruling Princes, some time previously, to erect a white memorial statue to His Majesty in the new city and this scheme had made considerable progress when His Majesty died. The matter was then considered in a broader light and in consultation between Their Highnesses and His Excellency the Earl of Willingdon, The Princes agreed to merge their scheme in a larger one for an All-India memorial to His Late Majesty. H. E. the Viceroy issued an appeal for subscriptions to the major scheme and he and Her Excellency the Countess of Willingdon opened the general subscription list with a donation of Rs. 5,000. Sir Edwin Lutyens was invited to submit a

design for a memorial and the statue was eventually unveiled by His Excellency the Viceroy, Lord Linlithgow, on November 14, 1939.

Public Institutions.—It was proposed during 1914 that a higher college for Chiefs should be established at Delhi and in this connection a conference of Chiefs and Political Officers was held at Delhi at which the Viceroy presided. The proposal is still "under consideration." To implement it would require an estimated capital outlay of Rs. 12½ lakhs.

The Government of India further in the Spring session of their Legislature in 1922 introduced and carried a Bill for the establishment of a unitary, teaching and residential **University of Delhi,** the buildings for which would be erected in the new capital. The plan was to provide a local university on the model recommended for Dacca University by the Calcutta University Commission. The provision of funds for the complete realisation of the university being a matter of time it was decided to commence work with the existing colleges in their present buildings and to permit them gradually to modify their organisation. The initial work of organisation was quickly effected by the Executive Council. Unfortunately the inability of the Government of India to allot considerable funds was a severe handicap. It was hoped that H. E. the Viceroy would be able to lay the foundation stone of the university buildings in November, 1922, but this proved impracticable. The general question of the finances of the University was in 1927 the subject of inquiry by a special Committee appointed by Government. For the time being the University was housed in the temporary buildings in old Delhi occupied by the Civil Secretariat until 1929 and in 1931 the old Viceregal Lodge was allocated to it for its future home. The Government of India have also allotted free land to various colleges in Old Delhi.

H. H. the Maharaja of Bhavnagar having offered Rs. 5,00,000 for the provision of some amenity in the new city, the Government of India decided to utilize the sum for the provision of a Stadium. The ground which they took for this was a large area lying immediately below the western walls of the Purana Qila, i.e., between them and Princes' place. This area was originally marked by Sir Edward Lutyens, in his plan, to be an ornamental lake. Practical consideration led to its abandonment for that purpose and the area was laid out as a park. A large proportion of the Maharaja's Rs. 5,00,000 was utilized for the provision of a huge brick grandstand overlooking the central portion of the park taken for the Stadium.

Inaugural Ceremony.—The New City was the scene of notable and elaborate inauguration ceremonies in February, 1931. The first of these was the unveiling of four "Dominion Columns" suitably placed about the great place between the two Secretariat blocks. The columns are of red stone, surmounted each by a gilded merchantman of the old style in full sail. The columns are designed to resemble the historic ones erected in various parts of the land by Asoka and were presented by Canada, Australia, New Zealand and South Africa. The first two and fourth of these Dominions sent their own representatives to perform the ceremony of unveiling. New Zealand nominated a Member of the Government of India to act in her behalf for the same purpose.

City Extension.—The main direction for the future extension of the new city is southward, where for some three miles beyond the limits of present development, Government have land in their possession and have placed it at the disposal of the City administration. The New Delhi Civil Aerodrome lies immediately southward of the existing new City boundary on the southern side and H. E. the Earl of Willingdon in February 1936, opened alongside the high road there a fine new Willingdon Air Station, which is furnished with the most modern equipment for day and night flying. Building has already taken place in the same neighbourhood.

A New Delhi Municipal Committee with its own permanent official Chairman and Secretariat was established in 1932.

The Improvement Trust was instituted in 1937, its duties being to provide for the expansion of the new capital, including both old and new cities and urgently to deal with the insanitary overcrowding of the old city, a problem arising from the rapid increase of population there since Delhi again became capital of India.

Chief Commissioner.—W. Christie, C.S.I., C.I.E., M.C., I.C.S.

Financial Adviser.—A. Balakrishnan.

Registrar to the Chief Commissioner.—P. H. B. Wilkins.

MAGISTERIAL AND EXECUTIVE.

Deputy Commissioner and President, Delhi Municipality.—W. F. G. Le Bailly, I.C.S.

Addl. District Magistrate.—F. H. D. Teal.

Chairman, Delhi Improvement Trust.—Sir Arthur Dean, C.I.E., M.C., E.D.

City Magistrate and Secretary, Notified Area Committee.—R. B. Nathu Ram, M.B.E.

JUDICIAL.

District and Sessions Judge.—S. B. Capoor, I.C.S.

Senior Sub-Judge.—Ch. Maqbool Ahmed.

POLICE.

Senior Superintendent of Police.—W. D. Robinson, O.B.E., I.P.

Superintendent of Police, C.I.D.—Rai Bahadur Sant Ram.

Addl. Supdt. of Police.—Malik Ata Mohammed Noon.

Superintendent of Police, New Delhi, S. C. Terry.

MEDICAL.

Director of Health Services.—Lt.-Col. D. Mc D. Fraser, C.I.E., I.M.S.

Chief Medical Officer and Civil Surgeon, Delhi.—Lt.-Col. P. A. Dargan, I.M.S.

Civil Surgeon, New Delhi.—Major C. J. Hassett, M.B.E., I.M.S.

Medical Superintendent, Irwin Hospital, New Delhi.—Major M. H. Shah, I.M.S.

Deputy Medical Superintendent, Irwin Hospital.—K. S. M. A. Haq.

Additional Civil Surgeon, Irwin Hospital, New Delhi.—Dr. Hakim Din, P.C.M.S.

The Home Government.

The Home Government of India represented for sixty years the gradual evolution of the governing board of the old East India Company. The affairs of the Company were originally managed by the Court of Directors and the General Court of Proprietors. In 1784 Parliament established a Board of Control, with full power and authority to control and direct all operations and concerns relating to the civil and military government, and revenues of India. By degrees the number of the Board was reduced and its powers were exercised by the President, the lineal precursor of the Secretary of State for India. With modifications this system lasted until 1858, when the Mutiny, followed by the assumption of the Government of India by the Crown, demanded a complete change. Under the Act of 1858 (merged in the consolidating measure passed in 1915) the Secretary of State is the constitutional adviser of the Crown on all matters relating to India. He inherited generally all the powers and duties which were formerly vested either in the Board of Control, or in the Company, the Directors and the Secret Committee in respect of the government and revenues of India.

The Secretary of State.

Until the Act of 1919 came into force, the Secretary of State and the Secretary of State in Council had, and exercised, the fullest powers of superintendence, direction and control over the government and revenues of India, subject, of course, to a large measure of delegation. The Secretary of State was the statutory heir of the East India Company and the Board of Control, and it was as such that the generality of his powers were exercised.

The Act of 1919 transferred a substantial share of power and responsibility in relation to the Government of the Provinces to the Provincial Legislatures and Ministers, while it greatly increased the elected element in, and the influence of, the Central Legislature at Delhi. In the sphere so affected the power and responsibilities of Parliament and its representative, the Secretary of State, were correspondingly curtailed, but outside the field of administration so transferred the responsibility of Parliament for the good government of India remained unimpaired. No statutory change in the relations between the Secretary of State and the Central Government was made, but there was a very marked alteration in the balance of authority corresponding with the enhanced status and influence of the Indian Legislature. The Report of the Joint Select Committee on the Bill of 1919 recommended that a convention should be allowed to grow up that only in exceptional circumstances should the Secretary of State be called upon to intervene in matters of purely Indian interest where the Government and the Legislature of India are in agreement.

The Council of India.

The Act of 1858 established besides the Secretary of State the body known as the Council of India, which was associated with the Secretary of State in the exercise of many of his powers and, in particular, held control of the revenues of India and was charged with the conduct of the business transacted in the United Kingdom in relation to the Government of India and the correspondence with India. The Act of 1919 established the number of members at a minimum of 8 and a maximum of 12, one half of whom were required to have served or resided in India for at least ten years. Lord Morley opened the door of the Council to Indians, and from 1917 the usual number of Indian Members was three.

The India Office.

The Secretary of State, like other Ministers of His Majesty's Government in the United Kingdom, is served by a body of officers and servants known in this case as the India Office. Its staff are recruited through the same source and serve on the same conditions as Civil Servants in corresponding positions in the other Government Offices in London. Until 1919, the whole cost was borne by Indian revenues, except that the Home Government made certain grants and remissions, in lieu of a direct contribution, amounting to £ 50,000 a year. The Act of 1919 transferred the salary of the Secretary of State to the Treasury, and, in accordance with its provisions, an arrangement was devised whereby a contribution from the Treasury of about £115,000 was made to the total cost. The basis of the contribution was that Home estimates should bear the outlay needed for the controlling and political functions of the India Office; Agency functions being still an Indian charge.

The Government of India Act, 1935.

Substantial changes in the machinery described above have resulted from the Government of India Act of 1935. The Secretary of State is no longer the final authority upon whose superintendence, direction and control depend the Acts of the Government of India and all grants, payments and charges arising out of the revenues of India. The powers of the Executive in India now run in the name of the Governor-General and the Governor, to whom they flow direct from the Crown, and there is no delegation of powers through the Secretary of State. In so far as the Executive Governments in India function on the advice of the Ministers responsible to the new Legislatures, the responsibility of the Secretary of State to Parliament, and consequently his control, is at an end. Where, however, the Governor-General or the Governors are empowered to act in their discretion or on their individual judgment, they are subject to direction by the Secretary of State who remains, in these matters, the channel of their responsibility to Parliament. During the interim period between the 1st April, 1937 (the date on which Provincial Autonomy came into operation) and the establishment of the Federation, the Secretary of State has power to issue directions to the Governor-General in Council, and such directions, if they are with respect to the revenues of the Governor General in Council, require the concurrence of his Advisers. The Council of India ceased to exist from the 1st April, 1937. Some of its functions, particularly in relation to Service matters, have passed, however, to a body of Advisers with the same numerical limits during the interim period, reduced after Federation to a minimum of 3 and a maximum of 6. The position of the India

Office as the Department serving the Secretary of State remains, but the change brought about by the Act involves the transfer of the whole cost to a Parliamentary vote with a contribution from Indian revenues based on the cost of Agency functions still performed by the Secretary of State for the Government of India.

To some extent the working of the Home Government is affected by the separation of Burma, involving as it does the separate exercise in respect of Burma of the functions of the Secretary of State. The Government of Burma Act provides also for the appointment of not more than 3 Advisers to the Secretary of State in relation to Burma, whose status and functions are analogous to those of the Advisers established by the Government of India Act. Provision has also been made for the payment from the revenues of Burma in respect of the expenses attributable to the performance, on behalf of the Government of Burma, of such functions as the Secretary of State agrees that his Department should perform.

THE INDIA OFFICE

Secretary of State. The Rt. Hon. Lord Pethick-Lawrence. (Private Secretary, F. F. Turnbull).

Parliamentary Under Secretary of State: A. Henderson, K.C., M.P.

Parliamentary Private Secretary: H. Thorneycroft, M.P.

Permanent Under Secretary of State: Sir D. T. Monteath, K.C.M.G., C.B., C.V.O., C.B.E.

Deputy Under Secretary of State: Sir W. D Croft, K.B.E., C.I.E., C.V.O.

Deputy Under Secretary of State for Burma: Sir G. Laithwaite, K.C.I.E., C.S.I.

Assistant Under Secretaries of State: P. J. Patrick, C.S.I.; G. H. Baxter, C.I.E.,; F. W. H. Smith, C.I.E. (Burma).

The Indian States.

The area enclosed within the boundaries of India is 1,808,679 square miles, with a population of 390 million of people—nearly one-fifth of the human race. But of this total a very large part is not under British Administration. The area covered in the Indian States is 712,508 square miles with a population of 93.2 million. The Indian States embrace the widest variety of country and jurisdiction. They vary in size from petty states like Lawa, in Rajputana, with an area of 19 square miles, and the Simla Hill States, which are little more than small holdings, to States like Hyderabad, as large as Italy, with a population of over fourteen millions. They include the inhospitable regions of Western Rajputana, Baroda, part of the Garden of India, Mysore, rich in agricultural wealth, and Kashmir, one of the most favoured spots on the face of the globe.

Relations with the Paramount Power.

So diverse are the conditions under which the Indian States were established and came into political relation with the Government of India, that it is impossible even to summarise them. But broadly it may be said that as the British boundaries expanded, the states came under the influence of the Government and the rulers were confirmed in their possessions. To this general policy however there was, for a brief period, an important departure. During the regime of Lord Dalhousie the Government introduced what was called annexation through lapse. That is to say, when there was no direct heir, the Government considered whether public interests would be secured by granting the right of adoption. Through the application of this policy, the states of Satara and of Nagpur fell in to the East India Company, and the kingdom of Oudh was annexed because of the gross misgovernment of its rulers. Then came the Mutiny. It was followed by the transference of the dominions of the East India Company to the Crown, and an irrevocable declaration of policy toward the Indian States. In the historic Proclamation of Queen Victoria it was set out that "We desire no extension of our present territorial possessions; and while we will permit no aggression on our dominions or our

rights to be attempted with impunity, we shall allow no encroachments on those of others. We shall respect the rights, dignity and honour of the Native Princes as our own; and we desire that they, as well as our own subjects, should enjoy that prosperity and that social advancement which can only be secured by internal peace and good government." Since the issue of that proclamation there has been no encroachment on the area under Indian rule by the Government of India. On the contrary, the movement has been in the opposite direction. In 1881 the State of Mysore, which had been so long under British administration that the traditions of Native rule were almost forgotten, was restored to the old Hindu ruling house. In 1911 the Maharajah of Benares, the great taluqdar of Oudh, was granted ruling powers over his extensive possessions. On many occasions the Government of India has had to intervene, to prevent gross misgovernment, or to carry on the administration during a long minority; but always with the undeviating intention of restoring the territories as soon as the necessity for intervention passed. Almost all states possess the right of adoption in default of heirs.

Rights of Indian States.

The rights and obligations of the Indian States are thus described by the Imperial Gazetteer. The Chiefs have, without exception, gained protection against dangers from without and a guarantee that the protector will respect their rights as rulers. The Paramount Power acts for them in relation to foreign Powers and other Indian States. The inhabitants of the Indian States are the subjects of their rulers, and except in case of personal jurisdiction over British subjects, these rulers and their subjects are free from the control of the laws of British India. Criminals escaping to an Indian State must be handed over to it by its authorities; they cannot be arrested by the police of British India without the permission of the ruler of the State. The Indian Princes have therefore a suzerain power which acts for them in all external affairs, and at the same time scrupulously respects their internal authority. The suzerain also intervenes when the internal peace of their territories is seriously threatened. Finally they participate in all the benefits which the protecting power obtains by its diplomatic action, or by its administration of its own dominions, and thus secure a share in the commerce, the railways, the ports, and the markets of British India. Except in rare cases, applied to maritime states, they have freedom of trade with British India although they levy their own customs, and their subjects are admitted to most of the public offices of the British Government.

Obligations of Indian States.

On the other hand, the Indian States are under an obligation not to enter into relations with foreign nations or other states; the authority of their rulers has no existence outside their territories. Their subjects outside their dominions become for all intents and purposes British subjects. Where foreign interests are concerned, the Paramount Power must act so that no just cause of offence is given by its subordinate allies. All Indian States alike are under an obligation to refer to the British every question of dispute with other states. The Indian States maintain a fixed proportion of Indian States Forces units for co-operation with the Imperial Government in the event of emergencies, and for internal security purposes. These units are, generally speaking, organised and armed on the lines of regular Indian Army units. In addition, many states keep up irregular forces, maintained almost on a feudal basis. These forces do not possess modern arms and equipment. Although old and unaltered treaties declare that the British Government will have no manner of concern with any of a Maharajahs' dependants or servants, with respect to whom the Maharajah is absolute, logic and public opinion have endorsed the principle which Lord Canning set forth in his minute of 1860, that the "Government of India is not precluded from stepping in to set right such serious abuses in a Native Government as may threaten any part of the country with anarchy or disturbed area, nor from assuming temporary charge of a Native State when there shall be sufficient reason to do so." Of this necessity the Crown Representative is the sole judge subject to the control of Parliament. Where the law of British India confers jurisdiction over British subjects or other specified persons in foreign territory, that power is exercised by the British courts which possess it. The subjects of European Powers and the United States are on the same footing. Where cantonments exist in an Indian State, jurisdiction both over the cantonment and the civil station is exercised by the suzerain power.

Political Officers.

The powers of the British Government are exercised through Political Officers who, as a rule, reside in the states themselves. In the larger states the Crown Representative is represented by a Resident and in groups of states by a Resident, assisted by local Political Agents. These Officers form the sole channel of communication between the Indian States and the Crown Representative with the officials of British India and with other Indian States. They are expected to advise and assist the Ruling Princes and Chiefs in any administrative or other matters on which they may be consulted.

Not only in preparation for the framing of an eventual constitution for the government of the whole of India but also to ensure the enjoyment of modern amenities by the subjects of smaller States whose rulers do not all have the wherewithal to provide such amenities, the Crown Representative in April 1943 announced a scheme to attach the smaller States to some of the bigger ones purely for administrative purposes. The process of attachment, which was at first confined to the very small States, namely, the non-jurisdictional and the semi-jurisdictional ones, was in November extended to what are called the 3rd and 4th class States.

Details of the attachment scheme, its repurcussions and sequel in Parliament are discussed in detail in the chapter on "The Chamber of Princes."

AIDES-DE-CAMP TO HIS MAJESTY.

Indian Princes who are Hon. Aides-de-Camp to His Majesty:—

Hon. Air Vice Marshal the Nawab of Bhopal.
Hon. Maj.-Genl. The Maharaja of Patiala.
Hon. Maj. The Maharaja of Dewas (Senior Branch).
Hon. Maj. The Maharao Raja of Bundi.
Hon. Aides-de-Camp to the King (extra):—
Hon. Lt.-Gen. the Maharaja of Jammu and Kashmir.
Hon. Maj.-Genl. the Maharaja of Ratlam.
Hon. Air Vice Marshal the Maharaja of Jodhpur.
Hon. Lt.-Col. the Nawab of Palanpur.
Hon. Col. the Maharaja Jam Saheb of Nawanagar.

HYDERABAD AND BERAR.

His Exalted Highness the Nizam exercises full sovereignty in all internal affairs. He grants titles and is the fountainhead of all powers retained by him or delegated to individuals or institutions. Before 1919, the Government consisted of a Prime Minister directly responsible to the Nizam, with Assistant Ministers, but an Executive Council was established in that year which now consists of nine members.

The Legislative Council consists of 22 members of whom, besides the President and the Vice-President, twelve are official members one of whom is a member of the Sarf-e-Khas Mubarak and the remaining are appointed in the following manner: one is selected by the Paigahs: two each are selected by the Ilaqi and the Jagirdars respectively and one is nominated to represent the interests of the General Public. Two extraordinary members are nominated by the Government, the nomination being based on consideration of special knowledge of the subject of legislation. The Council assists in considering bills and recommending them for sanction.

The administration is carried on by a regular system of Departments on lines similar to those followed in British India. By the 1936 Berar Agreement, the sovereignty of the Nizam over Berar was re-affirmed, the Berar rent was to continue as before, to be paid by the British Government to the Nizam, but the administration of Berar was to continue as before as part of the Central Provinces. The State (apart from Berar) is divided into two divisions, Telingana and Mahratwara, seventeen districts and 153 talukas. Local boards are constituted in each district and taluqa. The State maintains its own currency which consists of gold and silver coins and a large note issue. The rupee, known as the Osmania Sicca, exchanges with the British Indian rupee at an average ratio of 116/10.8 to 100. There is a State postal service and stamps for internal purposes.

Finance.—Hyderabad State is by far the wealthiest of the Indian States, having a revenue in its own currency of about 16 crores, which is approximately double that of the Central Provinces and Berar, and more than double that of any other of the larger States. Its finances are in a prosperous condition and a total Reserve of 42.40 crores, apart from the Paper Currency Reserve of 42.40 crores has been built up. This consists of separate Reserve Funds for Debt Redemption, Famine Relief, Industrial Development, O. S. Currency Stabilization, Securities Adjustment, Post-war Development, Budget Stabilisation and Deposits. The Budget Estimates for the present year 1355F. (5th October 1945 to 5th October 1946) show an ordinary revenue of 1582.43 lakhs and an expenditure of 1549.10 lakhs, inclusive of large sums set aside for famine, insurance and debt redemption. The Post-war Development Reserve is primarily meant for meeting post-war needs, but the Budget Estimates for 1945-46 also provide for a total expenditure of Rs. 27.00 lakhs which includes 16.86 lakhs for Educational Scholarships, etc., 8.64 lakhs for non-recuring portion of new items of expenditure under Medical and Public Health and Veterinary Departments and 150 lakhs for the annual contribution to the grant for Industrial Research Laboratory. The capital expenditure programme provides for an expenditure of 221.05 lakhs, which includes 54.43 lakhs for preliminary survey of large irrigation projects and 29.20 lakhs for railway construction, 26.79 lakhs for Osmania University buildings, 35.31 lakhs for Military buildings, 3.10 lakhs for Secretariat buildings, 18.30 lakhs for construction of Roads, 8.32 lakhs for District Electricity Power Schemes, 6.82 lakhs for Paper Currency Security Press and 11.56 lakhs for Educational Department and Medical Buildings. The year opened with a cash balance of 503.77 lakhs which is expected to be 360.88 lakhs by the end of the year.

In addition to the munificient gifts of His Exalted Highness the Nizam and the contribution of the public and other direct and indirect War expenditure, the State has subscribed at the rate of 21 lakhs annually in its own currency to the Empire's War Effort. The direct and indirect expenditure connected with the War from its commencement amounts to 8 crores.

Osmania University, which was established at Hyderabad by a Charter in 1918, marks a new departure in Indian education as it imparts instruction in the Faculties of Arts, Science, Law, Muslim Theology, Medicine, Engineering and Education through the medium of Urdu, English being a compulsory language in the B.A. and B.Sc. examinations and examinations leading up to that stage. In addition to the University College comprising the Faculties of Arts, Science, Muslim Theology and Law, it has a women's College teaching up to B.A. and B.Sc. Moreover there is a Medical College, an Engineering College and a Training College all imparting education up to higher degree standard in their own lines. Further an Agricultural and a Veterinary college are being started this year. The University also maintains six Intermediate Colleges, three in the City of Hyderabad and one each at Aurangabad, Warangal and Gulburga. The total number of students in the colleges of the University is 3,952. The annual expenditure is about Rs. 25 lakhs.

Executive Council.—His Excellency Sir Mirza M. Ismail, K.C.I.E., Kt., O.I.E., O.B.E., *President*; Nawab Sir Mahdi Yar Jung Bahadur, M.A. (Oxon.), *Extra-ordinary Member and Vice-President*; W. V. Grigson, C.S.I., M.A., I.C.S., *Revenue and Police Member*; Nawab Zain Yar Jung Bahadur, *Public Works Member*; Nawab Zaheer Yar Jung Bahadur, *Post, Ecclesiastical and Labour Member*; Nawab Liakat Jung Bahadur, H.C.S., *Commerce and Industries and Army Member*; Nawab Azam Jung Bahadur, M.A. (Hons.), (Cantab.), B.Sc., I.C.S. (Lond.), *Education Member*; Raja Bahadur S. Aravamudu Iyengar, B.A., B.L., M.B.E., *Judicial and Law Member*; Nawab Zahid Jung Bahadur, C.I.I., *Finance Member*; Nawab Ali Yavar Jung Bahadur, B.A. (Oxon.), *Medical and Constitutional Affairs Members*; Nawab Moin Nawaz Jung Bahadur, H.C.S., *Reforms Member*.

Production and Industry.—The principal industry of the State is agriculture, which maintains 54.46 per cent of the total population. The common system of land tenure is ryotwari. About 58 per cent of the total area is directly administered by the State. The rest consists of private estates of His Exalted Highness the Nizam called Sarf-e-khas and the estates of the Jagirdar and Paigah nobles. The total Land Revenue is over 3 3 crores. The principal food crops are rice, wheat, millets and pulses; the chief money crops are Cotton and Oil seeds. Cotton is grown extensively on black cotton soil. The total area under Cotton cultivation in 1945-46 was 21,54,917 acres. Hyderabad is well known for its Gaorani Cotton. It is one of the finest indigenous Cotton in India and is grown over an area of 900,815 acres.

Taxation.—Apart from the Land Revenue, the main sources of taxation are Excise and Customs. The receipts from each are estimated for the present year, at 32.5 lakhs and 17.5 lakhs respectively. After these come interest on Investments, 161.33 lakhs, Railways 18.75 lakhs, and Berar Rent 29.17 lakhs. The Customs Revenue is derived from an *ad Valorem* duty of not more than 5 per cent, on all imports and exports.

Communication.—The State of Hyderabad has the proud and unique position of having within its limits the largest system of railway in any Indian State and of being the pioneer in the field of road transport operated and controlled by an Indian Railway Administration.

State Railway.—132 miles of broad gauge line from Bombay to Madras traverse the State; also 30 miles of metre gauge of the Masulipatam to Mormugao line. At Wadi, on the Bombay-Madras line, the broad gauge system of H.E.H. the Nizam's State Railway takes off and running east through Hyderabad City and Warangal, reaches the Calcutta-Madras line at Bezwada, a total length of 338 miles. From Kazipet a link to Balharshah strikes north, providing the shortest route between Madras and Delhi. From Secunderabad the metre gauge Godaveri Valley Railway runs north-west for 386 miles to Manmad on the main line of the Great Indian Peninsula Railway to Calcutta. A metre gauge line runs south from Secunderabad through Mahbubnagar to the border and connects with Dronachellam on the Madras and Southern Mahratta Railway. Branch lines exist from Purna to Hingoli, Parbhani to Purli-Vaijnath, Karepalli to Kothagudium, Vikarabad to Bidar and Purli-Vaijnath and Jankampet to Bodhan. A branch line of 101 miles from Mudkhed to Adilabad is under construction. Thus with branch lines, there are now 799 miles of broad gauge and 665 of the metre gauge in the State. The Barsi Light Railway owns a short extension of 36 miles from Kurduwadi on the Bombay-Madras line to Latur in the Osmanabad District. H.E.H. the Nizam's State Railway was worked by a Company until April 1930, when it was purchased by H.E.H. the Nizam's Government.

An innovation worthy of special mention was the introduction by H.E.H. the Nizam's State Railway in 1940 of broad gauge Diesel Rail Cars for 3rd class passengers. These rail cars are the first of their kind provided on Indian Railways and the design is unique in that they are self propelled and fitted with air conditioning equipment.

H.E.H. the Nizam's State Railway also introduced a further innovation by commencing in 1943 the installation of fans in third class carriages.

State Road Transport Services.—The State of Hyderabad has given a definite lead in India as a result of the comprehensive scheme for the co-ordination of Rail and Road transport introduced by H.E.H. the Nizam's Government. A small beginning was made in 1932 by operating 34 vehicles over 284 route miles and at the present time H. E. H. the Nizam's State Railway road motor transport fleet totals 628 motor vehicles operated under the control of the State Railway Administration namely 334 passenger buses (operating over 4,449 miles) and 243 goods lorries and departmental vehicles.

The Rail and Road Transport co-ordination in Hyderabad State has eliminated wasteful competition and provided cheaper and better means of transport. The State Railway Bus Services run to scheduled advertised times and the advantages of regular time table services providing both comfort and realiability have been fully realised and appreciated by the travelling public.

In addition to the passenger bus services operated under the control of H.E.H. the Nizam's State Railway Administration, goods road transport services have also been introduced by the State Railway in a number of districts in Hyderabad State. Several out-agencies located at important towns and villages not served by the Railway system have been established for the through booking of goods and parcels, the State Railway lorries operating between these out-agencies and the nearest railway station.

Goods collection and delivery services have also been introduced at important centres. Under these arrangements goods are conveyed to and from the railway stations, the State Railway Road Transport Department lorries undertaking the collection and delivery work to and from merchants' premises, cartage areas having been defined at each place. This scheme enables door to door transport of goods to be effected.

Road Transport of Foodgrains. An innovation in connection with H. E. H. the Nizam's State Railway's road transport services is the operation of Mobile Goods Lorry Units for the road transport of foodgrains. As the cartage of foodgrains has in many cases to be undertaken from remote or isolated places in the Districts, these lorries have been formed into Mobile Lorry Units, each unit consisting of 16 vehicles in charge of Unit Foreman and complete with drivers, maintenance staff, equipment and tentage and these units move from place to place as required in connection with the foodgrains transport work.

Education.—In October 1945 (1351F.) the total number of Educational Institutions excluding University Education was 6,131 with an enrolment of 4,39,055 pupils. There was a fairly large increase in the number of schools and scholars of the Primary stage; the increase in the quinquennium being 789 and 21,616 respectively.

During the quinquennium 48 Secondary schools were established. There was an increase of 165 schools for girls (141 Primary, 15 Secondary and 9 Special) and the number of girls under instruction increased by 15,604. The number of Primary Schools for the Depressed Classes at the close of 1354 Fasli (5th October 1945), was 150 and the number of pupils in these schools was 6,409, while the total number of children of these classes under instruction in all types of schools was 13,552.

MYSORE.

The State of Mysore is surrounded on all sides by the Madras Presidency except on the north and the north-west where it is bounded by the districts of Dharwar and North Canara respectively and towards the south-west by Coorg. It has two natural divisions each with a distinct character of its own—the hill country (or malnad) on the west and the wide spreading valleys and plains (the maidan) on the east. The State has an area of 29,483 square miles, including the Civil and Military Station of Bangalore, and a population of 7,328,896 (1941 census), of whom 6,612,225 are Hindus. Kannada is the language of the State.

History.—The ancient history of the country is varied and interesting. Tradition connects the tableland of Mysore with many a legend enshrined in the great Indian epics, the Ramayana and the Mahabharata. The north-eastern portion of the country formed part of Asoka's Empire in the third century B.C. Mysore then came under the rule of the Andhra dynasty. From about the third to the eleventh century A.D. Mysore was ruled by three dynasties, the north-western portion by the Pallavas and the central and the southern portions by the Gangas. In the eleventh century, Mysore formed part of Chola dominion, but the Cholas were driven out early in the twelth century by the Hoysalas, an indigenous dynasty with its capital at Halebid. The Hoysala power came to an end in the early part of the fourteenth century. Mysore was next connected with the Vijayanagar Empire. At the end of the fourteenth century Mysore became associated with the present ruling dynasty. At first tributary to the dominant empire of Vijayanagar, the dynasty attained its independence after the downfall of Vijayanagar in 1565. In the latter part of the eighteenth century, the real sovereignty passed into the hands of Hyder Ali and then his son Tippu Sultan. In 1799, on the fall of Seringapatam, the British Government restored the State comprised within its present limits, to the ancient dynasty in the person of Maharaja Sri Krishnaraja Wadiyar Bahadur III. Owing to the insurrections that broke out in some parts of the country, the management was assumed by the British Government in 1831. In 1881, the State was restored to the dynasty in the person of Sri Chamarajendra Wadiyar Bahadur under conditions and stipulations laid down in an Instrument of Transfer. That Ruler brought Mysore to a state of great prosperity. He died in 1894, at the early age of 31, and was succeeded by His Highness the late Sri Krishnarajendra Wadiyar Bahadur, G.C.S.I., G.B.E., who was installed in 1902. In November 1913, the Instrument of Transfer was replaced by a Treaty which indicates more appropriately the relations subsisting between the British Government and the State of Mysore. In 1927, the Government of India remitted in perpetuity Rs. 10½ lakhs of the annual subsidy which till then had stood at Rs. 35 lakhs. A further provisional remission of Rs. 5·39 lakhs in the subsidy has been allowed from 1937-38, in accordance with the recommendation of the Indian States Enquiry Committee (Financial), 1932. H. H. Sri Krishnarajendra Wadiyar died in August 1940 at the age of 57 and was succeeded by H. H. Sir Sri Jaya Chamaraja Wadiyar Bahadur G.C.I., G.C.S.I. who was installed on September 8, 1940.

Administration.—Constitutional reforms of a far-reaching character were announced in a Proclamation of His Highness the Maharaja on November 6, 1939. These provide for the grant of enlarged powers and privileges for the Representative Assembly and Legislative Council, the widening of the electorate and the appointment of the elected representatives of the people to His Highness's Executive Council.

The Representative Assembly and the Legislative Council which have been hitherto functioning under separate Acts now function under a consolidated law. The term of both the Houses has been increased from three to four years. The strength of the Representative Assembly is 310. The Assembly is being invariably consulted in regard to any legislative measure before it is introduced in the Legislative Council The Assembly has the right of considering the general principles underlying any Bill or any of its provisions and of proposing amendments thereto. The powers of the Assembly in respect of the budget have been enlarged by conferring on it the right of passing resolutions on any of the major heads on the budget, provided that such resolutions do not have reference to particular grants of appropriations. Certain heads of expenditure hitherto

xcluded from discussion continue to be so xcluded except in the case of "the Military orces of His Highness the Maharaja" where iscussion is permitted.

The strength of the Legislative Council has en raised from fifty to sixty-eight, forty-four laces being filled by election. The Council as a non-official President who elected by the ouse, and an elected Deputy President.

Certain provisions calculated to widen the lectorate for the Assembly and the Legislative ouncil have also been made.

An important reform designed to enable the egislature more largely to influence the nature f the advice and assistance which the Executive ouncil tenders to His Highness, has been the lection of three non-official from among the lected representatives, in His Highness's xecutive Council. Such Ministers are eligible hold any portfolio of the Administration.

The Mysore Army.—The total strength the Mysore Army was 4,091, consisting of ,194 Combatants and 897 non-Combatants, the end of June 1945. The Combatant rength of the Mysore Lancers was 437, and at of the Mysore Horse was 113. The strength the Mysore Infantry was 3,041. The expenfiture under "army" amounted to nearly 25 so akhs of rupees.

The strength of the Mysore State police ce is nearly 11,000.

Agriculture.—Nearly three-fourths of the opulation are employed in agriculture, and the eneral system of land tenure is *ryotwari*. he principal food crops are ragi, rice, jola, nillets, gram and sugarcane, and the chief ops are cotton and sun-hemp. The Sericultural industry is the most important subsidiary industry practised by the agriculturists. The area under mulberry during the year ended June 1945 was 71,000 acres. The Department of Agriculture is popularising agriculture on scientific lines by means of demonstrations, investigations and experiment. There are 7 Government Agricultural Farms at Hebbal, Babbur, Marthur, Nagenahally, Hunsur, Mandya and the coffee experimental station at Balehonnur. A seperate Veterinary and Animal Husbandry Department has been organised for taking necessary steps for the improvement of live-stock. A cattle breeding station has been established at Parvatharay-anakere, near Ajjampur in the Kadur District, with a sub-station at Basur. A Serum Institute has been opened at Bangalore for the manufacture of serum and virus for inoculation against rinderpest and other contagious diseases. There are 80 Veterinary Institutions in the State under the control of the Veterinary Department.

Medical Relief.—The improvement of medical relief and sanitation in urban and rural areas has also received special attention. The headquarters of every one of the taluks in the State is provided with a hospital and there are 406 dispensaries and medical institutions. A scheme of subsidising rural practitioners has been in practice and is working successfully. A well equipped Ayurvedic and Unani Hospital has been established in Bangalore.

Among the important schemes under consideration are the construction of a general Hospital at Thirthahalli, the shifting of the Epidemic Diseases Hospital at K. G. F. from its present site and the establishment of tuberculosis clinics at the headquarters of districts.

Water Works and Electricity.—Water-works have been established at great cost in Mysore and Bangalore. Both these cities (and 222 towns and villages) are lit by electricity, and much has been done in the way of clearing out congested areas, providing them with "lungs," opening out extensions, and inducing the people to build houses of an improved type.

Industries and Commerce.—A Department of Industries and Commerce was organised in 1913 with a view to the development of industries and commerce in the State. Its main functions are stimulating private enterprise by the offer of technical advice and other assistance for starting new industries, undertaking experimental work for pioneering industries, developing existing industries and serving as a general bureau of information in industrial and commercial matters. The following factories are owned and run by Government:—The Government Soap Factory, Government Porcelain Factory Govt. Silk Weaving Factory, Government Electric Factory, Implement Factory, Government Lac and Paint Works and the Central Industrial Workshop; and the Government Industrial and Testing Laboratory, with a section devoted to the manufacture of pharmaceutical drugs and preparations, has since been converted into a limited company. The Well-Boring Section which is engaged in the drilling boreholes for meeting the requirements of drinking water in the rural areas is now under the control of the Bureau of Sanitary Engineering, Department of Public Health. Mysore is the largest producer of silk in India, and the care and development of this industry is entrusted to a Department of Sericulture. Arrangements have been made for the supply of disease-free seed and a central and five taluk popular schools have been doing good work.

With a view to demonstrating and imparting instruction in the utilisation of the high grade silk produced in the State, Government have established a Silk Weaving Factory and Dyeing and Finishing Works at Mysore. The Sandalwood Oil Factory at Mysore started on an experimental basis is now working on a commercial scale.

The Mysore Iron and Steel Works are owned and run by the Government. The works are the second largest of their kind in the British Empire and contain the only charcoal blast furnace and wood distillation plant in the East. A plant for manufacturing steel and steel products has been added since April 1936. Proposals are afoot for establishing an electric furnace to smelt iron ore. The slag produced by the blast furnace is now being utilised by the newly erected cement plant attached to the works. Nearby is also situated the Mysore Paper Mills started as a joint-stock company, which produce many varieties of paper. Bhadravati bids fair to become one of the most important industrial centres in India.

A notable feature during the past few years has been the coming into being of several state-aided joint-stock companies for the manufacture of sugar, paper, chemicals and fertilisers, plywood, implements and tools, spun silk, tobacco and coffee curing, electrical batteries, radios, glass making and vegetable oils. There are now 313 large scale industrial establishments in the State giving employment to about 81,154 persons.

A Trade Commissioner in London has been appointed to look after the interest of the trade and industry of the State.

Hydro-Electric and Irrigation Works.—The river Cauvery in its course through the State, has a natural fall of about 380 feet near the island of Sivasamudram, and this fall was harnessed in the year 1902 for the development of electric power, to the extent of about 12,000 H.P. for supplying power to the Kolar Gold Mining Companies and local industries and incidentally for lighting the cities of Mysore and Bangalore. In course of time, the demand for power increased and with a view to protecting the existing supply and augmenting the generation of additional power to meet the growing demands, the "Krishnaraja-sagara Reservoir", called after the name of the late Maharaja, was constructed. The storage from the reservoir, besides providing for the generation of electric power up to 46,000 H.P., has brought under irrigation about 90,000 acres of land situated in an area subject to more or less continuous drought. The new Canal Works were started in 1927, and the main canal is named the "Irwin Canal" after Lord Irwin, the then Viceroy. An area of about 18 thousand acres under this Canal has been brought under sugarcane cultivation and a Sugar Factory with a crushing capacity of about 2,000 tons of cane per day has been established nearby at Mandya. An up-to-date Distillery has been erected as an adjunct to the Sugar Factory. Full advantage is being taken of the available electric power for small industries and the electrification of towns and lift irrigation.

The construction of a reservoir across the river Kumadvathi near Anjanapur, Shikaripur Taluk, was completed at a cost of Rs.18 lakhs and the reservoir was opened for irrigation. The area expected to be irrigated is about 10,000 acres. In addition to large new irrigation works in progress, the work of constructing a Reservoir across the river Shimsha at Marconahalli, Kunigal Taluk, at a cost of Rs. 22 lakhs to irrigate an extent of about 10,000 acres, has been completed.

To provide for the ever-widening demand for power for industrial, domestic and town lighting purposes, the Shimsha and Jog hydro-electric schemes were sanctioned at an aggregate cost of over 450 lakhs of rupees. The Shimsha Power house is in service and The Jog Scheme is being pushed through rapidly.

There are over 6,220 power installations and 50,044 lighting installations. The total number of towns and villages electrified at the end of June 1945 was 225.

Finance.—The actual revenue receipts and disbursements charged to revenue for 1945-46 were Rs. 944·89 lakhs and Rs. 942·89 lakhs respectively.

Education.—A separate University for Mysore was established on 1st July, 1916. It is of the teaching and residential type composed of the Central, Engineering and Maharani's Colleges at Bangalore, and the Medical and Maharaja's College at Mysore, and six Intermediate Colleges. The colleges are efficiently equipped and organised and there is a training college for men teachers located at Mysore. The Maharani's College at Bangalore is a college for Women. An Agricultural College has been established in Bangalore.

Besides, technical education on a wide range of subjects is provided by Sri Krishnarajendra Technological Institute and the Sri Jayachamarajendra Occupational Institute.

There are 80 high schools and 490 middle schools in the State. Provision has been made for teaching several vocational subjects in general with a view to creating an interest in the vocations and in order to enable the pupils to take to such vocations after their High School life. There are 8 Training Institutions for training teachers in Middle and Primary Schools, 4 of them are for women. The control over Primary Education was taken over by Government from the local bodies from the 1st July 1941 under The Elementary Education Act, 1941. There are also schools for imparting instruction in Agricultural, Commercial, Engineering and other Technical subjects. There were altogether 8,871 schools at the end of June 1945 with a strength of 313,578 pupils. This gives one school for every 3.26 square miles of the area, and for every 793 persons of the population. The total expenditure on education was Rs. 104,11,745 giving an average of Rs.1-3-0 per head of population.

War Effort of Mysore State.—The State has been contributing to the war effort to the full limit of its resources. In February 1940, shortly after the outbreak of hostilities His late Highness the Maharaja made an appeal to his subjects to respond to any call made on them for the prosecution of the war and to help the cause of freedom by service or by money. In addition to the gifts made from time to time by His Highness and his Government for the purposes connected with the war, the people and the several industries of Mysore have played their part on a scale worthy of the traditions of the State. The First Battalion of the Mysore Infantry was sent for service overseas and taken prisoner in Singapore. The Unit was repatriated recently and most of the officers and men have arrived back safe. The courage and fortitude displayed by them both as soldiers and prisoners deserve our warm appreciation. The personnel of the 51 (Mysore) G. P. T. Company have also returned after three and a half years of overseas service. One of the officers of this Unit was awarded "M.B.E." and another was decorated with the "Order of the Red Star". Two Jamedars were mentioned in Despatches. The Second Battalion has been serving ex-State under the Crown and will continue to do so for some time longer.

Large extents of land were given in various parts of the State for military camps, hospitals, prisoners of war camps, training centres and similar purposes. A number of buildings

belonging to His Highness the Maharaja and the Government were placed at the disposal of the military authorities. The industrial concerns in the State supplied goods of the value of over Rs. 14 crores for war purposes. The Hindustan Aircraft Factory, of which the Government of Mysore are part owners, played a most useful part throughout the war as one of the important stations for the servicing and overhauling of aircraft used in the war against Japan. Cash contributions amounting to over Rs. 60 - lakhs were made by the State for various War Funds. A sum of Rs. 8.5 crores was invested in the Government of India War Bonds. Non-official organisations, including women's institutions, did a good deal of work in providing amenities and comforts to troops on active service or on leave and to prisoners of war overseas.

It is expected that about 5,000 persons belonging to Mysore are likely to be demobilized from the Indian Army. One or more employment exchanges will be established in order to resettle these persons in civil life. An attempt will also be made to organise some of the workers in groups for continuous employment on public works.

A Welfare Club has been opened in Bangalore for the provision of amenities to members of the Royal Indian Air Force.

Special facilities were provided for the training of war technicians. The number of persons trained so far in the State institutions is over 2,500. The sericulture industry was reorganised and expanded to meet the demands of war supply. A scheme for the production of high grade silk for parachutes was undertaken at the instance and with the support of the Government of India. More than 198,000 lbs. of filature silk were supplied for war purposes.

Dewan. Sir Arcot Ramaswami Mudaliar, K.C.S.I.

Ministers: O. Pulla Reddi, M.A., I.C.S.; Rajasevaprasakta M. Seshadri, M.A., Dewan Bahadur Dr. T. C. M. Royan, M.D.; O. S. Nasrulla Shariff, M.A., LL.B.; L. Siddappa, B.A., LL.B.

Resident in Mysore: The Hon'ble Lt.-Col. Sir P. Gaisford, C.I.E.

BARODA.

The State of Baroda is situated partly in Gujarat and partly in Kathiawar. It is divided into five district blocks: (1) the southern district of Navsari near the mouth of the Tapti river, and mostly surrounded by British territory; (2) central district north of the Narbada, in which lies Baroda, the capital city; (3) to the north of Ahmedabad, the district of Mehsana; (4) and to the west, in the peninsula of Kathiawar the districts of Amreli, and (5) Okhamandal formed of scattered tracts of land. The area of the State is 8,176 square miles; population 2,855,010, of whom over 89% are Hindus.

In pursuance of the Government of India's scheme of attachment, about 255 States, States and Talukas from the Western India States and the Gujarat States Agencies have been attached to the State. The total area so attached is about 6,000 sq. miles with a population of about 6 lakhs.

History.—The history of Baroda State as such dates from the break-up of the Mughal Empire. The first Maratha invasion of Gujerat took place in 1705. In later expeditions Pilajirao Gaekwar, who may be regarded as the founder of the ruling family, greatly distinguished himself. Songhad was the headquarters. After 1723 Pilajirao regularly levied tribute in Gujerat. His son Damaji Rao finally captured Baroda in 1734, since when it has always been in the hands of the Gaekwars; but Mughal authority in Gujerat did not end until the fall of Ahmedabad in 1753, after which the country was divided between the Gaekwar and the Peshwa. In spite of the fact that Damaji Rao was one of the Maratha chiefs defeated at Panipat by Ahmed Shah, he continued to add to his territory. He died in 1768, leaving the succession in dispute between two rival sons. He was succeeded in turn by his sons Sayaji Rao I, Fattesing Rao, Manaji Rao and Govind Rao. The last died in 1800 and was succeeded by Anand Rao. A period of political instability ensued which was ended in 1802 when the authority of Anand Rao at Baroda was finally established. By a treaty of 1805 between the British Government and Baroda, it was arranged *inter alia* that the foreign policy of the State should be conducted by the British, and that all differences with the Peshwa should be similarly arranged. Baroda was a staunch ally of the British during the wars with Baji Rao Peshwa, the Pindari hordes and Holkar. But from 1820 to 1841, when Sayaji Rao II was the Ruler, differences arose between the two Governments which were settled by Sir James Carnac, Governor of Bombay in 1841. During his rule the political supervision of Baroda was transferred to the Supreme Government. His successor, Khande Rao, who ascended the gadi in 1856, introduced many reforms. He stood by the British during the Mutiny. He was succeeded by his brother Malhar Rao in 1870. Malhar Rao was deposed in 1875 for "notorious misconduct" and "gross misgovernment," but the suggestion that he had instigated the attempt to poison Col. Phayre, the Resident, was not proved. Sayaji Rao III, a boy of 13 years of age, and a descendant of a distant branch of the family, was adopted as heir of Khande Rao in 1875 and invested with full powers in 1881. Sayaji Rao III, after a glorious reign of 63 years, died in February 1939 and was succeeded by his grandson and heir-apparent Pratap Sinha, who is the present Ruler.

Administration.—An executive council consisting of the Dewan and four Ministers carries on the administration, subject to the control of the Maharaja. Two of the Ministers are appointed from among the non-official members of the State Legislative Council. A number of departments have been formed, which are presided over by officials corresponding to those in British India. The State is divided into five *Prants* or divisions each of which is sub-divided into *Mahals* and *Peta Mahals*, of which there are 44 in all. Attempts have for some years been made to restore village autonomy, and village panchayats

have been formed, which form part of a scheme for local self-government. There is also a Legislative Council, consisting of a majority of elected members. A Reforms Committee has been recently appointed to suggest revision of present constitution on democratic lines. A High Court at Baroda possesses jurisdiction over the whole of the State and hears all final appeals. From the decisions of the High Court, appeals lie in certain cases to the Maharaja who decides them on the advice of the Huzur Nyaya Sabha and Huzur Adalat now known as the Privy Council. The State Army consists of 3,924 Regular forces and 3,806 Irregular forces.

Finance.—In 1944-45 the total receipts of the State were Rs. 434.26 lakhs and the disbursements Rs. 373.78 lakhs. The principal revenue heads were: Land Revenue Rs. 102.64 lakhs; Opium Rs. 5.86 lakhs; Railways Rs. 23.20 lakhs; Interest Rs. 29.47 lakhs; Tribute from other States Rs. 2.28 lakhs. British currency was introduced in 1901. The State is spending increasing amounts from its revenues on nation building departments. In 1944-45 the principal expenditure of the State was: Education Rs. 42.30 lakhs; Medical 12.16 lakhs; Sanitation 1.37 lakhs; Agriculture 10.17 lakhs; Co-operative 0.77 lakhs, Panchayats 2.32 lakhs and Commerce and Industries 1.67 lakhs.

Production and Industry.—Agriculture and pasture support 64.6% of the people. The principal crops are rice, wheat, gram, castor-oil, rapeseed, poppy, cotton, san-hemp, tobacco, sugarcane, maize and garden crops. The greater part of the State is held on *ryotwari* tenure. The State contains few minerals, except sandstone, which is quarried at Songir, and a variety of other stones which are little worked. Recently Sir Cyril Fox carried out a geological survey of the State. There are 307 industrial or commercial concerns in the State registered under the State Companies' Act. There are four Agricultural Banks and 1,359 Co-operative Societies in the State. The Income tax Act has been recently revised and taxable minimum raised to Rs. 3,000/- from Rs. 2,000/- to give relief to middle classes. The slab system has also been introduced.

Communications.—The B. B. & C. I. Railway crosses part of the Navsari and Baroda divisions and the Rajputana-Malwa Railway passes through the Mehsana divisions. A system of branch lines has been built by the Baroda State in all the four divisions in addition to which the Tapti Valley Railway and the Baroda-Godhra Chord line (B. B. & C.I.) pass through the State. The Railways owned by the State are about 795 miles in length. The total mileage of metalled and fair weather roads in the State is 679 and 1517 respectively.

Education.—The Education Department controls 2,701 institutions of different kinds, in 162 of which English is taught. The Baroda College, the B. T. College and the Commerce College are affiliated to the Bombay University. There are a number of high schools, technical schools, and schools for special classes such as the jungle tribes and lower castes. The State is pledged to the policy of free and compulsory primary education. It maintains a system of rural and travelling libraries. Twenty three per cent. of the population is returned in the census of 1941 as literate. Total expense on Education was Rs. 42.30 lakhs during 1944-45.

Post-War Plans. A special Ministry to formulate post-war plans has been created with a central co-ordinating committee consisting of officials and non-officials. A Board of Industrial Advice to scrutinise the State plans from all India view point has been established. Sir Homi Mehta is the Chairman of the Board. A tentative plan involving an expenditure of about Rs. 15 crores has been formulated.

Capital City.—Baroda City with the cantonment has a population of 153,301. It contains a public park, a number of fine public buildings, palaces and offices; and it is crowded with Hindu temples. The Cantonment is to the north-west of the city and is garrisoned by an infantry battalion of the Indian Army.

Ruler.—Lt.-Col. His Highness Farzand-i-Khas-i Dowlat-i-Englishia, Maharaja Sir Pratap Sinha Gaekwar, Sena Khas Khel, Samsher Bahadur, G.C.I.E., LL.D., Maharaja of Baroda.

Resident.—The Hon'ble Col. C. P. Hancock, C.I.E., G.B.E., M.C.

Dewan.—Sir Brojendra Lal Mitter, K.C.S.I.

GWALIOR.

The House of Scindia traces its de-cent to a family of which one branch held hereditary post of patel in a village near Satara. The head of the family received a patent of rank from Aurangzeb. The founder of the Gwalior House was Ranoji Scindia who held a military rank of Chatrapati Shahu Maharaj. In 1726 Chatrapati Shahu granted deeds to Puar, Holkar and Scindia, empowering them to levy "Chauth" and "Sardesmukhi" and retain half the payment to their troops. In 1736 Ranoji Scindia accompanied Baji Rao to Delhi where he and Malhar Rao Holkar distinguished themselves in military exploits. Ranoji fixed his headquarters at the ancient city of Ujjain, which for the first time became the capital of the Scindia dominions. During the time of Mahadji Scindia and Daulat Rao Scindia, Gwalior played an important part in shaping the history of India. Despite partial reverses which Mahadji Scindia's troops suffered at the hands of the British in 1780, reverses which led to the treaty of Salbai (1782), Scindia's power remained unbroken. For the first time he was then recognised by the British as an independent sovereign.

In 1790 his power was firmly established in Delhi. While he was indulging in ambitious hopes he fell a prey to fever, which ended his remarkable career on 12th February 1791. Himself a military genius, Mahadji Scindia's armies reached the zenith of their glory under the disciplined training of the celebrated French adventurer De Boigne. Mahadji was succeeded by his grand nephew Daulat Rao in whose service

Perron, a military commander of great renown played a leading part. The strength of Scindia's army was, however, considerably weakened by the reverses sustained at Ahmednagar, Assaye, Asigarh and Laswari. Daulat Rao Scindia died in 1827. Till his death he remained in undisputable possession of almost all the territory which belonged to him in 1805.

Daulat Rao was succeeded by Jankoji Rao who passed away in the prime of life. On his demise in 1843 intrigues and party spirit were rampant and the army was in a state of mutiny, with the result that it came into collision with the British forces at Maharajpur and Pannihar.

Jankoji Rao was succeeded by Jayaji Rao Scindia whose adherence to the British cause in the dark days of the Mutiny, when his own troops deserted him, was unshakable. In 1861 he was created a Knight Grand Commander of the Most Exalted Order of the Star of India and in 1877 was made a Councillor of the Empress. Subsequently he received other titles. He entered into treaties of mutual exchange of territories with the British Government. On his death on June 20, 1886, he was succeeded by his son Lieutenant-General H. H. Maharaja Sir Madhav Rao Scindia, Alijah Bahadur, G.C.V.O., G.C.S.I., G.B.E., A.D.C. to the King who assumed powers in 1894. In 1901 he went to China during the war. He died in June 1925 and was succeeded by his son Major-General His Highness Sir George Jivaji Rao Scindia, Alijah Bahadur, G.C.S.I., G.C.I.E. During His Highness's minority the administration of the State had been conducted by a Council of Regency. His Highness assumed full ruling powers on November 2, 1936.

Gwalior has an area of 26,397 sq. miles and its population is 4,006,159. Its average rainfall varies from 25 to 36 inches. The estimated gross revenue for 1944-47 is Rs. 385.55 lakhs.

The Ruler enjoys a salute of 21 guns and the State is in direct relations with the Government of India.

In matters of administration His Highness is assisted by a Council of Ministers under his direct control. The State Army consisting of Cavalry, Infantry and Artillery units is well organized and is considered to be the best among Indian State Forces. The State maintains its own Postal system and a light Railway.

Educationally, the State is much advanced. There are three Degree Colleges—two at Gwalior, the Capital including one for women, and one at Ujjain; two Intermediate Colleges, and High Schools in practically all the districts. There are a few technical schools imparting education in arts and crafts and there is a Public School on the Gwalior Fort which is run on the English Public School lines, and a Montessori School for small children. An up-to-date Medical College, the Gajra Raja Medical College, which would be the only one in Central India, has been affiliated to the Agra University and will actually commence from August 1946. Its foundation stone was laid by His Excellency Lord Wavell in November last.

The political reforms announced in June 1939 were further supplemented by His Highness' Proclamation of Sept., 1941. The strength of the Praja Sabha which was formerly 85 has now been raised to 90, and of this number 55 instead of 50 are elected representatives, thus providing for still greater non-official element in the House. The Praja Sabha (Lower House) and Raj Sabha (Upper House) have identical powers and the range of their functions will be co-extensive. Another feature of the recent reforms is that the legislature has the power of discussing the constitution as well. In his inaugural address to the first session of these Sabhas which met in April 1946, and which was a great success, His Highness the Maharaja Scindia, alluding to various problems facing the Government, said: "We have to build a solid structure of our State's peace and prosperity. We have to raise the standard of living by increasing per capita income. We have to bring about with vigour and promptitude an all round social, moral and cultural development. We have to carry medical help, nursing, midwifery, health and sanitation to the very doors of our people. We have to wipe out mass illiteracy and to fight chronic malnutrition and insanitation on an enormous scale."

Since the assumption of Ruling powers by the present Maharaja, commendable activity has been witnessed in all branches of administration. The construction of Harsi Reservoir costing about Rs. 1½ crores, the grant of one crore of rupees for rural reconstruction, the establishment of a Degree College for women and an up-to-date Medical College as also the scheme for construction of a Female Hospital are some of the important beneficent measures undertaken during the period. The network of roads has been utilized by motor bus services run by the Gwalior and Northern India Transport Company, and those places which were unconnected are now being joined with important highways. At Madhav Sagar, a seaplane base has been constructed which serves as a halting station for the boats flying on the Imperial Air Line.

Gwalior maintains an up-to-date aerodrome also.

Immediately, on the outbreak of hostilities, His Highness, in keeping with the traditional policy of the House of Scindias, placed his services, his Army and the entire resources of his State and his people at the disposal of His Majesty the King Emperor. Gwalior sent the pick of its Army on active service both in India and abroad and monetary contribution made by it in the form of gifts, investments and subscriptions reached the enormous figure of Rs. 3,23,53,539 4 6.

The end of war has brought the problem of Post-War Planning to the forefront. The State being predominently agricultural, it is devoting special attention to its post war schemes of agricultural improvements, betterment of live-stock, development of forestry, expansion of medical relief to villages and diffusion of elementary education in rural areas; besides such activities as the survey of minerals, metallurgy and industrial resources, construction of roads and buildings, restoration of ex-service personnel to civil life, multiplication of banking facilities, modification of laws, etc., communications, labour welfare, industries, public health-Education, etc., have also received due attention.

The blue print prepared by the State consists of 128 schemes grouped in 'Special Priority' 'Particular Area' and the 'Whole State' schemes to show at glance the order they claim for their execution. Dr. Radha Kamal Mukerjee, the reputed Indian Economist, who has been appointed as Economic Adviser, has been scrutinising the Draft Plah after which it will be submitted to the Government for necessary sanction for implementation. A handsome provision is earmarked in the State's budget for Samvat 2002 for the Post War Reconstruction and development.

The cessation of hostilities on all fronts has brought the question of re-settlement of ex-service men to the forefront. Accordingly Employment Exchanges have been set up at Gwalior and Ujjain and a Committee has been appointed by the Durbar for implementation of other schemes in this connection. Meanwhile, Pilot Projects and Emergency Schemes have been drawn up to give a start to work. The Emergency Schemes aim at checking the soil erosion in the northern districts of the State which has been the greatest single menace in the northern division. The Pilot Projects will inaugurate reconstruction of agriculture by concentration the activities of all the departments in particular groups of 10 to 15 villages in one district of northern division and another in the southern division. It is hoped that the prosperity brought about by these projects will create a voluntary demand from the public and allow the Government to watch to what extent the fixed targets are achieved before launching a State-wide programme The Pilot Projects have since received the sanction of the Government and are being implemented under the aegis of the Revenue Department. Negotiations are also afoot for participation in the Kotah Hydro-Electric Project, which will make about 26,000 KW of electric energy available to the State. The Post-War Reconstruction Department has commenced publishing weekly price index numbers, which are expected to prove helpful both for agriculture as well as industrial purposes

BALUCHISTAN AGENCY.

In this Agency lies the State of Kalat with its feudatory States of Las Bela and Kharan.

Kalat is bounded on the North by the Chagai district, on the East by Sindh and the Marri-Bugti tribal territories, on the South by the Arabian Sea and on the West by Persia.

The Kalat State, unlike the other Indian States, is a confederacy of partially independent chiefs, whose head is the Khan of Kalat. The divisions of the State are Sarawan or the Highlands, Jhalawan or the Lowlands, Kachhi and Mekran. The inhabitants are, for the most part, Mahommedans of the Sunni sect. The area is 53,995 square miles and population 253,305 (1941).

The relations of Kalat with the British Government are governed by the treaties of 1854 and 1876, by the latter of which the independence of Kalat was recognised, while the Khan agreed to act in subordinate co-operation with the British Government. There are also agreements with Kalat in connection with the construction of the Indo-European telegraph line, the cession of jurisdiction on the railways and in the Bolan Pass, and the permanent leases of Quetta, Nushki and Nasirabad.

The Khan is assisted in the administration of the State by a Wazir-i-Azam, at present an officer of the Indian Political Service. The Resident and Agent to the Governor-General in Baluchistan conducts the relations between the Government of India and the Khan, and exercises general political supervision over the State through the Political Agent in Kalat The revenue of the State is about Rs. 20 lakhs, out of which the Khan retains a civil list of Rs. 3,50,000 per annum. The present Khan is Major His Highness Begtar Bal Sir Mir Ahmad Yar Khan, G.C.I.E., born in 1904.

Las Bela is a small State under the suzerainty of Kalat. The Hab river for the Southern part of its course forms the Eastern boundary with Sind, and the greater part of the State consists of the valley and the delta of the Purali river. Area 7,043 square miles; population 69,067 (1941), chiefly Sunni Mahommedans. The estimated average revenue is about Rs. 5·4 lakhs. The ruling chief of Las Bela, known as the Jam, is Mir Ghulam Qadir Khan, born in 1920. The young Jam has studied at the Aitchison College, Lahore. The administrative control of the State is exercised by the Hon'ble the Agent to the Governor-General, Resident and Chief Commissioner in Baluchistan, through the Political Agent, Kalat. The Jam also employs a Wazir to assist him in the administration of the State.

Kharan is a small State under the Suzerainty of Kalat. Area 18,508 sq. miles, population 33,832. The Chief of Kharan is Nawab Habibullah Khan, Nausherwani, born about 1899. He employs a Wazir to assist him in the administration of the State. The Resident in Baluchistan exercises general political supervision over the State through the Political Agent in Kalat. The revenue of the State is about 50,000.

RAJPUTANA AGENCY.

Rajputana is the name of a great territorial circle with a total area of about 134,959 square miles, which includes 23 Indian States, one Chiefship, one estate, and the small British district of Ajmer-Merwara. It is bounded on the west by Sind, on the north-west by the Punjab, State of Bahawalpur, on the north and north-east by the Punjab, on the east by the United Pro-

inces and Gwalior, while the southern boundary runs across the central region of India in n irregular zigzag line. Of the Indian States, hiefship and estate 21 are Rajput, 2 (Bharatpur nd Dholpur) are Jat, and two (Palanpur and onk) are Mahomedan. For administrative urposes the Indian States are divided into the ollowing groups:—Eastern Rajputana States gency 6 States (Bharatpur, Bundi, Dholpur, halawar, Karauli and Kotah); Jaipur Agency 5 tates and one estate (Alwar, Jaipur, Kishangarh, onk, Shahpura and Lawa Estate); Mewar nd Southern Rajputana States Agency 6 tates and one Chiefship (Mewar, Dungarpur, answara, Partabgarh, Idar and Vijaynagar nd the Kushalgarh Chiefship); Western ajputana States Agency of States (Bikaner, odhpur, Jaisalmer, Palanpur, Sirohi and anta). The chief administrative control f the British District is vested in the Chief ommissioner, Ajmer-Merwara whose headuarters are at Ajmer; the Resident for Rajpuana supervises the relations between the several ndian States of Rajputana and the Political epartment. He has his headquarters at Abu.

The Aravalli Hills intersect the country lmost from end to end. The tract to the northest of the hills is, as a whole, sandy, ill-watered nd unproductive, but improves gradually from ing a mere desert in the far west to comparaively fertile lands to the north-east. To the outh-east on the Aravalli Hills lie higher and ore fertile regions which contain extensive hill anges and which are traversed by considerable vers.

Communications.—The total length of railays in Rajputana is 3,259 miles, of which about ,000 are the property of the British Government. he B. B. & C. I. (Metre-gauge) (Government) ins from Ahmedabad to Bandikui and from here branches to Agra and Delhi. Of the ndian State railways the more important are he Jodhpur and Bikaner lines from Marwar unction to Hyderabad (Sind) and to aner, the Mewar State Rly. line from Chittorarh to Udaipur and Marwar Junction to Mavli, pur State Rly. from Jaipur to Sawai Madhoand Jaipur to Soharu.

Inhabitants.—Over 50 per cent. of the popuation are engaged in some form of agriculture; bout 20 per cent. of the total population are aintained by the preparation and supply of aterial substances; personal and domestic ervice provides employment for about 5 per ent. and commerce for 2½ per cent. of the popuation. The principal language is Rajasthani. mong castes and tribes, the most numerous re the Brahmans, Jats, Mahajans, Chamars, ajputs, Minas, Gujars, Bhils, Malis and Bahis. The Rajputs are, of course, the aristoracy of the country, and as such hold the and to a very large extent, either as receivers of ent or as cultivators. By reason of their osition as integral families of pure descent, s a landed nobility, and as the kinsmen of ruling chiefs, they are also the aristocracy of ndia; and their social prestige may be measured y observing that there is hardly a tribe or clan as distinguished from a caste) in India which does not claim descent from, or irregular connection with, one of these Rajput stocks.

The population and area of the States and the British District of Ajmer-Merwara are as follows:—

Name.	Area in square miles.	Population in 1941.
Mewar and S. R. S. Agency.—		
Udaipur	13,170	1,926,698
Banswara	1,606	258,760

British District.—		
Ajmer-Merwara ..	2,400	583,693

Udaipur State (also called Mewar) was founded in about 646 A.D. The capital city is Udaipur, which is beautifully situated on the slope of a low ridge, the summit of which is crowned by His Highness the Maharana's palaces, and to the north and west, houses extend to the banks of a beautiful piece of water known as the Pichola Lake, in the middle of which stand two island palaces. It is situated near the terminus of the Mewar State Railway, 697 miles north of Bombay. Lieut.-Colonel His Highness Maharajadhiraj Maharana Sir Bhupal Singhji Bahadur, G.C.S.I., K.C.I.E., who succeeded his father the late Maharana His Highness Maharajadhiraj Maharana Sir Fateh Singhji Bahadur, G.C.S.I., G.C.I.E., G.C.V.O., in 1930, is the Premier Ruling Prince of Rajputana. Major Maharaj Kumar Sri Bhagwat Singhji who was born on 20th June, 1921, has been adopted as heir-apparent. He has married the daughter of His Highness the present Maharaja of Bikaner, and has two sons. The revenue of the State is Rs. 1,25,28,000 and the expenditure is Rs. 1,09,08,00. Its archæological remains are numerous, and stone inscriptions dating from the third century have been found.

Banswara State is the southernmost State of Rajputana within the Political Agency of the Southern Rajputana States. Area 1,946 square miles, population 290,913. It is thus in regard to size eleventh among the States of Rajputana. Banswara with Dungarpur originally formed a country known as Bagar, which was, from the beginning of the thirteenth century, until about the year 1529, held by certain Rajput Rulers of the Ghelot or Sishodiya clan, who claimed descent from an elder branch of the family now ruling in Udaipur. After the death of Maharawal Udal Singhji, the Ruler of Bagar, about 1529, his territory was divided between his two sons, Jagmal Singhji and Prithvi Rajji, and the descendants of the two families are now the Rulers of Banswara and Dungarpur respectively. Where the town of Banswara now stands, there was a large Bhilpal or colony under a powerful Bhil Chieftain, named Wasna, who was defeated and slain by Maharawal Jagmal Singhji about 1530. The name of Banswara is by tradition said to be a corruption of Wasnawara or the country of Wasna. Others assert that the word means the country (wara) of bamboos (bans). Nearly three centuries after its foundation by Maharawal Jagmal Singhji, Maharawal Bijai Singhji anxious to get rid of the supremacy of the Mahrattas offered to become a tributary to the British Government. In 1818, a definite treaty was made with his successor, Maharawal Umed Singhji. Banswara has been described as the most beautiful portion of Rajputana. It looks its best just after the rains. The principal rivers are the Mahi, the Anas, the Eran, the Chap and the Haran.

The present Ruler, His Highness Rayan Rai Maharajadhiraj Maharawalji Sahib Shri Chandraveer Singhji Bahadur was born on the 26th November 1909. He succeeded his father His late Highness Maharawal Sir Pirthi Singhji, K.C.I.E., on the 7th August 1944 and is 22nd in descent from Maharawal Jagmal Singhji. His Highness was educated at the Mayo College and conducts the administration of the State with the assistance of a Chief Minister. A State Council has been established last year. There are also a Legislative Assembly (with a non-official majority) and a High Court in the State.

Chief Minister.—Dr. Mohan Sinha Mehta, Ph.D., M.A., LL.B., Bar-at-Law.

Dungarpur State, represents the Gadi of the eldest branch of the Sisodias and dates its separate existence from about the close of the 12th Century. Samant Singh, King of Chitor, when driven away by Kirtipal of Jalor, fled to Bagar and killed Chowrasimal, Chief of Baroda, and founded the State of Dungarpur in 1179 A.D. The present Ruler is His Highness Rai-i-Rayan Mahimahendra Maharajadhiraj Maharawal Shri Sir Lakshman Singhji Bahadur, K.C.S.I., born on 7th March 1908, succeeded on 15th November 1918 and assumed reins of the administration on the 16th February 1928. Area: 1,460 sq. miles, Population: 274,000. Revenue: Rs.24 lakhs.

Partabgarh State, also called the "Kanthal" was founded in the sixteenth century by a descendant of Rana Mokal of Mewar. The town of Partabgarh was founded in 1698 A.D. by Maharawat Partabsingh. In the time of Maharawat Sawant Singh (1775-1844), "Kanthal" was invaded by the Marathas, but the Maharawat arranged to buy off the Holkar by agreeing to pay Rs.72,700 *Salam Shahi*, which were being coined in Partabgarh and accepted as legal tender throughout the surrounding territories. The first connection of the State with the British Government began as early as 1804. Holkar, by the Treaty of Mandsore, ceded all his rights of collecting tributes, etc., from the States of Rajputana to the East India Company, as a result of which Partabgarh continued to pay the former cash payment of Rs.72,700 *Salam Shahi* (subsequently converted to Rs. 36,350 British) to the British Government. As it has, however, been considered to be excessive, it has been reduced to Rs. 27,500 from the year 1937-38. The present Ruler is His Highness Maharawat Sir Ram Singhji Bahadur, K.C.S.I., who was born in 1908 and succeeded to the *gadi* in 1929. The Ruler enjoys a dynastic salute of 15 Guns and Partabgarh is one of the Treaty States enjoying plenary jurisdiction. The highest administrative and executive office is termed "Mahakma Khas" where sit His Highness and the Dewan. There is a graded judiciary under a separate High Court Judge, who is unconnected with the Executive. Annual average revenue Rs. 6,34,500. Area is 889 square miles.

Jodhpur State is the largest in Rajputana with an area of 36,071 square miles and a population of 2·5 millions, of which 86% are Hindus, 8·6% Muslims and the rest Jains and Animists. The greater part of the country is an arid region. It improves gradually from a mere desert to comparatively fertile land as it proceeds from the west to the east. The rainfall is scanty and capricious. There are no perennial rivers and the supply of sub-soil water is very limited. The only important river is the Luni.

The Maharaja of Jodhpur is the head of the Rathor Clan of Rajputs and claims descent from Rama, the deified King of Ayodhya. The earliest known King of the Clan named Abhimanyu, lived in the fifth century, from which time their history is increasingly clear. After the breaking up of their Kingdom at Kanauj, they founded this State in about 1212, and the foundations of the Jodhpur City were laid by Rao Jodha in 1459. He abolished the tax levied by Hussain Shah of Jaunpur from Hindu pilgrims at Gaya. His descendant was the famous Rao Maldeva, the most powerful ruler of the time, having an army of 80,000 Rajputs; the Emperor Humayun, when expelled by Sher Shah in 1542 A.D., sought refuge with him. Raja Sur Singh, son of Raja Udai Singh, in recognition of his deeds of valour was created a "Sawai Raja" with a mansab of 5,000 Zat and 3,300 Sowars by the Emperor Akbar.

The administration is carried on with the aid of a State Council composed of His Highness the Maharaja Sahib Bahadur as President, Lt.-Colonel Sir Donald M. Field, Kt., C.I.E., I.A. and Shri Bada Maharaj Kumar Sahib, Chief Ministers; Col. Maharaj Maharajadhiraj Sri Sir Ajit Singhji Sahib, Counsillor to His Highness the Maharaja Sahib Bahadur; Dewan Bahadur Pandit Dharamnarayanji, B.A., Bar-

at-Law, O.I.E., Deputy Chief Minister and Revenue Minister; Rao Bahadur Rao Raja Narpat Singhji, Minister-in-Waiting; Dewan Bahadur K. S. Menon, Bar-at-Law, Law Member; and Mayor F. Steel, B.A. (Oxon), O.B.E., Minister for Finance and Supplies. There is also a Consultative Committee representing the great body of Sardars, who hold as much as five-sixths of the total area, to aid in the administration with opinion on matters affecting customs and usage in the country. With a view to associating the people of Marwar with administrative problems in an increasing degree and affording them opportunities of receiving training in the working of democratic institutions, His Highness the Maharaja Sahib Bahadur has sanctioned the establishment of Village Panchayats in the districts and a Representative Advisory Assembly at Jodhpur. The Representative Advisory Assembly consist of 65 members of whom 14 are officials, 41 elected members and 10 nominated members (Non-officials).

The revenue of the State during the year 1945-46 was Rs. 3,17,14,836. The Jodhpur Railway, extending from Hyderabad (Sind) to Luni Junction and Marwar Junction to Kuchaman Road, with its branches on all sides in the territories of the state, is the principal railway, while the B. B. & C. I. Railway runs across a portion of the south-eastern border. The famous marble quarries of Makrana as well as the Salt Lake at Sambhar are situated in Jodhpur territory.

Jaisalmer State is one of the largest States in Rajputana and covers an area of more than 16,062 square miles. The Rulers of Jaisalmer belong to the Jadon clan and are the direct descendants of Sri Krishna. Jaisalmer City was founded in 1156, and the State entered into an alliance of perpetual friendship with the British Government in 1818. In 1841 after the British conquest of Sind the forts of Shahgarh, Garsia and Ghotaru which had formerly belonged to Jaisalmer were restored to the State. The population according to the census of 1941 is 93,246. The present Ruling Prince is His Highness Maharajadhiraj Raj Rajeshwar Param Bhattarak Sri Maharawalji Sir Jawahir Singhji Deo Bahadur, Yadukul Chandrabhal Rukan-ud-Dowlah, Muzaffer Jang, Bijaimand, K.C.S.I. Revenue Rs.7,50,000.

HEIR APPARENT: Maharaj Kumar Sri Girdhar Singhji Sahib Bahadur; Second Son: Maharaj Kumar Sri Hukam Singhji Sahib Bahadur; Grand Son: Bhanwar Shri Raghunath Singhji Sahib Bahadur.

Sirohi State is much broken up by hills, of which the main feature is Mount Abu, 5,650 feet. The Chiefs of Sirohi are Deora Rajputs, a branch of the famous Chauhan clan which furnished the last Hindu kings of Delhi. The present capital of Sirohi was built in 1425. The city suffered in the eighteenth century from the wars with Jodhpur and the depredations of wild Mina tribes. Jodhpur claimed suzerainty over Sirohi but this was disallowed and British protection was granted in 1823. The present ruler is His Highness Maharajadhiraj Maharao Shri Tej Singhji Bahadur. As he is a minor, the administration is carried on by the former Council with Rao Bahadur I. K. Pandya, B.A., LL.B. as Chief Minister assisted by three other members.

Jaipur is the fourth largest State in Rajputana. It consists for the most part of level and open country. It was known to the ancients as Matsya Desh, and was the kingdom of the King Virata mentioned in the *Mahabharata*, in whose court, the five Pandava brothers during their last period of exile resided. Barial in the Jaipur State has been identified.

The Maharaja of Jaipur is the head of the Kuchawa clan of Rajputs, which claims descent from Kush, son of Rama, King of Ayodhya, the famous hero of the famous epic poem, the *Ramayana*. This dynasty in Eastern Rajputana dates as far back as ninth century A.D. Dulha Raj, one of its most early rulers, made Amber the capital of the State in 1037 A.D. About the end of 12th century one of the rulers Pajun at the head of the army of Prithvi Raj, Emperor of Delhi, defeated Shahabuddin Ghori in the Khyber Pass and pursued him as far as Ghazni. Prithvi Raj had given his sister in marriage to him.

The present Ruler Maj.-Genl. His Highness Saramad-i-Rajahai Hindustan Raj Rajendra Shri Maharajadhiraja Sir Sawai Man Singh, Bahadur, G.C.I.E., LL.D was born on 21st August 1911. He was adopted by His late Highness on 24th March 1921. He is a scion of the Rajawat House of Isarda, and ascended the *gadi* on the 7th September 1922, and was married to the sister of the present Maharaja of Jodhpur on the 30th January 1924, from whom he has a daughter and a son and heir (*b.* 22nd October 1931). His second marriage with the daughter of his late Highness Maharaja Sir Sumer Singhji Bahadur of Jodhpur was celebrated on the 24th April 1932, from whom he has two sons: the first born in England on the 5th May, 1933 and the second born on the 10th December, 1935. Thirdly he married the younger sister of His Highness Jagaddipendra Narayan Bhup Bahadur, Maharaja of Cooch Behar on 9th May, 1940.

His Highness the Maharaja Sahib Bahadur was invested with full powers on 14th March, 1931. His Highness was appointed Honorary Lieutenant in the Indian Army on the 25th April, 1931, and was promoted to the rank of Honorary Captain on the 1st January, 1934, Major in 1940, and Major-General in 1946. In 1933, His Highness took his Polo Team to England, where it achieved exceptional success, setting up a record by winning all open tournaments. His Highness visited England several times. While in England His Highness was invested by His Majesty the King Emperor with the insignia of G.C.I.E., which distinction was conferred on him on the 3rd June, 1935. In December, 1936, His Highness met with an accident while playing Polo and had to proceed to Vienna (Austria) in January, 1937, for expert Medical advice. After undergoing a course of medical treatment for about eight weeks, he returned to his capital in March, 1937. His Highness attended the Coronation of His Majesty the King Emperor in London

n 1937. In September, 1940, His Highness was attached to the 13th Lancers at Risalpur for training and later went on Active Service on the North-West Frontier. In April, 1941, His Highness received from His Imperial Majesty the rank of Captain in the Household Cavalry and thereafter proceeded on Active Services overseas. He returned to Jaipur on the 6th September, 1941. His Highness underwent military training at Dehra Dun in 1942 and completed the course at the Staff College, Quetta in 1943.

A Chief Court of Judicature was established in 1921 which was converted into a High Court in 1942 and was invested with full powers in judicial matters.

The army consists of Cavalry, Infantry, Transport and Artillery.

The normal revenue is about Rs. 1,77,50,000 Jharshahi equal to Rs. 1,88,60,000 Kaldar (British Government).

The State has a Representative Assembly and a Legislative Council, with elected majorities.

The population of the State is 3,040,000. It's area is 16,682 square miles.

Kishangarh State is in the centre of Rajputana and consists practically of two narrow strips of land separated from each other, with an area of 858 square miles (population 104,155), the northern mostly sandy, the southern generally flat and fertile. The Ruling Princes of Kishangarh belong to the Rathor clan of Rajputs and are descended from Maharaja Kishan Singh (second son of Maharaja Udai Singh of Jodhpur) who founded the town of Kishangarh in 1611. The present ruler is His Highness Umdae Rajhai Baland Makan Maharajadhiraj Maharaja Sumair Singhji Bahadur. He was born on the 27th January, 1929, and is being educated at the Mayo College, Ajmer. On the demise of His late Highness on the 3rd February 1939, he succeeded to the *gadi* on the 24th April, 1939. Revenue about Rs. thirteen lakhs and expenditure Rs. twelve lakhs.

Lawa in Rajputana is a separate chiefship under the protection of the British Government and independent of any Native States. It formerly belonged to Jaipur and then became part of the State of Tonk. In 1867, the Nawab of Tonk murdered the Thakur's uncle and his followers, and Lawa was then raised to its present position. The Thakurs of Lawa belonged to the Naruka sect of the Kachwaha Rajputs. The present Thakur, Banspardeep Singh, was born on September 24, 1923, and succeeded to the chiefship on 31st December 1929.

Bundi State is a mountainous territory in the south-east of Rajputana. The Ruler of Bundi is the head of the Hara sect of the great clan of Chauhan Rajputs and the country occupied by this sect has for the last five or six centuries been known as Haraoti. The State was founded in the early part of the thirteenth century and constant feuds with Mewar and Malwa followed. It threw in its lot with the Mahomedan emperors in the sixteenth century. In later times it was constantly ravaged by the Mahrattas and Pindaries and came under British protection in 1818. The present ruler of the State is Major, His Highness Hadendra Shiromani Deo Sar Buland Rai Maharajadhiraj Maharao Raja Bahadur Singhji Sahib Bahadur, M.C., A.D.C., born 17th March, 1921, and succeeded to the *gadi* on 23rd April, 1945. Educated at Mayo College. Went to Police Training College, Moradabad, 1940, and attended the Indian Civil Service Probationers' Course at Dehra Dun in 1941. Entered the Army in 1942. Received the immediate award of the Military Cross, April 1945, for conspicuous gallantry during the attack on Meiktila. His Highness is entitled to a salute of 17 guns. Heir apparent Maharaj Kumar Shri Ranjit Singhji. Revenue Rs.33 lakhs in 1944.

Tonk State.—Partly in Rajputana and partly in Central India, consists of six Parganas separated from one another. The ruling family belongs to the Salarzae clan of the Bunerwal Afghan tribe. The founder of the State was Nawab Muhammad Amir Khan Bahadur General of Holkar's Army from 1798-1806. Holkar bestowed grants of land on him in Rajputana and Central India and the land so granted to him was consolidated into the present State. The present Ruler of the State is His Highness Said-ud-Daulah, Wazir-ul-Mulk Nawab Hafiz Sir Muhammed Saadat Ali Khan Bahadur Sawlati-Jang, G.C.I.E., who ascended the Masnad in 1930. The administration is conducted by His Highness the Nawab in consultation with a Council of five members, *viz.*, (1) Mohd. Mir, B.A. (Cantab.), Bar-at-Law, Vice-President, State Council and Finance Member; (2) Sz. Mohammed Taufiq Khan, Home Member; (3) Khan Bahadur Zamirul Islam Khan, B.Sc., LL.B. Chief Judge; (4) A. A. Kherie, Revenue Member; (5) Lt. Khan Sahib M. A. Faruqi, M.A., LL.B., Development Member.

Revenue ..	.. ..	Rs. 50,00,410
Expenditure	.. ..	Rs. 47,63,558

Secretary Council.—M. Shamsuddin Ahmad, B.A.

Durbar Secretary to H. H.—Khan Bahadur Mirza Hamid Ali Khan.

Shahpura State.—The ruling family belongs to the Seesodia clan of Rajputs. The State came into existence about 1629 when the Parganah of Phulia was granted by the Mughal Emperor Shah-i-Jehan to Maharaj Sujan Singh, son of Maharaj Surajmal, the second son of Maharana Amar Singh of Udaipur.

The present Ruler is Rajadhiraj Shri Umaid Singhji Bahadur. The State enjoys a permanent salute of 9 guns and full internal Powers. The Ruler is a member of the Chamber of Princes in his own right.

Bharatpur State.—Consists largely of an immense alluvial plain, almost 2,000 sq. miles in size watered by the Banganga and other monsoon rivers.

The rulers of Bharatpur are Jats, of the Sinsinwar clan, who trace their ancestry to the eleventh century. The family derives its name from its old village Sinsini. Bharatpur was the first State in Rajputana that made alliance with the British Government in 1803. It helped Lord Lake with 5,000 horses in his conquest of Agra and the battle of Laswari in which the Maratha power was entirely

broken, and received 5 districts as reward for the service. In 1804, however, Bharatpur sided with Jaswant Rao Holkar against the British Government which resulted in a war. Peace was re-established in 1805 under a treaty of alliance and it continues in force. The *Gadi* being usurped by Darjan Sal in 1825, the British Government took up the cause of the rightful heir Maharaja Balwant Singh Sahib. Bharatpur was besieged by Lord Combermere, and as the faithful subjects of the State also made common cause with the British Army, the usurper was quickly disposed of, and Maharaja Balwant Singh, the rightful heir, came into his own. Bharatpur also rendered valuable service to the British Government during the Mutiny. During the Great War the Bharatpur Durbar gave valuable help to the Imperial Government The Imperial Service Infantry served in East Africa and the Mule Transport Corps served in all theatres of war except Africa.

The present ruler is Lt.-Col. His Highness Maharaja Shree Brijendra Sawai Shri Bhrijendra Singh Bahadur Bahadur Jung who was born on first December 1918 and succeeded his father in 1929. His Highness was invested with ruling powers on 22nd October 1939. He married the youngest sister of His Highness the Maharaja of Mysore on 18th June 1941. He rendered valuable help in men and money to the British Government in the Second World War ((1939-45) The total contribution towards the War Fund amounted to Rs. 3,74,000. The State continued to pay a monthly contribution of Rs. 1,000 towards H. E. The Viceroy's War Purposes Fund since the beginning of the War.

The State invested Rs. 41,47,400 in the Victory Loan, Prize Bonds and National Saving Certificates. More than 8,000 recruits were enlisted from the State during the War in the Indian Army and 650 men were sent to the Assam Labour Corps. The State supplied more than 28,000 tons of food grains to the rest of India during the war. The Bharatpur Government furnished one company infantry (strength 222) for service outside the State They also undertook to train and furnish one section of 50 (Rajputana) G.P.T. Coy., R.I.A.S.C. (strength 121) as a unit of the I.A. out of the State Forces. One No. 63 (Bharatpur) Garrison Company, consisting of old and pensioned personnel of the State Forces was also raised as a unit of the I.A. The Bharatpur Government granted many concessions to encourage recruitments.

Lt.-Col. H. H. the Maharaja placed at the disposal of the Crown all men and material resources of the State. One of the brothers of H. H. served as Captain in the Second Royal Lancers and the other is Flight Captain in the Indian Air Force.

Population of the State	..	575,625.
Area		1,972 sq. miles.
Salute		19 guns.
Average revenue	..	Rs. 47,07,356.

Dholpur State.—The family of the ruling Chiefs of Dholpur belongs to the Bamrolian Jats, the adopted home of one of their ancestors. The family took the name of Bamrolia about the year 1367. They next migrated to Gwalior, where they took the part of the Rajputs in their struggles against the Emperor's Officers. Eventually the Bamrolia Jats settled near Gohad and in 1505 Surjan Deo assumed the title of Rana of Gohad. After the overthrow of the Mahrattas at Panipat, Rana Bhim Singh in 1761 possessed himself of the fortress of Gwalior but lost it six years later. In order to bar the encroachments of the Mahrattas, a treaty was made with the Rana in 1779 by the British Government under Warren Hastings, and the joint forces of the contracting parties re-took Gwalior. In the treaty of the 13th October, 1781 between the British Government and Scindia, it was stipulated that so long as the Maharaj Rana observes his treaty with the English, Scindia should not interfere with his territories. The possession of Gohad however led to disputes between the British and Scindia, and in 1805 the Governor-General transferred Gwalior and Gohad to Scindia, and that of Dholpur, Bari, Baseri, Sepau and Rajakhera to Maharaj Rana Kirat Singh. Maharaj Rana Kirat Singh died in 1836 and was succeeded by his son Maharaj Rana Bhagwant Singh on whose death in 1870 his grandson, the late Chief Maharaj Rana Nehal Singh, succeeded to the *Gadi*. Lt.-Col. His Highness Rais-ud-Daula Sipahdar-ul-Mulk Saramad Rajhai Hind Maharajadhiraj Sri Sawai Maharaj Rana Sir Udai Bhan Singhji Lokindra Bahadur Diler Jang Jai Deo, G.C.I.E., K.C.S.I., K.C.V.O., the present ruler, is the second son of Maharaj Rana Nehal Singh and was born on the 12th February, 1893. On the death of his brother Maharaj Rana Ram Singh, His Highness succeeded to the *gadi* on March 1911.

Karauli State.—A State in Rajputana under the political control of the Resident for Rajputana, lying between 26° and 27° north latitude and 76° 30′ and 77° 30′ east longitude. Area, 1,242 square miles. The river Chambal forms the south-eastern boundary of the State, dividing it from Gwalior Scindia's territory on the west and south-west it is bounded by Jaipur; on the north by Bharatpore and on the north-east by Dholpur. The State pays no tribute either to the British Government or to any other Indian State. Languages spoken Hindi and Urdu.

Ruler—His Highness Maharajadhiraj Maharaja Sir Bhom Pal, Deo Bahadur, Yadukul Chandra Bhal, K.C.S.I. Heir-apparent:—Maharaj Kumar Ganesh Pal. Chief Member, State Council: *Dewan*, Rai Bahadur Pandit Trilokinath Sharma, B.A., LL.B., *Revenue Member*, Munshi Mangal Lal, *Home Member*, Rai Sahib Babir Shyam Lal Gupta, M.A., B.Sc. (Hons.), (Eng.), (Lond.).

Kotah State belongs to the Hara Section of the clan of Chauhan Rajputs. The early history of their house is, up to the 17th century, identical with that of the Bundi family, of which they are an offshoot. Its existence as a separate State dates from 1625. The present Ruler is Lt.-Col. H. H. Maharao Shri Bhim Singhji Sahib Bahadur who was born in 1909 and succeeded to the *gadi* in December, 1940. The Administration is conducted by His Highness with the assistance of a State Council of four ministers, *viz.* Dewan Bahadur Pt. Brij Chandji Sharma, M.A., LL.B., (Retd. District Magistrate and Collector, U.P.), Prime Minister and Vice-President; Raj Chandra Senji of Kunadi, Home

Minister; N. L. Iya, B.A., B.E., M.I.E. (India), Development Minister and Thakur Mahendra Singhji Ranawat, Revenue and Civil Supplies Minister.

The total area of the State is 5,684 square miles and its average annual income amounts to about Rs. 52 lakhs. The population of the State according to the census of 1941 is 777,398.

Jhalawar State in the south east of Rajputana consists of two separate tracts. It has an area of 813 square miles, a population of 122,299, and an annual revenue of Rs. 10,90,000. The ruling family belongs to the Jhala clan of Rajputs. The present Ruler, His Highness Maharaja Rana Shri Harish Chandra Bahadur, succeeded to the gadi on the 2nd September, 1943. The Ruler enjoys a hereditary salute of 13 guns. He was born on 27th September, 1921, in England where he received a part of his education. He passed the Cambridge School Certificate Examination in 1941 and received I.C.S. training at Dehra Dun and Indian Police training at Moradabad. An heir-apparent was born to him on the 12th June, 1944.

Dewan.—Raj Bahadur R. L. Batra, B.A., LL.B., F.E.S.

Bikaner State in point of area (23,317 sq. miles) is the sixth largest of all the Indian States and the second largest in Rajputana. The population of the State is 1,292,938 of whom 70 per cent. are Hindus, 14 per cent. Mahommedans, 6 per cent. Sikhs and 3 per cent. Jains. The Capital city of Bikaner, which has a population (including the suburbs) of 127,226, is the third biggest city in Rajputana.

The northern portion of the State consists of level loam land, whilst the remainder is, for the most part, sandy and undulating. The average annual rainfall is about 12 inches. The water level over most of the State is from 150 feet to 300 feet deep.

The reigning family of Bikaner belongs to the Rathore clan of Rajputs. The State was founded in 1465 A.D. by Rao Bikaji, son of Rao Jodhaji, Ruler of Marwar (Jodhpur) and after him both the Capital and the State are named. Raja Rai Singhji, the 6th Ruler and the first to receive the title of Raja, was "one of Akbar's most distinguished Generals"; and it was during his reign that the present Fort of Bikaner was built in 1593. The title of Maharaja was conferred on Raja Anup Singhji by the Mughal Emperor Aurangzeb in 1687 in recognition of his distinguished services in the capture of Golconda. The conspicuous services of Maharaja Sardar Singhji, who in the Indian Mutiny of 1857 personally led his troops to co-operate with the British forces in the field on the outbreak of the Mutiny, were acknowledged by the Government of India by the transfer of the Sub-Tehsil of Tibi, consisting of 41 villages from the adjoining Sirsa Tehsil in the Punjab to the Bikaner State.

The present Ruler, Major-General His Highness Maharajadhiraja Raj Rajeshwar Narendra Shiromani Maharaja Sri Sadul Singhji Bahadur, G.C.I.E., C.V.O., is the 22nd of a long line of distinguished Rulers renowned for their courage and statesmanship.

He was born on the 7th September 1902 and succeeded his father, His late Highness Maharaja Sri Ganga Singhji Bahadur, on the 2nd February, 1943.

He is an Honorary Major-General in the Indian Army and was attached to His Royal Highness the Prince of Wales' Staff during the latter's Indian tour in 1921-22.

His Highness attended the Coronation Durbar at Delhi in 1911 when he was appointed a Page to His late Imperial Majesty King George V, and has visited Europe several times. He accompanied his father when he attended the Peace Conference in 1918-19 and the meetings of the Assembly of the League of Nations in Geneva in 1924.

The State Forces consist of the Army Headquarters and a composite Brigade comprising Camel Corps, known as "Ganga Risala", with a sanctioned strength of 560 including Band, an Infantry Battalion known as Sadul Light Infantry 853 strong, a Regiment of Cavalry known as Dungal Lancers 342 strong, including His Highness' Body Guard, a Battery of Artillery (4 guns 3·7" How.) 245 strong, Infantry Training Centre 287 strong and 2nd Infantry Battalion 362 strong. There is also a Camel Battery armed with muzzle loading guns. The total strength of the Bikaner State Army is 2,746.

At the commencement of the second great war His late Highness placed the personal services of his own and those of the Heir-Apparent, as well as the entire resources of the State, at the disposal of the British Government. His late Highness, accompanied by Yuvraj Kumar Sri Karni Singhji Bahadur, proceeded on active service to the Middle East Front in November, 1941. His Highness the Maharaja following the footsteps of his illustrious father, proceeded on active service to the Middle East Theatre of war in November 1943. He was accompanied by his second son Maharaj Kumar Sri Amar Singhji Bahadur. Again in November 1944 His Highness the Maharaja proceeded on Active Service to the Assam-Burma Front to inspect his State troops stationed there. The Ganga Risala, the famous Bikaner Camel Corps with 15 per cent. over its original establishment, the Sadul Light Infantry (Mechanised) which was reorganised from a 3 companies basis to 4 companies and the Bijay Battery proceeded outside the State to serve with His Majesty's Forces. Due to the war the annual military expenditure of the State rose from Rs. 8½ lakhs to 29½ lakhs showing an increase of 250 per cent. over and above peace time expenditure.

His Highness enjoys a permanent local salute of 19 guns and a dynastic salute of 17 guns outside the State.

Her late Highness the Dowager Maharani, Bhatianji sahib, received the Imperial Order of the Crown of India on New Year's Day, 1934.

His Highness is assisted in the administration by a Prime Minister and an Executive Council. The post of Prime Minister is held by Mr. K. M. Panikkar.

A Legislative Assembly was inaugurated in 1913, and has an elected majority; it ordinarily meets twice a year. Far reaching reforms, with a view ultimately to the establishment of

Popular Government which under the aegis of the Ruler will be responsible to the people, are under consideration and an announcement to this effect has already been made by His Highness.

The revenues of the State according to budget estimates for 1946-47 are: ordinary Rs. 2,29,51,333 and extraordinary Rs. 52,66,000 —total Rs. 2,83,17,333.

The State owns a large railway system, the total mileage being 883·05. The last portion of the Sadulpur-Rewari Chord Line—87·20 miles—was opened on 1st March, 1941. This extension forms an important connection towards Delhi. Another project under contemplation is that from Sri Kolayatji to Sind via Jaisalmer, a distance of approximately 300 miles.

Until 1927 there was practically no irrigation in the State, the crops depending only on the scanty rainfall; but the construction and opening in 1927 of the Gang Canal, taken out from the Sutlej River, has helped to protect about 7,37,765 acres of land in the northern part of the State against famine from which it had suffered in the past. The State is participating in another and a much larger irrigation project, namely the Bhakra Dam on the Sutlej which will irrigate nearly double the area irrigated by the Gang Canal, at an estimated cost of approximately Rs. 8 crores to the State.

A coal mine is worked at Palana, 14 miles south from the Capital.

Alwar State.—The State was founded in 1775 by Maharao Raja Pratap Singhji of Macheri, with Alwar as its capital, and until the beginning of the nineteenth century maintained somewhat loose political relations with the Moghal Court at Delhi. With the final decline of the Moghals, relations were opened with the East India Company resulting in the State's first and most important Treaty with the British Government "Of Offensive and Defensive Alliance" in 1803. Thereafter various other Treaties, Agreements and Engagements have been entered into with the British Government and several Sanads have been granted to the State (See Aitchinson's Treaties).

The seventh and present Ruler, Lt.-Col. His Highness Shri Sewai Maharaj Sir Tej Singhji Deo Bahadur, K.C.S.I., succeeded to the *gadi* from Thana on the 22nd July 1937.

The State has on several occasions placed its forces at the disposal of the British Government. In August 1900 a detachment of infantry, 500 strong, was despatched for service in China. On the outbreak of the Great War in 1914, the Alwar Imperial Service Infantry and one Squadron of the Alwar Lancers proceeded on active service. When hostilities with Afghanistan broke out in May 1919, the Alwar State Forces proceeded to the North-West Frontier.

During World War II the State again placed its resources at the disposal of His Majesty's Government and supplied a full Infantry Battalion—the Alwar Jey Paltan—with its reinforcements for service overseas. A section complete with vehicles for the 59, Rajputana G. P. T. Coy. was provided and also one full Garrison Company—52, Alwar Garrison Coy. A labour corps of 150 was despatched to Assam to work on the Burma Road. The State stands first in recruitment of soldiers in Rajputana. The State invested Rs. 60,00,000 in Defence Bonds and another Rs. 12,00,000 in Certificates. Two Fighter planes were contributed to His Majesty's Air Force and substantial contributions were made for relief to Sailors, ambulance and Red-Cross funds.

Palanpur. Palanpur State is in Rajputana. The State has an area of 1,774·64 square miles and a population of over 3,15,000. The revenue of the State in the year 1944-45 was Rs. 28,01,402.

Lieut.-Colonel His Highness Zubd-tul-Mulk Dewan Mahakhan Nawab Shri Taley Muhammed Khan Bahadur, G.C.I.E., K.C.V.O., A.D.C., Nawab Saheb of Palanpur, rules the State. The Ruling Family is of Afghan origin, belonging to the Lohani Stock, and had established their principality in Rajputana in the 14th century. The connection with the British may be said to have definitely begun from 1817 A.D., when Dewan Fateh Khan II entered into relations with the East India Company. A considerable trade in cloth, wheat, ghee, wool, hides, castor and rape seeds, sugar and rice is carried on in the State. The capital city of Palanpur is situated on the B. B. & C. I. Railway and is the junction station of the Palanpur State Railway. Palanpur is a very old settlement of which mention was made in the 8th century.

RAJPUTANA.

The Hon'ble the Resident for Rajputana.—The Hon. Lt.-Col. R. R. Burnett, C.I.E., O.B.E.

WESTERN RAJPUTANA STATES.

Political Agent. Lt.-Col. G. B. Williams, C.I.E., M.C.

JAIPUR AGENCY.

Political Agent. Lt.-Col. G. B. Williams, C.I.E., M.C.

EASTERN RAJPUTANA STATES.

Political Agent. Major L. A. G. Pinhey, O.B.E.

MEWAR AND SOUTHERN RAJPUTANA STATES.

Political Agent.—Lt.-Col. G. Kirkbride

CENTRAL INDIA AGENCY.

Central India Agency is the name given to the country occupied by the Indian States grouped together under the supervision of the Political Officer who is designated the Resident for Central India, with headquarters at Indore. As constituted in 1921—that is, after the separation of the Gwalior Residency—it is an irregularly formed tract lying in two sections, the Eastern comprising Bundelkhand Agency between 22°-38' and 26° 19' North and 78°-10' and 83°-0' East and the Western consisting of the Bhopal and Malwa Agencies between 21°-22' and 24°-47' North and 74°-0' and 78°-50' East. The British districts of Jhansi and Saugor and the Gwalior State divide the Agency into two sections. The total area covered is 52,072 square miles and the population (1941) 7,511,694. The great majority of the people are Hindus. There are 28 Salute States of which the follow-

ing 10 have direct treaty engagements with the British Government:—Indore, Bhopal, Rewa, Orchha, Datia, Dhar, Dewas Senior Branch, Dewas Junior Branch, Samthar and Jaora. All of these are Hindu except Bhopal, Jaora and Baoni which are Mahomedan. Besides these there are 60 Minor States and Guaranteed Estates. Excluding the Indore and Rewa States and the Hirapur and Lalgarh Estates the States and Estates are divided into the following groups for administrative purposes:—Bhopal Agency, 12 States and Estates (principal States Bhopal, Dewas Senior Branch, Dewas Junior Branch); Bundelkhand Agency, 33 States and Estates (principal States Orchha and Datia); Malwa Agency, 39 States and Estates (principal States Dhar, Jaora and Ratlam). The Agency may roughly be divided into two natural divisions, Central India West comprising the former plateau division with such hilly land as lies on this side and Central India East, comprising the former low-lying area and the Eastern hilly tracts. The hilly tracts lie along the ranges of the Vindhyas and Satpuras. They consist of forest areas and agriculture is little practised there, the inhabitants being mostly members of the wild tribes. The territories of the different States are much intermingled and their political relations with the Government of India and each other are very varied.

The following is the size, population and revenue of the ten treaty States mentioned above:—

Name.	Area in square miles.	Population 1911.	Revenue.
			Lakhs Rs.
Indore	9,934	15,13,966	504·9
Bhopal ..	6,924	7,85,322	119·8
Rewa	13,000	18,20,445	65
Orchha ..	1,999	3,63,405	16·3
Datia	912	1,71,072	20·2
Dhar	1,799	2,53,258	20·2
Dewas, Senior Branch ..	449	89,479	11
Dewas, Junior Branch ..	424·36	83,669	13 8
Samthar ..	178	38,279	3·7
Jaora	602	1,16,953	16·8

Indore.—The present eminent position of Holkar State is the fruition of two centuries of progressive effort. Indore, the capital of the State, is situated on the banks of the Khan and Saraswati rivers, 1830 feet above sea-level, and enjoys a salubrious climate all the year round. Besides being noted as an important commercial and industrial centre, it is well-equipped with various nation-building institutions.

History.—The founder of the House of Holkar of Indore was Malhar Rao Holkar, born in 1693. His soldierly qualities brought him to the forefront under the Peshwa, who took him into his service and employed him for his conquests. By this time the Maratha power was weakened at the battle of Panipat in 1761. Malhar Rao had acquired territories stretching from the Deccan to the Ganges as a reward for his career as a military commander. He was succeeded by his grandson. On his death without issue, his mother, Maharani Devi Ahilya Bai, became the ruler and her administration is still looked upon with admiration and reverence as that of a model ruler. She was succeeded by Maharaja Tukoji I who had been associated with her in military administration of the State and had in the course of it distinguished himself in various battles. He was succeeded by Maharaja Kashirao, and the latter by Maharaja Yeshwant Rao, his step-brother, a man of remarkable daring and strategy, which he exhibited in a number of engagements in which he had taken part. The brilliant success he obtained at the battle of Poona against the combined armies of the Peshwa and the Scindia made him dictator of Poona for some time and he declared in consequence the independence of Holkar State. During 1804-5 he had a protracted war with the British, ending in a treaty which recognised the independence of Holkar State with its territories. Yeshwant Rao died in 1811, when he was succeeded by his minor son, Maharaja Malhar Rao II. During the Regency which followed, the power of the State was weakened by various causes, the most important of which was the refractory conduct of the military commanders. On the outbreak of the war between the English and the Peshwa in 1817, some of these commanders, with a part of the army, rebelled against the authority of the State and were disposed to befriend the Peshwa while the regent-mother and her Ministers were for friendship with the British. There was a battle between the British Army and this refractory portion of the Holkar Army which ended in the latter's defeat. A treaty of peace and amity was signed in 1818. The internal sovereignty remained unaffected. The Treaty still regulates the relation between the Crown and the Maharaja Holkar.

Malhar Rao died a premature death in 1833. Then followed the administration of Hari Rao and his son. In 1844 H.H. Maharaja Tukoji Rao ascended the *gadi*, but as he was a minor, the administration was carried on by a Regency under Sir Robert Hamilton, the Resident, as its Adviser. The prosperity of the State revived a great deal during this administration and progress was maintained after the Maharaja assumed powers in 1852. It was interrupted by the outbreak of the Mutiny in 1857 in British India. This wave of disaffection did not leave some of the State troops untouched. The Maharaja with his adherents and the remaining troops, however, remained staunch in his loyalty to the British and gave every possible assistance to the British authorities at Indore, Mhow and other places, which was recognised by the British Government. The Maharaja effected various reforms in the administration and raised the position of the State to a high degree of prosperity and honour. On his death in 1886 he was succeeded by H. H. Maharaja Shivaji Rao who reigned for 16 years and will specially be remembered for his beneficient measures in matters of education, sanitation, medical relief and abolition of transit duties. H.H. Maharaja Tukoji Rao III succeeded in 1903 while yet a minor. The Regency Administration was continued till 1911 and it effected a number of reforms in all branches of administration. The policy of the Regency was maintained by the Maharaja. With his

assumption of powers the State advanced in education, including female education, commerce and industrial developments, municipal franchise and other representative institutions. This prosperity was specially reflected in the Indore City, the population of which rose by 40 per cent.

During the World War of 1914-1918 the State placed all its resources at the disposal of the British Government. Its troops took part in the various theatres of war and the contribution of the State towards the war and charitable funds in money was Rs. 41 lakhs and its subscriptions to the War Loans amounted to Rs. 82 lakhs, while contributions from the people of Indore amounted to over one crore. This assistance received the recognition of the British Government.

His Highness Maharaja Tukoji Rao III abdicated in favour of his son. The present Ruler, His Highness Maharajadhiraj Raj Rajeshwar Sawai Shree Yeshwant Rao Holkar Bahadur, G.C.I.E., LL.D., was born on 6th September 1908. He received his education in England during 1920-23 and again at Christ Church College, Oxford, from 1926 till his return in 1929. He married a daughter of the Junior Chief of Kagal (Kolhapur) in February, 1924, and the Princess Usha Devi was born in 1933. Her Highness Maharani Sanyogita Bai died in July 1937. On 6th July 1943 H.H. married Mrs Euphemia Watt Crane after divorcing his second wife. A Prince was born on 18th May 1944. His Highness's educational career at Oxford having come to an end, he returned to India, arriving at Indore on the 12th November 1929, and after receiving administrative training, assumed full ruling powers on 9th May 1930. Under the direct personal guidance of His Highness Maharaja Yeshwant Rao Holkar there has been a progressive increase in the prosperity of the State and the well-being of its people.

The administration of the State is carried on by the Ruler assisted by the State Cabinet. The Prime Minister is the President of the Cabinet and the chief executive authority. Moshir-ud-Dowlah Raja Gyan Nath, C.I.E., is the present Prime Minister.

Area, Population, Revenue.—The area of the State is 9,034·18 sq. miles and the present revenue Rs. 2,08,55,900. According to the Census of 1941, the population of the State is 1,513,960, showing an increase of 14·25 per cent. over the Census figures of 1931.

Constitution.—The Maharaja is assisted by the State Cabinet consisting of six Ministers. The Indore Legislative Council was recently reorganised and expanded, and it now consists of 53 members of whom 37 are elected, and 8 are nominated non-officials representing various interests such as Labour, Harijans, etc. The election is on the basis of joint electorate. The Council is given the powers to pass bills and resolutions, put interpellations and also discuss the Budget. They elect the Deputy President.

His Highness's Government have also adopted the policy of popularising the movement of Local Self-Government by introducing as many Panchayats as possible in Rural areas. A five year plan is prepared and 517 village Panchayats have so far been established in pursuance of this policy. Village Panchayats are given wide civil, criminal and administrative powers. Many Panchayats have imposed House-tax, wheel-tax, Hat tax, etc. His Highness's Government have also donated an annual grant of Rs. 25,000 to the Panchayats for doing works of public utility.

The Indore City Municipality is autonomous, pass their own Budget and appoint their own officers excepting the executive officers.

Education.—Education at all stages is directly financed by the State. There are three Colleges in Indore, of which the most important—Holkar College—coaches students for the highest examinations in Arts and Science. There are also courses for LL.B. and B.Com. A Bill for a separate Holkar University is under the consideration of Government.

There are 11 High Schools, including 2 for girls, 58 Middle Schools and 456 Primary Schools. Primary education for all children and education for girls up to the Matriculation is entirely free, while education for boys is cheap, the fees being low and there being a considerable number of scholarships and 10 per cent. of freeships. Harijan education is free even during the College course.

Compulsory primary education has been started in Indore City and in the Nemawar District of the State.

The State also maintains a Sanskrit College, an Arts and Music School, 9 special schools including one for the deaf and dumb.

A Medical School in Indore coaches students for the L.M.P. and L.C.P. & S. courses and it is proposed to convert this into an up to date Medical College, the Holkar State sharing a very large part of the expenditure for providing facilities for clinical instruction.

The Institute of Plant Industry which conducts research work on cotton and other crops is another institution of which the State may be proud.

Industries.—Indore is one of the few leading industrial States of India. Next to Bombay Ahmedabad and Cawnpore, Indore is probably the most important textile centre in India. With nine spinning and weaving mills, the loomage of the textile mills in Indore is more, for instance, than that of the whole of Madras Province. It is also the biggest distributing market for cloth and other commodities in Central India and Rajputana. Cloth produced in Indore Mills finds a ready market in the Punjab, North-West Frontier Province, the United Provinces and Bengal, and sorts like "Mazri" are invariably associated with the name of Indore in several countries beyond the frontiers of India. Sarees woven by the skilled handloom weavers of Maheshwar have been famous throughout India for decades past. The textile and other industries of Indore have made a far-reaching contribution to the war effort.

Factories to manufacture tentage and camouflage nets have sprung up to assist the war effort in addition to the established textile mills which were geared up for war production. Indore

also has foundries with a capacity to produce annually about 2,200 tons of castings, 124 ginning factories, 26 pressing factories and a number of hosiery works, an Ice factory, a Thymol factory and Glass Works at Rao, a Sugar factory at Mehidpur, Oil Mills at Indore and Khargone, a distillery that has recently started manufacturing Indian made liquors, a Slate Factory at Piplia, which it is estimated can produce 10,000 slates per day, besides woodworks and other minor industries.

Prospecting is being undertaken at Burwaha to see whether there is enough iron ore to work a smelting furnace which existed in the last century, but was abandoned for reasons not on record. Samples of the ore have proved to be very satisfactory on chemical analysis and if the prospecting reveals that there is a substantial quantity of the ore, an important basic industry may soon be established in the State. A lease has been given for the working of china clay, the quality and quantity of which have been definitely established to be good enough for the manufacture of potteries in the State. A further survey of the economic geology of the State is contemplated.

The project for a first-class and large unit to manufacture vegetable Ghee and allied chemical products is only awaiting the import of machinery from abroad, as also a strawboard factory that would produce 5 tons of finished product per day at Amarsarh, and a factory to manufacture hume pipes has already been established, while another factory is expected to be established shortly.

In view of the fact that availability of cheap power is indispensable for industrial progress, the possibilities of a Hydro-electric project based on the Chambal river are being examined. A scheme for electrification of the district towns has made considerable progress. Additional plant for the Indore Electric Supply is expected to come into commission in a few months. The establishment of a plant for the manufacture of Power Alcohol is also considered to be feasible.

Cottage industries are receiving the sympathetic attention of the Industries Department. The establishment of a Central Yarn Depot, if necessary with the help of a properly selected private entrepreneur has made considerable progress, and the starting of an emporium to sell the fabrics manufactured by the handloom weavers and the products of other cottage industries has been working successfully. Harijans among others are taking advantage of the facilities for training at the hand-made Paper Factory and the Tanning Demonstration Unit. Multiplication of Tanning Demonstration Units in the districts and establishment of a large scale Leather Works and Tannery have been sanctioned. A large plastics project is also under investigation.

Side by side, the policy of assisting industries Government are following a liberal labour policy. Indore is one of the few places in India where standardisation of wages for textile labour has been established and successfully maintained. Recently a bonus of 2½ months' wages was sanctioned by Government for textile workers. Indore led other industrial centres by giving an advance of Rs. 17 per worker as compensation for involuntary unemployment due to coal shortage pending final decision of the question on an All-India basis. Recently when the hours of work were reduced from ten to nine, the workers were given an increase of 100 in their basic wages as a quantum of compensation for the fall in their earnings.

Medical Relief.—The Holkar State is making rapid progress for the Medical Relief of the Urban as well as Rural areas. Fifty bedded new general wards have been built and a temporary Tubercular Ward for observation of T. B. cases has also been added. The Maharaja Tukoojirao Hospital has now 378 beds instead of 300 last year.

A scheme of a new Central Hospital for the City of Indore with provision of 750 beds is receiving attention of Government. This new hospital will also provide clinical instruction to the students of the proposed Medical College at Indore. The whole scheme is estimated to cost about Rs. 60 lakhs.

The construction of a combined building for Child Welfare Centre, Malharganj Dispensary and T. B. Clinic is in progress and is expected to be completed within a year or so.

The foundation stone of a T. B. Sanatorium about 6 miles from Indore has been laid and construction work will start after the monsoon. It will provide accommodation for 50 patients.

The scheme of providing ungraded dispensaries in all villages with a population of 1,000 or more has made good progress and out of 134 such villages only 34 have remained without a dispensary.

Medicine chests containing common drugs for ordinary ailments are being provided in 50 villages each year and it is expected that no village with a population of 500 or above will remain without a medicine chest.

There are 35 Ayurvedic and Unani dispensaries including 2 travelling ones and 3 more travelling dispensaries have been sanctioned.

X-Ray facilities have been provided at Khargone, one of the District Hospitals, and a scheme of providing portable X-Ray machines at all the District Hospitals is receiving attention.

Microscopes and provision of small laboratories have been made at all the District Headquarters and a few important graded dispensaries. The supply of medicines has been increased and special sanction has been given for equipment of dispensaries *viz.*, instruments, linen, furniture, etc.

Transport.—The State is traversed by the Holkar State Railways, the principal station of which is Indore, the B. B. & C. I. Railway, and the Ujjain Bhopal Section of the G. I. P. Railway. Besides the trunk roads, there are 700 miles of roads constructed and maintained by the State. A scheme is also under consideration to have all the roads in the capital city cement concreted.

Improvement Trust.—The City Improvement Trust of Indore, working directly under the Government, is actively executing planned schemes for the development of Indore City.

removing slums, laying out extensions, and constructing new traffic routes. About 2,000 building sites have been made available by the Trust. Among the most important of the recent activities is the construction of two arterial roads in the city to relieve congestion on the main road and to facilitate movement of traffic.

Water Works and Drainage.—The Indore Waterworks, constructed at a cost of Rs. 70 lakhs, provide filtered water which can supply up to 8 million gallons per day.

Special mention may be made of the Syphon spillways which, apart from being unique, are the largest in India.

The City will also have very shortly a complete underground drainage; the mains have already been laid and construction of Sedimentation tanks started. Progress is being made with projects for pipe water supply drainage and electrification of mofussil towns in the State. Out of a provision of Rs. 2 lakhs from the development fund headway has been made in providing drinking water wells to the villages and work in this connection is progressing.

Agriculture.—An Irrigation Fund has been established and a well staffed Irrigation Department is formulating schemes for large scale irrigation works in the State. During 1945-46 kharif season canal irrigation was introduced on the Depalpur Tank and the extension of irrigation was achieved by irrigating 200 per cent more area during the season than before under the tank, by constructing a canal and a few subsidiaries. This is intended to supplement the activities of the Agricultural Department which is already doing considerable work in the direction of furthering the prosperity of the peasantry by bringing the results of latest science to the very door of the cultivator.

Among various activities of this Department mention may be made of the cotton multiplication scheme which has brought large areas formerly under short staple cotton now under Jarilla cotton.

Consequent on the cessation of hostilities, the need for the Holkar State War Front Organisation ceased to exist and the department was therefore, abolished with effect from 16th May 1946. At the same time Government ordered the establishment of a Bureau for the Rehabilitation and Re-settlement of ex-service personnel, with Diler Jung Bahadur Col M. N. Bhagwat, M.A. (Oxon), as full time Director who is also in charge of the National Savings scheme. The Cine Van with its equipment and staff, which previously formed a part of the War Front Organisation, was handed over to the Education Minister for propaganda work in connection with measures for improvement in agriculture, rural development, health and sanitation, in addition to screening educational and instructional films.

Social Reform.—In the matter of social reform the State has made considerable headway. The Child Marriage and Restraint Act prohibiting child marriages is actively in force. The Indore Nukta and Marriage Expenditure Controlling Act, and the Old Men and Minor Girls Marriage Act, are being rigidly enforced.

Following the famous proclamation of His Highness of 1938 declaring temples and other public places open to the Harijans, Harijan uplift is being actively pursued.

With the help of a donation of a lakh of rupees per year given from his privy purse by His Highness the Maharaja Holkar about 200 tenements have been constructed for the poor.

Indore Women's Service.—Raised in 1944 as an organisation to promote increased opportunities for women in Holkar State, the Indore Women's Service has been, from its inauguration, primarily a post-war measure. It has, however, retained some of the better aspects of the war-time Women's Services and functions as an administration under the personal direction of Her Highness the Maharani Holkar.

Candidates for enrolment are required to satisfy the I. W. S. "Command" with regard to educational qualifications, citizenship and general character, and are doing their enrolled service, governed by the Regulations drawn up under Her Highness's personal supervision.

In the experimental stages the girls were posted to low grade clerical posts in State Departments, but a steady rise in their efficiency and value is very apparent now. A gratifying proportion of the total strength is now engaged on appointments of increasing responsibilities, and the foresight of Their Highnesses in starting and supporting this Service is beginning to show splendid results.

The Indore Women's Service runs clerical courses, and it is Her Highness' declared intention that, in due course, it will become a State-wide admission that "For efficiency, loyalty and skill the I. W. S. produces the goods."

Army.—His Highness the Maharaja Holkar's Army consists of 1 Cavalry unit, 3 Infantry units, 1 Animal Transport, 1 M. T. Coy., Army Medical Service, 1 Training Unit and a first class State Band under the direction of Lt.-Col. A. J. Curtis, M.B.E.

Two units, the Mahesh Guards and Animal Transport units, serving ex-State under the Crown, have returned to State with good records.

In addition, the State has provided a complete garrison Company for service under the Crown, viz No. 50 (now 204) Indore Garrison Coy. It has also provided a complete Indore Platoon for No. 58 (C. I.) G. P. T. Coy. Besides, a considerable number of signallers were provided to Indian Army on demand.

Reorganisation of the Army as a whole Post War Army is under process. Pioneer Coy. will be raised by disbanding 2nd Battalion while M. T. Coy will be raised to its full quota by disbanding the Animal Transport. Pay and allowances, etc., are considerably raised to the level of the Indian Army.

New barracks and other ancillary buildings are under construction. Army Headquarters is reorganised and the post of Second-in-Command to the General Officer Commanding as well as General Staff Officer I is newly created. Staff Captain "Q" Branch is reorganised.

War Efforts.—On the outbreak of hostilities in Europe, H. H. the Maharaja Holkar placed the entire resources of the State, including the

State Army and his personal services, at the disposal of the British Crown. His Highness donated a sum of Rs. 5,00,000 and placed it at the disposal of H. E. the Viceroy, to be utilised towards war purposes in any manner His Excellency thought best. Subsequently, His Highness and his Government, in keeping with the traditions of the illustrious House of Holkar and the close ties that bind it with the British Crown, intensified the State war effort and took various measures with a view to contributing to the utmost degree towards the effective prosecution of the war.

The Holkar Transport Corps was deputed to Jhansi for undergoing training early in 1940. In July 1940, under special ordersof His Highness the whole of the 1st Battalion was placed at the disposal of the Crown and steps were taken to bring up all Units of the Holkar State Forces to full strength. The 1st Battalion of Maharaja Holkar's Army is serving with His Majesty's Forces overseas.

Consequent upon the despatch of Holkar's Transport and 1st Battalion for service with H. M.'s Forces, the Maharani's Own Guards, a Cavalry Unit, was converted into a full Infantry Unit. A recruiting campaign was launched and the following Units were organised :—(1) a training centre for Holkar's Transport, (2) a training Company, 432 strong, for reinforcements to 1st Battalion overseas, as also a reserve of 12 officers, the selected candidates being trained at the I. S. F. and O. T. S. Schools. In addition, the following units and personnel were supplied to the Government of India :—(1) a section of M. T. Drivers, (2) a Garrison Company 165 strong, (3) 10 signallers, with 100 per cent. reinforcements per annum. And a number of other facilities were provided, *e.g.* accommodation, etc., to the Malwa Garrison Company. The State also undertook to train and supply M. T. reinforcement for 1st Battalion overseas. Three centres were opened for training recruits, under the Technical Training Scheme, and already 903 trained recruits for war service have been supplied from the State.

His Highness's Government are committed to incur an additional expenditure amounting annually to over Rs. 27 lakhs as a result of the war, on the Army, Police, Civil Defence, A.R.P., etc., and over Rs. 15 lakhs on account of dearness allowance granted to State servants getting upto Rs. 100 p.m. in the Districts and Rs. 120 p.m. in the City, and war allowance to all Government servants getting upto Rs. 700 p.m. A sum of Rs. 280 lacs has also been provided under "Debt Heads" for grain operations and other controlled commodities.

With a view to encouraging recruitment for war services, His Highness ordered that 50 per cent. of the vacancies should be reserved for those who have rendered approved war service. And the fullest co-operation was offered to the Government of India in a number of other matters connected with the war.

The scheme regarding the conferment of emergency commissions was given due publicity and a number of candidates had been recommended. Similarly, applications for other kinds of War Services were forwarded both from the State servants and the public. Special steps were taken to effect recruitment to the Medical Services for the War. Important concessions were announced in favour of those in the State Medical service or in private practice, who offered themselves for war services. Candidates from the State were also recommended under the Bevin Training Scheme.

A Holkar State War Front was set up, its work being carried out by the Holkar State War Front Council, and its propaganda and Publicity Sub-Committee. A fully equipped cine van has been made available for visual propaganda in the interior of the State. An organisation has been set up to carry on an intensive drive in connection with the Small Savings Scheme, within the State.

Liberal concessions in land revenue have been made to give impetus to the "Grow More Food" campaign. In order to deal with the food problem, Indore was the first in India to introduce successful rationing by the coupon system. The arrangements earned praise from all quarters, including the Economic Adviser to the Central and United Provinces Governments, both of whom visited Indore to study the working of the scheme and expressed their complete satisfaction. The scheme featured in a B. B. C. broadcast as well.

His Highness the Maharaja Holkar with his characteristic foresight impressed as far back as 1942 upon all concerned the necessity for growing more food with a view to securing self-sufficiency. Under the guidance and inspiration of His Highness, the Indore Crop Control Order was issued in order to bring a bigger area under food crops. The result of this effort has been marvellous as the area under food crops increased from 16,29,012 to 24,07,570 acres. His Highness the Maharaja in a message to the people exhorted them to continue their efforts with unabated zeal and was pleased to order that the good work of those contributed towards the success of the scheme will be suitably rewarded. His Highness assured the Government of India of the fullest co-operation of his State in this matter at a time when producing the maximum quantity of food grains was regarded as an important War Effort. This co-operation as will be indicated from the figures mentioned above was fully given in actual practice and has been much appreciated by the Government of India.

As a result of the increased outturn of food grains, the Holkar State which had been a deficit area was able to help substantially the deficit areas in other States and provinces, by allowing export.

All the textile mills in the State continue to be engaged in executing very substantial orders of the War Supply Department. H.H.'s Government had introduced their own system of supplying standard cloth to the poor population of the State, but eventually joined the All India Standard Cloth Scheme.

His Highness with his characteristic zeal for measures calculated to further the successful prosecution of the war, convened a unique conference at Indore, of all

the Patels (headmen) of the State with a view to bringing home to the headman of each village the responsibility resting on his shoulders for the defence of his village, intensification of the "Grow More Food" campaign and the building up of the morale of the people. His Highness also welcomed the idea of holding the first All-India War Front Rally at the capital of his State which was held in 1943 and proved a great success. The Sixth War Services Exhibition was inaugurated by H. H. the Maharaja on the 23rd October 1943, and attracted big crowds. It cost the State about Rs. 43,000.

H. H. recently paid a visit to Persia and Iraq to see troops from his State serving in that command.

Under H. H.'s commands, a vigorous campaign was inaugurated to secure the maximum number of recruits from all parts of the State. Prominent features of the scheme were the grant of land, rewards in cash and kind to serve as an incentive for enlistment.

H. H. the Commander-in-Chief has sanctioned the organisation and composition of the Soldiers' Boards in the State. Fullest co-operation has been shown in stimulating the recruitment of Indian women for the Women's Auxiliary Corps, particularly for the Naval wing.

Liberal contributions in money and kind have been made from the State, in addition to the initial contribution of Rs. 5,00,000.

Bhopal.—This principal Mahommedan State in Central India ranks next in importance to Hyderabad among the Mahommedan States of India. The ruling family was founded by Sardar Dost Mohammad Khan, Dilir-Jung, a Tirah Afghan, who, after having served with distinction in the army of the Emperor Aurangzeb obtained the pargana of Berasia in 1708. With the disintegration of the Moghal Empire, Bhopal became an independent State. In the early part of the 19th Century the Nawab successfully withstood the inroads of Scindia and Bhonsla, and by the agreement of 1817 Bhopal undertook to assist the British with a contingent force and to co-operate against the Pindari bands. In 1818 a permanent treaty succeeded the agreement of 1817.

The present Ruler of the State Col. His Highness Sikander Saulat Nawab Iftikharul Mulk, Nawab Mohammad Hamidullah Khan Bahadur, G.C.S.I., G.C.I.E., C.V.O., B.A., Air Commodore, succeeded his mother, Her late Highness Nawab Sultan Jahan Begam, on her abdication in May 1926. He had previously actively participated in the administration of the State for nearly ten years as Chief Secretary and afterwards as Member for Finance and Law and Justice. His Highness was elected as the Chancellor of the Chamber of Princes in the year 1945.

His Highness is assisted in the work of administration by an Executive Council.

The work of legislation with the right of discussing the Budget, moving resolution and interpellations rests with a representative Legislative Council inaugurated in 1927. The *ryotwari* system in which the cultivator holds his land direct from Government has lately been introduced. The State forests are extensive and valuable, and the arable area which comprises more than two-thirds of the total area consists mostly of good soil, producing cotton, wheat, and other cereals, sugar-cane and tobacco. The State contains many remains of great archæological interest including the famous Sanchi Topes, which date from the 2nd Century B.C. and which were restored under the direction of Sir John Marshall. Sanchi Station on the G. I. P. main line to Delhi adjoins the Topes.

Among other troops, the State maintains one full strength Infantry Battalion. The Capital, Bhopal City, beautifully situated on the northern bank of an extensive lake, lies on the main broad-gauge line between Bombay and Delhi and is the junction for the Bhopal-Ujjain Section of the Great Indian Peninsula Railway.

The main industries are represented by the Bhopal Textile Mills, the Narbada Refrigerated Products Co., the Hamidia Match Factory, the Sugar Factory of Sehore, the Bhopal Strawboard Products and the Central India Chemicals, Ltd.

Rewa.—The largest State in Central India Agency, area: 13,000 sq. miles, population: 1,820,445 (1941). The Rulers are Baghel Rajputs descended from the famous Solanki clan which ruled over Gujrat from the 10th to 13th Century. During the Mutiny the Durbar rendered meritorious services to the Crown for which various *parganas*, which had been seized by the Marathas were restored to the Maharaja.

Dhar.—This State, in the Malwa Political Agency in Central India, takes its name from the old city of Dhar, long famous as the capital of the Parmar Rajputs, who ruled over Malwa from the 9th to the 13th century and from whom the present Rulers of Dhar Puar Marathas claim descent. In the middle of the 18th century the Ruler of Dhar, Anand Rao, was one of the leading chiefs of Central India, sharing with the Holkar and Scindia the ruler of Malwa. The State came into treaty relations with the British Government by virtue of the treaty of 1819. The present ruler, Lieutenant His Highness the Maharaja Anand Rao Puar Sahib Bahadur, was invested with full ruling powers on March 16, 1940. The Ruler enjoys a salute of 15 guns.

There are 13 Feudatories and 9 Bhumias, of whom 13 hold a guarantee from the British Government. The population of the State according to the latest census figure is 253,258 and the average Income and Expenditure are about 19 and 18 lakhs respectively.

The Administration of the State is now carried on by His Highness the Maharaja Sahib Bahadur assisted by a Council consisting of the Dewan, Dewan Bahadur N. R. Chandorkar, B.A., LL.B., who is also the Vice-President and two other Members namely Rao Sahib N. V. Joshi, B.A., Revenue Member and Rai Bahadur H. Sanghi, B.A., LL.B., Judicial Member, State Council.

War Contributions.—When the present war broke out the Durbar offered to the British Government all the resources of the State and

His Highness volunteered his personal services. Since then the State has contributed Rs.1,15,000 towards war purposes, of which His Highness contributed from his privy purse Rs.60,000 for the purchase of a Light Tank complete with arms, and Rs.5,000 towards the Lord Mayor's Air Raid Victims' Relief Fund.

Defence Bonds of the face value of Rs. 68,000 along with the Interest-free Bonds of the value of Rs. 35,000 have been purchased by the Darbar and liberal donations from the officials and public amounting to Rs. 15,000 have been contributed to the War Fund, Red Cross and other Funds. Besides this, the Durbar have recently invested a sum of Rs. 2,00,000 in 3 per cent. loan 1951-54.

His Highness the Maharaja Saheb Bahadur has further donated a sum of Rs. 70,000 towards H. E. the Viceroy's War Purposes Fund for the purchase of a Spit fire (Fighter Plane).

The famous and ancient hill fort of Mandu, the capital of several ancient and medieval Kingdoms, with its beautiful mausoleums, tombs, palaces high hills and deep dales, is situated in the State at a distance 24 of miles from the city of Dhar.

Jaora State.—This State is the only Treaty State in the Malwa Political Agency. Area, about 602 square miles, population about 1,16,957. Jaora is the headquarters town. The Chiefs of Jaora claim descent from Abdul Majid Khan an Afghan of the Tajik Khel from Swat. The first Nawab was Abdul Ghafoor Khan who came in possession of the State about the year 1808. The present Chief is Lieutenant-Colonel His Highness Fakhrud-Daulah Nawab Sir Mohammad Iftikhar Ali Khan Bahadur, Saulat-e-Jang, G.B.E., K.C.I.E., who was born in 1883. His Highness is an Honorary Lieutenant-Colonel in the Indian Army. On the outbreak of War, His Highness the Nawab Sahib Bahadur placed all the resources of the State at the disposal of His Imperial Majesty the King Emperor. The State has so far contributed Rs. 1,58,676-10-3 to the various War Funds and invested Rs. 7,38,428-9-8 in various War Loans.

His Highness is assisted by a Council in the administration of the State as under :—

President.—His Highness the Nawab—Ruler.

Vice-President and Chief Minister.—Khan Bahadur Syed Bunyad Hussain, B.A. (Alig.), (Retired Deputy Commissioner, Punjab). (Political, Finance and Police).

Members.—Nasrat Mohammad Khan, M.A., LL.B. (Law and Justice); Sahibzada Mir Ghulam Zainul Abedin Sahib (Education and Medical); Molvi M. A. Ghani Sahib, B.S.E. (Secretary, P.W.D.); Lala Kali Ram (Retired Selection Grade Tehsildar, Delhi Improvement Trust) (Revenue).

A High Court with a Chief Justice and a Judge has also been established.

The soil of the State is among the richest in Malwa, being mainly of the best black variety bearing excellent crops of wheat, cotton and poppy. The average revenue is Rs. 15 lakhs.

Ratlam—Is the premier Rajput State in the Malwa Agency. It covers an area of 693 square miles, exclusive of the Kheda Tappa in Kushalgarh State, which pays an annual tribute to the Ratlam Darbar. The State was founded by Raja Ratansinghji, a great-grandson of Raja Udai Singh of Jodhpur, in 1652. The Ruler of Ratlam is the recognised head of the Rajputs of Malwa, and important caste questions are referred to him for decision. The State enjoys unrestricted Civil and Criminal powers with power to make its own laws. The present Ruler of Ratlam is Major-General His Highness Maharaja Shri Sir Sajjan Singh, G.C.I.E., K.C.S.I., K.C.V.O., extraordinary A.-D.-C. to His Majesty the King-Emperor. He was born in 1880, educated at the Daly College, Indore, received his military training in the Imperial Cadet Corps, and invested with full powers in 1898. His Highness served in World War I in France and Egypt from 1915 to 1918 was mentioned in despatches and received the Croix d'Officiers de Legion d'Honneur of the French Government. Attended London Coronation in May 1937 as His Majesty's A.-D.-C. Salute 13 guns, local 15 guns.

Heir-Apparent.—Maharaj Kumar Lokendra Singh, born 9th November, 1927.

Chief Minister.—Tribhovandas J. Raja, M.A., LL.B.

Datia State.—The rulers of this State, in the Bundelkhand Agency, are Bundela Rajputs of the Orchha House. The territory was granted by the Chief of Orchha to his son Bhagwan Rao in 1628; this was extended by conquest and by grants from the Delhi emperors. The present Ruler Lieut.-Colonel His Highness Maharaja Lokendra Sir Govind Singh Ju Deo Bahadur, G.C.I.E. (1932), K.C.S.I. (1918), born in 1886, succeeded in 1907, married 1902, enjoys a salute of 15 guns. He placed all his resources and his personal services at the disposal of the Imperial Government during the Great War and established a War Hospital at Datia. He is a progressive Ruler and has created a Legislative Council and introduced many useful and important reforms in his State. He is a Vice-President of the St. John Ambulance Association and a patron of the Red Cross Society. His Highness offered to the Imperial City of Delhi the life size marble statue of Lord Reading, a former Viceroy. He has built a hospital in the city named after Mrs. Heale and a girls' school named after Lady Willingdon. His Highness is a keen shot and has bagged more than 221 tigers and 130 panthers.

War contributions during World War II (1939-45): Rs. 1,12,775 to various war funds; Rs. 10,78,900 invested in War Bonds; placed at the disposal of the Govt. of India one M.T. Section and Duty Platoon; supplied 280 recruits and revolvers and other equipments totalling 371; sent 9,765 knitted and sewn garments and 1,124 mazazines for the use of Troops; established a free canteen at Datia at which many officers and other ranks were entertained; initiated a leave scheme for British Officers and B.O.Rs; about 2,000 of whom enjoyed their leave at Datia at State expense.

Orchha State.—The Rulers of this State are Bundela Rajputs claiming to be the descendants of the Gaharwars of Benares. It was founded as an independent State in 1048

A.D. It is the premier Treaty State of Bundelkhand—the other Bundela Princes being the clons of Orchha House. It entered into relations with the British by the Treaty made in 1812 A.D. His Highness Maharaja Sir Pratap Singh, G.C.S.I., G.C.I.E., died in March 1930 and has been succeeded by his grandson His Highness Saramad-i-Rajahai, Bundelkhand Shri Sawai Mahendra Maharaja Sir Virsingh Dev Bahadur, K.C.S.I., the present Ruler. The ruler of the State has the hereditary titles of His Highness Saramad-i-Rajahai Bundelkhand Maharaja Mahendra Sawai Bahadur and enjoys a permanent salute of 15 guns. The State has a population of 303,405 and an area of 2,080 square miles. The capital is Tikamgarh 36 miles from Lalitpur station on the G. I. P. Ry. Orchha, the old capital, has fallen into decay but is a place of interest on account of its magnificent buildings which were erected by Maharaja Bir Singh Dev I, the most famous ruler of the State (1605-1627). The present ruler has introduced many reforms in the State and has brought the administration to an up-to-date standard.

His Highness is assisted in the work of administration by a cabinet consisting of the following:—

President. His Highness; *Vice-President.*—Rao Raja Rai Bahadur Dr. Shyam Behari Misra, M.A., D.Litt. (Chief Adviser); *Members*:—R. S. Shukla, M.A., LL.B. (Chief Minister); Major M. N. Zutshi, P.A. (Home Minister).

SIKKIM.

Sikkim is bounded on the north and north-east by Tibet, on the south-east by Bhutan, on the south by the British district of Darjeeling and on the west by Nepal. The population consists of Bhutias, Lepchas, and Nepalese. It forms the direct route to the Chumbi Valley in Tibet. The main axis of the Himalayas which runs east and west, forms the boundary between Sikkim and Tibet. The Singalila and Chola ranges, which run southwards from the main chain, separate Sikkim from Nepal on the west, and from Tibet and Bhutan on the east. On the Singalila range rise the great snow peaks of Kinchinjunga (28,146 feet), one of the highest mountains in the world. The Chola range, which is much loftier than that of Singalila, leaves the main chain at the Dongkya La.

Tradition says that the ancestors of the Rajas of Sikkim originally came from eastern Tibet. The State was twice invaded by the Gurkhas at the end of the eighteenth century. On the outbreak of the Nepal War in 1814, the British formed an alliance with the Raja of Sikkim and at the close of the war the Raja was rewarded by a considerable cession of territory. In 1835 the Raja granted the site of Darjeeling to the British and receives Rs. 12,000 annually in lieu of it. Sikkim is thinly populated, the area being 2,818 square miles, and population 121,520, chiefly Buddhists and Hindus. The most important crops are maize and rice. There are several trade routes through Sikkim from Darjeeling District into Tibet. A number of good roads have been constructed in recent years. The present ruler, His Highness Maharajah Sir Tashi Namgyal, K.C.S.I. (1939), K.C.I.E. (1923), was born in 1893 and succeeded in 1914. His Highness was invested with full ruling powers on the 5th April 1918. The average revenue is Rs. 5,20,422.

Political Officer in Sikkim:—A. J. Hopkinson, C.I.E., I.C.S.

Asst. Political Officer in Sikkim:—Rai Sahib Rameshwar Prasad.

NORTH-WEST FRONTIER STATES.

The Indian States of the North-West Frontier Provinces are Amb, Phulera, Dir, Swat and Chitral. The area of the latter three is 3,000, 4,000 and 4,000 square miles and population 119,477, 146,014 and 107,909 respectively.

Amb State.—Area 225 square miles, including trans-border territory, population 47,916.

Ruler, Nawab Sir Mohammad Farid Khan, K.B.E. Headquarters, Shergarh (Summer) and Darband (Winter).

Amb State comprises the following territories:—1. The trans-Indus territory, which lies for a few miles on the right bank of the Indus River, opposite the extreme north-west corner of the Badhnak tract in the Haripur Tehsil of the Hazara District, and comprises a few villages only, of which Amb is the chief. 2. The major portion of the tract known as Feudal Tanawal, which lies on the left bank of Indus, and occupies the centre of the western half of the Hazara District.

The State of Phulera comprises the minor portion of Feudal Tanawal. It consists of 98 small villages with a population of 8,757 and is situated in Feudal Tanawal. The name of the Khan is *K. S.* Abdul Latif Khan.

Officer in charge of political relations with Amb and Phulera States.—K. S. Arbeb Mohd. Abbas Khan, B.A., P.C.S.

Chitral.—Runs from Lowarai top to the south of the Hindu-Kush range in the north, and has an area of about 4,000 square miles. The ruling dynasty has maintained itself for more than three hundred years, during the greater part of which the State has constantly been at war with its neighbours. It was visited in 1885 by the Lockhart Mission, and in 1889, on the establishment of a political agency in Gilgit, the ruler of Chitral received an annual subsidy from the British Government. That subsidy was increased two years later on condition that the ruler, Amen-ul-Mulk, accepted the advice of the British Government in all matters connected with foreign policy and frontier defence. His sudden death in 1892 was followed by a dispute as to the succession. The eldest son Nizam-ul-Mulk was recognised by Government, but he was murdered in 1895. A war was declared by Umra-khan of Jandul and Dir against the infidels and the Agent at Gilgit, who had been sent to Chitral to report on the situation, was besieged with his escort and a force had to be despatched (April 1, 1895) to their relief.

The valleys of which the State consist are extremely fertile and continuously cultivated. The internal administration of the country is conducted by His Highness Haji Mohd. Muzaffar-ul-Mulk the Mehtar of Chitral and the foreign policy is regulated by the Political Agent at Malakand. The ruler proceeded on pilgrimage to Mecca in February 1939.

Dir.—The territories of this State, about 3,000 square miles in area, include the country drained by the Panjkora and its affluents down to the junction of the former river with the Bajaur Rud. The Nawab of Dir is the overlord of the country, exacting allegiance from the petty chiefs of the clans. Dir is mainly held by Yusufzai Pathans, the old non-Pathan inhabitants being now confined to the upper portion of the Panjkora Valley known as the Dir Kohistan. A motor road has been constructed to Dir from Malakand. A private telephone line has been erected from Chakdarra to Dir, and a Petrol Pump was installed at Timul-Garah in 1939.

Swat.—The Ruler is a descendant of the famous Akhund Sahib of Swat. He consolidated his rule in Swat from 1917 to 1922, and was recognized by the Government of India as Wali of Swat in 1926. The area of the State is 4,000 square miles. The Headquarters of the State is at Saidu Sharif about 38 miles from Malakand and connected with Malakand by motor road.

The Wali has since annexed to his territory the areas of Ranoliya, Bankad, Tijal, Duber, Patan, Kandia, and Seo in the Indus Kohistan. He has built forts in these areas and has connected them by telephone.

There is a High School at Saidu.

Political Agent for Dir, Swat and Chitral—K. B. Nawab S. Mehbub Ali Khan, O.B.E., I.P.S.

STATES IN THE MADRAS PRESIDENCY.

The Madras Presidency includes 5 Indian States covering an area of 10,644 square miles. Of these, the States of Travancore and Cochin represent ancient Hindu dynasties. Pudukottai is the inheritance from a chieftain called the Tondiman; Banganapalle and Sandur, two petty States, of which the first is ruled by a Nawab, lie in the centre of two British districts, and are in the political charge of the Resident in Mysore.

Name.	Area sq. miles.	Population.	Estimated Gross Revenue in lakhs of rupees.
Travancore ..	7,661.75	6,070,018	623.64
Cochin ..	1,480	1,422,875	294.25
Pudukottai ..	1,179	438,348	34.42

Travancore.—This State, which has an area of 7,661.75 square miles and a population of 6,070,018 with a revenue of Rs. 623·65 lakhs, occupies the south-west portion of the Indian Peninsula, forming an irregular triangle with Cape Comorin as its apex. The early history of Travancore is in great part traditional; but there is little doubt that His Highness the Maharaja is the representative of the Chera dynasty, one of the three great Hindu dynasties which exercised sovereignty at one time, in Southern India. The petty chiefs, who had subsequently set themselves up as independent rulers within the State were all subdued, and the whole country, included within its boundaries, was consolidated and brought under one rule, by Maharaja Marthanda Varma (1729-58). The English first settled at Anjengo; a few miles to the north of Trivandrum, and built a factory there in 1684. In the wars in which the East India Company were engaged in Madura and Tinnevelly, in the middle of the 18th century, the Travancore State gave assistance to the British authorities. Travancore was reckoned as one of the staunchest allies of the British Power and was accordingly included in the Treaty made in 1784 between the East India Company and the Sultan of Mysore. The present relations of Travancore with the British Government are governed by the treaties of 1795 and 1805. Under the Treaty of 1795 an arrangement was entered into on a reciproca l basis for the protection of Travancore from foreign aggression. The Treaty of 1805 is one of "perpetual friendship and alliance" and the obligations of Travancore for purpose of defence were later commuted into an annual contribution of nearly eight lakhs of rupees payable by the State to the British Government.

Colonel His Highness the Maharaja (*b.* 7th November 1912) ascended the musnud on the 1st September 1924. During his minority the State was ruled by Her Highness Maharani Setu Lakshmi Bai, C.I., aunt of the Maharaja, as Regent on his behalf. His Highness was invested with ruling powers on the 6th November 1931. Educated privately. Has travelled extensively in India, Ceylon, the Dutch East Indies and Europe. The Andhra and the Annamalai Universities have conferred the honorary degree of D. Litt. on His Highness the Maharaja and Her Highness the Maharani, mother of His Highness the Maharaja. The Benares University has conferred the honorary degree of D. Litt. on Her Highness the Maharani.

A Legislative Council was established as early as 1888. The Legislature was last re-constituted in 1932, when a bicameral body was instituted. The two Chambers, viz., the Sri Mulam Assembly and the Sri Chitra State Council have a predominant elected non-official majority. Both Chambers possess the right to vote on the annual Budget, to move resolutions and ask questions. Both Chambers have also the right to initiate legislation. The elections to the Assembly are based on a wide franchise. Differences of opinion between the two Chambers are to be settled by a Joint Committee consisting of an equal number of members selected by each Chamber. Women are placed on a footing of complete equality with men in the matter both of franchise and membership in the Legislature. In the more important towns and villages there are Municipal bodies and Village Panchayats and Unions with a predominant non-official majority functioning in the field of Local and Self-Government.

A Press Communique dated 16th January 1946 announces His Highness's intention to promulgate constitution Reforms of far-reaching significance. Subject to the rights and prerogatives of the Sovereign, the new reforms when implemented will be thoroughly democratic in character. There will be two Houses of Legislature of co-equal status both wholly composed of elected representatives of the people. The Lower House will be elected on the basis of territorial constituencies and universal adult suffrage for men and women, and the Upper House will be composed of elected representatives of various interests and professions and will be functional and facultative in character. There will be no nominations and the President and Deputy President of both the Houses will be elected by the Legislature. The new constitutional Scheme will be modelled on that of the United States of America in the matter of relation between the Legislature, the Executive and the Judiciary.

The State has joined the Indian State Forces Scheme. H. H. The Maharaja is the Colonel-in Chief of the Travancore State Forces and Honorary Colonel of the 12th Malabar Battalion. He is also an Honorary Lieutenant-Colonel in the British Army.

The State is in the forefront in the matter of education. According to the census of 1941, the percentage of literates on total population is 47·1 for the whole State, 58·1 for males and 36.0 for females; and the percentage of literates aged 5 years and above is 55.0 for the whole State, and 67.9 and 42.1 for males and females respectively.

A Scheme of Universal and compulsory Primary Education on the basis of a ten-year plan has been initiated.

The principal food-grain grown is rice, but the main source of agricultural wealth is the cocoanut. Other crops are pepper, arecanut, jack-fruit, sugar-cane and tapioca. Rubber and tea are among other important products.

The State is rich in forest resources. Besides valuable timber like teak, blackwood, ebony and sandalwood, there are soft woods and reeds suitable for making paper, cardboard and artificial silk. Among the mineral resources of the State may be mentioned the valuable mineral sands like monozite, ilmenite, Zircon, kutile and Zillimanite, and the abundant deposits of graphite, mica and kaolin of exceptional quality.

The sands in various parts of the coast-line of the State extending over about 90 miles in length as well as in certain other localities contain considerable quantities of Ilmenite, Zircon and Thorium bearing Monazite deposites which are the property of the Travancore Government. The policy of the Government in regard to the exploitation of Thorium deposits is on the basis of self-control and disposal by the Government. Government propose to start research and do as much work within the State on all the varieties of mineral sands, as possible. Extraction of oil from copra, spinning of coir yarn, manufacture of coir mats, matting, rugs, etc., weaving of handloom fabrics, production of tea and rubber, manufacture of rubber goods, ceramic goods, glassware and paper, fabrication of tiles, extraction of mineral sands, refining of sugar, manufacture of salt, chemical and fertilizers and production of aluminium are the chief industries pursued in the State.

Among other industries pursued on a cottage industry basis are ivory carving, wood carving, coir making, embroidery and lace work, plaiting of fancy and utility articles with screwpine and palmyra leaves, making of jaggery from palmyra juice.

In November 1936 His Highness the Maharaja issued the historic Temple Entry Proclamation which has been hailed all over the world as a great piece of social and religious reform. In 1944 His Highness issued another Proclamation abolishing the death penalty provided for certain offences under the Travancore Penal Code.

By another Proclamation in November 1937 a University designed, in addition to ordinary studies, specially to promote technological studies and research has been established.

His Highness is keenly interested in the development of industries in the State and the inauguration of the Pallivasal Hydro-electric Scheme which makes available cheap power to every village in the State marks an epoch in the industrialisation of the country. The Rubber Factory and the Toy Factory at Trivandrum, the Ceramic Factory at Kundara, the Sri Chitra Mill at Alwaye, the Travancore Sugars and Chemicals Ltd., comprising a Sugar Factory at Thuckalay, a Distillery at Nagercoil and a Factory for the manufacture of pharmaceutical products at Trivandrum, the Aluminium Factory at Alwaye, the Plywood Factory at Punalur and the glass Factory at Alwaye are among the foremost industrial concerns established under Government auspices with a view to the more profitable utilisation of indigenous resources and the better employment of indigenous talent. Schemes are well under way for the establishment of factories for the manufacture of cement, cane-sugar, fertilizers, caustic soda, sulphuric acid, potassium chlorate, synthetic ammonium sulphate, acetic acid and calcium carbide. "The Travancore Fertilizers and Chemicals" has been started with a capital of five crores of rupees, and the construction of a fertilizer factory at Alwaye for the manufacture of Ammonium Sulphate and other important Chemicals is proceeding apace. Measures for the establishment of spinning mills are also in progress. Arrangements are being made for the establishment of a cane-sugar factory in Central Travancore. Facilities for long-term loans to agriculturists and small industrialists are extended by the Credit Bank established by Government. The nationalisation of the motor transport system of the State has ensured an efficient, safe and cheap transport with considerable advantage to trade and commerce. Government have also taken steps for the development of coastal traffic, and a company styled, the Travancore Steam Navigation Company, has been started.

His Highness evinces great interest in matters connected with art and culture and has established at Trivandrum two Art Galleries known as the Chithralayam and the Renga Vilasom Art Gallery, a Classical Dance Centre, an Academy of Music and a Broadcasting Station.

The State is well provided with roads and with a natural system of backwaters, besides canals and rivers navigable for country crafts. A concrete road 51 miles long connecting the capital with Cape Comorin has been recently completed. A line of railway about one hundred miles in length cuts across the State from east to west and then runs along the coast to the Capital. The Capital is Trivandrum. There exists a weekly air mail service between Bombay and Trivandrum, and Trivandrum and Trichinopoly which is on the Madras-Colombo Air Mail route.

War Efforts.—On the declaration of War in September 1939 His Highness the Maharaja placed the entire resources of the State at the disposal of His Majesty the King Emperor. He has presented a trawler and minesweeper, "H.M.I.S. Travancore" at a cost of Rs. 6½ lakhs to the Royal Indian Navy and two fighter planes at a cost of Rs. 1½ lakhs to the Royal Air Force. He has, besides, contributed Rs. 15,80,350 to H.E. the Viceroy's War Fund, Rs. 2,00,000 to H.E. the Viceroy's Comforts Fund, Rs. 1,10,000 for Red Cross Work Rs. 1,50,000 for Women's War Work, Rs. 50,000 to the King George's Fund for Sailors, Rs. 15,000 to H.E. the Governor's War Fund, Rs. 60,000 to St. Dunstan's Fund and Rs. 1,000 to General de Gaulle's Fund for amenities to the French prisoners of war. Her Highness Maharani Setu Parvati Bayi has contributed Rs. 1,00,000 to His Excellency the Viceroy's War Fund and also an ambulance car. A branch of the Red Cross Organisation has been opened in the State with the Dewan, Sachivottama Sir C. P. Ramaswami Iyer as President. His Highness has also sent the first and second infantry units of the State Forces for active service. Generous and voluntary contributions have also been made by officials and non-officials alike to the War Purposes Fund. Large quantities of cocoanut shell, charcoal, coir goods, including tent components, fabricated steel works, ceramic ware, rubber goods, etc., have been supplied from the State for War Purposes. The total monetary contributions of the State to war effort including those from the Public amounts to Rs. 35,12,580-7-9 (State 30,51,050; Public 4,61,530-7-9). Further His Highness contributed about 50,000 men to the Assam Labour Force who built the road to China over which the Allied Armies marched to Victory.

Dewan.—Sachivottama Sir C. P. Ramaswami Aiyar, K.C.S.I., K.C.I.E., LL.D.

Cochin.—This State on the south-west coast of India is bounded by the Malabar District of the Madras Presidency and the State of Travancore. Very little is known of its early history. According to tradition, the Rajas of Cochin hold the territory in right of descent from Cheraman Perumal, who governed the whole country of Kerala, including Travancore and Malabar, as Viceroy of the Chola Kings about the beginning of the ninth century, and afterwards established himself as an independent Ruler. In 1502, the Portuguese were allowed to settle in what is now British Cochin and in the following year they built a fort and established commercial relations with the State. In the earlier wars with the Zamorin of Calicut, they assisted the Rajas of Cochin. The influence of the Portuguese on west coast began to decline about the latter part of the seventeeth century, and in 1663 they were ousted from the town of Cochin by the Dutch with whom the Raja entered into friendly relations. About a century later, in 1759, when the Dutch power began to decline, the Raja was attacked by the Zamorin of Calicut, who was expelled with the assistance of the Raja of Travancore. In 1776, the State was conquered by Hyder Ali, to whom it remained tributary and subordinate, and subsequently to his son, Tippu Sultan. A treaty was concluded in 1791 between the Raja and the East India Company, by which His Highness agreed to become tributary to the British Government for his territories which were then in the possession of Tippu and to pay a subsidy.

On the demise of His Highness Sri Ravi Varma, His Highness Sri Kerala Varma succeeded to the *gadi* on 31st January 1946. The State is governed by His Highness the Maharaja, and the executive authority is exercised by His Highness through the Diwan in relation to "reserved subjects" and through two Ministers appointed under the Government of Cochin Act, in relation to "transferred subjects." The forests of Cochin form one of its most valuable assets. They abound in teak ebony, blackwood and other valuable trees. Rice is the chief cultivation. Cocoanuts are largely raised in the sandy tracts and their products form the chief exports of the State. Communications by road and backwaters are good, and the State owns a line of railway from Shoranore to Cochin Harbour Terminus, and a Forest Steam Tramway used in developing the forests.

Resident for Madras States.—Lt.-Col. C. G. N. Edwards, C.I.E.

Dewan.—Sir George Boag, K.C.I.E., C.S.I.

Pudukkottai.—(Area 1179 square Miles; Population 4,38,318). This State is bounded on the north and west by Trichinopoly, on the south by Ramnad and on the east by Tanjore. There are evidences of pre historic settlements all over the State and some villages are mentioned in Tamil works of the early centuries of the Christian era. In early times, a part of the State belonged to the Chola Kings and the southern part to the Pandya Kings of Madura. A large part of the State was under Pallava rule from the 7th Century A.D. until the establishment by Vijayalaya, in the 9th Century, of the Second Chola Empire. When the Chola power declined, the country was ruled for some time by the Hoysalas and, later, was added to the second Pandyan Empire. In the 14th Century, it was included in the Vijayanagar Empire and from the 16th Century formed part of the Nayak Kingdom of Madura. The State is rich in inscriptions, temples and art treasures belonging to all the dynasties. Towards the close of the 17th Century, the Tondiman chief of Ambukoil, now a village in the State, whose ancestors had migrated from Tirupati, got possession of modern Pudukkottai town and founded the State. The State expanded to its present limits in the 18th Century. Relations with the English began during the Carnatic Wars. During the siege of Trichinopoly by the French in 1752, the Tondiman of the time did good service to the Company's cause by sending them provisions, although his own

country was, on at least one occasion, ravaged as a consequence of his fidelity to the English. In 1756, he sent some of his troops to assist Muhammad Yusuf, the Company's sepoy commandant, in settling the Madura and Tinnevelly countries. Subsequently, he was of much service in the wars with Hyder Ali and Tippu Sultan. His services were rewarded by a grant of territory subject to the conditions that it should not be alienated (1806). Apart from that, there is no treaty or arrangement with the Raja. His Highness Sri Brihadamba Das Raja Rajagopala Tondiman Bahadur, the present ruler was installed as Raja on 19th November, 1928. He was invested with ruling powers on 17th January 1944. He is assisted by an Executive Council consisting of a Dewan and two Councillors. The various departments are constituted on the British Indian model. The main occupation of the people is agriculture; the principal food crops are ragi and rice, and pulses are largely grown. The forests which cover about 1 7th of the State contain only small timber. The State is well provided with roads. The main line of the South Indian Railway from Madras to Danushkodi, which forms the shortest route to Ceylon passes through the State. Pudukkottai is the only municipal Town.

Resident for the Madras States.—Lt. Col. C. G. N. Edwards, C.I.E.

Banganapalle.—This State, area 275 square miles, is in two detached portions which in the 18th century passed from Hyderabad to Mysore and back again to Hyderabad. The control over it was ceded to the Madras Government by the Nizam in 1800. The present Ruler is Nawab Mir Fazle-e-Ali-Khan Bahadur, who enjoys a salute of 9 guns and is a member of the Chamber of Princes in his own right. The Nawab pays no tribute to the Crown and maintains no military force. The chief food-grain is cholam. The revenue of the State is nearly 4 lakhs. The State has been transferred from the political charge of the Resident for the Madras States to that of the Hon'ble the Resident in Mysore on 1st January 1939.

Resident.—The Hon'ble Lieut.-Colonel Sir Philip Gaisford, C.I.E.

Dewan.—Khan Sahib Syed Imam Sahib Bahadur, B.A.

Sandur.—Sandur is the only Mahratta State in South India and is in political relations with the Government of India through the Resident in Mysore. The State was conquered early in the eighteenth century by Siddoji Rao, ancestor of the present Ruler, from a poligar of the Bedar tribe. During the time of his son and successor, Morar Rao, the state reached the zenith of its territorial expansion. In the Carnatic and Mysore wars Morar Rao was the staunchest ally of the British. The State came into political relations with the British in 1818. In 1876 the proper style of address of the Ruler was acknowledged by the Government of India. This is one of the 146 important States which received Canning's Sanad of Adoption in 1862. The Ruler also has vested interests in Gajendragad, a jaghir in Bombay Presidency, held on his behalf by certain junior members of his family. The State pays no tribute to the Crown. The Ruler is the fountain-head of all authority—judicial, legislative and executive—and exercises powers of life and death. He has established an independent Chief Court presided over by the senior member of the Madras judicial service, whose services have been lent to the State under a special arrangement with the Madras Government. There is a State Council to initiate all legislative measures and an Executive Council in charge of the administration. The Ruler has revived the ancient institution of the Darbar to function as an active participant in the Government of the State. By the Sandur State Constitution Act of 1946 the Ruler has consolidated all measures for the participation of the people in their own government. A popular minister known as the Mantrasabha, takes equal part with the nominated minister (or two nominated ministers) in the administration, and further facilities for quickly reaching the democratic ideals, towards which the state has been marching for the past 16 years, have been made available to the people of Sandur by this Act.

An educational institution, Shri Chatrapathi Shivaji Vidyamandir, provides both moral and physical education and also imparts instructions upto the Matriculation standard.

Sandur State holds extensive and excellent deposits of very important economic minerals, especially manganese and iron. Dr. N. Jayaraman, D.Sc., of the Indian Institute of Science, Bangalore, is of the opinion that the manganese ore in the State, especially in certain localities, is very rich in manganese and contains a high percentage of pyrolusite. Anu Ghosh of Bengal is of the opinion that "area for area Sandur deposits probably contain the largest manganese reserves so far found." Sandur manganese was formerly exported largely to Continental markets, mainly to Belgo-Luxemburg consumers, to the United Kingdom and Japan and commanded first grade unit prices from Continental buyers. It has been found to be very useful in the manufacture of ferro-manganese.

The State has also extensive deposits of red and yellow oxide of iron which have been found to be very useful in the manufacture of paints by leading firms in Bombay and Calcutta, who import this commodity in large quantities. The gold quartz found in the area in the vicinity of Taramagari contains indications of promising reefs at very moderate depths. Enormous quantities of high grade jasper, most useful for the manufacture of mosaic tiles, is found in Sandur hills. Dr. V. S. Dubey of the Benares Hindu University, who visited the State recently, reported very favourably on all these deposits. Sandur forests abound in sandalwood which is as rich in oil content as that of Mysore.

The present Ruler is Raja Shrimant Yeshwant Rao Hindurao Ghorpade Mamlakatmadar Senapathi.

President of the Executive Council.—Shrimant Sowbhagyasampanna Ranisaheb Maharaj.

Resident.—The Hon'ble Lieut.-Col. P. Gaisford, C.I.E.

Western Kathiawar Agency.—The Western Kathiawar Agency, with Headquarters at Rajkot Civil Station, was constituted by the amalgamation in 1923 of two (Sorath and Halar) out of the four *Prants* or Districts into which the province of Kathiawar was formerly divided. The combined district which was at first named "The Western Kathiawar States" was given its present designation in 1927.

Political Agent: Major P. C. Hailey, O.B.E.

Bhavnagar.—This State lies at the head and west side of the Gulf of Cambay. The Gohel Rajputs, to which tribe the Ruler of Bhavnagar belongs, are said to have settled in the country about the year 1260, under Sejakji from whose three sons—Ranoji, Sarangji and Shahji—are descended respectively the rulers of Bhavnagar, Lathi and Palitana. An intimate connection was formed between the Bombay Government and Bhavnagar in the eighteenth century when the ruler of that State took pains to destroy the pirates who infested the neighbouring seas. The State was split up when Gujarat and Kathiawar were divided between the Peshwa and the Gaekwar; but the various claims over Bhavnagar were consolidated in the hands of the British Government in 1807. The State pays an annual tribute of Rs. 1,28,060 to the British Government, Rs. 3,581-8-0 as Peshkashi to Baroda and Rs. 22,858 as Zortalbi to Junagadh. Lt.-Col. His Highness Maharaja Sir Krishna Kumarsinhji succeeded to the *gadi* on the death of his father, Maharaja Sir Bhavsinhji, K.C.S.I., on 17th July 1919 and was invested with full powers on 18th April 1931. The Principal officers of the State are A. P. Pattani, M.A. (Cantab.), Dewan; N. M. Surati, B.A., LL.B., Naib Dewan; M. H. Gandhi, M.A., LL.B., Bar-at-Law, Judicial Assistant; R. S. Bhatt, M.A. (London), Personal Assistant and H. K. Mehta, Education Assistant. A fixed privy purse for His Highness, the separation of Judicial from executive functions, and the decentralisation of authority are the noteworthy features of the administration. A Dhara Sabha (Legislative Assembly) consisting of 55 members, of which the Dewan is the President, was established by His Highness in 1941 and one of its non-official member is appointed to the Executive.

The chief products of the State are grain, cotton, sugar-cane and salt. The chief manufactures are oil, copper and brass vessels and cloth. The Bhavnagar State Railway is 307 miles in length. The capital of the State is the town and port of Bhavnagar, which has a good and safe harbour for shipping and carries on an extensive trade as one of the principal markets and harbours of export for cotton in Kathiawar. Bhavnagar supports 270 State Lancers and 250 State Infantry.

Population (in 1941) was 6,18,429, of whom 91·6 per cent. were Hindus (including Jains), and 8 per cent. Mahomedans. The average income for the last five years was Rs. 80,39,927, exclusive of Railway income, and the average expenditure Rs. 89,84,626. Under Agency Notification No. 105 dated 20th June 1943 Chok Datta, Songadh as well as Pallad Taluka of the old Pallad Thana have been attached to the Bhavnagar State with effect from 28th June 1943.

By another Notification No. 192 of 30-11-1943, the States of Vala, Lathi and Jasdan were attached to the State with effect from 7th December 1943.

Dhrangadhra State is a State of the First Class in Kathiawar with a population of nearly one lakh and an area of 1,167 square miles, exclusive of the Dhrangadhra portion of the Rann of Cutch. The ruler of Dhrangadhra is the head of the Jhala family of Rajputs, originally called the Makvanas. This Rajput clan is of great antiquity having migrated to Kathiawar from the North, establishing itself first at Patri in the Ahmedabad District, then moving to Halvad and finally settling in its present seat. Being the guardians of the North-Eastern marches of Kathiawar, they had to suffer repeatedly from the successive inroads of the Mahomedans into that Peninsula, but after suffering the various vicissitudes of war they finally established themselves in Halvad. The States of Wankaner, Limbdi, Wadhwan, Chuda, Sayla and Than-Lakhtar are off-shoots from Dhrangadhra in Kathiawar and Jhalawar and other estates like Sadadi, Delwara, Tana, Gogunda, Kunadi and Narwar in Rajputana. His Highness Maharajadhiraj Maharana Shri Mayurdhwajsinhji, Maharaja Raj Saheb, is the ruler of the State and the head of all the Jhalas. The administration of the State is conducted by His Highness with the assistance of the State Council of which His Highness is the President and the other two members are G. K. Kaddi, M.A. (Lond.), as Vice-President and W. G. Subedar, B.Sc., LL.B. as General member. The soil being eminently fit for cotton cultivation, the principal crops are long stapled cotton and cereals of various kinds. Excellent building and ornamental stone is quarried from the hills situated within the State Salt of superior quality called Wadagara and Magnesium chloride and other bye-products of salt are also manufactured in the State salt works at Kuda which offer particularly inexhaustible supplies for their manufacture. To utilize these valuable resources, the State built a huge factory in Dhrangadhra, known as the Shri Shakti Aikali Works, now converted into a limited Company known as the Dhrangadhra Chemical Works, Limited for the manufacture on a large scale of Soda Ash, Caustic Soda and Soda Bicarb as bye-products of salt. There is also another company called Mayurdhwaj Magnesia Works Ltd., manufacturing magnesia at Nimaknagar. The capital is Dhrangadhra, a fortified town, 75 miles west of Ahmedabad.

Dhrangadhra State owns the Railway from Wadhwan Junction to Halvad, a distance of 40 miles, which is worked by the Morvi Railway. An extension of this line to Mailya is under contemplation. A railway siding has been laid from Dhrangadhra to Kuda—a distance of 11 miles—to facilitate the salt traffic.

Gondal State.—The Ruling Prince of Gondal is a Rajput of the Jadeja stock with the title of H. H. Maharaja Thakore Saheb, the present Ruler being H. H. Bhojrajji who ascended the *gadi* on the 9th March 1944 on the demise of H. H. Maharaja Bhagwat Sinhji, G.C.S.I., G.C.I.E. on the 9th March 1944. H. H. Maharaja Bhojrajji received his education at Eton School and Balliol College, Oxford, England. The early founder of the State, Kumbhoji I, had a modest estate of 20 villages. Kumbhoji II, the most

powerful Chief of the House, widened the territories to their present limits by conquest; but it was left to His late Highness Maharaja Bhagwant Sinhji to develop its resources to the utmost, and in the words of Lord Reay, Governor of Bombay, by its "importance and advanced administration to get it recognised as a First Class State." The State pays a tribute of Rs. 1,10,721. The chief products are cotton, groundnuts and grain and the chief manufactures are cotton and woollen fabrics and gold embroidery. Gondal has always been pre-eminent amongst the States of its class for the vigour with which public works have been prosecuted, and was one of the earliest pioneers of railway enterprise in Kathiawar, having initiated the Dhasa-Dhoraji line. It owns the Dhasa-Jam Jodhpur section called the Gondal Railway with its Kunkavav Bagasra and Kunkavav-Derdi Extensions and manages it along with the Porbandar State Railway and the Jetalsar-Rajkot Railway subsequently built in partnership with other Indian States in Kathiawar. There are no export and import dues, the people being free from taxes and dues. Gondal stands first in Kathiawar in respect of the spread of education, which is free, female education in the State being compulsory. Rs. 40 lakhs have been spent on irrigation, tanks and canals, water-supply and electricity to the towns of Gondal, Dhoraji and Upleta. The capital is Gondal, a fortified town on the line between Rajkot and Jetalsar.

Junagadh State.—A first-class State under the Western India-States Agency lying in the south-Western portion of the Kathiawar Peninsula between 24°-44′ and 21°-53′ North latitude; 70° and 72° East longitude with the Halar division of the province as its northern boundary and Godhilwad Prant to its east. Besides Mangrol, it includes 21 Talukas attached to it under the attachment scheme. It is bounded on the south and west by the Arabian Sea. The State is divided into 12 Mahals. It has 16 ports, the principal one being Veraval. The chief rivers in the State are the Bhadar, Uben, Ozat, Hiran, Saraswati, Machhundri, Singoda, Meghal, Vrajmi, Raval and Sabli. The capital town of Junagadh, which is one of the most picturesque towns in India, is situated on the slopes of the Girnar and the Datar Hills. In antiquity and historical interest it yields to none. The Upperkot or old citadel contains interesting Buddhist caves and the city and its neighbourhood are also honeycombed with their remains. There are a number of fine modern buildings in the town. The famous Asoka inscription of the Buddhist era, carved out on a big bolster of black granite, is housed at the foot of the Girnar Hill, which is sacred to the Jains, Shivaites, Vaishnavites and other Hindus. To the south-east of the Girnar Hill lies the extensive Gir Forest comprising 495 square miles. It supplies timber and other natural products to the residents of the State and the neighbouring districts and is unique in being the last-refuge of the Indian lion.

The total area of the State is 4,017 square miles. The population, according to the census of 1941, is 8,16,844. These figures include those of Mangrol and the Attached Units. The Annual revenue of the State proper amounts to about 1 crore and 39 lakhs.

Until 1472, when it was conquered by Sultan Mahomed Begda of Ahmedabad, Junagadh was a Rajput State ruled by Chiefs of the Chuda sama tribe. During the reign of Akbar it became a dependency of Delhi under the immediate authority of the Moghal Viceroy of Gujarat. About 1735 when the representative of the Moghuls lost his authority in Gujarat, Sherkhan Babi, the ancestor of the present Babi Ruler, expelled the Mogul Governor, and established his own rule. The ruler of Junagadh first entered into engagements with the British Government in 1807.

The principal products of the State are cotton, bajri, juwar, sesamum, wheat, rice, sugar-cane cocoanuts cereals, grass, timber, stone, castor-seed, fish, country tobacco, groundnuts, bamboos, etc., while the chief manufactures are ghee, molasses, sugarcandy, copper, and brassware, dyed cloth, gold and silver embroidery, pottery, hardware, leather bamboo furniture, etc.

The State pays a tribute of Rs. 28,394 annually to the Paramount Power and Peshkashi of Rs. 37,210 to His Highness the Gaekwar; on the other hand, it receives a tribute styled Zortalbi amounting to Rs. 92,421 from not less than 134 States and Talukas and from the Baroda State for its Amreli Prant in Kathiawar, a relic of the days of Mahomedan supremacy. The State has its own forces consisting of Lancers and the Mahabat Khanji Infantry, the sanctioned strength of the former being 173 and of the latter 219, inclusive of Bag-pipe Band.

The Chief of Junagadh bears the title of Nawab. The present Nawab is Major His Highness Sir Mahabat Khanji III, G.C.I.E., K.C.S.I., who is the ninth in succession and seventh in descent from His Highness Bahadurkhanji I, the founder of the Babi-Family of Junagadh in 1735 A.D. His Highness the Nawab Saheb was born on 2nd August 1900 and succeeded to the *gadi* in 1911, visited England in 1913-14, received his education at the Mayo College, Ajmer, and was, invested with full powers in March, 1920. His Highness is the Ruler of the Premier State in Kathiawar and ranks first amongst the Chiefs of Kathiawar. His Highness exercises plenary powers, and enjoys a personal and local salute of 15 guns and Dynastic salute of 13 guns. Languages spoken: Gujarati and Urdu.

Heir-Apparent—Nawabzada Mahomed Diawarkhanji.

President of the Council.—H. H. the Nawab Saheb Bahadur.

Vice-President of the Council, and Dewan of the State.—Khan Bahadur Abdul Kadir Mohamed Hussain, C.I.E.

Nawanagar State, on the southern shore of the Gulf of Cutch, has an area of 3,791 square miles. The Maharaja of Navanagar is a Jadeja Rajput by caste, and belongs to the same family as the Rao of Cutch. The Jadejas originally entered Kathiawar from Cutch, and dispossessed the ancient family of Jethwas then established at Ghumli. The town of Jamnagar was founded in 1540. The present Jam Saheb is

Colonel His Highness Maharaja Jam Shri Digvijayasinhji Saheb, G.C.I.E., K.C.S.I., A.D.C., who succeeded in April 1933. The principal products are grain, cotton and oil-seeds shipped from the ports of the State. A small pearl fishery lies off the coast. The State pays a tribute of Rs. 1,20,093 per annum jointly to the British Government, the Gackwar of Baroda and Zortalbi to the Nawab of Junagadh. The State maintains Modified Headquarters and one squadron of Shri Huzur Bodyguard and one full battalion of Shri Shatrushalya Infantry. The capital is Jamnagar, a flourishing town, nearly 4 miles in circuit, situated 5 miles east of Bedi, a modern port affording all facilities. The State owns a Railway which traverses through its entire territory and is part of the Railway system connecting the Peninsula with the mainland. Population 5,01,006. Revenue nearly Rs. 98 lakhs.

Dewan:—Khan Bahadur Merwanji Pestonji, B.A., LL.B.

Military Secretary and Home Member.—Col. Maharaj Shree Himmatsinhji.

Personal Assistant.—Major Geoffrey Clarke.

Cutch.—The State is bounded on the north and north-west by Sind, on the east by the Palanpur Agency, on the south by the Peninsula of Kathiawar and the Gulf of Cutch and the south-west by the Indian Ocean. The State has an area of 8,249·5 square miles, exclusive of the great salt marsh called the Rann of Cutch. The capital is Bhuj. From its isolated position, the special character tic of its people, their distinctive dialect, and their strong feeling of personal loyalty to their ruler, the peninsula of Cutch has more of the elements of a distinct nationality than any other State in Western India. The earliest historic notices of the State occur in the Greek writers. Its modern history dates from its conquest by the Sind tribe of Samma Rajputs in the thirteenth century. The section of the Samma forming the ruling family in Cutch were known as the Jadejas or "children of Jada". A non-tributary State, its treaty with the British dates from 1816. There is a fair proportion of good arable soil in Cutch, and wheat, barley and cotton are cultivated. The State is rich in gypsum, clays and lime-stone and has a good proportion of iron and lignite. Cutch is noted for its beautiful embroidery and silverwork and its manufactures of silk and cotton are of some importance. Trade is chiefly carried by sea and the country-craft traffic mainly centers round Mandvi and Tuna. The State has a modern port of Kandla, which is a natural harbour. It has deep calm-water approaches and a reinforced concrete pier along which large ocean-going ships can lie. The Ruling Chief is the supreme authority. There are altogether 625 schools with 27,300 pupils.

There are six Government hospitals and fourteen Government dispensaries. The State is served by 72 miles of railway and 270 miles of roads. Irrigation has been well-developed in Kutch and there are today 18 dams irrigating 6,375 acres of land. The main industrial establishments of Kutch are: (1) The United Salt Works, (2) The Anjar Spinning and Weaving Mill, (3) The Kutch Oil and Allied Industries, (4) The Kutch Match Works, and (5) The Merau Metal works.

The present ruler His Highness Maharaja Dhiraj Mirza Maharao Shri Vijayaraji Savai Bahadur, G.B., succeeded to the *gadi* in 1942. Population, 5,00,800. Revenue: about Rs. 57 lakhs. Salute: 17 guns. (Local Salute being 19 guns). Dewan: Dewan Bahadur S. K. Navampalli, B.A., LL.B.

Porbandar.—Porbandar State, on the Western Coast of the province of Kathiawar, comprises an area of 642¼ square miles and has a population of 1,46,648 according to the 1941 Census. The capital of the State is Porbandar, a flourishing port having trade connections with Java, Burma, Persian Gulf, Africa and important Continental Ports. The State has its own Railway. The well-known Porbandar stone is largely exported to important places in as well as outside India. Porbandar Ghee (butter) is also well-known and is largely exported to Africa. There is a fully equipped laboratory at Porbandar where ghee is graded and given Government AGMARK seals and labels. The Cement Factory of The Associated Cement Cos Ltd. was established at Porbandar in 1912. It manufactures Ganpati Brand Portland Cement of the best quality. Among more recent industries may be mentioned the establishment of the Nadir Salt Works, the Maharana Spinning and Weaving Mills, the Natwar Match Works, the Hosiery Works, of the Swastik Industries Ltd. the Vishwakarma Engineering Works doing fine engine turning on jewels in metals, Paint and Distemper Manufacture, etc. A Vegetable ghee factory is being set up in the State. Porbandar is also an Air Port with commodious Hangar, Rest House, etc. There is a State Bank at Porbandar and also a Branch of the Imperial Bank of India. The State maintains a Military Force.

The present Ruler, Captain His Highness Maharaja Rana Saheb Shri Sir Natwarshinhji Bahadur, K.C.I.E., was born on the 30th June, 1901 and ascended the *gadi* on the 20th January, 1920.

Heir-Apparent.—Maharaj Kumar Shri Labdhan.

Radhanpur is a first-class State, with an area of 1,150 square miles, which is held by a branch of the illustrious Babi family, who, since the reign of Humayun, have always been prominent in the annals of Gujarat. The present Ruler is His Highness Nawab Murtazakhanji Jorawarkhanji. The State maintains a Police force of 170. The principal products are cotton, wheat and grain. The capital is Radhanpur town, a considerable trade centre for Northern Gujarat and Cutch. Another town of importance is Sami, which has a cotton press and 5 ginning factories. There are two ginning factories at Munpur, one at Lolada and one at Sanke-shwar which is a great centre of Jain pilgrimage all the year round. Gotarka, Dev, and Trakod Loti are also the principal places of pilgrimage for Mahomedans, Vaishnavas and Brahmins respectively.

There are several ancient monuments in the State, viz., Patohkote at Radhanpur, Jhalore's Teba at Subapura, Loteshvara Mahadev at Loti,

Sankeshvara temple at Sankeshvar, Waghel tank at Waghel, Varanath place at Waghel, Tatleshwar Mahadev at Fatehpur, Rajpur Bhotava, old Masjid at Munjpur, Place of Asan at Gotarka, Mahabali Pir's Dargah at Gotarka and Nilkantha Mahadev at Kuwar.

There is also an Anath Ashram for the poor known as "The Husseinbakhte Saheba Mohobat Vilas."

His Highness the Nawab Saheb Bahadur has established a Bank named "Vadhiar Bank" to lend money to cultivators and others on easy terms, and thus save them from the clutches of money-lenders.

Idar.—Idar is a first-class State in the Rajputana Agency with an area of 1,366 square miles and an average gross revenue of about 55 lakhs. The present Ruler of Idar, H. H. Maharaja Shri Himmat Singhji Bahadur, is a Rajput of the Rathod clan. He was born in 1899 A.D. and ascended the *gadi* in 1931 on the demise of His late Highness Maharaja Sir Dowlat Singhji. His Highness accompanied His late Highness Lt.-Col. Sir Dowlat Singhji to Europe when the latter went to attend the Coronation of His Majesty the King-Emperor in London and acted as Page to his Imperial Majesty at the Coronation Darbar held at Delhi in 1911. The subordinate Feudatory Jagirdars are divided into three classes. The Jagirdars belonging to the class of Bhayats are cadets of the Ruling House to whom grants have been made in maintenance or as a Jiwarak. Those known as Sardar Pattawats are descendants of the military Sardars who accompanied Anand Singhji and Raj Singhji, the founders of the present Marwar dynasty who took possession of the State in the first quarter of the eighteenth century and to whom grants of land were made by Maharaja Shiv Singhji in 1741 A.D. on condition of military service. In the class of the Bhoomias are included all subordinate Feudatories who were in possession of their Pattas prior to the advent of the present Marwar dynasty. The pattas they hold were acquired by their ancestors by grant from the former Rao Rulers of the State. The Maharaja receives about Rs. 52,427 annually on account of Khichdi and other Raj Haks from his subordinate Sardars the tributary talukas of the Mahi Kantha Agency and others, and pays Rs. 30,340 as Ghasdana to the Gaekwar of Baroda through the British Government. His Highness enjoys a salute of 15 guns. One State eight Talukas and two non-jurisdictional estates with a total area of 124 square miles have been attached to the Idar State in the recent constitutional changes.

Vijaynagar.—The State has an area of 135 square miles with a population of 13,942 and an annual revenue of Rs. 2,30,596. The Ruler is a well educated and intellectual Rathod Rajput. Leaving Idar his ancestors, established their rule in Polo after having conquered the Padhiar Rajputs of that place. The State enjoys full plenary powers and pays no tribute to any authority, but on the contrary receives Chauth, Tika, Hathgarna and other Haks from Idar. The present Ruler is His Highness Maharao Shri Hamirsinghji Saheb Bahadur. He was born on 3rd January 1904 and succeeded to the *gadi* in 1916. He enjoys rank above some of the nine gun salute states.

Rajkot.—Centrally situated in the Western India States Agency, Rajkot State has an area of 283 square miles and a population of 1,03,033. Revenue on an average, Rs. 13,58,863. Undulating country, with a stony soil watered by several streams, of which the Aji is perennial.

Common kinds of grain, cotton and sugar-cane are the principal agricultural products. The climate is generally healthy though hot in April, May and October.

Rajkot being the headquarters of the Hon'ble the Resident to the Governor-General in the States of Western India, it is politically important and all the States of Kathiawar have each a representative in the Office of the Hon'ble the Resident to the Governor-General.

The present Ruler Thakore Saheb Shri Pratapsinhji was born on 24th February 1911, ascended the *gadi* on 12th June 1940 and was invested with full powers on 17th August 1940.

THE BARODA, WESTERN INDIA AND GUJARAT STATES AGENCY.

Kathiawar in which the majority of the States in the old Western India States Agency are situated is the peninsula lying immediately to the north of Gujarat in the Bombay Presidency. Its extreme length is about 220 miles and its greatest breadth about 165 miles, while the total area is about 23,445 sq. miles. It is for the most part flat except for the Gir forest, where there exist the only lions still surviving in India.

As a result of the scheme of Attachment, Political Agents of the subordinate Agencies have ceased to be in direct relations with non-salute States and groups of innumerable petty estates known as "Thanas" which have been attached to Major States. These Thanas were originally off-shoots of larger States but owing to the system of successive holders dividing their heritage amongst all their heirs, a custom prevalent amongst the Kathis, who became so subdivided as to render impractical the normal administration and the exercise of any jurisdictional powers by each individual holder. There are administered areas which include the Civil Stations of Rajkot and Wadhwan.

The history of the British connection with Kathiawar commences with Colonel Walker's settlement of 1807. In 1863 the States were divided in seven classes and although these have since been abolished, the jurisdictions fixed in that year still remain graded. Formerly, the Political Administration of the Western India States was the responsibility of the Government of Bombay. The transfer of States to direct political relations with the Government of India a change which was advocated in the Montague Chelmsford Report on Constitutional Reform was not carried out until 1924. The first step

in the process was the creation of a new Agency in direct relation with the Government of India, known as the Western India States Agency. This Agency comprised the whole of the area containing the old Kathiawar, Cutch and Palanpur Agencies.

The other States in the Bombay Presidency which for the time being remained in Political relations with the Government of Bombay, were transferred to the control of the Government of India with effect from the 1st April 1933. This transfer necessitated the re-grouping, not only of the remaining Bombay States but also of some of the States of Western India States Agency and also the creation of a separate Political Agency of the Government of India designated the Baroda and Gujarat States Agency. The charge of this new Agency was added to the charge of the Resident at Baroda who was designated as the Resident at Baroda and the Gujarat States. The States of Danta and Palanpur were included in the Rajputana Agency; the former having been part of the old Mahi Kantha Agency and the latter, part of the Western India States Agency. The States and estates of the Mahi Kantha and Bana-Kantha Agencies were united in the Sabar Kantha Agency since abolished. The States of Idar and Vijayanagar, formerly included in the old Mahi Kantha Agency, are now included in the Rajputana Agency. All petty States and estates in the Gujarat States Agency, excepting Jambughoda and Surgana, have been attached to Baroda under the Attachment Scheme. Kadana has been absorbed in the Sant State.

With effect from the 5th November 1944 the Western India States Agency and the Baroda and Gujarat States Agencies were amalgamated and the Resident for the combined Agency is designated "Resident at Baroda and for the States of Western India and Gujarat."

With effect from the same date the Political charges in Kathiawar and Gujarat were re-organised as under:—

I. Resident at Baroda and for the States of Western India and Gujarat (headquarters at Rajkot) in direct relations with Baroda and Cutch States.

II. The Political Agent, Western Kathiawar Agency (headquarters at Rajkot) in relations with Junagadh, Nawanagar, Porbandar, Gondal Jafrabad (Janjira State), Dhrol, and Rajkot.

III. The Political Agent, Eastern Kathiawar and Sabar Kantha Agency (Headquarters at Rajkot) in relations with Bhavnagar, Dhrangadhra, Radhanpur, Morvi, Wankaner, Palitana, Limbdi and Wadhwan.

IV. The Political Agent, Gujarat States Agency (headquarters at Bulsar) in relations with Balasinor, Bansda, Baria, Cambay, Chhota Udepur, Dharampur, Jawhar, Lunawada, Rajpipla, Sachin, Sant, Jambughoda, Surgana, the Dangs and the estates of Vatrak Kantha Thana.

The Dangs consist of a tract of country between Sahyadris and the Surat District which is parcelled out among 14 petty Chiefs. Of these, 13 are Bhils and 1 a Kokani.

Balasinor.—This State has an area of 189 square miles, a population of 61,035 and an annual revenue of about Rs. 4 lakhs. The Ruling Prince belongs to the Babi family. The State pays a tribute of Rs. 9,766-9-8 to the British Government and Rs. 3,077-11-1 to the Baroda Government. The name of the present Ruler who is a minor is Babi Shri Mohmed Salabat Khanji, Nawab of Balasinor. He was born on the 20th May 1944, and succeeded to the *gadi* in 1945. The Ruler of the State received in 1890 a Sanad guaranteeing succession according to Muhammadan Law in the event of failure of direct heirs. The Nawab is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns.

Bansda.—This State has an area of 215 square miles, a population of 54,764 and an annual revenue of about Rs. 7½ lakhs. The Rulers of Bansda are Chalukya Rajputs of the Lunar Race. The ancient history of the House of Bansda is traceable to the second Chalukya dynasty of Vatapi—direct descendants of Janmejaya—grandson of Arjun. One of His Highness' ancestors, the illustrious Jaisinh, founded and consolidated a vast kingdom in Southern Gujarat, of which the present Bansda State is a small part. The present Ruler Maharawalji Shri Sir Indrasinhji Pratapsinhji, K.C.I.E., was born on 16th February 1888, and acceded to the Gadi on 11th November 1911. The Ruler of the State has received a Sanad guaranteeing succession to an adopted heir in the event of failure of direct heirs. He is a member of the Chamber of Princes in his own right, enjoys a dynastic salute of 9 guns, and is entitled to be received by H. E. the Viceroy.

Baria.—The State with its attached State of Sangli has an area of 857 square miles with a population of 2,02,055. The capital Devgad Baria is reached by the Baria State Railway from Piplod Station on the B. B. & C. I. Railway. The Ruler, Lieut.-Col. His Highness Maharaval Shri Sir Ranjitsinhji, K.C.S.I., is the direct descendant of the Great House of Khichi Chowhan Rajputs who ruled over Gujarat for 244 years with their capital at Champaner, bearing the proud title of Pavapatis. The State pays no tribute either to the British Government or to any other Indian State. His Highness served in France and Flanders in the Great European War and in the Afghan War, 1919. Enjoys a dynastic salute of 9 guns and a personal salute of eleven guns.

Cambay.—This State has an area of 392 square miles, a population of 96,501 and an average annual revenue of Rs. 17,94,524 (on the average of last five years' normal income). The founder of the Ruling family was Mirza Jafar Najam-e-Sani Mominkhan I, the last but one of the Muhammadan Governors of Gujarat. The present Ruler is His Highness Najam-ud-Daulah Mumtaz-ul-Mulk Mominkhan Bahadur Dilaverjung Nawab Mirza Hussain Yawar Khan Bahadur. He was born on the 16th May 1911, succeeded to the *gadi* on the 21st January 1915 and was invested with ruling powers on the 13th December 1930. His Highness is a member of the Chamber of Princes and enjoys a dynastic salute of 11 guns.

Chhota Udepur.—This State has an area of 890 square miles, a population of 1,62,145 and an annual revenue of about Rs. 23,54,677. The

Ruling family belongs to the Khichi Chauhan Rajput clan and claims descent from the last Patal Rawal of Pawagadh or Champaner, the State being founded shortly after the fall of that fortress in 1484. The present Ruler is His Highness Maharawal Shri Natwarsinhji. He was born on the 16th November, 1906, and succeeded to the *gadi* on the 29th August, 1923, on the death of his father. He is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns.

The Gad Boriad State with an area of 128 sq miles, a population of 13,120 and a revenue of Rs. 1,95,661 has been attached to this State.

Dharampur.—This State has an area of 704 square miles, a population of 1,23,336 and an annual revenue of about Rs. 15 lakhs. The Rulers of Dharampur trace their descent from Ramchandraji of Hindu Mythology. They belong to the Solar Sisodia Rajputs dynasty. The present Raja, His Highness Maharana Shri Vijayadevji Mohandevji, was born on the 3rd December 1884 and succeeded to the *gadi* on the 26th March 1921. His Highness is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns and a personal salute of 11 guns.

Janjira.—This State is situated to the South of the Kolaba District of the Bombay Presidency. The most noticeable point in its history is the successful resistance that it alone, of all the States of Western India, made against the determined attacks of the Mahrattas. The British, on succeeding the Mahrattas as masters of the Konkan, refrained from interfering in the administration of the State. The State enjoys plenary civil powers. It also has plenary criminal powers excepting over British subjects. The ports of Janjira proper have the rights of British Indian Customs port. The Chief is a Sunni Mohammedan, with the title of Nawab, and has a *sanad* guaranteeing succession according to Mahommedan law. It pays no tribute. But it receives from the Junagadh State an annual "Khandani" payment on Una Mahal of 360 Mosambigiri Ryals equivalent to Rs.500. The last ruler, H.H. Nawab Sidi Sir Ahmed Khan, G.C.I.E., died on 2nd May 1922, and was succeeded by his son, His Highness Sidi Muhammad Khan, born on the 7th March 1914. His Highness the present Nawab Saheb was invested with ruling powers on the 9th November, 1933. The area of the State is 379 square miles, and the population 1,17,324. The average revenue is about 15 lakhs including that derived from a small dependency named Jafarabad in the south of Kathiawar under the Western India States Agency. The Capital is Murud on the main land, the name of Janjira being retained by the island fort opposite. His Highness the Nawab Saheb is entitled to a dynastic salute of 11 guns and to a permanent salute of 13 guns within his own territories.

Jawhar.—This State is situated to the North of the Thana District of the Bombay Presidency on a plateau above the Konkan plain. It has an area of 308 square miles, a population of 65,126 and an average annual revenue of about Rs.10 lakhs. The present Ruler, Flt.-Lt. Shrimant Raja Patangshah, *alias* Yeshwantrao Vikramshah, was invested with full administrative powers on 16th January 1938. He exercises full Civil and Criminal Jurisdiction, and is a Member of the Chamber of Princes in his own right. He enjoys a dynastic salute of 9 guns.

Lunawada.—The State has an area of 388 square miles, a population of 105,318 and an annual revenue of about Rs. 9 lakhs. The Rulers of Lunawada belong to the historic Solanki clan of Rajputs claiming their descent from the famous Sidhraj Jaysinh of Anhilwad (Gujarat). Besides having fine patches of good agricultural land, the State contains a considerable forest area yielding rich timber. The present Ruler, Lieut. Maharana Shri Virbhadrasinhji, was invested with full powers on 2nd October 1930. He is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns.

Rajpipla.—This important State lies to the south of the Narbada. It has an area of 1,517½ square miles, a population of 2,49,032 and an annual revenue of about Rs. 52 lakhs. The lands are rich and very fertile and, except for a few forest-clad hills, are suitable and available for cultivation in large quantities in the south-east talukas. The family of the Maharaja of Rajpipla, Lt.-Col. H. H. Maharana Shri Sir Vijaysinhji, G.B.E., K.C.S.I., is said to derive its origin from a Rajput of the Gohel clan. Cotton is the most important crop in the State. In the hills there are valuable teak forests. The capital is Rajpipla which is connected with Ankleshwar by railway built by the State. His Highness is a member of the Chamber of Princes and enjoys a dynastic salute of 13 guns.

Sachin.—Sachin is the senior of the only two Abyssinian States in India. The ancestors of the Nawab of Sachin were the Rulers of Janjira. The founder of the Ruling House of Sachin was Nawab Sidi Abdul Karim Mohommed Yakut Khan I. In 1784, on the death of his father, Nawab Sidi Abdul Karim Mohommed Yakut Khan became Nawab of Janjira but the Throne was seized by Sidi Jauhar in favour of Nawab Sidi Abdul Karim Mohommed Yakut Khan's younger brother. This led to several complications which Nawab Sidi Abdul Karim Mohommed Yakut Khan decided to avoid and made the great sacrifice of leaving Janjira with his younger brother. Nawab Sidi Abdul Karim Mohommed Yakut Khan intended to go to Tippu Sultan and gain his support but as this was considered impolitic, the Honourable the East India Company intervened as mediators and through the good offices of Mr. Mallet (afterwards Sir Charles) and Nana Furnavis, the Prime Minister of His Highness the Peshwa, a Triple Alliance was signed on the 6th June 1791, by which Nawab Sidi Abdul Karim Mohommed Yakut Khan took the State of Sachin. Nawab Sidi Abdul Karim Mohommed Yakut Khan was granted the hereditary title of Nawab by the Emperor of Delhi, His Imperial Majesty Shah Alum II, and was also granted a "Haft Hazari" and the "Mahi Maratab." The Rulers of Sachin are known as amongst the first powerful Princes in India to have cemented an alliance of perpetual friendship with the British. His Highness Nubaruz-ud-Daulat, Muzaffer-ul-Mulk, Ahlat-ul-Umarah, Khan-e-Zishan, Nawab Sidi Mohammed Haider Mohammed Yakut Khan, Nusratjung Bahadur,

who was born on the 11th of September 1909 and succeeded to the Throne on 10th November 1930. His Highness is a member of the Chamber of Princes in his own right and a member of the Princes' Standing Committee.

Sant.—This State has an area of 527½ square miles, a population of 1,14,047 according to the census of 1941 and an annual revenue of about Rs.10,06,962. The Ruling family belongs to the Mahipavat branch of the Puvar or Parmar Rajputs. The Rulers used to pay a tribute of Rs. 7,000 to Baba Shahi Scindia equivalent to Rs. 5,385 of present currency. This tribute is now paid by the State to the British Government. The present Ruler Maharana Shri Sir Jorawarsinghji Pratapsinghji, K.C.I.E., was born on 24th March, 1881, and succeeded to the *gadi* in 1896. He is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns. The Kadana State has been absorbed into Sant State by orders of H. M.'s Secretary of State for India and now forms part and parcel of Sant State.

Heir-Apparent.—Maharaj Kumar Shree Pravinsinghji.

Dewan.—N. J. Divecha, B.A., LL.B.

Surgana.—Is situated on the borders of the Nasik District.

Many of the States and Estates are small and only a few enjoy restricted jurisdictional powers. The Bhaderwa, now attached to Bansda, Surgana and Jambughoda States are, however, larger and more important, and are included in the list of electorates to representative members of the Chamber of Princes.

KOLHAPUR AND THE DECCAN STATES AGENCY.

This Residency includes the following States:—

Kolhapur.	Miraj (Junior).
Savantvadi.	Kurandwad (Senior).
Mudhol.	Kurandwad (Junior).
Sangli.	Ramdurg.
Bhor.	Aundh.
Jamkhandi.	Akalkot.
Phaltan.	Savanur.
Jath.	Wadi Estate.
Miraj (Senior).	

These States are in political relations with H. E. the C. R. through the Resident for Kolhapur and the Deccan States, whose headquarters are at Kolhapur.

Resident for Kolhapur and the Deccan States.—Lt.-Col. C. W. L. Harvey, C.I.E., O.B.E., M.C.

Secretary to the Resident for Kolhapur and the Deccan States.—Captain E. W. M. Magor.

Assistant Secretary to the Resident for Kolhapur and the Deccan States.—Sardarsahib Sardar Bhagwan Singh, B.A., LL.B.

Assistant Director of Food Supplies, Deccan States Group.—Lt. M. G. Abhyankar.

Kolhapur.—Kolhapur State has an area of 3,229 sq. miles and a population of about 12 lakhs. The administration is carried on by a Council of four Ministers with Her Highness Shri Tarabaisaheb Chhatrapati, the Senior Maharanisaheb and Regent, as its President. The State proper is divided into seven Pethas and three Mahals and has, besides, nine Feudatory Jahagirs. It pays no tribute. The State force includes one complete battalion known as 'Rajaram Rifles' and a Transport Company known as "No. 50 (Kolhapur) G. P. T. Company" R.I.A.S. which has seen service abroad; Kolhapur City, the capital of the State, is known as 'Southern Benares' on account of its religious importance. The Mahalaxmi temple in the City is famous for its architectural beauty. Kolhapur is also a cultural centre of Maharashtra and has three Colleges (Arts and Science, Teachers' Training, and Law), 12 High schools, a Technical Institute, two Film-studios and Associations for the development of Arts, Music, etc. Kolhapur is also a flourishing business centre and has a sugar mill, a textile mill and two oil mills. It is a seat of the Joint High Court in which eleven Deccan States have joined so far. The principal articles of production are Gur, Sugar, Jowar and Tobacco.

The State abounds in great potential resources. The Western Ghats give rise to a number of rivers on which large irrigation and hydro-electric projects are possible. The Ghat ranges have also very rich bauxite deposits.

The Regency Council have now launched a Development Plan for the State as a whole. It is estimated to cost about Rs. 12 crores, and is spread over 15 years. It comprises over 300 schemes, the most important of which being the construction of a reservoir on the Bhogavati river at Radhanagari. This reservoir will store about 8,000 million cubic feet of water and will be mainly used for irrigation. It is estimated to cost about Rs. 160 lakhs.

Sawantwadi.—This State has an area of 930 square miles and a population of 2,52,200. The average revenue is Rs. 10,34,597. It lies to the north of the Portuguese territory of Goa, the general aspect of the country being extremely picturesque. Early inscriptions take the history of the State back to the sixth century. The late Ruler, Major His Highness Raje Bahadur Shrimant Khem Sawant *alias* Bapusaheb Bhonsle, K.C.S.I., having expired on the 4th July 1937, His Excellency the Crown Representative recognised his only minor son, His Highness Raja Shivram Sawant Bhonsle, the present Ruler, as his successor and appointed Her Highness Rani Parwatibaisaheb Bhonsle as Regent to conduct the administration of the State during the minority of the present Ruler from 5th October 1937. Rice is the principal crop of the State, and it is rich in valuable teak. The sturdy Marathas of the State are favourite troops for the Indian Army and supply much of the immigrant labour in the adjacent British districts. The Capital is Sawantwadi, also called Sundar Wadi, or simply Wadi. The Raja enjoys a dynastic salute of 9 guns and a permanent local salute of 11 guns.

Mudhol.—The State has an area of 869 square miles, a population of 72,447 and an annual average revenue of about Rs. 4,65,112. The present Ruler—Raja Shrimant Bhairav Sinhji Malojirao Ghorpade—is a minor. The administration is

carried on by a Council of Regency, with the Ranisaheba as Regent. The minor Raja was born on the 15th October 1929 and succeeded to the *gadi* on the 9th November 1937. The Ruler enjoys a dynastic salute of 9 guns and is entitled to be received by the Viceroy.

Sangli.—The State has an area of 1,136 square miles, a population of 293,381 and an annual revenue of Rs. 22,46,480. The founder of the family was Harbhat who rose to distinction during the rule of the Peshwas. The present Ruler Captain (Honorary) His Highness Raja Shrimant Sir Chintamanrao Dhundiraj *alias* Appasaheb Patwardhan, K.C.I.E., was born on the 14th February 1890 and succeeded to the *gadi* in 1903 on the death of his adoptive father Dhundiraj Chintamanrao Patwardhan. He was invested with ruling powers on 2nd June 1910 on attaining his majority. His Highness has been granted the hereditary title of Raja. He enjoys a dynastic salute of 9 guns and a personal salute of 11 guns. His Highness exercises first class jurisdiction.

Bhor.—The State lies in the Western Ghats in wild, beautiful and mountainous country. It has an area of 910 square miles, a population of 1,55,961 and an annual revenue of about Rs. 9,05,088. The present Ruler is Raja Shrimant Sir Raghunathrao Shankarrao *alias* Babasaheb Pandit Pant Sachiv, K.C.I.E. The honour of a dynastic salute of 9 guns and the hereditary title of Raja was conferred on him in 1927 and 1935 respectively. The Raja Saheb became a permanent member of the Chamber of Princes in 1940 and was made a K.C.I.E. in January 1941. He is an elected member of the Standing Committee of the Chamber of Princes for the years 1946-48. The State is included in the Kolhapur and the Deccan States Agency.

The following are the particulars of the States grouped in this Residency :—

State.	Name of Chief.	Area.	Population. (1941 Census).	Revenue.	Payments to British Indian Government.
				Rs.	Rs.
Akalkot ..	Raja Shrimant Vijaysinh Fatesinh Bhonsle, Raja of.	498	103,903	6,85,000	14,592
Aundh ..	Raja Shrimant Bhavanrao Shrinivasrao Pant Pratinidh, C.B.E., Raja of.	501	88,723	5,48,000	Nil
Bhor ..	Raja Sir Raghunathrao Shankarrao Pandit Pant Sachiv, K.C.I.E., Raja of.	910	1,55,961	7,33,000	4,684
Jamkhandi ..	Raja Shrimant Shankarrao Parshuramrao Patwardhan, Raja of.	524	126,272	8,64,000	20,841
Jath	Lt. (R.I.N.) Raja Shrimant Vijayasinhrao Ramrao Dafle, Raja of.	980·8	107,036	4,11,000	11,247
Kolhapur ..	.. .. ..	3,229	1,092,046	1,30,94,000	Nil
Kurundwad (Senior).	Raja Shrimant Chintamanrao Bhalchandrarao Patvardhan, Raja of.	182·5	52,552	2,96,000	9,619
Kurundwad (Junior).	(1) Shrimant Ganpatrao Trimbakrao *alias* Tatyasaheb Patwardhan, Raja of Kurundwad Junior. (2) Raja Shrimant Raghunathrao Ganpatrao Patwardhan, Non-Jurisdictional Raja of Kurundwad Junior.	116·02	46,009	2,00,000	Nil

EASTERN STATES AGENCY.

On April 1st, 1933, the Eastern States Agency was created, and an Agent to the Governor-General was appointed at Ranchi. The designation was subsequently changed to the Resident for the Eastern States. The agency embraced 23 Orissa States, formerly included in the Province of Bihar and Orissa, and 16 Central Provinces States. Subsequently on December 1st, 1936, the two Bengal States of Cooch Behar and Tripura were transferred to the Agency. The Status of the Agency was raised to that of a 1st class Residency with effect from 1st December, 1941. There are three Political Agencies under the Hon'ble the Resident for the Eastern States at Calcutta, viz.

(1) The Orissa States Agency with its headquarters at Sambalpur, has the following States in Political relations with it:—

Athgarh, Athmallik, Bamra, Baramba, Budhi Bonai, Daspalla, Dhenkanal, Gangpur, Hindol Keonjhar, Khandpara, Kharsawan, Narsinghpur, Nayagarh, Nilgiri, Pal-Lahara, Rairakhol, Ranpur, Seraikela, Sonepur, Talcher and Tigiria.

(2) The Chhattisgarh States Agency with its headquarters at Raipur, has the following States in Political relations with it:—

Bastar, Changbhakar, Chhuikhadan, Jashpur, Kalahandi, Kanker, Kawardha, Khairagarh, Korea, Nandgaon, Patna, Raigarh, Sakti, Sarangrah, Surguja and Udaipur.

(3) The Bengal States Agency with its headquarters at Calcutta, has Political control of the following States:—

Cooch Behar, Mayurbhanj and Tripura.

Of all these States the Rulers of six enjoy the distinction of salute, viz., Cooch Behar and Tripura of 13 guns, and Mayurbhanj, Patna, Kalahandi and Sonepur of 9 guns.

Cooch Behar.—This State is situated in North Bengal, bounded by the Districts of Jalpaiguri, Goalpara and Rangpur. Area 1,318 square miles; population 639,898; revenue about Rs. one crore. The town of Cooch Behar is connected by the Cooch Behar State Railway with the Bengal Assam Railway system. The present Ruler, Major His Highness Maharaja Sir Jagaddipendra Narayan Bhup Bahadur, K.C.I.E., born 15th December 1915, succeeded his father His Highness Maharaja Sir Jitendra Narayan Bhup Bahadur, K.C.S.I., on 20th December 1922 and was invested with full ruling powers on 6th April, 1936.

Tripura.—This State lies to the east of the district of Tippera in Bengal. It has an area of 4,116 square miles and a population of 513,952, with a revenue of Rs. 54,05,500. The present Ruler is Lt.-Col. His Highness Bishana-Samara-Bijoyee Maharajadhiraja Sir Bir Birkram Kishore Deb Varman Bahadur, G.B.E., K.C.S.I., who was born on 19th August 1908, and succeeded the late Maharaja Manikya Birendra Kishore Deb Barman Bahadur on 13th August, 1923.

Mayurbhanj.—The Ruler is a permanent member of the Chamber of Princes and enjoys an honorary rank of Flight-Lieutenant in the Royal Air Force. The Maharaja is also the Pro-Chancellor of the Utkal University. Archæological finds that have come to light within the State area, as also outside, go to show that the ancient Bhanja Kingdom covered a considerable part of Orissa. Though the origin of the kingdom is shrouded in hoary antiquity, tradition recorded by Hunter places it more than two thousand years ago. Bhanja Kings ruled over an extensive territory from Khijinga-Kotta, modern Khiching, whose anci-

nt remains bear testimony to their eminence and culture which found expression in diverse forms of art of a very high order notably the Mayurbhanj School discussed by Rene Grousset and other art critics of acknowledged authority. During the Moghul period, Mayurbhanj was recognised by the Emperors as an autonomous principality, and in the days of Mahratta supremacy in Orissa, the Rulers of Mayurbhanj were often at war with the Mahrattas who attempted to levy a precarious tribute by force of arms. In 1761, the East India Company took possession of Midnapore and almost immediately afterwards the Ruler of Mayurbhanj opened friendly negotiations with the British authorities. During half a century preceding the British conquest of Orissa, the British authorities maintained their friendship with Mayurbhanj and a treaty was concluded between the East India Company and Mayurbhanj State in 1829.

Keonjhar is an off-shoot of Mayurbhanj, being held by a junior branch of the Ruling family which separated from the parent State.

Kharsawan and Seraikela.—The Rulers of these States belong to the family of the Raja of Porahat whose States were confiscated by the British Government. These States first came under the notice of the British in 1793, when in consequence of disturbances on the frontier of the old Jungle Mahals the Thakur of Kharsawan and the Kunwar of Seraikela were compelled to enter into certain agreements relating to the treatment of fugitive rebels. The Chiefs were bound, when called upon, to render service to the British Government, but not required to pay tribute. The Bengal Nagpur Railway runs through a part of the State.

Patna State—Patna is a very ancient State and its various architectural ruins bear mute testimony to its ancient grandeur and civilisation. In the hoary past this State was the seat of the well known Koshala Empire which was ruled by the kings of the Aira dynasty. In the times of the Moghul Emperors as well as during the ascendency of the Mahrattas, the State maintained its independence and sovereignty. It was taken under British protection in 1803 and has ever since been extremely loyal to the British Crown. The Maharajas of Patna have all along enjoyed the hereditary title of Maharaja. Its great services in the Great War were acknowledged in high terms by the Government, when it conferred the privilege of a permanent salute of 9 guns on the Maharaja. Patna is one of the premier States of the Eastern States Agency and has an area of 2,530 sq. miles and a population of 632,220 souls according to the Census of 1941. It lies between North Lat. 20°9′ and 21°4′ and East Long. 82°41′ and 83°40′. It is a very well-governed and progressive State possessing various good educational and industrial institutions, dairy and agricultural farms and other nation-building institutions. There are also fully equipped hospitals for both sexes, an X-ray and Electrotherapy Institute, a Veterinary Hospital and a Leprosy Hospital. It has a College called the Rajendra Intermediate College.

Ruler.—Maharaja Sir Rajendra Narayan Singh Deo, K.C.I.E.

Athgarh, Athmallik, Bamra, Barambe, Baudh, Bonai, Daspalla, Dhenkanal, Gangpur, Hindole, Kalahandi, Keonjhar, Khandpara, Narsinghpur, Nayagarh, Nilgiri, Pal-Lahara, Rairkhol, Rampur, Sonepur, Talcher, Tigiria.—These States have no connected or authentic history. They were first inhabited by aboriginal races who were divided into innumerable communal or tribal groups each under its own Chief or headman. These carried on incessant warfare with their neighbours. In course of time their hill retreats were penetrated by Aryan adventurers who gradually overthrew the tribal Chiefs and established themselves in their place. Tradition relates how these daring interlopers, most of whom were Rajputs from the north, came to Puri on a pilgrimage and remained behind to found kingdoms. The Chiefs of Baudh and Daspalla are said to be descended from the same stock as the Rulers of Mayurbhanj; and a Rajput origin is also claimed by the Rajas of Athmallik, Narsinghpur, Pal-Lahara, Talcher and Tigiria; Nayagarh, it is alleged, was founded by a Rajput from Rewah, and a scion of the same family was the ancestor of the present house of Khandpara. The ruling family of Ranpur is of Khond origin and furnishes the only known instance in which amid many vicissitudes, the supremacy of the original settlers has remained intact. The States acknowledged the suzerainty of the paramount power and were under an implied obligation to render assistance in resisting invaders; but in other respects neither the ancient kings of Orissa nor their successors, the Moghuls and Mahrattas, ever interfered with their internal administration. All the States have annals of the dynasties that have ruled over them; but they are made up for the most part of legend and fiction and long genealogical tables of doubtful accuracy, and contain very few features of general interest. The British conquest of Orissa from the Mahrattas which took place in 1803, was immediately followed by the submission of ten of the tributary States the Chiefs of which were the first to enter into treaty engagements.

Bastar, Changbhakar, Chhuikhadan, Jashpur, Kanker, Kawardha, Khairagarh, Korea, Nandgaon, Raigarh, Sakti, Sarangarh, Surguja, Udaipur.—These States are scattered round the Chattisgarh Division in the Central Provinces to the different districts of which the majority of them were formerly attached.

Bastar.—This State is situated between the Central Provinces, Orissa and the Madras Presidency, and is in the Eastern States Agency. The State is the twelfth largest in the Indian Empire, its area being 13,725 square miles. The late Chief of Bastar whose son is the present Maharaja, was a Rajput lady. She was the last direct descendant on the male line of an ancient family of Lunar Rajputs, which ruled over Warangal until the Mohammadan conquest of the Deccan in the 14th century A.D. when the brother of the late Raja of Warangal fled into Bastar and established a kingdom there. From then till the days of the Mahrattas the State was virtually independent, its inaccessibility securing it from all but occasional raids

of Mohammadan freebooters. The Bhonslas of Nagpur imposed a small tribute on Bastar in the 18th century which is now paid to the British Government. Nearly 11,000 square miles are covered by forest, of which about 3,000 square miles are reserved, and the cultivated area is about 886,000 acres. The capital of the State is Jagdalpur (population in 1941 census 11,304) on the Indravati, 184 miles from Raipur in the Central Provinces, and 159 miles from Vizianagram in the Madras Presidency by motorable road. The population of the State numbered, 633,888 at the 1941 census and by far the greater number of the inhabitants are aboriginals: Murias, Marias, Parjas and Bhatras, related to the Gond race. The State is at present under administration by the Government of India owing to the minority of the Maharaja. The principal exports are rice, rape-seed, tora oil, cattle, timber, lac, myrobalams and other forest produce. The principal imports are cloth, yarn, salt, kerosene oil, and domestic hardware. The State income for 1941 was over 24 lakhs.

Surguja.—Maharaja Ramanuj Saran Singh Deo, C.B.E., Maharaja and Ruler of Surguja State, E. S. A. Born: 1895, installed 31st December, 1917. Has three sons, Heir Apparent: Maharajkumar Ambikeshwar Saran Singh Deo, Maharajkumar Chandikeshwar Saran Singh Deo, B.A., who is employed as Development Member on the State Council, and the third son, Raja Chandra Chur Prasad Singh Deo, has been adopted in Udaipur State, E. S. A. The Maharaja has travelled extensively in Europe and East Africa. He is a keen sportsman and has shot over a thousand tigers. *Area*:—6,055 sq. miles. Population: 5,51,307. Gross Revenue for 1945-46: Rs. 16,31,034. Surguja is the second largest State in the Eastern States Agency, most of which is fertile and double-cropped. Its mineral wealth consists of deposits of coal, mica, iron ores, limestone, bauxite and lead. The capital of the State is Ambikapur. The administration of the State is carried on by the Maharaja assisted by a State Council and Diwan. There are well-equipped hospitals for men and women at headquarters and dispensaries all over the State. There are telephonic communications between all important centres of the State. *Diwan and General Member*: Raghu Raj Singh. *Development Member*: Maharajkumar Chandikeshwar Saran Singh Deo, B.A. *Finance Member*: Satya Narayan Singh, B.A., B.L.

UNDER THE GOVERNOR OF ASSAM.

Manipur.—The only State of importance, under the Government of Assam, is Manipur which has an area of 8,638 square miles and a population of 5,12,069 (1941 Census), of which about 59 per cent. are Hindus. Manipur consists of a great tract of mountainous country, and a valley about 50 miles long and 20 miles wide, which is shut in on every side. The State adopted Hinduism early in the eighteenth century, in the reign of Pamheiba or Gharib Nawaz, who subsequently made several invasions into Burma. On the Burmese retaliating, Manipur negotiated a treaty of alliance with the British in 1762. The Burmese again invaded Manipur during the first Burmese war, and on the conclusion of peace in 1826 Manipur was declared independent. The chief event in its subsequent history was the intervention of the British in 1891 to establish the claim of Kula Chandra Singh as Maharaja, followed by the treacherous murder of the Chief Commissioner, Mr. Quinton, and the officers with him, and the withdrawal of the escort which accompanied him. From 1891 to 1907 the State was administered by the Political Agent, during the minority of Chura Chand Singh. The Raja was invested with ruling powers in 1907 and formally installed on the *gadi* in 1908. For his services during the War the hereditary title of Maharaja was conferred on him. He was made a C.B.E. in Dec. 1917, and K.C.S.I. in Jan. 1934. Having been on the *gadi* for 50 years he expressed his wish to abdicate in favour of his eldest son Maharaj Kumar Bodh Chandra Singh on the 13th Sept. 1941. The Maharaj Kumar assumed charge of the administration of the State on the 30th Sept. 1941. After the death of his father, a Khatita from H.E. the Viceroy was formally given to him by Political Agent in Manipur on the 1st April 1942 at the Palace Darbar Hall recognising his succession to the *gadi*.

His Highness the Maharaja is entitled to a salute of 11 guns and to be received by H.E. the Viceroy.

The administration of the State is now conducted by H. H. the Maharaja, assisted by a Durbar, which consists of a President, who is usually a member of the Indian Civil Service, his services being lent to the State by the Assam Government, and 6 Members, who are all Manipuris. The staple crop of the country is rice. Forests of various kinds cover the great part of the mountain ranges.

Khasi States.—These small states, 25 in number, with a total area of about 3,700 square miles and a population of 213,580, are under the control of the Governor of Assam acting as the Agent of His Excellency the Crown Representative. The States have treaties or engagements with the British Government. The two largest are Khyrim and Mylliem and the smallest is Nongliwal, which has a population of only 213. Most of them are ruled by a Chief or Siem. The Siemship usually remains in one family. The succession was originally controlled by a small electoral body constituted from the heads of certain clans but in recent years there has been a tendency to broaden the elective basis. The constitution of a Khasi State has always been of a very democratic character, the Siem exercising but little control over his people.

IN POLITICAL RELATION WITH THE RESIDENT AT GWALIOR AND FOR THE STATES OF RAMPUR AND BENARES.

Rampur State.—Area, 893 sq. miles; Population, 476,912; Gross Revenue Rs. 88,06,415 (1945-46). The State of Rampur was founded by Nawab Syed Ali Mohammed Khan Bahadur in the middle of the 18th century and his dominions included a considerable portion of what is now known as Rohilkhand. The founder belonged to the famous Syed clan of Bareha in the Muzaffarnagar district and was a statesman of remarkable ability. He rendered valuable services to the Moghal Emperor who recognised him as Ruler of Rohilkhand and bestowed on him the Mahi Maratab, *i.e.*, the Insignia of the Royal Fish.

Upon his death, his Kingdom underwent many vicissitudes and was considerably reduced in size during the reign of his son Nawab Sayed Faizullah Khan Bahadur. The Province of Rohilkhand had then passed into the hands of the East India Company. Nawab Sayed Faizulla Khan Bahadur was very loyal to the British Government and placed his entire Cavalry of 2,000 strong, at their disposal in 1778 during the war against France.

His Highness Nawab Sir Syed Yusuf Ali Khan Bahadur spared neither men nor money in helping the British Government during the mutiny of 1857. He saved the lives of many Europeans whom he provided with money and other means of comfort. He established his reputation as a good administrator to such an extent that he was placed on behalf of the British Government, in charge of the administration of Moradabad and neighbouring districts. These signal services were recognised by the British Government by the grant of an Illaqa besides other marks of distinction.

Nawab Sir Kalbe Ali Khan Bahadur was an Oriental scholar of great repute and during his rule the Court of Rampur was surrounded by artists, poets, and musicians, who were left without any patronage on the break up of the Moghul and Oudh Courts. Rare and most precious Persian manuscripts and Moghul miniatures were collected and preserved at the Rampur Oriental Library. The years of the rule of Nawab Sir Syed Kalbe Ali Khan Bahadur may rightly be called a period of rich renaissance for Rampur State.

His Highness Nawab Sir Syed Mohammad Hamid Ali Khan Bahadur, father of the present ruler, maintained the traditions of his house for devotion to the British Crown and the Great War of 1914 found him foremost in offering his personal services and all the resources of the State to the British Government. He contributed one lakh of rupees towards the cost of upkeep of the Hospital Ship '*Royally*.' During his rule Rampur made great strides in trade and commerce and in fact in every walk of life.

The present ruler Lt.-Col. His Highness Nawab Sir Syed Mohammad Raza Ali Khan Bahadur, G.C.I.E., K.C.S.I., D.Litt, LL.D., succeeded his father on 20th June 1930. His Highness was born on 17th November, 1906, and was educated at the Rajkumar College, Rajkot. During the short period that the reins of the State have been in his hands Rampur State has made great progress. A State Council consisting of the Chief Minister as President and three ministers as members has been responsible since 1934 for the administration of the State on the principle of the joint and several responsibilities of each member. The Council is primarily responsible for the administration of the State under the guidance of His Highness and deals with all matters except a few that fall within the prerogative of the Ruler. The Ministers and the Secretaries enjoy defined powers and have scope for initiative. His Highness has fixed his Civil List which is distinct from the State Budget, which is controlled by the Council.

A number of experienced officers have been borrowed from the United Provinces Government to help to achieve the same standard of efficiency as obtained in British India and to train local men so that on the return of the lent officers they may be in a position to take over charge successfully. The Finance and Revenue departments have been under the control of an I.C.S. Officer since 1935.

A High Court of Judicature consisting of a Chief Justice and two puisne judges with powers to exercise original, appelate and revisional jurisdiction was established. The local laws and enactments were completely overhauled and important laws prevailing in British India were introduced and enforced in the State. Legal qualification is a condition precedent to the appointment of a Judicial Officer.

The Legislative Committee consisting of eight officials and six non-official members usefully worked since 1935 and passed 29 Acts. The New Legislature has come into existence from 1st May, 1940, with greatly increased Legislative powers and a substantial non-official majority. It consists of 34 members, 22 of whom are non-officials. Statutory Advisory Boards which include non-official members have also been provided to assist various departments.

Primary Education is free throughout the State. There are about 100 Primary Schools of all kinds in the State. There are 3 Anglo-Vernacular Middle Schools, 7 Vernacular Middle Schools, a High School and one Intermediate College teaching Arts as well as Sciences. For the training of Primary and Middle School teachers a Training School has been established providing both one year and two year training courses. There is a full fledged High School for girls and 6 Primary Girls Schools. The "Madrasa Alia" (Oriental College) is an old and famous centre of Islamic learning and classical languages. Amongst the newer educational development are a Montessori School, a Model and Experimental Primary School, many centres of Adult Education, a People's College, a Central Library for Teachers, and a Central Library for children. The State Library is one of the best Libraries of valuable and rare manuscripts in Arabic, Persian and Urdu and provides facilities for research. There is also a Government Polytechnic providing Technical Education of the Secondary standard.

Each Tehsil has been provided with an up-to-date hospital and the Sadar Hospital, the largest in the State, has been completely altered and renovated at a cost of over a lakh of rupees. A special ward has been added for Tuberculosis patients. The operation theatre has been brought upto modern requirements by alterations in the building and provision of shadowless lamps, high pressure steam sterilisers and modern anæsthesia implements. The Rafat Maternity and Child-Welfare Centre was started in the city in 1934 and six branches have since been opened in the city and in the rural area.

Settlement and Record operations have been carried out and rent rates on the basis of unit values and soil classification have been framed. The State demand on account of rents has been reduced from Rs. 32,22,253 to Rs. 26,40,326. The rents now represent one consolidated demand which is made on the tenants for their holdings. Occupancy rights have been conferred under the Rampur Tenancy Act.

The State holds investments to the value of Rs 1,61,10,000 which are being increased annually to the extent of Rs.2 lakhs. All the superior services have been given grades and their promotions and increments are regulated by time scales. The system of pension has been introduced and the employees have also been given the benefit of a General Provident Fund. Travelling Allowances and Leave Rules have been introduced and the Local Audit of the various departments is done periodically. The budgetary system has been revised and brought into line with the system prevailing in British India. A highly beneficent scheme for the conversion of the General Provident Fund into Life Assurance has recently been sanctioned. Besides life cover the employees will get a better yield on their G. P. Fund contributions, or on ordinary life assurance.

The Agriculture Department has extended its activities throughout the State. Improved seeds and implements are distributed on Sawai basis, and seven Seed-Stores are working in the State.

The cost of the 1st Rampur Raza Infantry which served overseas and in India also for about 5 years amounted approximately to Rs. 50 Lakhs, the whole of which was borne by the State. In addition His Highness, his people and industry in the State contributed about Rs. 12 Lakhs to various War funds as distinct from war savings. Over Rs. 64 Lakhs were invested by the State and Industry in Defence Loan. The Savings Campaign met with success from the very beginning and in the first year of its working, Defence Savings Certificates to the value of over Rs. 50,000 were purchased by small investors, most of whom were State servants and workers in the factories. Interest free advances were sanctioned to State servants in order to enable them to purchase Savings Certificates.

The permanent salute of the State is 15 guns. Rampur State does not pay tribute to the Crown.

Benares.—The kingdom of Benares under its Hindu rulers existed from time immemorial and finds mention in Hindu and Buddhist literature. In the 12th century it was conquered by Shahab-ud-din Ghori and formed a separate province of the Mahommadan Empire. In the 18th century when the powers of Moghal Emperors declined after the death of Aurangzeb, Raja Mansa Ram, an enterprising zamindar of Gangapur (Benares district), founded the State of Benares and obtained a Sanad from the Emperor Mohammad Shah of Delhi in the name of his son Raja Balwant Singh in 1738. Raja Mansa Ram died in 1740 and his son Balwant Singh became the virtual ruler. During the next 30 years attempts were unsuccessfully made by Safdar Jang and after him by Shuja-ud-daula of Oudh to destroy the independence of the Raja and the Fort of Ramnagar was built on the bank of the Ganges opposite the Benares City. Raja Balwant Singh died in 1770 and was succeeded by his son Chet Singh. He was expelled by Warren Hastings and Balwant Singh's daughter's son Mahip Narain Singh was placed on the *gadi*. The latter proved an imbecile and there was mala-administration which led to an agreement in 1794 by which the lands, held by the Raja in his own right which had been granted to him by the British Government, were separated from the rest of the province. The direct control of the latter was assumed by the Government and an annual income of one lakh of rupees was assured to the Raja while the former constituted the Domains within which the Raja had revenue powers similar to those of a Collector in a British district. There was thus constituted what for over a century was known as the Family Domains of the Maharaja of Benares. On the 1st of April, 1911, the major portion of these Domains became a State consisting of the perganas of Bhadohi and Chakia (or Kera Mangraur). The town of Ramnagar and its neighbouring villages were ceded by the British Government to the Maharaja in 1918 and became part of the State. The Maharaja's powers are those of a Ruling Chief, subject to certain conditions, of which the most important are the maintenance of all rights acquired under laws in force prior to the transfer, the reservation to Government of the control of the postal and telegraph systems, of plenary criminal jurisdiction within the State over servants of the British Government and European British subjects, and of a right of control in certain matters connected with Excise.

The present ruler is H. H. Maharaja Vibhuti Narain Singh. Born on November 5, 1927, he was adopted by His late Highness as his son and succeeded to the *gadi* in 1939.

PUNJAB STATES.

There are 45 States and Estates in the Punjab which are in political relation with His Excellency the Crown Representative, through the Hon'ble the Resident for the Punjab States whose Headquarters are at Lahore.

Serial No.	Name of State or Estate.	Title and name of Ruler.	Date of birth.	Area (in square miles).	Population.	Salute in guns.	Date of succession.	Approximate revenue.
1	Patiala	Major-General His Highness Maharaja Dhiraj Sir Yadavindra Singh Mahindar Bhadur, G.C.I.E., G.B.E., A.D.C.	7-1-1913	5,942	1,936,259	17 pt. & 19 local	24-3-1938	Rs. 2,02,62,305

* Tributaries of Bashahr. † Tributaries of Keonthal. ‡ Tributaries of Jubbal. * Not recognised Ruler as yet.

States Nos. 7, 11, 13, 14, 18, 19 and 21 to 45 were placed in political relations with the Hon'ble the Resident for the Punjab States, on the 1st October, 1936.

Patiala.—This is the largest of the Phulkian States and the premier State in the Punjab. Its territory is scattered and interspersed with small States and even single villages belonging to other States and British districts. It also comprises a portion of the Simla Hills and territory on the border of Jaipur and Alwar States. Area: 5,942 square miles. Population 19,42,019. Gross income Rs. 2,89,47,000. Its history as a separate State begins from 1762. Its Ruler, Major-General His Highness Farzand-i-Khas, Daulat-i-Inglishia Mansur-i-Zaman Amir-ul-Umra, Maharajadhiraj Raj Rajeshwar Shri Maharaja i-Rajgan Maharaja Sir Yadavindra Singhji Mahendra Bahadur, Yadu Vanshavatans Bhatti Kul Bhushan, G.C.I.E., G.C.V.O., LL.D., was born on the 7th January, 1913, educated at the Aitchison College, Lahore, and succeeded to the *gadi* in March, 1938, on the demise of his father, Lieutenant-General His Highness Maharajadhiraj Bhupendra Singhji. In 1930 His Highness accompanied His late Highness to England in connection with the first Round Table Conference. received Police training at the Police Training College, Phillaur, and held various appointments in the State administration. His Highness enjoys a local salute of 15 guns.

The principal crops of the State are grain, barley, wheat, sugarcane, rapeseed, cotton and tobacco. A great part of it is irrigated by the Sirhind and Western Jamna Canal distributaries. It possesses valuable forests and is rich in antiquities, especially in Pinjore, Sunam, Sirhind Bhatinda, Narnaul, etc. Its miles of broad-gauge railway line, comprising two sections—from Rajpura to Bhatinda and from Sirhind to Rupar have been constructed by the State at its own cost. The North-Western Railway, the E. I. Railway, the B. B. & C. I. Railway and the J. B. Railway traverse the State.

His Highness maintains a war contingent of two regiments of Cavalry, four battalions of Infantry one battery of Horse Artillery, one Mountain Battery. Among the new units raised for the last war, mention may be made of the Wireless section, Army Training school, Artillery Training Centre, Infantry Training Centre and D.D.R.T.C. and among the units reorganized to full strength were the 3rd Patiala Sikh Infantry, the 4th Patiala Infantry and the Patiala Training Coy. (A. and M. Section).

The State maintains a first grade college for boys and a second grade college for girls at Patiala and a second grade college for boys at Bhatinda, one of the prosperous towns in the State. Primary education for boys and for girls upto 10th class is free throughout the State.

Since the State entered into alliance with the British Government in 1801 and 1809, it has rendered help to the British Government on all critical occasions, such as the Gurkha War of 1814-15, the Sikh War of 1845, the Mutiny of 1857, the Afghan War 1878-79, and the Tirah and N.-W. F. campaign of 1897. On the outbreak of the last Great War 1914-1918, His late Highness placed the entire resources of his State at the disposal of His Majesty the King Emperor and offered his personal services. The entire Imperial Service Contingent was on active service throughout the period of the War and served on various fronts in Egypt, Gallipoli, Mesopotamia and Palestine, winning numerous distinctions. Two mule and one Camel Corps were raised and placed at the service of the British Government for the period of the War, and in addition to furnishing nearly 28,000 recruits for the British Indian Army and maintaining the State Imperial Service Contingent at full strength, the State contributed substantially in money and material. Again in 1919, on the outbreak of hostilities with Afghanistan, the late Ruler served personally on the Frontier on the Staff of the General Officer Commanding and the Imperial Service Contingent saw active service at Kohat and Quetta fronts. For his services on the N.-W. Frontier, His late Highness was mentioned in despatches. His Highness the present Ruler, true to the traditions of the House of Patiala, volunteered on the occasion of the crisis in September, 1938, to place at the disposal of His Majesty's Government all the resources of the State in the event of war. The offer was renewed in August, 1939, and the measures that have already been taken to implement it are in keeping with the best traditions of the State. His Highness has made a notable contribution to the war effort by making large payments towards various funds organised in connection with the war, in addition to placing special units at the disposal of His Excellency the Crown Representative for active service. His Highness is the Patron-in-Chief of the Khalsa Defence of India League, a body organised by His Highness after the outbreak of war to provide a common platform for the members of the martial Sikh community and to accelerate the pace of recruitment. The contribution made by this body has been remarkable and has been acclaimed as a solid contribution to India's war effort. It will be interesting to note that the number of Patiala State Subjects under colours in the Indian Army and other forces was between 7000-8000 at the end of the world War II.

In July-August 1941 His Highness made a tour of Malaya, the Eastern Front in November 1942 and of Italy the Middle East in October, 1944.

A son and Heir was born to His Highness on the 11th March, 1942.

His Highness has been a member of the Standing Committee of the Chamber of Princes since his accession and is now also Pro-Chancellor of the Chamber. He was also a member of the *National Defence Council of India*. His election as President of the Punjab States Council in 1939 and re-election in 1942 and 1943 bespeak of the esteem in which he is held by his brother Princes. His Highness is the President of the All India Olympic Association, Vice-President of the Gondag League of India, Chairman of the Spanish Club of India, President, Southern Punjab Cricket Association, a representative of India in the Western Asiatic Council and Founder of the Western Asiatic Olympic Association.

Bahawalpur.—Bounded on the North-East by the District of Ferozepur; on the East and South by the Rajputana States of Bikaner and Jaisalmere; on the South-West by Sind, on the North-West by the Indus and Sutlej rivers. Area, 20,000 square miles.

This State is about 320 miles in length and about 60 miles wide, is divided length wise into three great strips. Of these, the first is a part of the Great Indian Desert; the central track which is as barren as the uplands of the Western Punjab, has mostly been rendered capable of cultivation by the network of Sutlej Valley Canals constructed recently; and the third a fertile alluvial tract in the river valley is called the Sind. The State is the major partner in the great Sutlej Valley Project.

The ruling family is descended from the Abbasside Khalifas of Baghdad. The tribe originally came from Sind, and assumed independence during the dismemberment of the Durrani Empire. In the Treaty of Lahore in 1809 with Ranjit Singh the State boundary was confined to the right bank of the Sutlej.

The first treaty with Bahawalpur and the Hon'ble the East India Company was negotiated in 1833, for regulating among other matters, traffic on the Indus. It secured the independence of the Nawab within his own territories and opened up the traffic on the Indus and Sutlej. During the first Afghan War the Nawab rendered assistance to the British and was rewarded by a grant of territory and a life pension. On his death his heir being minor for a time the administration of the State was in the hands of the British authorities. The present ruler is H. H. Col. Dr. Al Haj His Highness Rukn-ud Daula Nusrat-i-Jang Sufdar Daulla Hafizul-Mulk Mushfiq-ul-Daula, Wa Mulnud Daula Nawab Sir Sadiq Mohammad Khan Sahib Bahadur Abbasi V., G.C.S.I., G.C.I.E., K.C.S.I., K.C.V.O., LL.D., who was born in 1904 and succeeded in 1907. During his minority the State was managed by a Council of Regency which ceased to exist in March 1924, when His Highness the Nawab was invested with full powers. His Highness is now assisted in the administration of his State by a Prime Minister, Sir Richard Crofton, C.I.E., I.C.S., a Public Works and Revenue Minister, Khan Bahadur Abdul Qayum B.A., LL.B., a Minister for Education and Health, Major Shamsuddin Mohammad, B.A., a Minister-in-Waiting, Major Saeed Ahmed Hashmi and Diwan Kalch Chand, B.A., LL.B., Household Minister.

The chief crops are cotton and wheat. The Lahore-Karachi branch of the North Western Railway passes through the State. The State maintains an Imperial Service Unit (1st Bahawalpur Infantry) and other State forces, Garrison Companies, M. T. Company and a Mountain Battery.

There is also a State owned Railway of 168 miles of which 84 miles have been temporarily lifted. This is managed for the State by the North-Western Railway.

Khairpur.—The state of Khairpur lies in Upper Sind between 26° 10' and 27°-46' North Latitude and 68° 20' and 70°-14' East Longitude. It is bounded on the East by Jodhpur and Jessalmere territories and on the North, West and South by British Districts of Sind. The climate is similar to the rest of Sind. The maximum temperature in summer is 117° in the shade and the minimum in winter 43°. The nearest hill station is Quetta, 5,500 feet above sea-level. Rainfall is scarce, the last 13 years' average being 4-15". The area of the State is about 6,050 square miles. The population of the State according to the census of 1941 is 305,787 of whom 83% are Muslims. The majority of them are cultivators. Others are engaged in trade, State services and labour. The Muslims are mainly Sunnis, but the Ruler and his family and some others are Shias. The State's income from all sources in 1944-45 was Rs. 52,77,140. The State pays no tribute either to the British Government or to any other State. The language of the State is Sindhi. Urdu and English are also spoken. The chief products of the State are grain and cotton which are cultivated on irrigation canals taking off from the Indus river at the Lloyd Barrage and to a small extent on wells. Oil-seeds, ghee, hides, tobacco, Fuller's earth ("multi"), carbonate of Soda ("Kharo chamho") and wool are also produced. The manufactures comprise cotton, silken and woollen fabrics, lacquer work, carpets and pottery.

The Rulers are Muslim Talpur Balochs and belong to the Shia sect. Previous to the accession of this family on the fall of the Kalhora dynasty of Sind in 1783, the history of the State belongs to the general history of Sind. In that year Mir Fatehoh Khan Talpur established himself as Ruler of Sind and subsequently his nephew, Mir Sohrab Khan Talpur, founded the Khairpur Branch of the Talpur family. In 1842 the individuality of the Khairpur State was recognised by the British Government. The Ruler is a first-class prince and is entitled to a permanent salute of 15 guns outside and 17 guns inside the State limits.

Present Mir. His Highness Mir Faiz Mahomed Khan Talpur of Khairpur State. Born on 4th January 1913. Ascended the gadi on 30th April 1935.

Resident for the Punjab States. The Hon'ble Mr. J. H. Thompson, I.C.S.

Political Officer in Khairpur State. Khan Bahadur S. Ijaz Ali, O.B.E. (Retired Collector, United Provinces).

Ministers. Khan Bahadur Ilahi Bakhsh, M.L.A., P.W. Minister; Sahibzada Hafiz Mir Obedullah Hussain Khan Talpur, Judicial Member.

Jind.—Jind is one of the three Phulkian States (the other two being Patiala and Nabha). Its area is 1,282 square miles, with a population of 3,01,342, and an income of about Rs. 41,00,000.

The history of Jind as a separate State dates from 1763, when Raja Gajpat Singh, the maternal grandfather of Maharaja Ranjit Singh, and great-grandfather of the famous Phul, established his principality. He was succeeded by Raja Bhag Singh, who greatly assisted Lord Lake in 1805. His grandson Raja Sangat Singh was succeeded by the nearest male collateral Raja Sarup Singh in 1837. In the crisis of 1857 Raja Sarup Singh rendered valuable services to the British and was rewarded with a grant of nearly 600 square miles of land, known as Dadri territory. He was succeeded by his son Maharaja Raghbir Singh, who gave help to the British Government on the occasion of Kuka outbreak (1872) and the 2nd Afghan War (1878). The present ruler Maharaja Ranbir Singh was born in 1879, succeeded in 1887 and was invested with full powers in 1899. The State rendered exemplary services in the Great European War 1914-18. It supplied 8,673 men to the Indian Army and

Imperial Service Troops and doubled the strength of its Imperial Service Infantry. The total contribution amounted to nearly 35 lakhs, in gifts of cash, materials, animals and loan.

When the international crisis became imminent just before the commencement of the Second Great War (1939-45), His Highness placed unreservedly all resources of his State and his army at the disposal of the Crown. The Jind Government instituted a War Relief Fund to which the State treasury and the officials as well as the non-official public of the State made contributions. The State treasury guaranteed that the total contribution in each quarter of the year would be equal to 10%, of the land revenue (excluding cesses) and income-tax receipts of the State brought to account during the quarter. Two-thirds of the total contribution was earmarked for the Government of India. Investments were also made in the Defence Loans and National Savings Scheme of the British India Government. The Jind Infantry left the State for intensive training in British India on 19th July 1940 and thence proceeded to overseas where they fell prisoners of war in the hands of the Japanese. The Jind Government thereafter raised and provided three garrison companies which were subsequently amalgamated and organised into one Indian Army Jind Infantry unit. The Jind State also raised Labour Units consisting of 843 men. 11,342 recruits were supplied to the Indian Army from the state in addition to 1,269 recruits enlisted in the State Forces.

His Highness enjoys a salute of 15 guns. The capital is Sangrur, which is connected by a State Railway with the North-Western Railway. The principal executive officer of the State is called Dewan.

Ruler.—Brigadier His Highness Farzand-i-Dilband Rasikh-ul-Itikad, Daulat-i-Inglishia Raja-i-Rajgan Maharaja Sir Ranbir Singh Rajendra Bahadur, G.C.S.I., G.C.I.E., etc.

Nabha.—Nabha, which became a separate State in 1763, is one of the 3 Phulkian States—Nabha, Patiala and Jind—and though second in point of population and revenue of the 3 sister States, it claims seniority owing to its Rulers claiming descent from the eldest branch. It consists of two distinct parts: the main portion comprising 12 separate pieces of territory scattered among the other Punjab States and Districts, forms the City of Nabha and the Nizamats of Phul and Amloh; the second portion forms the Nizamat of Bawal in the extreme south-east of the Punjab on the border of Rajputana; this Nizamat of Bawal was subsequently added to its territory as a reward from the British Government for the loyalty of the Rulers of Nabha. The State now covers an area of about 1,000 square miles and has a population of about 3,40,000. It maintains a Field Service Unit consisting of a full Battalion of Infantry known as the Nabha Akal Infantry under the Indian States Forces Scheme, 1939, and a full Training Company. For the preservation of the peace there is also a Police force consisting of about 500 men.

The State is traversed by the main and 3 branch lines of the N.-W. Railway and the B. B. & C. I. crosses the Nizamat of Bawal. A portion of the State is irrigated by the Sirhind Canal. The crops of the State are gram, pulses, bajra, sugarcane, cotton, wheat and barley; to facilitate trade the Durbar has opened grain markets and Banks near the principal railway stations within the State territory. The chief industries of the State consist of the manufacture of silver and gold ornaments, brass utensils, cotton, carpets, lace and gota, etc. There are some ginning factories and 5 cotton Steam Presses in the State which are working successfully. Lt.-Col. His Highness Maharaja Sir Pratap Singh Malvendra Bahadur, K.C.S.I., who was born in 1919, was invested with ruling powers on 5th March 1941. In the administration of the State His Highness is assisted by a cabinet of Ministers. The Chief Minister, Sardar Sahib Sant Singh, is an officer of the Punjab Civil Service.

Kapurthala.—This State consists of three detached pieces of territory in the great plain of the Jullundur Doab. The ruler of Kapurthala at one time held possessions both in the Ods and Trans-Sutlej and also in the Bari Doab. In the latter lies the village of Ahlu whence the family originates and from which it takes the name of Ahluwalia. The Bari Doab estates are held by the head of the House as a jigdir in perpetuity. For good services during the Mutiny, the present Maharaja's grandfather was rewarded with a grant of other estates in Oudh which at present yields an annual income of more than Rs. 20,00,000 to those of Kapurthala State.

The present Ruler Brigadier H. H. Farzand-i-Dilband Rasikh-ul-Itiqad Daulat-i-Inglishia Raja-i-Rajgan Maharaja Jagatjit Singh, G.C.S.I., G.C.I.E., G.B.E., was born on 24th November, 1872 and succeeded his father, His Highness the late Raja-i-Rajgan Kharak Singh of Kapurthala in 1877. The present Maharaja received the Grand Cross of the Legion d'Honneur from the French Government in 1924, and possesses also the Grand Cross of the Order of Carlo 3rd of Spain, Grand Cross of the Order of the Star of Roumania, Grand Cross of the Order of Menelek of Abyssinia, Grand Cross of the Order of the Nile of Egypt, Grand Cordon of the Order of Morocco, Grand Cordon of the Order of Tunis, Grand Cross of the Order of Chili, Grand Cross of the Order of the Sun of Peru, Grand Cross of the Order of Cuba. His Highness represented Indian Princes and India on the League of Nations in 1926, 1927 and 1929, celebrated the Golden Jubilee of his reign in December 1927, and the Diamond Jubilee in 1937.

The rulers of Kapurthala are Rajput Sikhs and claim descent from Rana Kapur, a distinguished member of the Rajput House of Jaisalmer which is considered as the head of human race. Only a small proportion of the population, however are Sikhs, the majority being Mahomedans. The chief crops are wheat, gram, maize, cotton and sugarcane.

The town of Sultanpur in this State is famous for handprinted cloths. Phagwara is another important town in the State, has a large Sugar Factory on modern lines, and is very prosperous also on account of its grain markets and factories for manufacture of agricultural implements, and metallic utensils. A big starch factory was started a few years ago while a big and up-to-date

textile mill is to be started soon. The situation of this town on the main railway line and the consequent facilities of export and import make it an important and chief commercial town in the State. The main line of the North-Western Railway passes through part of the State and the Grand Trunk Road runs parallel to it. A branch railway from Jullundur City to Ferozepur passes through the capital.

A new Industrial town, Jagat Nagar, has been developed on the main North Western Railway at a distance of about seven miles from Kapurthala. One of the largest sugar factories in Northern India is working successfully in the area, while an up-to-date distillery the largest in India, is also running successfully.

The Imperial Services and local troops of the State have been reorganised and are now designated as Kapurthala State Forces. These State Troops, the strength of which was raised during the last Great War, to nearly 3,000 served the Empire in that crisis in East Africa, Mesopotamia and on the Afghan Frontier. The Maharaja's third son, late Lt.-Col. Maharaj Kumar Amarjit Singh, O.B.E., served with the Indian Army in France. He also made two months' tour in M. E. I. and Persian Gulf visiting the Indian troops stationed there in 1941. War work of all kinds was carried on throughout the State with great zeal and commendable results. A number of State officers and soldiers of the Kapurthala State Forces and in the Indian Army rendered meritorious services during the War and received various distinctions. Amongst others the following deserve special notice.

(a) Victoria Cross to Lt. Dr. Kataru Singh, Judge (Divisional Officer) Sikh Punjabi Regiment.

(b) Military Cross to Lt. Sucha Singh of Village Dhesian Tehsil Kapurthala (6th Sikh Punjab Regiment).

On the termination of War His Highness the Maharaja sanctioned a sum of Rs. 50 lacs for Post War Development activities in several fields, grant additional amenities, facilities to its subjects for Education, sanitation Medical Relief Public Health, roads and rural development etc.

Primary Education is free throughout the State and a large proportion of the revenue of the State is spent for the Educational Department. The Randhir College at Kapurthala and the Ramgarhia College at Phagwara have recently been raised to B.A. standard. Besides there is a large number of Primary and High Schools for boys and girls all over the State.

The capital is Kapurthala which has been embellished by the present Maharaja with a Palace of remarkable beauty and grandeur and with various buildings of public utility. The town boasts of modern amenities such as electric light, water-works, etc.

Political Officer: The Hon'ble the Resident for the Punjab States.

Tehri State (or Tehri Garhwal). This State lies entirely in the Himalayas and contains a tangled series of ridges and spurs radiating from a lofty series of peaks on the border of Tibet. The sources of the Ganges and the Jumna are in it. The early history of the State is that of Garhwal District, the two tracts having formerly been ruled by the same dynasty since 688 A.D. Pradyumna Shah, the last Raja of the whole territory, was killed in battle fighting against the Gurkhas; but at the close of the Nepalese War in 1815, his son received from the British the present State of Tehri. During the Mutiny the latter rendered valuable assistance to Government. He died in 1859. The present Ruler is H. H. Maharaja Manabendra Shah who is 60th direct male lineal descendant from the original founder of the dynasty, Raja Kanak Pal. The principal products are rice and wheat grown on terraces on the hill sides. The State forests are very valuable and there is considerable export of timber. The Maharaja has full powers within the State. The strength of the State forces is 1,000. Tehri is the capital but His Highness and the Secretariat Office are at Narendranagar for the greater part of the year, the summer capital being Pratapnagar, both being above the sea level. The State is in political relationship with the Residency of the Punjab States.

Mandi is an Indian State in the Punjab Political Agency, being one of the Hill tribes of Himachal with a total area of 1,200 square miles. Its capital, Mandi, is situated on the left bank of the Beas River, between 31° 32' North Lat. and 76° 54' East Long., and is connected with Pathankot, on the South by Kangra Valley Railway and by road with Kulu on the North and with Suket on the West by Kamand (7,200) which finally decided in 1846 to submit to the British and in 1846 entered into a treaty with the British in 1846.

The present Ruler, Major His Highness Raja Sir Joginder Sen Bahadur, K.C.S.I., assumed full powers on February 1904. His Highness succeeded to the gadi on the death of his father His Highness Maharaja Sir Bijai Sen, K.C.S.I., on 8th Dec., 1902. His younger brother is Rajkumar Lok Sen younger brother of Rajkumar Sahib of Rajpipla. A son and heir was born on 7th Dec., 1925.

The Mandi Hydro-Electric Scheme was formally opened by His Excellency the Viceroy in March 1932. Irrigation supplies rice, maize, wheat and vegetables. About two-fifths of the State is covered by forests and grazing lands. It is rich in minerals. The capital is Mandi, founded in 1527, which contains several temples and places of interest. Drangs one of the chief marts for commerce with Ladhakh and Yarkand.

Sirmur. This State, the Simla Hills States Agency, lies between 30° 22' and 31° 1' North Lat. and 77° 5' and 77° 49' East Long., and is bounded on the North by Tibet, on the East by Tehri-Garhwal State, on the South by the United Provinces, and on the West by Simla District and Keonthal State. Its area is 1,198 square miles. Its population (1931) was 138,707, showing an increase of 11.5 per cent. during the decade. The density is 116 persons per square mile. The number of villages is 1,000. The capital is Nahan, which is situated 2,100 feet above the sea level, and is 47 miles from Kalka, the railway terminus, and 30 miles from Simla. The population of Nahan was 9,000 in 1931. The Raja is entitled to a salute of 15 guns. He is a member of the Rajput branch of the Indian Royal Family. The present Ruler is H. H. Maharaja Rajendra Prakash, who is the 18th direct male descendant from the original founder of the dynasty, Maharaja Sobhans Prakash in 1048 A.D. He was born in 1913 and succeeded in 1933.

The State consists of both hills and plains with altitude varying from 1,000 ft. to 11,000 ft. The chief products are wheat, maize, rice, sugar-cane, poppy, ginger potatoes, turmeric and chillies, etc. It is rich in Sal, Deodar and Pine forests. It has an Iron Foundry which was

established in 1867 A.D. and produces sugar-cane crushers which are the best available in the market. The State owns large tea estates at Kowlagarh and Choharpur in Dehra-Dun District. The mineral resources of the State are being prospected. There are huge deposits of Gypsum, Lime and Iron Pyrites. A scheme for construction of dams on the rivers Tons and Giri, which are tributaries of the Jumna, to generate hydro-electric power and provide irrigation facilities is under the active consideration of the Durbar and the Punjab Government. A Sirmur Land Produce Syndicate Limited has been formed.

The State maintains a Corps of Sappers and Miners which rendered valuable services to the Crown during the Second Afghan War and during the last Great War when it was captured with Gen. Townshends force at Kut-ul-Amara. It also served with His Majesty's Forces during Great War II.

EXECUTIVE COUNCIL.—His Highness the Maharaja Sahib Bahadur, *President*; Rai Bahadur Jamai Dass Atal, I.C.S., Retd., *Vice-President*; Khan Sahib R. G. Abbi, *Finance Minister*; Maharaj Rajendra Singh Ji, *Minister without Portfolio*.

Faridkot.—The Faridkot Rajas belong to the same stock as the Phulkian Chiefs, having a common ancestor in Brar. The Faridkot House was founded in the middle of the 17th century. The present Ruler Lt.-Col. His Highness Farzand-i-Saadat Nishan Hazrat-i-Kaiser-i-Hind, Raja Sir Harindar Singh, Brar Bans Kanwal, was born on the 20th January, 1915, succeeded to the *gadi* in 1918, and was invested with full ruling powers in October, 1934. His Highness personally administers the State assisted by an Executive Council of five members, presided over by Lt. Col. Kanwar Manjitindar Singh Bahadur, the younger brother of His Highness. His Highness has been a member of the National Defence Council. The State comprises an area of 643 square miles with a population of 199,283 and has a gross annual income of Rs. 50,00,000. The Ruler is entitled to a salute of 11 guns. Faridkot, the Capital town, lies on the main Delhi-Bhatinda-Lahore Section of the North-Western Railway.

Chamba.—Bounded on the west and north by Kashmir, on the east and south by the British districts of Kangra and Gurdaspur, Chamba is shut in on almost every side by lofty hill ranges. The whole country is mountainous and is a favourite resort of sportsmen. It possesses a remarkable series of copper plate inscriptions from which its chronicles have been compiled.

Founded probably in the sixth century by Maruta, Surajbansi Rajput, who built Brahmapura the modern Barmaur, Chamba was extended by Meru Varma (680) and the town of Chamba was built by Sahil Varma about 920. The State maintained its independence, until the Moghal conquest of India.

Under the Moghals it became tributary to the empire, but its internal administration was not interfered with, and it escaped almost unscathed from Sikh aggression. The State first came under British influence in 1846. The part, west of the Ravi, was at first handed over to Kashmir, but subsequently the boundaries of the State were fixed as they now stand, and it was declared independent of Kashmir. The present Chief is H. H. Raja Lakshman Singh who was born in 1924 succeeded to the *gadi* in 1935 and was invested with Ruling powers on the 4th May 1945. His Highness has an executive Council consisting of a Dewan (J. Slattery, C.B.E.) and two members (Rai Bahadur Raghubir Singh, Revenue Member, and L. Gurditta Mal, General Member) for the Administration of the State. The principal crops are rice, maize and millets. There are some valuable forests which were partly leased to Government in 1864 for a term of 99 years, but their management has now been retroceded to the Chamba Durbar. The principal road to Chamba town is from Pathankot, the terminus of the Amritsar Pathankot branch of the North-Western Railway. Chamba town, on the right bank of the Ravi, has a number of interesting temples, of which Lakshmi Narayan temple, dating possibly from the tenth century, is the most famous.

Maler Kotla.—This State lies in the Cis Sutlej area in the South East Punjab. It consists of a level plain unbroken by a hill or stream, and is bounded on the North by a strip of Ludhiana District, on the East and South by the Patiala territory, on the West by Nabha territories. The ancestors of the Rulers (Nawabs) of Malerkotla came originally from "Derbant" in the Province of "Sherwan" on the shores of Caspian Sea and founded the town of "Sherwan" in the North of Persia. Thus they derive the title of "Sherwani". Some of them migrated into Afghanistan near Ghazni amongst whom was Sadrud Din Khan the ancestor of the Maler Kotla Sherwani. Afghans who came to India from Ghazni and settled in Maler, the old capital of the State, in 1442, and acquired the surrounding territory and later his descendants enlarged it by conquest and grant from the Delhi Emperors for service and held very extensive territories. As the Moghal Empire began to decline they gradually became independent. The town of Kotla was built by Nawab Baizla Khan in 1658. They were engaged in constant feuds with the adjacent Sikh States. The Nawab of Maler Kotla joined the British with his troops at Laswari and assisted General Lake in his Campaign against the Mahratta and after the victory of Laswari gained by the British over Sindhia in 1803 and by this victory and the subjugation and flights of Holkar in 1805, the British Government succeeded to the power of the Mahrattas in the districts between the Sutlej and the Jamna. The State entered into political relations with the British Government in 1809. The present Ruler Lt.-Col. His Highness Nawab Sir Ahmad Ali Khan Bahadur, K.C.S.I., K.C.I.E., was born in 1881 and succeeded in 1908. He was created Honorary Major in the Indian Army in June 1916 and promoted to the rank of Lt.-Col. in December, 1919.

The capital of the State is Maler Kotla which is connected by roads to *Ludhiana*, *Nabha*, *Patiala*, *Ambala*, and *Sangrur*. The L. D. J. Railway which is owned by the Jind and Maler Kotla Darbars runs through the State. Maler Kotla is a station on this line. Ahmadgarh is

the second town and a flourishing Mandi in the State and is situated on this line 12 miles North of Maler Kotla town.

The chief products of the State are cotton, sugar, aniseed, mustard Ajwain, Methi, Tobacco, Garlic, Onions, Wheat, Maize and all other sorts of grains. Except very little canal irrigation the chief means of irrigation is from wells.

The Annual Revenue of the State is about 15¼ lacs. The State maintains among its military forces a full Field Company of Sappers and Miners for services of the Crown.

The State Forces assisted the British Government in the Gurkha war 1814, the siege of Bharatpur 1826, the Sikh War 1845-46, the Mutiny 1857 and the 1st and 2nd Kabul Wars and its Field Company has been on service in the "Tirah 1897", "China 1900-01", "The Great War 1914-18" 3rd "Kabul War" and is now again on Active Service since September 1939. The State has also assisted the British Government with men, money and material besides its troops in all campaigns.

The State has permanent salute of 11 guns and is a member of the Chamber of Princes in its own right. It is in the Punjab States Residency.

His Highness has an younger brother and three sons, the eldest Sahibzada Iftikhar Ali Khan born in 1904, the Heir-Apperent. His Highness has a grandson Sahibzada Kazim Ali Khan born 1936. He is the son of His Highness' third son Sahibzada Altaf Ali Khan.

JAMMU AND KASHMIR STATE.

The territory known generally as the Jammu and Kashmir State, lies between 32° and 37° N. and 73° and 80° E. It is an almost entirely mountainous region with a strip of level land along the Punjab border, and its mountains, valleys and lakes comprise some of the grandest scenery in the world. The State may be divided physically into three areas; the upper, comprising the area drained by the River Indus and its tributaries; the middle, drained by the Jhelum and Kishenganga Rivers; and the lower area, consisting of the level strip along the southern border, and its adjacent ranges of hills. The dividing lines between the three areas are the snow-bound inner and outer Himalayan ranges known as the Zojila and the Panchal. The area of the State is 84,471 square miles. Beginning in the south where the great plain of the Punjab ends, it extends northwards to the high Karakoram mountains "where three Empires meet."

Briefly described, the State comprises the valleys of the three great rivers of Northern India, viz., the upper reaches of the Chenab and the Jhelum, and the middle reaches of the Indus. The total population is 4,021,616.

History.—Various historians and poets have left more or less trustworthy records of the history of the valley of Kashmir and the adjacent regions. In 1586 it was annexed to the Moghul Empire by Akbar. Srinagar, the capital originally known as Pravarapura, had by then been long established, though many of the fine buildings said to have been erected by early Hindu rulers had been destroyed in the fourteenth century. In the reign of Sikandar, who was a contemporary of Tamerlane, a large number of Hindus was converted to Islam. Jehangir did much to beautify the Valley, but after Aurangzeb there was a period of disorder and decay, and by the middle of the eighteenth century the Suba or Governor of Kashmir had become practically independent of Delhi. Thereafter the country remained under the Afghan rule until 1819 when it was conquered by Maharaja Ranjit Singh and passed to Sikhs. The early history of the State as at present constituted is that of Maharaja Shri Gulab Singhji, a scion of the old Ruling Family of Jammu, who rose to eminence in the service of Maharaja Ranjit Singh of Lahore and was, in recognition of his distinguished services, made Raja of Jammu in 1820. He held aloof from the war between the British and the Sikhs, only appearing as mediator after the battle of Sobraon (1846), when the British made over to him the valley of Kashmir and certain other areas in return for his services in re-establishing peace. His son, His Highness Maharaja Ranbir Singhji, a model Hindu and one of the staunchest allies of the British Government, ruled from 1857 to 1885. He did much to consolidate his possessions and evolve order in the frontier districts. He was succeeded by his eldest son, *His Highness Maharaja Sir Pratap Singhji*, who died on 23rd September 1925, and was succeeded by His Highness the present Shri Maharaja Hari Singhji Bahadur.

The most notable reform effected in the State during the reign of the late Maharaja was the Land Revenue Settlement originally carried out under Sir Walter Lawrence and revised from time to time.

Administration.—For some years after the accession to the *gadi* of the late Maharaja, the administration of the State was conducted by a Council over which the Maharaja presided. In 1905 this Council was abolished and the administration of the State was thenceforward carried on by His Highness the Maharaja with the help of a Chief Minister and a number of Ministers in charge of different portfolios. This system continued until January, 1922, when an Executive Council was inaugurated. Very recently certain modifications have been introduced in the constitution. The Executive Council at present includes 2 popular Ministers.

The British Resident has his headquarters at Srinagar and Sialkot and there is also a Political Agent at Gilgit. A British Officer is stationed at Leh to assist in the supervision of the Central Asian Trade with India, which passes through Kashmir.

In the Dogras (Hindus and Muslims) the State has splendid material for the Army. They also serve in large numbers in the Indian Army.

Revenue.—The total revenue of the State for the year 1945-46 has been estimated at Rs. 495·51 lakhs.

Production and Industry.—The population is predominently agricultural and pastoral. The principal food crops are rice, maize and wheat. Oilseed is also an important crop. Barley, cotton, saffron, tobacco, beans, walnuts, almonds and hops are also grown. Pears and apples, the principal fruits of the Valley, are exported in large quantities. The State forests are extensive and valuable. The principal species of timber trees are deodar, blue pine and fir. The most valuable forests lie in Kishtwar, Karnah and Kamraj Illaqas. A survey of the mineral resources of the State is being conducted. The most noteworthy of the minerals expected to be found in the State are bauxite, coal, Fuller's earth, kaoline, slate, zinc, copper and talc. Gold is found in Baltistan and Gilgit, sapphires in Paddar, aquamarines in Skardu and lead in Uri. The silk filature in Srinagar is the largest of its kind in the world. Manufacture of silk is a very ancient industry in Kashmir. Zain-ul-Abidin, who ruled from 1421 to 1472, is said to have imported silk weavers from Khurasan and settled them here. Woollen cloth, shawls, carpets, papier maché and wood carving of the State are world famous. The State participated in the British Empire Exhibition of 1924, where the Kashmir Court earned the name "The Gem of The Smaller Courts" and attracted many visitors. An Industrial and Agricultural Exhibition is held in the State annually, where the products of indigenous arts and craftsmanship for which Kashmir is famous, are displayed. His Highness's Government are maintaining a Visitors' Bureau at Srinagar for the convenience of visitors, who are attracted by the scenery and charm of the beauty-spots of Kashmir. Recently attention has been directed towards the development of tourist traffic. Tourist Bureaus have been opened at a number of places including Rawalpindi and Suchetgarh, to give the necessary information regarding the State to the intending visitors.

Communications.—Great efforts have been and are being made towards the improvement of roads for wheeled traffic in the State. The Jhelum Valley road (196 miles) which links the Kashmir Valley with the Punjab and the North-Western Frontier Province is considered to be one of the finest motorable mountain roads in the world.

The Banihal Cart Road, about 200 miles long, joins Kashmir with the North-Western Railway system at Jammu-Tawi and is also a fine motorable road.

Roads for pack animals lead from Srinagar the summer capital of Kashmir, to the frontier districts of Gilgit and Ladakh. Internal village communication have also been much improved.

The Jammu Suchetgarh Railway, a section of the Wazirabad-Sialkot branch line of the North-Western Railway system, is the only Railway in the State. The mountainous nature of the country has so far prevented the extension of the line into the heart of the State.

Public Works.—In 1904 a flood spill channel above Srinagar was constructed to minimise the constant danger of floods in the River Jhelum. A number of canals have been constructed at considerable expense both in Jammu and Kashmir. The State is connected with the telephone system of British India. Good progress has been made with irrigation. The installation of a large Electric Power Station on the Jhelum River at Mahora was completed in 1907.

Education.—According to the last census of the State, there were over 238,000 literate persons in the State including over 35,000 females. The number of educational institutions is 2,078. There are four Colleges and one aided Oriental College. The number of scholars in 1945 was 127,000. In Municipal areas education for boys was made compulsory in 1929. More schools including basic schools are introduced every year.

Reforms.—One of the important reforms connected with the present Maharaja's reign has been the establishment of an independent High Court of Judicature modelled on British Indian lines. In September 1943, His Highness granted Letters Patent to the High Court similar to those of High Courts in British India. Important legislative measures passed by His Highnesses' Government in recent years include the raising of the age of marriage to 14 for girls and 18 for boys, and the Agriculturists' Relief Act designed to cope with the problem of rural indebtedness.

As signs of constitutional progress of the State may be mentioned the freedom granted to the press, and the introduction of the State Assembly in 1934. His Highness announced further reforms on the 16th of February, 1939, by a proclamation, the main features of which were (*a*) an elected majority in the Praja Sabha, (40 elected members in a house of 75); (*b*) election by the Praja Sabha of its own Deputy President; (*c*) appointment of four non-official members of the Sabha as Under-Secretaries to assist His Highness's Ministers, and (*d*) submission of proposals for the appropriation of the Revenues and other monies in any year for expenditure on items which are votable (the non-votable items being specified in the Statute) to the vote of the Sabha in the form of demands. Recently two members of the Praja Sabha selected from a panel of 6 elected by the non-official members of the Praja Sabha itself, were included in the Executive Council.

The Constitution Act which was promulgated in 1939 made provision for the appointment of a Board of Judicial Advisers and the creation of the post of an Advocate-General. The Board advises His Highness in the disposal of such civil and criminal appeals as lie to His Highness from the High Court of Judicature.

War Effort. During the last War, the State supplied over half a lakh of recruits. Eight units of the State Army were sent for active service out-side the State. Three of the units have been permanently transferred to the Indian Army. The State Forces units particularly distinguished themselves at the battles of Keran (Eritrea) and Damascus (Syria) and also in the campaign that resulted in the defeat of the Japanese attempt to invade India and the re-conquest of Burma. One of the units had the distinction of capturing Kennedy Peak and Fort White. Several awards for conspicuous gallantry in the field were conferred upon State Subjects serving in the State Forces or in one of other of the Indian Defence Services. The State bore the full cost of its war efforts.

The Army expenditure rose from Rs. 47½ lakhs in 1939-40 to about Rs. 90 lakhs in 1944-45. The War Aid Committee set up under the presidentship of Her Highness the Maharani Sahiba collected a sum of about Rs. 9 lakhs—mostly contributions from His Highness and the Ruling Family—and spent over Rs. 8 lakhs on providing amenities to troops and other activities calculated to contribute towards winning the war. His Highness also contributed large sums of money from his privy purse for particular purposes connected with or arising out of the war. He presented eighteen completely equipped motor ambulances and also placed a portion of the Kashmir House, Delhi, at the disposal of the Government of India free of rent for the accommodation of Government offices. His Highness also placed his lock-heed plane at the disposal of the Government of India for use in connection with the war. Later His Highness sent £50,000 to His Excellency the Viceroy for purchase of 10 fighter aircrafts for the defence of India. In October 1941, His Highness paid a visit to the Forces in the Middle East among whom were his own men of the 1st Jammu and Kashmir Mountain Battery. In April 1944, in fitting recognition of his great service, the Maharaja was invited to England as a member of the Imperial War Cabinet—not for nothing is he styled "Shield of the Empire". On his return, after nearly three months, His Highness visited Italy at the dramatic moment when the Allied Forces had entered Rome. Later, His Highness again went overseas. During this visit he saw some of his troops on duty in Iran.

THE CHAMBER OF PRINCES.

The Narendra Mandal or Chamber of Princes came into existence, with the earnest co-operation of a number of leading Princes themselves, as one of the results of the Report on Indian constitutional reform presented to Parliament by Mr. Montagu, Secretary of State for India and H. E. Lord Chelmsford, Viceroy and Governor-General of India in 1919. The proposal was that the Chamber should exist as a permanent consultative body, with the Viceroy as President and the members composing the Chamber consisting mainly of the Princes and Chiefs having salutes or whose membership might otherwise be considered desirable by the Viceroy. Certain smaller Chiefs were grouped and were given the privilege of nominating a member to represent them from year to year. The Chamber is a recommendatory body, which performs its functions under a constitution approved by the Secretary of State and it deals with questions submitted to it concerning the Princes and their rights and privileges generally and their position in imperial affairs.

The Chamber was formally inaugurated by H. R. H. the Duke of Connaught on 8th February 1921. It meets once a year and the agenda of subjects for discussion is framed and proposed by the Chancellor of the Chamber. The Chamber selects by vote its own office-bearers, who are the Chancellor, a pro Chancellor to act for him in his absence out of India and a Standing Committee of the Chamber. This Committee considers before the annual meetings the subjects to be discussed at them.

Composition of Chamber:—As the constitution of the Chamber provided for each State-Member exercising one vote on any question coming before the Chamber, power in the Chamber gradually fell into the hands of a majority representing the smaller States because these States were naturally the readiest to exercise their membership privileges. This development caused serious dissatisfaction among the Greater States and out of that sprang a movement for the re-organization of the Chamber.

The differences between the Greater States and the Lesser States were much sharpened by the different view-points which they held in regard to Federation. His late Highness of Patiala early in 1936 resigned the Chancellorship on this account. Thereafter His late Highness of Bikaner resigned from the Standing Committee of the Chamber. Only one Ruling Prince with a salute as big as 17 guns was then left an active participant in the Chamber's affairs. His Highness of Patiala was succeeded in the Chancellorship by His Highness of Dholpur, who automatically proceeded to the appointment from that of pro Chancellor. There was no meeting of the Chamber in 1936. His Excellency the Viceroy, in consultation with the Princes, convened a meeting in February 1937.

This meeting was preceded by intensive deliberations in the Informal Conferences of Princes. Their Highnesses at discussions which they held in Bombay in October 1936 appointed a Constitution Committee, under the Chairmanship of His late Highness the Maharaja of Patiala and including the Chancellor, to examine the Government of India Act of 1935 from the point of view of the States' entry into Federation. This Committee produced its report in the first week of February 1937, and in the course of it said that upon careful consideration of the Act they had "come to the conclusion that the safeguards have been substantially met" and that certain further communications now newly made by themselves would, if adopted, completely fulfil them. These recommendations, the Committee said, had been drafted in consideration of the fact that the Act had already been passed. They comprised, therefore, four proposed changes in the Draft States' Instrument of Accession.

This report was taken into consideration by the general body of Princes at an informal Conference which adopted the report of the Constitution Committee. This decision was endorsed in a formal meeting of the Chamber of Princes in February 1937 by the re-election of His late Highness of Patiala to the Chancellorship by an overwhelming majority, and by the election of a pro Chancellor and Standing Committee in sympathy with the same decision.

His Highness the Jam Saheb of Nawanagar succeeded His late Highness of Patiala in the Chancellorship and held the office for a number of years until the election in 1944 of His Highness the Nawab of Bhopal who is now the Chancellor. The Jam Saheb is "pro-Chancellor."

Internal Reform in States.—The pace of administrative and constitutional reform in the States has rapidly increased in the last few years owing to the introduction of provincial autonomy in British India, the apparent approach of Federation, and pressure—sometimes direct—from the Indian National Congress.

A new factor in the accession of the States to the proposed federation arose early in 1938. The Congress which had all this while opposed the inauguration of the federal part of the Government of India Act intensified its opposition since July 1937 when its nominees became Ministers in the majority of British Indian provinces. One of their principal objections was the anomaly of "forcing an alliance between democratic British Indian provinces and autocratic Indian States." In other words, the Congress demanded as one of the conditions precedent to its active co-operation with the federal scheme the introduction in the States of self-governing institutions and an undertaking by the States rulers that in choosing their representatives to the federal legislature they would adopt an elective element. Neither the British Government nor their representatives in India could countenance these demands which were contrary to the provisions of the Act. Nevertheless the tide of democracy could not be stemmed. Many States could not escape the influence of autonomous adjacent provinces.

Numerous States announced their Rulers' intention to liberalise their constitutional machinery and to improve their administration. Many actually introduced reforms. A few Rulers declared that responsible government was the goal of policy and took steps towards it. Many Rulers announced progressive schemes of administrative reform in their respective states.

An extraordinary development took place early in 1939 when Mr. Gandhi decided on a fast to death to compel the Thakore Saheb of Rajkot to implement his promise concerning the membership of a reforms committee. The Viceroy intervened and Mr. Gandhi agreed to the adjudication of the Chief Justice of the Federal Court, which went in his favour. But subsequently further difficulties over the constitution of the committee arose owing to Mr. Gandhi's promise to the minorities and Mr. Gandhi eventually recanted and declared that his fast had been coercive in character. He therefore left the committee to be constituted by the State. Later Mr. Gandhi announced a "new technique" for agitation by States subjects, in which he counselled moderation in their demands and called off all civil disobedience movements in the States.

His advice and direction was followed in almost every Indian State where previously the air had been thick with strife. In some cases the response was quick, while in others the local leaders were inclined to be resentful of this sudden brake on their activities. Eventually, however, quiet was restored on the "States front," although stray "incidents" continued to engage the attention of the local public and of Mr. Gandhi himself.

As recently as October 1941 Mr. Gandhi declared: "I am convinced that in the new world order which is bound to follow the insensate butchery, dignified by the name of war, the Princes will have place only if they become true servants of the people, deriving their power not from the sword, but from the love and consent of the people." Mr. Gandhi advised the people of the States to cultivate patience and prepare themselves for the responsibilities that would devolve on them, by doing mute constructive work. That did not mean submission to active and acute tyranny of which so many accounts had reached him. That the victims must resist in the best manner they could.

1943 Meeting of the Chamber.—The annual meeting of the Princes' Chamber was held in October 1943. It was addressed by Lord Linlithgow for the last time, for His Excellency the Crown Representative left India almost immediately after. The address was listened to by the largest number of Princes that had ever attended any session since the inauguration of the Chamber. His Excellency upheld the federal ideal as the best for Indian unity and for the constitutional future of India and declared that "that unity is wholly consistent with the survival and orderly development of Indian States." He emphasised that the Crown's obligations to protect carried with them equally binding responsibilities to ensure, if need be, that what was protected continued to be worthy of protection.

The Viceroy's remarks gave rise to mixed feelings among the Princes. The Standing Committee of the Chamber held a prolonged meeting to discuss the Chancellor's draft reply to the Crown Representative.

Replying to the Viceroy's address, the Jam Saheb made a reference to the constitutional issue and urged that disputes arising between the Government of India or a provincial Government and any Indian States or between two or more Indian States, or where a State was dissatisfied with the ruling or advice of the Crown Representative or his local representative, should be referable as of right to a court of arbitration of the Federal Court as may be settled in consultation with the representative of the States.

The Jam Saheb particularly referred to the Viceroy's statement that the "Crown's obligations to protect carry with them equally binding responsibilities to ensure that what is protected continues to be worthy of protection." He said that the statement had raised vital problems and new issues of far-reaching and grave importance which would receive their earnest consideration. In this connection the Chancellor referred to "grave apprehensions that the rights and interests of the Indian Princes were not receiving the consideration to which they were entitled because of their lack of nuisance value." He said: "In view of these grave apprehensions, it is felt that Your Excellency's successor would be rendering a real service to the Crown as also to the States, if at his early convenience he were to invite the representatives of the States for a free and frank consultation on the few outstanding questions and the ways and means to remove those prevailing apprehensions."

States' War Effort.—Reviewing the States' contribution to war effort at a meeting of the Standing Committee of the Chamber held in

Bombay in July 1944, the Nawab of Bhopal said that 59 Indian States had sent their armed forces for active service. Over 3,00,000 men had volunteered and proceeded from their territories to the various fighting services. Those were in addition to the 15,000 trained technicians and many thousand unskilled workers.

The total financial contributions made by the Princes and their people aggregated over Rs. 6,50,00,000 which was more than half the total contributions from British India for the Viceroy's War Purposes Fund. Their total war investments amounted to approximately Rs. 11,50,00,000. These figures were exclusive of the investments made by various banks whose head offices were in British India but whose branches operated in the States as well and of investments through post offices in the States for which separate accounts were not kept.

The cost of material supplied for war purposes by the States came to several crores of rupees. Various States had presented aircraft to the R.A.F. and the I.A.F. Most of them had presented more than one aircraft, three having presented complete squadrons, one of them three squadrons, including a bomber squadron and one State a flight of fighters. Several Rulers had presented their own private aircraft.

Some States had presented armed vessels to the Royal Indian Navy. Some others had placed at the disposal of the War Department their motor transport ambulance companies which had rendered meritorious service overseas. Thousands of ambulances, armoured lorries and trucks had also been supplied.

1944 CRISIS.

In the middle of September two deputations of the Princes waited on His Excellency the Crown Representative. One of them discussed questions affecting smaller States such as inter-state general services, while the other took up with His Excellency the industrial policy of the Government of India as affecting the States, post war reconstruction, treaty rights and relationship with the Crown. What happened at this interview is not clear except from the rapid events which culminated in a crisis in December 1944. On December 4, 1944, for the first time in the 23 year long history of the Chamber of Princes, the Standing Committee of the Chamber resigned *en bloc* and the session of the Chamber, scheduled to meet on the following day, was obliged to be postponed *sine die*.

On this crisis of first rate importance there is, curiously enough, no authoritative information, barring a statement made in the House of Commons by the Secretary of State for India in reply to a question. Mr. Amery said: "In September last, a small deputation of Princes, led by the Chancellor of the Chamber, was received by the Crown Representative. The matters discussed covered a wide field. A further reply was sent on December 2, on behalf of the Crown Representative, to the points raised by the deputation. On December 3, just before the date fixed for the session of the Chamber of Princes, the Chancellor informed Lord Wavell that he, the Pro-Chancellor and 19 members of the Standing Committee had resigned their offices and membership of the committee. No question arises of the Crown Representative accepting or not accepting the resignations since appointments connected with the Chamber of Princes are made not by him but by the Chamber itself; but they inevitably caused postponement of the session of the Chamber.

"The Princes have made no statement indicating what particular issue or issues led them to resign. Until the situation is clear, I should not like to express any opinion on this point. I would emphasise, however, that the reply to the Princes to which I have alluded, contained nothing new in principle or policy.

"I am glad to be able to tell the House that the Viceroy has received an assurance from the Princes concerned that their resignation will not affect their determination to do their utmost to help in the prosecution of the war.

"On the question of the future development of Indian States I may add that discussions on this subject and its relation to post war development in British India were initiated with representatives of Princes on October last. These discussions are at the preliminary stage only, and the reply to the Princes' deputation, which I have mentioned, merely referred to the discussions and to the importance of the question. The Government of India are aware of the necessity for shaping their post-war development plans that benefits will, as far as possible, accrue to the whole country and not to British India only."

Commenting on Mr. Amery's statement, the Chancellor said: "The Princes will be happy to note that the communication of December 2, 1944, to which a reference was made by the Secretary of State, was not intended to contain anything new in principle or policy. . . . . The events of the past three or four years have caused grave anxiety and apprehensions to the Princes, big and small. They have without a single exception solidly stood by the Empire, and they and their people have unconditionally and to the utmost of their capacity given of their very best in men, in money, material and personal services towards the successful prosecution of the war. They have, therefore, not been able to understand why, at this stage of their long and honourable relationship with the Crown, they should receive this treatment. I repeat again the assurance already given that the States will not relax their efforts until final victory has been won over all the enemies of the King-Emperor.

"I should also like to make it clear that the Princes have no intention or desire, as is alleged in a section of the press, to stand in the way of the growth of India to its full stature, or to hinder the political, economic or social progress and advancement of their peoples. I am confident that when the time comes and it is necessary that the Princes should make sacrifices in the true interests of their country—they shall not be found wanting.

"The Princes only ask for justice and fairplay. They have faith in Lord Wavell and reply on the goodwill of His Majesty's Government."

Causes of Crisis.- The foregoing statements, though authoritative, throw little light on the issues in dispute which precipitated the crisis. For an understanding of the subject, one has to rely on press reports published at the time. These varied in detail but were agreed on the main causes of the crisis. According to these press reports, the unprecedented step of the resignation of the entire Standing Committee of the Chamber and the appointment of a "Committee of action" (including the Chancellor and the Pro Chancellor the Nawab of Bhopal and Dr Jam Saheb of Nawanagar) was the climax of a series of events since September 15-16, 1944 when a deputation of Princes led by the Nawab of Bhopal, waited on H. E. the Crown Representative. About a month later the Chancellor addressed a communication to the Political Adviser to the Viceroy. The latter replied on December 9, which was the immediate cause of the Princes' decision. The decision was taken after several hours of protracted discussion extending over two days, and in the later stages the Standing Committee of the Chamber of Rulers consulted the Standing Committee of the Law Chancellor administrative Work. So far experience was consulted. Besides the Nawab of Bhopal Chancellor of the Chamber, and the Pro Chancellor, the Jam Saheb of Nawanagar, the members of the Standing Committee who resigned included the Rulers of Baroda (Senior), Dewas (Senior), Ratlam, Jaipur, Bikaner Bilaspur and Rewa.

It has to be noted in this connection that in 1936 delegates from the greater and lesser States on the question of Federation resigned in the resignation of the Chancellor, the late Maharaja of Patiala. Likewise H. H. the Maharaja of Jaisalmer became Chairman of the Standing Committee. No meeting of the Chamber was held that year and the Viceroy in consultation with the Princes' representatives drew up a formula in 1937. In spite of the latest number of Rulers involved in the present resignation, a vital difference is that the resignation of 1936 was a result of disunity, while the present resignation is an expression of unity among the Princes.

Princes Demands.- Newspaper reports claim that the Princes' decision to the Viceroy in the middle of September covered eight points, namely: First, the Chamber set up to control the working of the joint wings of States should consist of full powered States and should not include minority representatives of States.

Secondly, joint advisers appointed for groups of States which had it financially and otherwise desirable to have them should not deal with Political Officers over the head of the State administrations.

Thirdly, the working of various schemes relating to the States should be reviewed periodically.

Fourthly, the Standing Committee should be given the opportunity to prepare schemes to secure minimum standards of administration in the states.

Fifthly Princes could be allowed to draw up an alternative plan for co-operative grouping.

Sixthly joint High Courts should not be set up The Raja of Bilaspur, in particular, is reported to have opposed these courts as an invasion of the rights of States.

Seventhly, the Instrument of Attachment should be revised in consultation with representatives of the attaching and attached States and no further attachments should be made.

Eighthly, arbitration machinery should be set up to ensure that treaty rights are not overriden.

The Viceroys' reply expressed disagreement with points one, two, five, six and eight and the first part of seven, and promised consideration of three and four. As regards the second part of seven, the reply pointed out that the scheme of attachment was limited to Western India and Gujarat States and the Government had no intention of extending it to other States

The reply promised protection against undue newspaper attacks from British India against States and drew attention to the fact that as States' administrations improved occasions for harsh or unjust criticisms would become less and less

On the question of post-war reconstruction and industrial planning the Crown Representative was against allowing any unit or units to follow any policy of development that was likely to upset the All India scheme.

Treaty rights.- The declaration that, while the Crown stood by all the undertakings given in the past to the Princes in regard to the protection of their treaty rights, the interpretation to be put on those treaties must be according to usage and in accordance with the changed circumstances of the present day, was construed by the Princes as an attempt on the part of the Crown to revise treaties in a unilateral fashion. Their contention was that while they were agreeable to any revision of the treaties it must not be done unilaterally by the Crown but only after consultation with the Princes. The Princes asserted that they had always stood for the progress and well being of their peoples and that they would not oppose the revision of a treaty just for the sake of opposition, but that the case had to be established when a revision was projected.

In regard to the attachment of smaller States the Princes' contention was that the Crown Representative must at least have consulted the Rulers concerned before deciding on any action. On this and other subjects it was proposed to move strongly worded resolutions at the session of the Princes' Chamber, but as the Political Department discountenanced them they were dropped.

Deadlock resolved.- In the next six or seven months one heard very little of the public activities of the Indian Princes in an organisational sense. There was no development since the resignation of the Standing Committee except for expressions of regret by British and Indian newspapers and publicists. In the summer of 1945, however, it was reported that the deadlock had almost been resolved. The resignations made in December 1944 were withdrawn late in the summer of 1945 and the Princely Order turned its attention to measures towards the political, social and economic uplift of the States against the background of current developments in the country.

Attitude to Wavell Plan.—The Princes' meeting in Bombay in the summer of 1945 coincided with the conference of leaders convened by His Excellency the Viceroy. The Nawab of Bhopal, addressing the Constitutional Advisory Committee of Princes and Ministers, welcomed the Wavell Plan, expressed the desire that an agreed settlement should be reached, and gave the assurance that the Princes would co-operate most cordially with an interim national Government for British India on matters of all India concern.

His Highness felt confident that they could come to reasonable and honourable terms with the Government of a free India, and said: "India is our motherland. We have a great heritage of tradition, culture and administrative experience. We yield to none in patriotism. We are not cut asunder by communal and parochial differences. Our contribution can, therefore, be of real help to the country. It is our duty and privilege to work for our people, always to have them in our thoughts and to live for them.

"We must associate our people as closely as possible with the administration of our States. This is, in fact, being done in many States. We shall have to take immediate action where this has not already been done to implement forthwith and to the fullest extent the recommendations made at our previous meetings with regard to independent judiciary, representative institutions and the fixing of the privy purse. We must act in these matters not as if we are fighting a delaying action but as those leading a successful advance."

Referring to the Wavell Plan, His Highness said that it was proof of the Viceroy's goodwill and sincerity towards India and her aspirations. The States were not directly concerned at this stage in the formation of the Executive Council. They shared, however, the general desire in the country that an agreed settlement should be reached. The Princes would wish gladly to see an Interim National Government for British India and would co-operate with them most cordially on matters of all India concern. What action the States should take to collaborate with British India on matters of common concern in the interim period and on a long term basis needed careful consideration.

"Our policy," said His Highness, "is to live and let live. We seek justice for the States and their peoples. We are ready to make our contribution towards the greatness and glory of our motherland and for the ordered progress of humanity."

The Standing Committee met again at the end of September, 1945, and considered a number of questions of interest to the States. On the morrow of the meeting, the Late Sir Manubhai Mehta, Chairman of the Committee of Ministers, dwelt on some of the points of difference between the Indian States and the Paramount Power. Referring to the contention that low taxation standards in the Indian States attracted capital from British India, he made it clear that the States had no intention to invite British Indian industrialists to establish industries in State territories at the expense of the industrial development of British India. He suggested that a large part of the capital that felt attracted to the Indian States was that of subjects of Indian States, who wished to use a part of their capital for the development of industries in their own States, which they loved. He conceded, however, that most Indian States had a great leeway to make up in the matter of standards of taxation, but they must have the time to bring their standards up to those of British India. The States also asked for a voice in the formulation of the economic and industrial policy of the whole country. They did not want to be presented with a *fait accompli* in this or other matters and then be called upon to conform to standards or policies in the shaping of which they had no voice. The late Sir Manubhai also complained that the Central Government had obstructed the natural growth of industries in Indian States.

States' Collaboration with British India.—Sir Manubhai declared that the States were prepared to collaborate in order to see that India achieved full political progress. What they opposed was unilateral changes in their treaty rights. He said that there should be no change in the fundamental form of government. The rulers might accept representative or responsible government, they were prepared to associate their people with the Government, for they would not like that democracy, which had been flourishing in the States for the last three or four centuries, should be changed at the dictation of anyone.

Princely circles were busy in January 1946 on the eve of the annual session of the Chamber. It is at the meeting of the Standing Committee and at gatherings of some of about two hundred rulers and ministers, that we discussed the position of the States in general against the background of impending constitutional developments in India, the latter's future scheme, all-India industrial and aviation policies, co-operative grouping of States and joint services.

1946 Session of the Chamber.—Meeting after an interval of nearly two years, the annual session of the Chamber of Princes heard the Viceroy, Lord Wavell, give an assurance on one of the main points of difference which led to the crisis of 1944, namely, treaty rights and relationship with the Crown.

"I can assure you," said the Viceroy, "that there is no intention on our part to initiate any change in this relationship or those rights without your consent.

"I am confident that you will have no intention or desire to stand in the way of the growth of India to its full stature or to hinder the political economic or social progress and advancement of your subjects.

"It will rather be natural and in accordance with your traditions that you should become leaders in peace, as you formerly have been in war."

Speaking of States whose finance is inadequate, Lord Wavell suggested that it was incumbent upon them so to modify their constitutional position as to ensure the welfare of their subjects for the future. In order that these States might have political stability, adequate financial resources and effective association of the people

with the administration, he strongly urged that they should arrange to join a larger unit or combine with other small States to form a political entity of a sufficient size.

Referring to economic problems, the Viceroy said: "It is my earnest aim and it will be my constant endeavour that the interests of the States should receive the same attention and sympathy from the Government of India in the process of development as the Provinces of British India. I am also sure that the States will afford that same measure of cordial co-operation in controls and in planning as they have given in the past.

Lord Wavell said he had under consideration further machinery to improve economic touch between British India and the States.

The Viceroy invited the Chamber's attention to two particular examples of the need for close co-operation one short term, one long term. The short-term instance was that of food grains for some time to come, world allocations would continue to be made by the Combined Food Boards in Washington, and India would have to justify her demand for a share in the world surpluses by showing that she was making the best possible distribution of her own resources. In this, the produce of British India and the States must be treated as one.

The long-term issue was the management of India's water-supplies, in which direction lay India's best way to progress. In many of the schemes now under consideration, for flood control, irrigation, navigation, and hydro-electric power, provinces of British India and States were closely concerned and it was essential that they should work in close co-operation, so that unified development could take place.

The Viceroy touched on the importance of gradually approximating taxation policies and systems in Indian States with those of British India.

Constitutional Developments in States.

An important declaration on constitutional developments in Indian States, guaranteeing certain fundamental rights to the States people, was made by the Chancellor, the Nawab of Bhopal. On behalf of the States he pledged himself to make "our fullest contribution to any attempt to settle India's constitutional problems on a just and reasonable basis." The declaration of rights was an earnest of this desire. A resolution urging States to adopt immediate measures to implement the policy outlined in the declaration was adopted by the Chamber.

The Chancellor referred to differences and disagreements which, he said, weakened India and added:

"It is to the spirit of justice, tolerance and co-operation that I look to bring us to the goal which every thinking Indian, be he Prince or peasant, must long to reach. *Is there one among us who does not wish to see this land of our birth free*, great and respected (applause), making its worthy contribution to the uplifting of humanity as it did in the ages long ago?"

Referring to the intention recorded in the resolution to make every possible contribution to the settlement of the Indian constitutional problem, the Chancellor said: "The character and extent of that contribution it is not yet possible for us to specify, for we have no idea of what the final picture is to be. We can, however, promise our fullest contribution to any attempt to settle India's constitutional problem on a just and reasonable basis."

As an earnest of that spirit and to enable the States to play their full part in the India of the future, the Chancellor made the following declaration:

"The Chamber of Princes in consultation with the Committee of Ministers have given anxious consideration to the question of the development of constitutional reforms in Indian States and without prejudice to the correct constitutional position, which has been reaffirmed by the declaration made in Parliament on behalf of H. M. G. and repeated by H. E. the Viceroy, that 'the decision as to the constitution best suited to the needs of his people and his state rests with the Ruler himself to take,' they recommend an immediate declaration by the Chamber of Princes of the policy in this matter which should be taken immediately where this had not already been done, to implement it.

"The Chancellor of the Chamber of Princes is accordingly authorised to make the following declaration on behalf of and with the full authority of the Chamber of Princes:

"The object is to *set up forthwith constitutions in the States in which the sovereign powers of the Rulers are exercised through regular constitutional channel without in any way affecting or impairing the continuance of the reigning dynasty in, and the integrity of each State.*

"There shall be *popular institutions* with elected majorities to ensure close and effective association of the people with the governance of the States.

"It is understood that in framing the detailed constitution of individual States on the above lines, regard shall be had to the special circumstances in each State.

"Most States have already adopted statutory provisions guaranteeing the rule of law and the security of persons and property within their territories. In order to lay down and declare the position in this matter in precise and clear terms, the following essential rights should be guaranteed in States where this has not already been done with powers vested in the courts of the States to redress any infringement of these rights:—

"(1) No person should be deprived of his liberty, nor should his dwelling or property be entered, sequestered or confiscated save in accordance with law.

"(2) Such right may be suspended as may be prescribed in case of war, rebellion or serious internal disorder.

"(3) Every person should enjoy the right of free expression of opinion, the right of free association and combination and the right to assemble peacefully without arms and without military formation for purposes not opposed to law or morality.

"(4) Every person should enjoy freedom of conscience and the right of freely to profess and practice his religion, subject to public order and morality.

"(5) All persons should be equal before the law, irrespective of religion, caste or creed.

"(6) No disability should attach to any person merely by reason on his religion, caste or creed, in regard to public employment, office of power or honour, or in the exercise of any trade or calling.

"(7) There should be no *begar* (forced labour).

"It is reaffirmed that the administration shall be based on the following essential principles which would be strictly enforced where they do not obtain at present:

"1. The administration of justice must vest in an impartial and competent judiciary independent of the executive, and there must be suitable provision for the impartial adjudication of disputes between individuals and the state.

"2. The Rulers in their own States should clearly demarcate administrative budgets from civil lists and fix the latter at a reasonable percentage of the ordinary revenue.

"3. The incidence of taxation must be fair and equitable and a definite and substantial portion of the revenue must be allocated for the benefit of the people, particularly in the nation building departments.

"It is strongly recommended that the essential measures recommended in this declaration should, where they are not in force, be adopted without delay.

"This declaration, made spontaneously and earnestly, is inspired by faith in the peoples of Indian States and in the future destiny of the States. It represents the will of the Rulers to implement these decisions without reservation or delay. May it lead to increasing freedom from want and fear, and freedom of the mind and its expression! May it grow on the sure foundation of mutual love, tolerance, service and responsibility!"

Chancellor's Reply to Crown Representative's Address. Replying to the Crown Representative's opening address, the Nawab of Bhopal, on behalf of the Princes, said: "We are grateful to Your Excellency for the *reassurance that there is no intention to initiate any change in our relationship with the Crown or the rights guaranteed by our treaties and engagements without our consent.* We have already declared that we have no intention of withholding our consent to any adjustments which may be required under the future constitutional arrangements in India and which we consider reasonable in the wider interests of India. We desire our motherland to occupy her due place among the great nations of the world. The higher the status of an Indian the greater must be his sense of humiliation to the continuance of the present political deadlock in the country."

Referring to the attachment scheme the Chancellor said: "We take it as understood that the arrangements envisaged under this suggestion are intended to proceed on the basis of mutual consent and do not exclude suitable schemes of joint services between some bigger and some smaller States where these may be evolved by mutual agreement. In fact some of the smaller States have admittedly efficient administrations and are willing to do all they can, individually where necessary or through suitable voluntary schemes of joint services, to effect such further improvements as may be possible and required to meet local conditions. The Chamber of Princes has already stated its view that where individual States cannot themselves afford the agreed standards of efficiency required in modern times, they should do so by making suitable arrangements with *some other State or States*. We are convinced that it is possible to ensure the objective in view without impairing the continuance of the ruling dynasty or the integrity and autonomy of the State concerned."

The Chancellor said that the Rulers concerned were entitled to be assured that in their agreeing to work out suitable schemes of joint services for the fuller attainment of their administration would not be any jurisdiction or undue interference by local officers in their internal affairs. "We feel sure," he continued, "that in seeking the smaller States which cannot themselves afford to provide the requisite standard of a modern administration to form 'political units' of efficient size, Your Excellency has no intention of suggesting any encroachment whatsoever on the continuance of the ruling dynasty or the integrity or autonomy of the States concerned. We deem it our duty to bring to Your Excellency's notice the serious misgivings which prevail generally, amongst the Rulers of so-called smaller States and we invite Your Excellency's particular sympathy and consideration in approaching the problems of these States."

H. H. of Bhopal on India's Independence.—A few words of the Chancellor of the Chamber of Princes speaking in his personal capacity, appealed to all Indians to make a united effort for the achievement of India's national freedom based on compromise and mutual sacrifice. He said: "I stand for a free and independent India. No Indian worthy of the name would stand for anything less. If sacrifices are needed, let us all, in a spirit of 1857 patriotism, placing the good of the country before everything else, come together and make our mutual contribution to the task of building a new India of our own dreams, an India which will fill her proper place in the councils of the world and make, as in the days long ago, her contribution to the uplift of humanity and the advance of the spirit of true civilization."

Referring to the Princes' attitude in this regard, His Highness said: "The States form an intimate part of this sub-continent and are linked to it by history, by tradition and by the strongest economic considerations. It is inevitable, therefore, that the future of India should be a problem of living concern and of vital moment to the States. While they cannot consent to be effaced as separate entities, they realise that they owe it to the country, to themselves and to their own people to take their full share in helping to build an

India in which its diverse elements and many interests may receive just and, where possible, generous recognition. I am certain that no Prince will, in order to secure his own selfish ends, conspire to perpetuate foreign control and domination. I regard myself as an Indian first and, when the honour of India is concerned, I am prepared to make the biggest sacrifice that the circumstances may call for. If we want protection and strength, let us seek them in the affection and loyalty of our own people for there we shall find our strongest and surest bulwark. The future would indeed be dark if the States were to rely upon foreign support for their preservation through generations to come."

In a press interview, the Nawab of Bhopal declared that, while he and his fellow-rulers were working for the independence of India, they would look with dismay upon a settlement imposed without agreement. In his consultations with various political leaders he was trying to secure assurances that the States would receive fair consideration in any constitutional settlement.

States and Cabinet Mission.—The political outlook underwent a transformation with the announcement in the middle of March, 1946, that a British Cabinet Delegation would visit India and finally settle the constitutional problem of the country.

At a meeting of Rulers and Ministers of the Indian States, early in April 1946, it was generally agreed that any constitution would be subject to ratification by the States in order to be binding on them, that adherence to the monarchical form of Government and continuance of the reigning dynasty in each state would not be open to question and that the existing treaties and *sanads* would not be altered unilaterally without the consent of the States concerned. It was also agreed that the following points should be placed before the Cabinet Delegation.

Enforcement of constitutional safeguards, which the States may secure, should be such as can be enforced through the Federal Court.

Every State shall continue to retain its sovereignty, except to the extent to which its powers are delegated by it to the future Indian Union;

The territorial integrity of each State shall not be interfered with and the existing boundaries of each State shall not be altered without its free consent and approval;

The reigning dynasty of each State shall continue;

The existing form of Government in each State shall not be interfered with by the Union or any unit of the Union;

States which cannot individually afford to provide the basic efficiency of administration required in modern times should freely enter into suitable arrangements founded on consent with large States or combine in groups of small States.

Shortly after, the Indian States Constitutional Advisory Committee decided that the Princely Order should remain outside the proposed Interim Government, but the idea that an *ad hoc* committee should be established, to serve as a liaison body between the Interim Central Executive and the Indian States, found strong support. As for the position of the States in an independent India, the Princes were reluctant to commit themselves until a full and final constitutional picture emerged.

Cabinet Mission's Memorandum on States.—In a memorandum on States Treaties and Paramountcy, presented to the Chancellor of the Chamber of Princes, the Cabinet Mission said:

"Prior to the recent statement of the British Prime Minister in the House of Commons an assurance was given to the Princes that there was no intention on the part of the Crown to initiate any change in their relationship with the Crown or the rights guaranteed by their treaties and engagements without their consent. It was at the same time stated that the Princes' consent to any changes which might emerge as a result of negotiations would not unreasonably be withheld. The Chamber of Princes has since confirmed that the Indian States fully share the general desire in the country for the immediate attainment by India of her full status. H. M. G. have now declared that if the Successor Government or Governments in British India desire independence, no obstacle would be placed in their way. The effect of these announcements is that all those concerned with the future of India wish her to attain a position of independence within or without the British Commonwealth. The Delegation have come here to assist in resolving the difficulties which stand in the way of India fulfilling this wish.

"During the interim period, which must elapse before the coming into operation of a new Constitutional structure under which British India will be independent or fully self-governing, paramountcy will remain in operation. But the British Government could not and will not in any circumstances transfer paramountcy to an Indian Government.

"In the meanwhile, the Indian States are in a position to play an important part in the formulation of the new Constitutional structure for India, and H. M. G. have been informed by the Indian States that they desire, in their own interests and in the interests of India as a whole, both to make their contribution to the framing of the structure, and to take their due place in it when it is completed. In order to facilitate this they will doubtless strengthen their position by doing everything possible to ensure that their administrations conform to the highest standard. Where adequate standards cannot be achieved within the existing resources of the State they will no doubt arrange in suitable cases to form or join administrative units large enough to enable them to be fitted into the constitutional structure. It will also strengthen the position of States during this formulative period if the various Governments which have not already done so take active steps to place themselves in close and constant touch with public opinion in their State by means of representative institutions.

"During the Interim period it will be necessary for the States to conduct negotiations with British India in regard to the future regulation of matters of common concern, especially in the economic and financial field. Such negotiations, which will be necessary whether the States desire to participate in the new Indian Constitutional structure or not, will occupy a considerable period of time, and since some of these negotiations may well be incomplete when the new structure comes into being, it will, in order to avoid administrative difficulties, be necessary to arrive at an understanding between the States and those likely to control the succession Government or Governments that for a period of time the then existing arrangements as to these matters of common concern should continue until the new agreements are completed. In this matter, the British Government and the Crown Representative will lend such assistance as they can, should it be so desired.

"When a new fully self-governing or independent Government or Governments come into being in British India, H M G's influence with these Governments will not be such as to enable them to carry out the obligations of paramountcy. Moreover, they cannot contemplate that British troops would be retained in India for this purpose. Thus, as a logical sequence and in view of the desires expressed to them on behalf of the Indian States, His Majesty's Government will cease to exercise the powers of paramountcy. This means that the rights of the States which flow from their relationship to the Crown will no longer exist and that all the rights surrendered by the States to the paramount power will return to the States. Political arrangements between the States on the one side and the British Crown and British India on the other will thus be brought to an end. The void will have to be filled either by the States entering into a federal relationship with the successor Government or Governments in British India, or failing this, entering into particular political arrangements with it or them."

On May 16, 1946, the British Cabinet Mission issued their famous statement, outlining their proposals for the evolution of a future Constitution of India (See Chapter on the Indian National Congress). Princely circles generally regarded the Statement as satisfactory.

Princes' Reaction to Cabinet Mission's proposals.—Shortly after the Standing Committee of the Chamber and Ministers of other States met to consider the Cabinet Mission's proposals in the light of the memorandum quoted above. In June 1946 the Chancellor wrote to the Viceroy:—

"The Standing Committee of Princes gave most careful consideration at their recent meetings in Bombay to the proposals of the Cabinet Mission and Your Excellency in regard to the long-range constitutional arrangements and for the interim period. Their views are embodied in the enclosed statement which has been released to the press and of which an advance copy was forwarded to Sir Conrad Corfield, Political Adviser to the Viceroy in his capacity as Crown Representative. I would invite Your Excellency's particular attention to the attitude taken by the Standing Committee of Princes on the question of internal reforms in the States as indicated in Paragraph 4 of the press statement.

"The Standing Committee desired me to convey to the members of the Cabinet Mission and to Your Excellency their graceful appreciation of the genuine efforts made by them, notwithstanding obvious difficulties, to reach as far as possible an agreed settlement of the Indian constitutional problem. The Standing Committee are of the view that the plan provides the necessary machinery for the attainment by India of independence as well as a fair basis for further negotiations. They welcome the declaration of the Cabinet Mission in regard to paramountcy, but consider certain adjustments necessary for the interim period which have already been indicated by them. Final decisions of the States and of the Standing Committee, as will doubtless be appreciated, will depend on the completed picture which may emerge from the proposed negotiations and discussions.

"The Standing Committee desire in particular to convey their gratitude to Your Excellency for your valuable advice and assistance during these negotiations to safeguard the legitimate interest of the States, and they would request that their grateful thanks may also be conveyed to Sir Conrad Corfield who, as Your Excellency knows, has been very helpful. The Committee feel confident that with your support, the various matters which have been left undefined or for future negotiations and discussions will be settled on merits to the satisfaction of the States.

"The Standing Committee have decided, in response to Your Excellency's invitation, to set up a Negotiating Committee whose personnel is given in the enclosed list. The Committee did their utmost to keep the number small as desired by Your Excellency, but they felt that it would not be possible for them to reduce that number. I shall be grateful if I am informed as early as possible, of the time and place when this committee is expected to meet, and the personnel of the corresponding committee which may be set up by the representatives of British India on the Constituent Assembly. The result of these negotiations are proposed to be considered by the Standing Committee of Princes, the Committee of Ministers and the Constitutional Advisory Committee whose recommendations will be placed before a general conference of Rulers and representatives of States. The decision on the question whether the States should or should not join the Constituent Assembly will be taken by that conference and will depend on the result of the forthcoming negotiations.

"A list of representatives of the States for the proposed committee on matters of common concern to British India and the States is also enclosed. It was necessary to accommodate on it various important interests and regions of States and to include persons with special knowledge of subjects which are likely to be taken up at the deliberations of this committee. It is understood, however, that all the members of this Committee would not be required to attend every meeting, and that ordinarily not

more than five or six, whatever the number from British India, would be invited by the Chancellor to participate in the discussions according to the nature of the subjects on the agenda. Provision will also have to be made for the co-option of representatives from any State or group of States, not represented on the Committee, when any special questions particularly affecting them are under discussion. Draft rules for the conduct of business and other details relating to this committee will be discussed with Sir Conrad and it is believed that Your Excellency may also have to consult the interim Government in regard to these matters.

"In the meantime, as desired by Your Excellency, questions relating to the exercise of paramountcy in the interim period are proposed to be pursued with Sir Conrad and any outstanding points will be submitted to Your Excellency. The Standing Committee have authorised me to conduct further negotiations in regard to these matters with a view to reaching early decisions."

To this the Viceroy replied at the end of June: —

"The Cabinet Mission and I welcome the attitude which the Princes have adopted towards the plan which we have proposed for the solution of India's constitutional problem, and we particularly appreciate the action of the Standing Committee in endorsing the suggestions we made in regard to the manner in which States could best fit themselves to make their due contribution to India's new constitutional structure. We are confident that, when the time comes for the States to make their final decision, that decision will be characterised by the same sense of realism and the same spirit of accommodation as have already been manifested.

"I greatly appreciate the sentiments expressed by the Standing Committee in regard to myself and my Political Adviser. I should like to assure Your Highness and the Standing Committee that we shall continue, during the forthcoming negotiations, to give such assistance as is in our power to the promotion of agreed conclusions satisfactory alike to the States and to British India.

"I have taken note of the personnel selected by the States to represent them on the Negotiating Committee. I will inform Your Highness, as soon as I am in a position to do so, of the time and place of the Committee's meeting. The composition of the corresponding committee from British India cannot, I think, be determined in advance of the preliminary session of the Constituent Assembly.

"I understand from Sir Conrad Corfield that he is already engaged in active discussions with the authorities of the Central Government about the machinery for giving effect to the Princes' proposal for a Consultative Committee to deal with matters of common concern to British India and the States. Sir Conrad will, no doubt, keep Your Highness fully informed of the progress made in these discussions, and I myself intend, at a later stage, to place the proposal before the Interim Government.

"I shall be grateful if Your Highness will convey to the Standing Committee of Princes my appreciation of the helpful attitude they have adopted towards the complex constitutional problems with which India is confronted. Under Your Highness's presidency, the Standing Committee have given a lead which will, I trust, be followed by all Princes of India."

Meanwhile, there was evidence of considerable activity by the Indian Rulers not only to liberalise their administrations, but also to get together for common purposes. The decision to form a Union of Deccan States is an example of this tendency. It was resolved that a Board of Rulers would exercise constitutional sovereignty in a combine Government with one popular ministry and one legislature. There would be common services and a common Exchequer and the boundaries of individual states would be obliterated.

MERGER SCHEME.

By far the biggest development affecting the Princely Order during the past 12 months is a merger scheme for Indian States decided upon by the Crown Representative under which smaller states are to be linked with bigger ones. Small Indian States will be merged into neighbouring larger ones with whom they have geographical economic and political affinities. The States to which such responsibilities are to be transferred have been apprised of these details as also have the units to be attached which collectively cover an area of over 7,000 square miles with a population of over 8,00,000 and an annual revenue of more than Rs. 70,00,000.

The *communique* announcing this said:—

"H. E. the Crown Representative, has for a long period had under intensive review the perplexing political and administrative problems which arise from the existence in Western India and Gujarat of literally hundreds of small units which, though they are usually referred to as 'semi-jurisdictional' or 'non-jurisdictional' estates or talukas, do actually fall within the category of 'Indian States'. Owing to the slenderness of their individual resources and general aversion from neighbourly co-operation there has arisen in this part of India geographical, administrative and economic fragmentation on a scale unknown anywhere else in the country. In the great majority of these units the revenues, which often have to be divided among numerous shareholders, barely suffice to meet the private needs of the talukdars and shareholders, and the amenities provided for their subjects under the supervision of the local Political authorities are therefore sadly circumscribed. In short, the Crown Representative's survey has fully established that without some drastic simplification of existing arrangements any kind of co-ordinated development of the countryside or any form of real progress is impossible."

The 'communique' refers to the discussion of the problem in the period preceding the 1935 Act and says that the Maharaja of Baroda

(to whom many of the small units in Western India and Gujerat are tributory) brought forward proposals to bring these tributaries into closer relations with the Baroda State.

A fresh approach to the problem has since been made on the lines of these proposals and on a wider basis with a view to afford to other larger states an opportunity to assume similar responsibilities in respect of units which have similar geographical, economic and political amenities with them.

In order that the scheme may be carried into effect with the least possible delay Lt.-Col. G. B. Williams of the Indian Political Service has been placed on special duty in the area concerned.

The 'communique' points out that the scheme contains due provision for the continued integrity of the attached units and of the existing powers and privileges of their talukdars and shareholders in so far as may be compatible with modern requirements and subject to further review after a period of seven years as also for the allocation of a suitable proportion of the revenue for their personal requirements.

The States to which these small units are to be attached will also be required to admit the inhabitants of attached areas to the benefits of administrative amenities such as secondary and technical education and medical treatment on the same terms as their own subjects and to provide new hospitals, schools, roads and other amenities where these though clearly required, are beyond the present capacity of local resources.

The Crown Representative is conscious that the action to which he is now committed may meet with criticism on the ground that it is calculated to infringe the rights and lower the status of many ancient families, or alternatively that the Paramount Power should itself have assumed direct responsibility for such reforms as may be necessary. He has examined the problem from both these points of view with all due regard to policies and obligations for the maintenance and support of Indian States, however small and weak. As stated above, provision has been made to implement such obligations in so far as they are compatible with the overriding principle that autocratic powers shall not be abused and that a State which is not inherently capable of survival should be artificially perpetuated. The ultimate test of fitness for the survival of any State is, in his opinion, capacity to secure the welfare of its subjects, and he regards the forthcoming qualified merger of these small States as a justifiable solution of any conflict in his obligations towards Rulers and ruled. Experience has shown that the units with which he is here concerned, not only when unaided but even when grouped together as 'thanas' or under close supervision of Political Agents, are unable to achieve the conditions of administrative efficiency which alone can justify in them the perpetuation of any form of hereditary rule. On the other hand, it has been signally demonstrated that in great and wealthy States such as even in considerably smaller States under requisite efficiency can be abundantly achieved.

The assumption of direct responsibility for the necessary reforms, by the Paramount Power is regarded by the Crown Representative as impracticable because geographical and other factors preclude the absorption of these area in British India and because the Political Department is not an administrative organisation or equipped with the machinery and resources of finance and personnel which can only be afforded by the administrative control of large territories. Moreover the areas concerned are so scattered and fragmentated as to make it impossible to bring them under unified central control. These difficulties and deficiencies can, in the Crown Representative's opinion, only be overcome by the course on which he has decided, which involves delegation of the responsibility to those who are in the best position to discharge it namely, the bigger States of Western India and Gujarat. In framing the terms of that delegation he has been fully mindful of the interests of the inhabitants of these small States, of those to whom they owe immediate allegiance and of the larger States with which a new relationship is to be established. To all these parties the Crown Representative admits a continuing responsibility which does not exclude his future intervention, as circumstances may demand, in furtherance of the essential object which he has in view, namely the firm establishment of conditions in which the areas concerned will secure and enjoy full opportunity for progress and development.

The idea of co-ordination of smaller States for administrative purposes is not new. Years ago Lord Irwin (now Lord Halifax) in a confidential memorandum urged the Princes to put their houses in order and maintain certain minimum standards of administration.

Later still Lord Linlithgow openly exhorted the Princes on the same lines, and, further, pressed the smaller states to pool their resources in order that they may adequately discharge their obligations as a modern state.

In 1939 the Political Department issued a circular asking all States with an annual revenue of less than Rs. 20,00,000 to join regional confederations. In reply to this the Princes submitted a memorandum in which they insisted that grouping of States should be voluntary and that no conditions and restrictions as to the manner in which the police forces should be maintained or the administration of justice should be provided for should be imposed from without; they were above all keen on maintaining unaltered the rights of the grouped states vis-a-vis each other.

Criticisms of Merger Scheme.—Criticising the "qualified" merger scheme and suggesting a better alternative, a committee representative of the people of 17 principalities and chiefships comprising the Deccan States formulated a scheme, federal in character and designed to take full account of the rights, interests and obligations of all the parties, affected—the rulers, the citizens and the States alike. The executive authority in the proposed constitution for the States will be exercised on behalf of the rulers by the President of the Federation assisted by a Cabinet of whom

two-fifths will be members of the Federal Assembly. The legislature will be bicameral, the Upper House designed to uphold the authority of the rulers and the States and the Lower, constituted though it will be by indirect election, that of their peoples. On the Council, each ruler will have a seat based on the hereditary principle and no other element will be represented to it. The list of federal subject is not very extensive so that the States' Governments are left with a large measure of autonomy. The principle of the rule of law is accepted as well as that, contrary to the rulers' opinion recorded by the Joint Parliamentary Committee, of the fundamental rights of the citizens. There is ample safeguard for the maintenance of Treaty rights, a matter of no small importance from the point of view of the Paramount Power. The scheme further accords full recognition to the principle of regionalism, that is, of geographical, cultural, economic and other affinities, as the Crown Representative's scheme is meant to do.

In Kathiawar itself the protest against the merger scheme grew with the passage of time. Whereas the Hindu Mahasabha Working Committee opposed the attachment of Hindu talukdars and territories to neighbouring bigger Muslim States, the Rulers of attached States objected to the scheme on the grounds that it militated against the recognised concept of Paramountcy and against the Government of India Act. In the autumn of 1943 one of the attached States, namely, Bhadwa Taluka challenged the transfer of some cases from the files of the judicial branch of the Political Department to the courts of the attaching States. The matter was settled by a special tribunal which held that the transfer was illegal and also observed that the attachment scheme itself was *ultra vires* of the Government of India Act and a reversal of imperial policy.

Meanwhile, the attachment scheme which according to the April *communique*, was confined to the non-jurisdictional and semi-jurisdictional States, was extended so as to include the 3rd and 4th class states some of whom at least had full jurisdictional powers. This increased the opposition of the princely order to the scheme.

The judicial finding that the scheme was invalid created an embarrassing situation for the Political Department who, being convinced of the desirability of the step, induced the Secretary of State for India to initiate in Parliament legislation validating the attachment scheme. This measure was enacted quickly and secured Royal assent in March 1944. The Bill, which, in its original draft, was comprehensive in character, was restricted by an official amendment to the States of Kathiawar and Gujerat. On account of the war-time restrictions on transport and communications the interests affected could not effectively present their case before Parliament. Even so, Opposition M.Ps., acting on the strength of cables sent by some of the Indian Princes, objected to the validation of an executive act which had been judicially held invalid and contended that the scheme was not only not so urgently necessary but would in its operation adversely affect the interests of both the Rulers and the subjects of the attached States. Government spokesmen, on the other hand, affirmed that the scheme devised by the Political Department in India was the only feasible method of ensuring to the subjects of the numerous, weak, and excessively fragmented States the amenities of modern administration which were sought to be made available to them through merger with units commanding better resources. Government members also gave the assurance that the scheme did not involve any deprivation of the rights of the rulers of the attached States, inasmuch as what was transferred to the bigger States was only those powers which the agents of the Crown Representative had till then been exercising on behalf of the Rulers of the small States.

The enforcement of the attachment scheme led to some petty difficulties which were overcome easily. Nevertheless, some at least of the smaller States affected by the scheme did not fully reconciled themselves to it.

The question continued to engage the attention not only of the Princes affected by the scheme but also of the Order as a whole. The scheme was criticized by the conference of two hundred princes and ministers which met in New Delhi during the Cabinet Delegation negotiations.

A meeting of Kathiawar States held in Bombay devised a formula based broadly on the bilateral co-operative grouping principle. A couple of months later, Dr. M. R. Jayakar drew up a bilateral agreement seeking to overcome the chief objections of the smaller States and contemplating the establishment of a joint High Court and common police services. A detailed scheme drafted on this basis was considered by the States concerned in December 1945 but rejected. A time limit was given to the Princes, but they asked for an extension. Meanwhile, some of the dissenting States agreed to the draft. Eventually, early in 1946, the whole lot of them agreed to work it, subject to the condition that they would have the right to appeal to higher authorities.

STATES PEOPLES.

Symptomatic of the change that was gradually coming over the Indian scene was the awakening among States peoples, who looked forward to an early opportunity of associating themselves with the task of framing the new Constitution. Although, strictly speaking, they had no *locus standi* in the determination of the future status of the States, they expected that their representatives would be associated, along with the representatives of the States Governments, in the framing of the Constitution. The activities of the Indian States Peoples' Conference, therefore, assumed unprecedented importance. For the first time in its history the Conference met within the borders of an Indian State—Udaipur. Pandit Jawaharlal Nehru presided.

Pandit Nehru said the approach to the Princes should be a friendly one and an invitation to them to join hands in the great tasks ahead. In regard to small states, he said that the absorption should be with the provinces as

ot with existing States as had recently been one in Western India. The Rulers of such maller states might be given some kind of ensions and might be further encouraged to erve in a different capacity. The major Indian tates with a reformed and democratic system f administration could play an important and istinctive part as autonomous units of the ederation. Referring to the States Peoples' presentation in the Constituent Assembly, andit Nehru said that proper democratic presentation in the Constituent Assembly necessarily implied the introduction of democracy in the internal affairs of the State; otherwise, there would be conflict between those representatives and the State Governments.

The Conference adopted a resolution declaring that, constitutional changes in British India should be followed by full responsible government in Indian States as integral parts of a free India. It also demanded that in the constitution-making body the people of the Indian States must be represented on the widest franchise possible.

Payments from Indian States.

Many of the States make payments, varying in amount according to the circumstances of each e to His Majesty. These payments are frequently due to exchange of territory or settlement claims between the Governments, but are chiefly in lieu of former obligations to supply or maintain troops. The annual receipts on account of these payments from Indian States are summarised the following table. The relations of the States to one another in respect of Cash Contribution re complicated, and it would serve no useful purpose to enter upon the question. It may, however, be mentioned that a large number of the States in the Western India and Gujarat States Agencies pay Cash Contribution of some kind to Baroda, and that Gwalior claims Cash Contribution on some of the smaller States of Central India States making payments directly to His Majesty.

States paying Cash Contribution directly to His Majesty.

	Rs.
pur	4,00,000
ar	4,34,720 (of this sum Rs. 2,00,000 has been suspended.)
ipur (Eastern States Agency)	1,200
hpur	2,12,000 (of this a sum of Rs.1,15,000 has been suspended)
Bundi	1,20,000
Udaipur (Mewar)	2,66,000 (includes contribution to local corps.)
Other Rajputana States	1,11,575
Jaora	1,37,127
Assam.	
Manipur	5,000
Rambrai	100
Bengal.	
Cooch Behar	67,701
United Provinces.	
Benares	2,19,000
Punjab.	
Mandi	1,00,000
Other States	13,307
Madras.	
Travancore	7,96,430
Mysore	24,50,000
Cochin	2,00,000
Western India States.	
Those paying cash contribution to His Majesty include:—	
Bhavnagar	1,28,060
Cutch	82,258
Dhrangadhra	40,671
Gondal	49,096
Junagadh	28,304
Nawanagar	50,312
Porbandar	21,202
Rajkot	18,991

It was announced at the Coronation Durbar of 1911 that there would in future be N[illegible]rama payments on successions.

Foreign Possessions in India.

Portugal and France both hold small territorial possessions in the Indian Peninsula.

The Portuguese possessions in India, all of which are situated within the limits of Bombay Province, consist of the Province of Goa on the Arabian Sea Coast; the territory of Daman with the small territory called Pragana-Nagar-Avely on the Gujarat Coast, at the entrance to the Gulf of Cambay; and the little island of Diu with two places called Gogola and Simbor, on the southern extremity of the Kathiawar Peninsula. All these three territories constitute what is called by the Portuguese *Estado da India Portuguesa*.

The Portuguese Empire consists of, besides Portugal, Azores, Madeira, Cabo Verde, Guine, S. Tome e Principe, Angola e Congo, Mozambique India, Macau and Timor. The Portuguese have taken charge of Timor which was, during the greater part of the war, held by the Japanese. It has an area several times larger than the total area of Portugal itself, which together with it colonies make up over 2 million square kilometers. Portuguese India has an area of 3,98 square kilometers.

GOA.

Goa, derived from Govem or Gova, forms a compact block of territory surrounded by British districts and sea. Savantwadi State lies to the north of it, the Arabian Sea on the west and North Kanara on the South, and the eastern boundary is the range of the Western Ghats, which separates it from the British districts of Belgaum and North Kanara. The extreme length from north to south is 62 miles and the greatest breadth from east to west 40 miles. The territory has a total area of 3,806 square kilometers and consists of the *Velhas Conquistas*, or Old Conquests, compri-ing the island of Goa, acquired by the Portuguese in 1510, and the neighbouring municipalities of Salsette, Bardez, and Mormugao acquired in 1543; and of the *Novas Conquistas*, or New Conquests, comprising the municipalities of Pernem, Sanquelim, Ponda, Quepem, Canacona, Satari and Sanguem acquired in the latter half of the 18th century and early in the 19th century. The small island of Angediva situated opposite the port of Karwar, in the British district of North Kanara, forms administratively a portion of the Canacona municipality. This was acquired in 1505. The whole country is hilly, especially the eastern portion, the predominating physical feature being the Western Ghats, which besides bounding the country along the north-east and south-east just off westward and spread across the country in a succession of spurs and ridges. There are several conspicuous mountains of which the highest are Sonsagod, 3,827 feet high, Catlanchi Mauli 3,790 feet, Vagneri or Zormem, 2,360 feet, and Morlemgod 2,145 feet.

The country is intersected by numerous rivers running westward from the Ghats, and the principal nine—Mandovi, Zuari, Tiracol, Chapora, Baga, Sinquerim, Sal, Talpona, Galgibaga—which are all navigable, are in size of some importance. Goa possesses a fine harbour, formed by the promontories of Bardez and Salsette. Half-way between these extremities lies the *cabo*, or cape, which forms the extremity of the island of Goa. This divides the whole bay into two anchorages, known as Aguada and Mormugao. Both are capable of accommodating the largest shipping from September to May, but Aguada is virtually closed during the south-west monsoon, owing to the high winds and sea and to the formation of sand bars across the estuary of the Mandovi river which opens into Aguada. Mormugao is accessible at all times of the year and is therefore a harbour of commercial importance. Though there is no regular steamer service between Portugal and Mormugao, yet occasionally the steamers of *Companhia de Navegação Nacional* call at Mormugao to take passengers and cargo. Last year the steamer *Miranda* called at this port and this year the steamers *Nyassa* & *Colonial*. The port is provided with lighthouses, buoys and necessary equipment and can accommodate six large ocean going steamers at a time. It is the terminus of the Western India Portuguese railway running to the coast from the inland British system of lines. A breakwater and a port have been built there and the trade is considerable, being chiefly transit trade from British India. The harbour has been leased to the W. I. P. Rly. and in recent times much work has been done for its development, and large sums of money have been spent. The railway lines carry a large entrepot trade. At the outbreak of world war II three German ships—the *Drachenfels*, *Braunfels* and *Ehrenfels*—and one Italian cargo boat, *Asfora*, took shelter in the Mormugao harbour. On March 9, 1943, the German crew set fire to the ships and scuttled them. It was reported that some Germans had disappeared from Goa and a few of them had died in hospital. One of the German ships had merchandise worth about Rs. 70,00,000 consigned to merchants in British India. The Germans are now under detention at Aguada, Goa.

The People. The total population of Portuguese India was 579,970 of which 279,398 are males and 300,572 females in the 1931 census. The latest census is expected to reveal a higher population, about 8 lakhs of inhabitants, with a population ratio definitely in favour of the Hindus. Portuguese India has 4 cities, 3 towns and 600 villages in which reside 130,000 families. The density of the country is about 160, the highest being in Bardez with 468 inhabitants per square kilometer and lowest in Sanguem with only 24 inhabitants

er square kilometer. The country presents any interesting demographic problems relating the distribution of population, birth and eath rates, average span of life, density, etc. he Velhas Conquistas are thickly populated and kes the highest contingent for emigration and inhabitants are to be found in almost all the arts of the world, including British India nd British East Africa where there are about 00,000 Goans in various walks of life. With outbreak of war, there has been a regular lux of Goan emigration to British India here they have found temporary jobs either military departments or in civil positions. hough there are no official statistics, it is esti ated that over 100,000 Goans have emigrated Bombay and other parts of British India, here the rationing system guarantees them necessities of life.

In the Velhas Conquistas the majority of the opulation is Catholics. In the Novas Conistas Hindus are more numerous than hristians. The Moslems in the territory are umbered in a few hundreds and they speak onkani as well as Hindustani. The Christians till very largely adhere to caste distinctions, aiming to be Brahmans, Chardos, Sudras and ew castes, which generally do not intermarry, though youths in modern times are intermarry and do not believe in these social conventions. he Hindus who form about one half of the total opulation are largely Maratha and do not differ om those of the adjacent Konkan districts of ombay. All classes of the people with the ception of Europeans, use the Konkani dialect Marathi with some admixture of Portuguese words. Many emigrant families at Bardez and asette speak the English language. The fficial language is Portuguese, which is commonspoken in the capital and the principal towns, well as by all educated people. Nearly all the hristians profess the Roman Catholic faith nd are spiritually subject to an Archbishop who has the titles of Primate of the East and Patriarch of the East Indies and exercises ecclesiastical jurisdiction also over a portion of British India, and the provinces of Macau (China) and Timor (Oceania), with missions in foreign countries and Mozambique (Portuguese East Africa). The Christians of Daman and Diu are subject, under a new Treaty signed in 1928 between Portugal and the Holy See, to the Archbishop of Goa. There are numerous churches in Goa, mostly built by the Jesuits and Franciscans prior to the extinction of the religious orders in Portuguese territory. At Old Goa, which was the capital of Goa up to 1903, there are beautiful churches and convents noted for their art and architecture. In the convent of Bom Jesus lies the sacred body of St. Francis Xavier. Every ten years there is an exposition of the Saint's body and thousands of pilgrims from all over India and abroad flock to Goa to kiss the sacred body. The last exposition took place on May 6, 1912, and the Saint's body was kept open for three weeks. The churches are in charge of secular priests. Hindus and Mahomedans enjoy perfect freedom in religious matters and have their own places of worship. In the early days of Portuguese rule the worship of Hindu gods in public and the observance of Hindu usages were strictly forbidden and rigorously suppressed.

The policy of the Portuguese Republic established in 1910 was to suppress all religious Societies which, it claimed, were interfering with the political affairs of the State. As a result of this policy Jesuits were driven away from the country. The New State under Dr. Oliveira Salazar, the Prime Minister of Portugal, a deeply religious statesman, has entirely reversed the religious policy of the country. All religious Orders are now freely allowed and several of them have established Convents and Schools in the country, including the Jesuits who have started a Secondary College at Nova Goa. A number of nuns have also come to the country. Some of the Religious Orders of Nuns in British India have set up branches in Nova Goa and Margao. A new Seminary is being built at Saligao and a new religious Order is started in Goa. The relations between the Church and State are very cordial, though even under the anti-clerical republic the Law of separation of Church and State had never been enforced. At present the Church has obtained a legal existence in the country and Portugal even maintains in Goa and in British India a few missionaries, supported by the Lisbon treasury. The New State is based on corporative principles which have not yet been applied to Portuguese India. But there is censorship of the press and only one political party, the Uniao Nacional, supporting the Government, is in existence. A new administrative code has been promulgated and a system of excessive centralization is in force, both financial and administrative. The finances of Goa are controlled by the Minister for Colonies at Lisbon. Every year the Governor-General frames the budget of Portuguese India and submits the same to the Minister for Colonies for his approval.

Mormugao came recently in the limelight and was buzzing with diplomatic activity due to its having been selected as the neutral port for the exchange of Japanese and American civilian interees. The arrangements for the exchange of prisoners were well executed by the Portuguese authorities without any hitch.

The Country.—A little over one-third of the entire territory of Goa is stated to be under cultivation. The present policy of the Government is to bring as much land under cultivation as possible. For this purpose, technical and agricultural experts have been appointed to carry on propaganda and to demonstrate to the farmers modern methods of cultivation. Statistics are being organised referring to agriculture, rice and coconut production, area under the plough, etc. The fertility of the soil varies considerably according to quality, situation and water-supply. The Velhas Conquistas areas, as a rule, are better and more intensively cultivated than the Novas Conquistas. In both these divisions a holding of fifteen or sixteen acres would be considered a good sized farm but the majority of holdings are of much smaller extent varying from half an acre to five or six acres. The staple produce of the country is rice, of which there are two good harvests, but the quantity produced is barely sufficient to meet the needs of the population for two-thirds of the year. Due to lack of supplies of rice from British India, Goa is at present passing through great hardships and the

people are experiencing difficulty to obtain supplies of this necessity of life. With a view to securing equitable distribution of rice among the various sections of the population, the Government have decided to take over the production of both the crops this year. A press note issued by the Government stated that this drastic step had to be taken on account of difficulties of importing rice and the hoarding resorted to by producers during the previous harvest, without any regard for the common interest of the population. Next to rice, the cultivation of coconut palms is deemed most important from the variety of uses to which the products are applied. Hilly places and inferior soils are set apart for the cultivation of cereals and several kinds of fruits, the most notable of which are the famous Alphonso and Malcurada mangoes and vegetables are cultivated to a great extent. The condition of the agricultural classes in the Velhas Conquistas has improved during recent years, owing to the general rise in the prices of all classes of agricultural produce and partly due to the current of emigration to British territory. There is a great shortage of agricultural labour in the Velhas Conquistas. In the summer months hordes of artisans and field labourers from the adjoining British territory make their way into Portuguese Salsette where the demand for labourers always keen. Stately forests are found in the Novas Conquistas. They cover an area of 116 square miles and are under conservation and *yield some profit to the administration. Iron ores, soapstone and pozzolana are found in parts of the territory but have not been seriously worked. Manganese also exists and some mines are being worked at present, the ore being exported to Europe.*

In recent years a remarkable change has come over the means of transport throughout the country. A large number of new roads have been built which have brought the most distant villages of Goa into close and intimate connection with the cities and towns. It is easy to cover the whole country in a motor car within practically a single day and Novas Conquistas are now easily accessible to the remotest parts of the Velhas Conquistas. All the principal roads are asphalted. A number of new bridges have been built which have made easy inter-district communication. There are cheap bus services throughout the country at regular intervals. These have quickened communication with British India and have enabled the districts of Salcete and Bardez to import a larger quantity of foodstuffs, fruits and vegetables from the adjoining British territories. The Bombay-Goa road has now been completed and shortens substantially the distance between these two places. Owing to the present system of petrol rationing, which came into existence soon after the outbreak of the war, bus services have become limited and work by rotation. A regular ferry steamer service has been started between Bombay and Panjim during the summer months *i.e.* September to May. At present the steamer service runs trice a week and it is expected that the Scindhia Steam Navigation Co. will run the service daily as was done before the war in 1939. During the monsoon the *Barra de Aguada* is closed for navigation.

Besides the steamer service, the country carts carries on trade to a limited extent between Diu, Daman and Goa and some parts of British India.

There are also steam launches and motor boats plying between Nova Goa, Betim, Verem Aldona and other places where there are important rivers.

Commerce.—**In the days of its glory Goa was the chief entrepot of commerce between the East and the West and was specially famous for its trade in horses with the Persian Gulf. It lost its commercial importance with the downfall of the Portuguese Empire and its trade is now insignificant.**

The present trade of Goa is not very large Its imports amounted to about Rs. 150 lakhs and exports to about Rs. 32 lakhs in 1939, chiefly with British India, Portugal and Japan. With the outbreak of the war, trade with Japan was stopped. Even with Portugal, the trade was decreased due to the lack of shipping facilities. Portugal has a very small merchant navy. The deficit is met from the remittances sent to Goa by over one lac of emigrants who are to be found in British India and other parts of the world. Few manufacturing industries of any importance exist and most of the manufactured articles in use are imported. The exports chiefly consist of cocoanuts, copra, betel nuts, mangoes, cashewnuts, bamboos, salt and salt fish, etc. No reliable statistics are available of the country's balance of indebtedness and of its invisible exports which are considerable and mainly responsible for the favourable terms of trade which the country enjoys.

The only industries are soap making, timber, food products and cashew nuts and jaggery.

A new sugar factory has been started at Sanguem, Goa. The present Goa Government is keen to help industrial enterprises in Goa as it will contribute to the prosperity of the country. This fact by also manufactures jaggery.

No exports of any local produce to Indian or foreign places or ports are permitted by the Portuguese Customs Department unless a special permit is obtained by the exporter from the local authorities. This new regulation has been enforced with a view to reserving sufficient stocks for local consumption

A line of railway connects Mormugao with the Madras and Southern Mahratta Railway Its length from Mormugao to Castle Rock above the Ghats where it joins the British system is 51 miles, of which 49 are in Portuguese territory. The railway is under the management of the Madras and Southern Mahratta Railway administration, and the bulk of the trade of Mormugao port is what it brings down from and takes to the interior. The W. I. P. Rly., now run by the Madras and Southern Mahratta, has, recently experienced increased traffic, both passenger and goods, and has yielded enormous profits more than sufficient to pay the guaranteed rate of interest; even a surplus is left over which is paid regularly into the Lisbon treasury every six months. The Portuguese Government have, in the past, lost considerable sums in the payment of the guaranteed interest. Considerable expenditure has also been incurred in modernising the facilities in the Mormugao harbour. The telegraphs

in Portuguese territories are worked as a separate system from the British. The latter, however, had an office at Nova-Goa maintained jointly by the two Governments but since 1925 the Nova-Goa office has been handed over to the Portuguese Government which now maintains and works all the telegraphs in its territories including Damaun and Diu.

Most of the commerce of Portuguese India is with British India with which it maintains close commercial relations. About 90 per cent. of the imports of the country are now from British India which also receives most of its exports but in recent years these have shown a remarkable fall due to various controls set up by the Government. Among the most important imports are rice, textiles, sugar, cereals, petrol, kerosene oil, all kinds of machinery, foreign liquor, etc. There is a large entrepot trade bringing into about 8 to 9 crores of rupees a year, which is generally cleared by the port and railway at Mormugao.

Taxes and Tariffs. The finances of the country showed chronic deficits for nearly 60 years with occasional exceptions. The last war increased them to alarming proportions and these were met by fresh taxes and new loans. Most of the new taxes were initiated by the Governor-General Jaime de Morais, who is popularly known as the "Governor of Taxes." Only in 1927 the country experienced the joys of a balanced budget and the public servants whose salaries had always remained in arrears are now paid regularly. If municipal and national taxes be added together, the country presents a very high incidence of taxation, even higher than that of British India, the average coming to about Rs. 13 *per capita*. The income tax is paid only by those merchants who make large profits and by Government servants. The private income from other sources is not taxed. There is a special ten per cent tax on all incomes derived in the shape of interest on loans. This is a powerful contributory cause to the flight of capital from Portuguese India. The chief items of revenue are the land tax, interest on loans, excise and the customs. There is a special tax on emigrants all persons, Goan and non-Goan at the time of their leaving Goa, which yields to the State a little over Rs. 10,000. The country being economically backward, the taxes give very little indication of its productive capacity or of its annual wealth. The national wealth is a matter of pure conjecture for lack of statistics. It is proposed to revise the system of taxation, specially the land tax which represents 12 per cent of the nett yield.

The State has established in Bombay an institution called *Instituto Indo-Portugues* with an annual subsidy of Rs. 36,000 from Government to be utilised for the promotion of social and economic welfare of Goans residing in British India and British East Africa. The proceeds of the emigration tax have been earmarked for the subsidy to the Institute. This Institute is conducting shorthand, typewriting, book-keeping and other commercial subjects, an electricity class, a tailoring class for ladies, Portuguese and Konkani classes and an employment bureau and is doing useful work for the moral and social uplift of the Goan Community in Bombay. The Government of Goa have also appointed a Commercial Agent attached to the Portuguese Consulate to look after the economic interests of Portuguese subjects in British India.

The tariff schedule is based on the three-fold principle, fiscal, protective and preferential. There is a limited free list on which books and paper figure prominently. The fiscal tariff ranges from 10 to 30 per cent. according to the nature of the commodities, but the duties in several cases are specific, not *ad valorem*. This causes considerable hardship to trade, and specially to the poorer classes of consumers. The preferential tariff applies to goods coming from Lisbon and the Portuguese Colonies. Very recently the principle of protection has been extended to the export of canned fruits which are entitled to a bounty of 10 per cent. on their basic price. The tariffs were again revised last year, and the import duties on foreign goods were generally increased. The preferential duties on Portuguese wines, spirits and provisions have been lowered so as to make preference even more effective. Sugar imported from Mozambique enjoys effective protection, though its import is done through British India. But there are no exports from Goa to Mozambique.

For the last eight years the country has experienced recurring surpluses due to the increasing indirect taxes. Public revenues between 1914 and 1.4 have almost doubled and the indirect taxes yield to the State about 32 lakhs of rupees and direct taxes about 9 lakhs of rupees. The surplus from 1935 to 1937 came to 17 lakhs which, together with other special funds, make up a reserve of about 65 lakhs of rupees available for developmental expenditure, in which sum is included about 17 lakhs of rupees due by other colonies of Portugal. The total surplus for the last decennium amounts to about 90 lakhs of rupees, of which about 64 lakhs are constituted into a reserve fund. Recently all the different special funds have been merged into the consolidated reserve fund with the exception of the yield of the rice tax which will constitute a separate reserve ear marked entirely for the development of rice cultivation. The duty on imported rice which was introduced towards the end of 1938 has now been withdrawn. The tax on rice was levied with a view to give protection to the local production but when Government saw that the price of paddy was soaring high, it saw that no useful purpose was served by keeping the tax on rice. Hence the repeal of this tax which has brought relief to the poor consumers. A notification in the Government Gazette says the price of paddy continues to remain at Rs. 26 per candy of 160 litres with the exception of *ezegut* variety. It is understood that this price is applicable only to places of production or at the godowns of producers. The price of unboiled rice locally produced is fixed at Rs. 28 a bag of 88 litres. Boiled rice imported from Karachi is to sell at Rs. 32-8 a bag.

The public debt of Goa is made up of dues to Portugal and small loans floated in the country itself. Most of the debt due to Portugal has been wiped out by lump payments. The

currency of the country is the monopoly of the Banco Nacional Ultramarino which is the State Bank of issue for some of the Portuguese colonies. Currency in recent times has expanded and the fiduciary issue has been increased from 10 millions to about 12 millions. The State holds a percentage of share capital on which interest is payable by the Bank to the respective colonies. The total fiduciary issue of the Bank at the end of last year was about 112 lakhs and its active note circulation has recently increased about 13 millions. The Bank does ordinary banking business with very few central banking operations. It preserves a limited loan policy but purchases, on a large scale, British Indian notes and coins and remits them to Bombay where it maintains a branch financed by transfer of capital from Goa through the purchase of British Indian currency. There was, during 1940-1941 a considerable repatriation of funds from British India, which resulted in an expansion of the note circulation of Banco National Ultramarino to over 80 lacs of rupees. There was also a large increase in the Savings Bank deposits. The heavy demand for Portuguese notes resulted in a discount being demanded for their conversion. But the Banco Nacional Ultramarino has withdrawn the facilities for transfers and conversion of notes, at present, which it had previously allowed to its customers. The Goa Government Treasury Offices also do not receive English notes for any payments and the emigrants have to pay Rs. 5 to Rs. 8 per hundred to get the English notes exchanged into Portuguese. These hardships have been the subjects of representations by different Goan Institutions in Bombay and so far Government has not modified its orders, although Government used to freely receive English notes at par before 1941. The currency problem has considerably eased at present and merchants are freely receiving English currency notes for their goods, without charging any commission. It is only for Portuguese notes that commission is demanded. The Portuguese Government has already allowed the Posts and Telegraph Departments to accept British currency up to Rs. 4-15. This will go a long way to help the public, as Portuguese coins, especially fractions of a rupee are difficult to obtain.

The Capital.—Nova-Goa, the present capital of Portuguese India, situated on the banks of the Mandovi, comprehends Panjim and Ribandar and is the seat of the Governor-General. Old Goa is some six miles away from the new city. Panjim occupies a narrow strip of land leading up to the Cabo, the cape dividing the Aguada bay from that of Mormugao, and mainly slopes down to the edge of the Aguada. It was selected as the residence of the Portuguese Viceroy in 1759, and in 1843 it was raised to its present rank as the capital of Portuguese India. The appearance of the city, with its row of public buildings and elegant private residences, as seen from the water is very picturesque and this impression is not belied by a closer inspection of its neat and spacious roads, bordered by decent, tidy houses. The most imposing public structures are the barracks, an immense quadrangular building the eastern wing of which accommodates the Primary School, the Public Library and the Government Press. Other noticeable buildings are the Cathedral at Velha Goa and the various churches, the vice-regal palace and the High Court. The square in the lower part of the town is adorned with a life-sized statue of Albuquerque standing under a canopy.

Panjim has been undergoing in recent years many remarkable improvements. The electrical supply of the country has been reorganised under the control of the Municipality and an excellent system of lighting, public and private, is now in force. Most of the important roads have been asphalted at a large cost and recently a large number of buildings have come up on *Altinho* which is the Malabar Hill of Panjim. A decree has been published calling upon all housewners to introduce septic tanks as a preliminary step to the working out of a scheme of water-supply. This decree has so far not been enforced, due to lack of water-supply.

The Government recently invited Sir M. Visweswarayya to work out a plan for the supply of water to Nova Goa. He has submitted a report, and it is expected that Government will give effect to his recommendations.

The population of Nova Goa, the Capital of Goa, according to the latest census of 1940 shows 20,291 inhabitants, 10,747 males and 9,544 females. There are 1,020 British subjects, 5 Germans, 6 Chinese 3 Iraquians and 1 Yugo Slavian. There are 4 up-to-date hotels with all comfort catering to the needs of visitors.

History. Goa was captured for the Portuguese by Alfonso de Albuquerque in 1510 Albuquerque promptly fortified the place and established Portuguese rule on a firm basis. From this time Goa rapidly rose in importance and became the metropolis of Portuguese power in the East. There was constant fighting with the armies of the Bijapur kingdom, but the Portuguese held their own and gained the surrounding territory now known as the Velhas conquistas.

The subsequent history of the town is one of ostentation and decay. Goa reached its summit of prosperity at the end of the sixteenth century. The accounts of travellers show that the Goa of those days presented a scene of military, ecclesiastical and commercial magnificence which has had no parallel in the British capitals of India. Portugal, however, with its three millions of population, was too small to defend itself against Spain and maintain at the same time its immense Empire in the four Continents. Albuquerque tried to consolidate Portuguese rule in India by his policy of attracting the conquered Indians and granting them civil and religious liberties and by encouraging intermarriages between the Portuguese and the Indians. His contemporaries however, could not understand his far-seeing statesmanship and after his death they undid all his work basing their dominion on conquest by the sword and military force and they laboured to consolidate it by a proselytising organisation which threw all the missionary efforts of every other European power in India into the shade. Old Goa, as the ruins of the old capital are called to-day, had a hundred churches, many of them of magnificent proportions, and was the seat of the Inquisition which

was a religious power in the land. The 60 years' subjection of Portugal by Spain in the 17th century completed the ruin of the Portuguese Empire in the East and though the Marquis of Pombal in the 18th century tried to stave off its decadence, his subordinates in the far off India either could not understand or would not carry on his orders and even his strong hand was unable to stop the decline. It was in the 19th century that the subjects of the colonies began to enjoy full Portuguese citizenship and sent their representatives to the Parliament in Lisbon.

Modern Times. There was frequently recurring fighting and in 1741 the Marathas invaded the neighbourhood of Goa and threatened the city itself. An army of 12,000 men arrived from Portugal at the critical moment. The invaders were beaten off, and the Novas Conquistas were added to the Portuguese possessions. In 1844 the shelter given by Goa to fugitives from justice in British territory threatened to bring about a rupture with the British Government at Bombay. In 1852 the Ranes of Satari in the Novas Conquistas, revolted. In 1871 the native army in Goa mutinied and the King's own brother came from Lisbon to deal with the trouble and having done so di-banded the native army, which has never been reconstituted. But another outbreak among the troops took place in 1895 and the Ranes joining them the trouble was again not quieted until the arrival of another special expedition from Lisbon. The Ranes again broke out in 1901 and again in 1912, troops being again imported to deal with the last outbreak, which was only reported concluded in the summer of 1913. There has been no outbreak after that date.

The people on the whole appeared to be quite satisfied with the Portuguese connection. There was no agitation for further reforms as in British India and not a sign of disaffection against the Portuguese rule. This was chiefly due to the fact that under the old regime the people of Goa enjoyed complete equality with the subjects of Portugal, many of the sons of Goa occupying high and responsible positions in Portugal. Thus Bruno de Brito who was Minister of the Public Works towards the end of the last century was a native of Goa, so was the father of Dr. Bettencourt Rodrigues, Minister for Foreign Affairs in General Carmona's dictatorial Government. Natives of Goa were also Dr. Almeida Arez, the ex-President of the Supreme Court in Lisbon, Dr. Caetano Gonsalves, a former Judge of the same Court and Mr. Alberto Xavier, Secretary-General of the Ministry of Finance. The new colonial policy of Portugal is based on racial distinctions and on a classification of citizens into full fledged and assimilated. The *Acto Colonial* is now the corner-stone of Portuguese colonial legislation and its preamble states that it is the historic function of Portugal to own and rule colonies. This function is called its *organic essence*. The subjects from colonies are debarred from entering the ranks of military officers and are not allowed to join military and naval colleges of Portugal. This racial discrimination in the fundamental statutes of the country has given rise to discontent and has led to many representations to the Government of Portugal. A recent Governor-General of Portuguese India, General Craveiro Lopes, voiced India's feelings at the Colonial Conference of Governors when he stated that Portuguese India was hurt by such legislation and demanded equal treatment with the Portuguese.

The establishment of dictatorship in Portugal has produced profound changes in the administrative machinery of Goa. A system of centralisation, financial and administrative, has been introduced with the result that all important financial and administrative acts require the sanction of the Lisbon Government. The Governor General has to submit periodical reports of his administration to the Lisbon Government. A press law controls the freedom of the Press and imposes heavy penalties on all crimes committed by newspapers. Old newspapers are exempted from deposits, but new ones have to keep with the State considerable sums of money before they are allowed to appear. Every paper has to be previously censored by official censors and so also the publication of books, brochures and pamphlets. The powers of the Council of Government are also reduced, particularly their legislative functions. They are for all intents and purposes a mere advisory body as officials and nominated members form a majority. A system of periodical conferences has been established, made up of all the colonial Governors now suspended due to war. There is a common parliament and the whole Portuguese Empire is constituted into a single constituency electing about 90 members of the National Assembly. Presidents of municipalities and charitable associations are appointed by the Governor General. The economic condition of the country has deteriorated considerably in recent times. Due to scarcity of necessaries of life, thousands of Goans have come to British India to earn their living. Prices have risen by leaps and bounds and people cannot afford to buy in the black markets which are flourishing before the eyes of the authorities who seem helpless to check profiteering. So the result is an increase of emigration to British India.

Administration — The Lisbon Government by Decree No. 3266, dated 27th July 1917, enacted new rules regarding the administration of Portuguese India under an Organic Charter (Carta Organica) in force since 1st July 1919. This Charter, regarding civil and financial administration of the colony, was modified by rules Nos. 1005 and 1022, dated 7th and 20th August 1920, and decrees Nos. 7008 and 7030, dated 9th and 10th October. A new Organic Charter modifying in certain parts the earlier one was granted by Decree No. 8699 of 5th May 1937 and is now in force.

The territory of Portuguese India is ruled by a Governor-General, residing in the Capital of the State, at Panjim, now known as Nova Goa, and is divided into three districts: Goa, Daman and Diu. The last two are each under a Lieutenant-Governor. The district of Goa is under the direct control of the Governor-General.

Assisting the Governor-General in the administration are the Home and Political, Finance, Customs, Education, Military, Naval, Agriculture,

Health and Public Works Secretariats. There are also three special and autonomous Departments, which do not constitute exclusive Secretariats, one of them being the Department of Posts and Telegraphs, the second that of Survey and the third that of the Fiscal of the W. I. P. Railway.

As the principal organ of administration next to the Governor-General and in collaboration with him works a Governor's Council (*Conselho do Governo*) with Legislative and advisory powers. The Council is constituted, in addition to the Governor-General, *ex-officio* President, of four officials (Attorney-General, the Director of Finances, the Director of Civil Administration and the Director of Public Works), five elected members (three representing *Velhas Conquistas*, one the *Novas Conquistas* and one the Districts of Daman and Diu) and five members nominated by the Governor-General to represent the minorities, agricultural, commercial and other interests and the press.

In each province of Goa, Daman and Diu there is a District Council to supervise the Municipalities and other local institutions. The District Council of Goa is composed of the Director of Civil Administration, President; the Government Prosecutor of the Nova-Goa Civil Court; the Deputy Chief Health Officer; the Engineer next to the Director of Public Works; the Deputy Director of Finances; the Chairman of the Municipal Corporation of Ilhas; one member elected by the Commercial and Industrial Associations of the district; one member elected by the 60 highest tax payers of Goa; one member elected by the Associations of Landowners and Farmers of the District; and one advocate-member elected by the Legislative Council from among the legally qualified.

There is one High Court in Portuguese India with five Judges and one Attorney-General; and Sessions Courts at Panjim, Margao, Mapuca, Bicholim, Quepem e Damao; and Munsipa. Courts of Justice at Mormugão (Vasco da Gama), Ponda, Diu and Nagar-Avell.

A new Administrative Code has been introduced which improves administrative discipline and holds public servants directly and personally responsible for all their actions. No public servant can profess communism and has to make a declaration to that effect before he is appointed for any Government post. The Governor has wide disciplinary powers over the public servants subject to the right of appeal to the Supreme Administrative Court or the Supreme Court of Discipline in Lisbon. The judiciary has its own autonomy independent of the Governor of the colony as regards promotions, discipline punishments and dismissal subject to general supervision and control by the Minister for Justice. The whole Portuguese Empire forms one judicial district directly under the Lisbon Government.

There are over six English teaching High Schools recognised by the University of Bombay from which students appear for the Bombay Matriculation.

PORT OF MORMUGAO.

Mormugao is situated towards the south of Aguada Bay, on the left bank of Zuary River in Lat. 15° 25′ N. and Long. 73° 47′ E., about 225 miles south of Bombay and 6½ miles south of Panjim, the Capital of Portuguese India. The Port of Mormugao is the natural outlet to the sea for the whole area served by the M. & S. M. Rly. (metre-gauge), and offers the shortest route both passenger and goods traffic. The distance from Aden to Mormugao is about the same as from Aden to Bombay. The Port is provided with lighthouses, buoys and all necessary marks and it is easily accessible to shipping all the year round and at any hour of the day or night even without the assistance of a Pilot. Pilotage is not compulsory but when the usual pilot flag is hoisted, a qualified officer will board the vessel and render such assistance as is necessary.

Mormugao Harbour is the terminal station of the Western India Portuguese Railway which is controlled by the Madras and Southern Maharatta Railway Company, with headquarters at Madras.

With a view to promoting the economical, commercial and industrial development of Mormugao, a special Department has been created with its head office at Vasco da Gama, 2 miles from Mormugão Harbour. The Local Government have introduced various regulations granting every facility to those intending to raise buildings for residential and industrial purposes in the whole area, comprising about 300 acres, near the Harbour. The scheme of "free" port did not produce much commercial development. No new industries were established. But with the increase in the railway traffic to about 9 crores of rupees, by sea and rail, the harbour was visited by several vessels, before the outbreak of the present war.

DAMAN.

The settlement of Daman lies at the entrance to the Gulf of Cambay, about 100 miles north of Bombay and four hours run by rail from Bombay Central Station. It is composed of two portions, namely, Daman proper, lying on the coast, and the detached *pargana* of Nagar-Avell, separated from it by a narrow strip of British territory and bisected by the B.B. & C.I.

Railway. Daman proper contains an area of 22 square miles and 26 villages and has a population (1931) of 19,741 of whom 1,675 are Christians. The number of houses is according to the same census 4,095. Nagar Aveli has an area of 60 square miles and a population (1931) of 38,260, of whom only 400 are Christians. The number of houses is 6,069. The town of Daman was sacked by the Portuguese in 1531 rebuilt by the natives and retaken by the Portuguese in 1558, when they made it one of their permanent establishments in India. They converted the mosque into a church and have since built eight other places of worship. The native Christians adopt the European costume, some of the women dressing themselves after the present European fashion, and others following the old style of petticoat and mantle once prevalent in Spain and Portugal. The language spoken here is Portuguese and Guzerati There is an English School recognised by the Government of Portuguese India.

The soil of Daman is moist and fertile, especially in Nagar Aveli, but despite the ease of cultivation only one-twentieth part of the territory is under tillage. The principal crops are rice, wheat, the inferior cereals of Gujarat and tobacco. The settlement contains no minerals. There are stately forests in Nagar Aveli, and about two-thirds of them consist of teak, but the forests are not conserved and the extent of land covered by each kind of timber has not been determined. Before the decline of Portuguese power in the East, Daman carried on an extensive commerce especially with the east coast of Africa. In those days it was noted for its dyeing and weaving industry.

The territory forms for administrative purposes a single district and has a Municipal Chamber and Corporation. It is ruled by a Governor invested with both civil and military functions, subordinate to the Governor-General of Goa. The judicial department is administered by a judge, with the help of a delegate of the Attorney-General and two clerks. In Nagar Aveli the greater part of the soil is the property of the Government, from whom the cultivators hold their tenures direct. A tax is levied on all lands, whether alienated or the property of the State. The chief sources of revenue are land tax, forests, excise and customs duties.

DIU.

Diu is an island lying off the southern extremity of the Kathiawar Peninsula, from which it is separated by a narrow channel through a considerable swamp. It is composed of three portions, namely, Diu proper (island), the village of Gogola, on the Peninsula, separated by the channel, and the fortress of Simbor about 5 miles west of the island. It has a small but excellent harbour, where vessels can safely lie at anchor in two fathoms of water and owing to the great advantages which its position offers for trade with Arabia and the Persian Gulf, the Portuguese were fired at an early period with a desire to obtain possession of it. This they gained first by treaty with the Sultan of Gujerat and then by force of arms. Diu became opulent and famous for its commerce. It has now dwindled into insignificance. The extreme length of the island is about seven miles and its breadth from north to south, two miles. The area is 20 square miles. The population of the town of Diu, from which the island takes its name, is said to have been 50,000 in the days of its commercial prosperity. The total population of the island, according to the census of 1931, is 16,688, of whom 251 are Christians. Most of the Goan convicts sentenced for transportation for life have recently been transferred to Diu which has been made a penal settlement. Formerly all prisoners undergoing the sentence of transportation were sent to Mozambique Island but now the convicts are sent to the Island of Diu.

Officials:

Governor-General of Portuguese India—Dr. Jose Ferreira Bossa

Chief of Cabinet—Lieut. O. Vasconcellos.

Chief of Military Staff.—Major Alexandre Arthur.

Commissioner of Police.—Major Daniel Fernandes Agadar.

Director of Health.—Dr. Froilano de Mello.

Director of Posts and Telegraphs.—Oliveira Chaves.

Public Works Department.—Director: Eng. Jose Godinho; *Deputy Director*: Eng. Bernardino Camilo Da Costa.

High Court Judges.—Dr. Agostinho Colaco; *Chief Justice*: Dr. Braganza Pereira; Dr. Antonio Miranda, Dr. Nicolau Sobrinho; Dr. Virgilio Souza.

Director of Finances.—Vasco Ferreira Martins.

Deputy Director of Finances.—A. J. M. de Melo Moreira.

Director of Civil Administration—Dr. Joaquim de Magalhaes Mexia Mendes Pinheiro.

Advocate-General.—Dr. Antonio Taumaturgo Pereira.

Elected Members of the Legislative Council.—Rev. Father Canon Castilho Serpa do Rosario Noronha; Antonio Jose Joao Francisco Pinto de Menezes; Antonio Anastasio Bruto da Costa, Vinaica Sinai Colssoro; Dr. Joao Filipe Ferreira.

British Vice-Consul at Nova Goa.—R. B. Lavers.

FRENCH POSSESSIONS.

The French possessions in India comprise five Settlements, with certain dependent lodges, or plots. They aggregate 203 square miles, and had a total population on the 1st July 1941 of 323,295. The first French expedition into Indian waters, with a view to open up commercial relations, was attempted in 1603. It was undertaken by private merchants at Rouen, but it failed, as also did several similar attempts which followed. In 1642 Cardinal Richelieu founded the first Campagnie d'Orient, but its efforts met with no success. Colbert reconstituted the Company on a larger basis in 1664, granting exemption from taxes and a monopoly of the Indian trade for fifty years. After having twice attempted, without success, to establish itself in Madagascar, Colbert's Company again took up the idea of direct trade with India and its resident, Caron, founded in 1668 the Comptoir, or agency, at Surat. But on finding that city unsuited for a head establishment he seized the harbour of Trincomalee in Ceylon from the Dutch. The Dutch, however, speedily retook Trincomalee; and Caron, passing over to the Coromandel coast, in 1672, seized San Thome, a Portuguese town adjoining Madras, which had for twelve years been in the possession of Holland. He was however, compelled to restore it to the Dutch in 1674.

The ruin of the Company seemed impending when one of its agents, the celebrated Francois Martin, suddenly restored it. Rallying under him a handful of sixty Frenchmen, saved out of the wreck of the settlements at Trincomalee and San Thome, he took up his abode at Pondicherry, then a small village, which he purchased in 1683 from the Rajah of Gingee. He built fortifications, and a trade began to spring up; but he was unable to hold the town against the Dutch, who wrested it from him in 1693, and held it until it was restored to the French by the peace of Ryswick, in 1697. Pondicherry became in this year and has ever since remained, the most important of the French Settlements in India. Its foundation was contemporaneous with that of Calcutta. Like Calcutta, its site was purchased by a European Company from a native prince, and what Job Charnock was to Calcutta Francois Martin proved to Pondicherry. On its restitution to the French by the Peace of Ryswick in 1697, Martin was appointed Governor, and under his able management Pondicherry became an entrepot of trade.

Chandernagore, in Lower Bengal, had been acquired by the French Company in 1688, by grant from the Delhi Emperor; Mahé, on the Malabar Coast, was obtained in 1725-6, under the government of M. Lenoir; Karikal, on the Coromandel Coast, under that of M. Dumas, in 1739. Yanaon, on the coast of the Northern Circars, was taken possession of in 1750, and formally ceded to the French two years later.

Administration.—The military command and administration-in-chief of the French possessions in India are vested in a Governor, whose residence is at Pondicherry. The French Establishments in India have rallied to the Free French Movement under the Leadership of General de Gaulle. He is assisted by a Chief Justice and by several "Chefs de Service" in the different administrative departments. In 1879 local councils and a council-general were established, the members being chosen by a sort of universal suffrage within the French territories. Seventeen Municipalities, or Communal Boards, were erected in 1907, namely, Pondicherry, Ariancoupam, Modeliarpeth, Oulgaret, Villenour, Tiroubouvane, Bahour and Nettapacam, for the establishment of Pondicherry; Karikal, Neravy, Nedoungadou, Tirnoular, Grande Aldée, Cotchery, for the establishment of Karikal, and also Chandernagore, Mahe and Yanaon. On municipal boards natives are entitled to a proportion of the seats. Civil and Criminal courts, courts of first instance and a Tribunal Supcieur d'Appel compose the judicial machinery. The army and establishments connected with the Governor and his staff at Pondicherry and those of administrators at Chandernagore, Yanaon, Mahe and Karikal, together with other headquarter charges necessarily engross a large proportion of the revenue. All the state and dignity of an independent Government, with four dependent ones, have to be maintained, and the prestige of the French Government is worthily maintained in the East. Pondicherry is also the scene of considerable religious pomp and missionary activity. It forms the seat of an Archbishop, with a body of priests for all French India; and of the Missions Etrangere the successors of the Mission du Carnatic founded by the Jesuits in 1776. But the chief field of this mission lies outside the French Settlement a large proportion of its Christians are British subjects and many of the churches are in British territory. The British rupee is the ordinary tender within French territories. A line of railway running *viâ* Villenour, from Pondicherry to Villupuram on the South Indian Railway, maintains communication with Madras and the rest of British India, and Karikal is linked to the same railway by the branch from Peralam. A Chamber of Commerce consisting of fifteen members, six of them Europeans or persons of European descent, was reorganised by a decree of 7th March, 1914. The capital, Pondicherry, is a very handsome town, and presents, especially from the sea, a striking appearance of French civilisation.

People and Trade. There were in 1937, 67 primary schools and 3 colleges, all maintained by the Government, with 353 teachers and 13,602 pupils. Local revenue and expenditure (Budget of 1945) are Rs. 3,800,300. The principal crops are paddy, groundnut, and ragi. There are at Pondicherry 3 cotton mills, and at Chandernagore 1 jute mill. The cotton mills have in all 1,066 looms and 85,976 spindles, employing 6,900 persons. There are also at work one oil factory and a few oil presses for groundnuts and one ice factory. The chief exports from Pondicherry are oil seeds at the ports of Pondicherry and Karikal. In 1940-41 (for the year ending 31st March 1941) the imports amounted to Rs. 4,583,495 and

the exports to Rs. 6,714,951 to these two ports in 1940, 122 vessels entered and cleared; tonnage 240,957. Before the war Pondicherry was served by French steamers, sailing monthly between French and Indo-China *via* Colombo, Madras and Singapore and also fortnightly by the British India Steam Navigation Co. Steamers which plied between East Coast Ports and the Straits Settlements. The figures contained in this paragraph are the latest available and are corrected up to March 1941.

On the 15th February 1941 a Customs Union with British India came into force. As a result, all goods exported or imported into the Ports of Pondicherry and Karikal are liable to the same duties as are levied in other British Indian ports.

PONDICHERRY.

Pondicherry is the chief of the French Settlements in India and its capital is the headquarters of their Governor. It is situated on the Coromandel Coast, 105 miles from Madras by road and 122 by the Villupuram-Pondicherry branch of the South Indian Railway. The area of the Settlement is 115 square miles and its population in 1941 was 204,673. It consists of the eight communes of Pondicherry. The Settlement was founded in 1674 under Francois Martin. In 1693, it was captured by the Dutch but was restored in 1699. It was besieged four times by the English. The first siege under Admiral Boscawen in 1748 was unsuccessful. The second, under Eyre Coote in 1761, resulted in the capture of the place, which was restored in 1765. It was again besieged and captured in 1778 by Sir Hector Munro, and the fortifications were demolished in 1779. The place was again restored in 1785 under the Treaty of Versailles of 1783. It was captured a fourth time by Colonel Braithwaite in 1793, and finally restored in 1816.

The Settlement comprises a number of isolated pieces of territory which are cut off from the main part and surrounded by the British District of South Arcot, except where they border on the sea.

At Pondicherry there is a British Consul-General accredited to the French Government, who is an officer of the Indian Political Department. The town is compact, and is divided by a canal into two parts, the Ville blanche and the Ville noire. The Ville blanche has a European appearance, the streets being laid at right angles to one another, and the houses being constructed with courtyards and embellished with green venetians. All the cross streets lead down to the shore, where a wide promenade facing the sea is again different from anything of its kind in British India. In the middle is a screw-pile pier, which serves, when ships touch at the port, as a point for the landing of cargo, and on holidays as a general promenade for the population. There is no real harbour at Pondicherry; ships lie at a distance of about a mile from the shore, and communication with them is conducted by the usual *masula* boats of this coast; Facing the shore end of the pier is a statue of the great Dupleix, to whom the place and the French name owed so much.

CHANDERNAGORE.

Chandernagore is situated on the bank of the Hooghly, a short distance below Chinsura. Population (in 1941) 38,284. The town was permanently occupied by the French in 1688, though previously it had been temporarily occupied by them at a date given as 1672 or 1676. It did not, however, rise to any importance till the time of Dupleix. It changed hands between British and French various times during the Napoleonic wars and was finally restored to the French in 1816.

The former grandeur of Chandernagore has disappeared, and at present it is little more than a quiet suburban town with little external trade. The railway station on the East Indian Railway is just outside French territory 22 miles from Calcutta (Howrah). The chief administrative officer is the Administrator, who is subordinate to the Governor of the French Possessions. The chief public institution is the College Dupleix, formerly called St. Mary's Institution, founded in 1882 and under the direct control of the French Government.

KARIKAL.

Karikal lies on the Coromandel Coast between the Tanjore District of Madras and the Bay of Bengal. The settlement is divided into six communes, containing 110 villages in all, and covering an area of 53 square miles. It is governed by an Administrator subordinate to the Governor at Pondicherry. The population has in recent years rapidly decreased. In 1883 it was 93,055; in 1891, 75,626; in 1901, 54,003; in 1923, 57,023; in 1924, 56,922; in 1936, 60,447 and in 1941, 60,555; but the density is still very high, being 1,068 persons per square mile. Kumbakonam is the only taluk in Tanjore District which has a higher density. Each of the six communes—namely, Karikal, La Grande Aldee, Nedungadu, Cot-Kery, Neravy and Tirncular—possesses a mayor and council. The members are all elected by universal suffrage but in the municipality, Karikal half the number of seats are reserved for Europeans or their descendants. The country is very fertile, being irrigated by seven branches of the Cauvery, besides many smaller channels.

The capital of the settlement is situated on the north bank of the river Arasalar, about 1¼ miles from its mouth. It has a brisk trade in rice with Ceylon, and to a less extent with the Straits Settlements. It has no commerce with France, and very little with other French colonies. The port is merely an open roadstead, provided with a light-house 142 feet high, the light in which having a range of from 8 to 10 miles. In 1899 Karikal was connected with Peralem on the Tanjore District Board Railway. Karikal finally came into French possession on the settlement after 1815.

The Frontiers.

By those who take a long view of politics in the wide sense of the term, it will be seen that the Indian Frontier problem, which has loomed so large in the discussion of Indian questions, has always borne a twofold character—the local issue and the international issue. For almost a century the international issue was the greater of the two, and the most serious question which the Indian Government, both directly and as the executors of British Imperial policy, had to face. But the tendency of later times until Germany's invasion of Russia was for the international aspect to recede and for the local aspect to grow in importance, until it might be said, with as much truth as characterises all generalisations, that the local issue dominated, if it did not absorb the situation.

The Local Problem.—The local problem, in its broadest outlines, may be briefly indicated before proceeding to discuss it in detail. From the Arabian Sea on the West to the confines of Kashmir is a wild and troublous sea of some of the highest mountains in the world. The thin valleys in these immense ranges are populated by hardy, brave, militant mountaineers. But sparse as the population is, it is in excess of the supporting power of the country. Like mountaineers in all parts of the world, these brave and fearless men have sought to supplement their exiguous agriculture by raiding the rich plains of Hindustan. We may find a fairly close parallel to the situation in the position of the Highlands of Scotland until after the rebellion of 1745 the English Government of the day sought a permanent remedy by opening for the warlike Highlanders a military career in the famous Highland regiments, and in rendering military operations easier by the construction of Wade's road. The Highland problem has disappeared so long from English politics that its pregnant lessons are little realised, but if the curious student will read again that brilliant novel by Neil Munro, "The New Road," he will appreciate what Wade's work meant for the Highlands of Scotland, and what lessons it teaches those who are called upon to face, in its local aspect, the Indian frontier problem. So far as the area with which we are dealing was concerned, two policies were tried. In Baluchistan, the genius of Sir Robert Sandeman devised the method of entering into military occupation of the principal points, and thence controlling the country. At the same time close engagements were entered into with the principal chiefs, through whom the tribesmen were kept in order. That policy was so successful that whilst the administration was expensive the Baluchistan frontier did not seriously embarrass the Government of India from the time when Sandeman set his mark on the land. Not that the country was entirely peaceful. Occasional tribal raids or risings necessitated occasional military operations, and the Gomal Pass was involved in the general tribal disturbances which followed the wanton declaration of war by Afghanistan in 1919. But speaking broadly, Sandeman brought peace to Baluchistan, and to the large frontier area which is embraced in that generic term. So far as this section of the frontier is concerned it may be said that no frontier problem exists, save the need for an economic and constructive policy.

Towards Afghanistan.—Far otherwise has it until lately been with the section of the frontier which stretches from Baluchistan to the confines of Kashmir. That was, for three-quarters of a century, the scene of almost ceaseless military operations, which constituted a devastating drain on the Indian exchequer. For years one sought for a definite policy guiding the actions of the Government of India. One explanation of their inconsistencies was found in the existence of two schools of thought. Once the frontier with Afghanistan had been delimited, the soldiers naturally pressed for the armed occupation of the whole country right up to the confines of Afghanistan, or at any rate, for military posts, linked with good communications, which would dominate the country. But those who looked at policy not only from the military standpoint, were fearful of two considerations. They felt that occupation up to the Afghan frontier would only shift the frontier problem farther north. Instead of the differing tribes, we should, they argued, have to meet the Afghan on

our border line. If Afghanistan were a strong, homogeneous State, that would be a matter of little account. But even under the iron rule of Abdurrahaman Khan, the Amir's writ ran but lightly in the southern confines of his kingdom. Under his successor, Habibullah Khan, whose policy was generally wise and successful, it ran still less firmly. The Amir was unable to control the organisation of the tribal gatherings which involved us in the Zakka Khel and Mohmand expeditions during the Indian secretaryship of that arch pacifist, Lord Morley. Nor did it enable Habibullah to deal effectively with a rising against his own Governor in Khost. The Afghan forces melted away under transport difficulties when they were moved against the rebellious Khostwals, and the Amir had to make peace with his troublous vassals. Therefore, it was said, occupation up to what is called the Durand Line because it is the line demarcated by the Frontier Commission in which Sir Mortimer Durand was the British Plenipotentiary, would simply mean that in time of trouble we should have to deal with Afghanistan instead of a tribe or two, and with the irreconcilable tribesmen along our difficult line of communications. The Kabul Government now have greater control over their tribes near the frontier than formerly but the old argument still applies. There was the further consideration that financiers were of the fixed belief that even if the Forward Policy was wise from the military standpoint, it would involve charges over an indefinite period greater than the Indian finances would bear. Moreover, on this section of the Frontier, the position was complicated by the expansion of Russia in Central Asia. The easiest passes, and the passes down which for centuries from the time of Alexander the Great invaders have swept from Persia and Central Asia to loot the fat plains of Hindustan, traverse this region. Therefore it was deemed essential to control, if not to occupy them, in the interests of the Imperial situation. In this zone therefore policy ebbed and flowed between the Forward School, which would have occupied, or dominated, the whole Frontier up to the Durand Line, that is to say up to the Afghan frontier, and the Close Border School, which would have us remain out of the difficult mountainous zone and meet the tribesmen on the plains if they sallied forth. The extreme advocates of this school would even have had us return to the line of the Indus.

The Two Policies.—The result of this conflict of opinion was a series of wavering compromises, which like all compromises was profoundly unsatisfactory. We pushed forward posts here and there, which irritated the Tribesmen, and made them fearful for their prized independence, without controlling them. These advanced posts were in many cases inadequately held and rarely were they linked with their supporting posts by adequate means of communication. We preserved between our administrative frontier and the Durand Line which demarcated our frontier with Afghanistan an irregular belt of land called The Tribal Territory, in which neither we nor the Afghan Government exercised jurisdiction. This was left entirely under the control of the tribes who peopled it. Now it was often asked why we did not follow the precedent of Baluchistan and "Sandemanise" the Independent Territory. That was one of the perennial topics of Frontier discussions. But stress was laid upon the essential differences between this zone and Baluchistan. Sir Robert Sandeman found a strong tribal system existing in Baluchistan, and he was able to enter into direct engagements with the tribal Chiefs. There is no such tribal organisation in the Independent Territory. The tribal Chiefs, or Maliks, exercise a very precarious authority, and the instrument for the collective expression of the tribal will is not the chief, but the jirgah, or tribal council, of the most democratic character, where the voice of the young men of the tribe often has the same influence, in time of excitement perhaps more influence, as the voice of the wiser greybeard. The bitter fruit of this policy of compromise was reaped in 1897, when following a minor outbreak in the Tochi Valley the general uneasiness flamed into a rising which involved the whole of the North-West Frontier, from the Gomal to the borders of Kashmir. A force over thirty thousand strong had to be mobilised to deal with it. Even this large force, owing to the immense difficulties of transportation, was unable effectively to deal with the situation, though peace was made. The emergency thus created synchronised with the advent of Lord Curzon as Viceroy. He dealt with it in masterful fashion. In the first place, he separated the frontier zone from the Government of the Punjab, which had hitherto been responsible for its administration, and had organised for the purpose a special force of Frontier soldiers, known as the Punjab Irregular Frontier Force. This was the revival of a scheme as old as the Viceroyalty of Lord Lytton, though no other Viceroy had been able to carry it through in the face of the strong opposition of successive Punjab Governments. The area so separated was constituted into a separate administrative zone under the direct authority of the Government of India, exercised through a Chief Commissioner. Then Lord Curzon withdrew the advanced military posts and concentrated the regular troops in bases better linked with the main military centres of India by roads and railways. The advanced posts, and especially important Passes like the Tochi, the Kurram and the Khyber, were entrusted to the defence of local militia, recruited from the tribesmen themselves, and officered by British officers drawn from the ranks of the Indian Army. Later it was supplemented by a fine development policy. The construction of the Upper Swat Canal, led to such an increase in cultivation that the tribesmen were given a means of livelihood and were invested with the magic charm of valuable property. The irrigated part of the Frontier has since been one of the most peaceful in the whole border line.

Lord Curzon's Success.—Judged by every reasonable standard the Curzon policy was successful. It did not give us complete peace. There were occasional punitive expeditions demanded, such as for instance the Zakka Khel and Mohmand expeditions, and the Wazirs, and in particular the truculent Mahsud Wazirs, never ceased raiding. But in comparison with what had gone before, it gave relative peace. It endured throughout the Great War, though the Wazirs built up a heavy bill of offences, which awaited settlement when Government were free from

the immense preoccupations of the war. It broke down under the strain of the wanton invasion of India by the Afghans in the hot weather of 1919. On February 20th the Amir Habibullah Khan was assassinated in his sleep near Jelalabad. Although he does not figure so prominently in frontier history as his iron father Abdurrahaman Khan, he nevertheless has high claims on the favourable verdict of history. None anticipated that any successor to Abdurrahaman Khan could hold in the least in a single State the fractious, fanatical tribes who make up the population of the Afghan kingdom. Yet this Habibullah did. On occasions his attitude seemed to be equivocal, as when armed gatherings of the tribes called lashkars were permitted to assemble in Afghan territory and to invade the Tribal Territory, causing the Zakka Khel and Mohmand expeditions. But we must not judge a State like Afghanistan by European standards; the Amir had often to bow before the fanatical elements amongst his own people until they had burnt their fingers by contact with the British troops. At the outset of the Great War he warned the Government that he might often have to do things which seemed unfriendly, but they must trust him. In truth, the position of the Amir when Turkey entered the war, and called Moslems everywhere to arms on the side of Germany, was extraordinarily difficult. He received Turkish, German and Austrian missions in Kabul, from which British representatives were still excluded. But he kept Afghanistan out of the war, and with the complete defeat of the Central Powers and their satellites, his policy was justified up to the hilt. Indeed his success was the cause of his assassination. The irreconcilable elements in the Kingdom saw that the day of reckoning had come and strove to avert the settlement of their account by the murder. When he was done to death, his brother, Nasrullah Khan, was proclaimed Amir by the assassins. But the conscience of Afghanistan revolted against the idea of Nasrullah, the archfanatic of the ruling House of Kabul, ascending the throne over the blood-stained corpse of his brother. A military movement in Kabul itself brushed him aside and installed the son of Habibullah, Amanullah Khan, on the throne. But Amanullah Khan soon found it was a thorny bed on which he lay, and encouraged by the disorders in India which followed the passing of stringent measures to deal with anarchical crime, set his troops in motion on April 25, 1919, and preaching a *jehad* promised his soldiers the traditional loot of Hindustan. The Indian Army was at once set in motion, and as has always been the case the regular Afghan Army was easily beaten. Dakka, beyond the Khyber, was seized, Jelalabad and Kabul were bombed from the air, and there was nothing to prevent our occupation of Kabul, save the knowledge gleaned from the bitter heritage of the wars of 1838 and 1878, that it is one thing to overset a government in Afghanistan, but it is quite another to set up a stable government in its stead. The Government of India wisely held their hand, and the Afghans having sued for peace, a treaty was signed on the 8th August, 1919.

But an untoward effect of this wanton war was to set the Frontier from the Gomal to the Khyber ablaze. With one or two exceptions, the Tribal Militia, left without the support of the regular troops, who in the emergency ought to have been hastened to their succour, could not stand the strain of an appeal from their fellow tribesmen, and either melted away or joined the rising. This has often been described as the failure of the Curzon policy, which was based on the tribal militia. But there is another aspect to this question. The Militia numbered only some 3,000 men. They were distributed in a number of isolated and semi-isolated posts. There was no possibility of their withstanding the onslaught of an Afghan invading force. They were not intended for such a purpose. If they had, when the invasion began, been supported by regular troops their loyalty might have remained sound. But other counsels prevailed. It was at the outset decided in high military quarters that in the face of the Afghan invasion it was inadvisable to send regular troops to support the Waziristan militia posts as it was concluded that the Mahsud and Wazir tribes of Waziristan would join the enemy. Orders were therefore issued that the posts should be abandoned, the British officers in them withdrawing with such men as remained loyal. The officer commanding the Bannu brigade immediately despatched a movable column for the succour and reassurance of the militia garrisons in his area but superior orders followed directing the return of the column forthwith. The militia were thereupon ordered to withdraw and their commencement to do so, accompanied by the burning of such stores as they could not carry, quite naturally produced the instant uprising of the tribesmen, who began to attack and loot the retiring convoys and the abandoned posts. To expect the militia to remain firm in retreat in such circumstances was to refuse reasonable consideration of the facts of the situation.

Russia and the Frontier.—The Curzon policy was up to this inevitable collapse greatly assisted by extraneous events. The greatest external force in moulding Indian frontier policy was the long struggle with Russia. For nearly three-quarters of a century a veiled warfare for predominance in Asia was waged between Great Britain and Russia. There are few pages in British foreign policy less attractive to the student of Imperial affairs. Russia was confronted in Central Asia with precisely the same conditions as those which faced England in India when the course of events converted the old East India Company from a trading corporation into a governing body. The decaying khanates of Central Asia were impossible neighbours. Confronted with an inferior civilisation, and with neighbours who would not let her alone, Russia had to advance. True, the adventurous spirits in her armies and some of the great administrators in the Tsarist capital were not averse to paying off on the Indian Borderland the score against Great Britain for the Crimean War and for what the Russians thought was depriving them of the fruits of their costly victory over Turkey in 1877-78. The result was a long and unsatisfactory guerrilla enterprise between the hardiest spirits on both sides, accompanied by periodic panics in the British Press each time the Russians moved forward, which induced the coining, after the Russian occupation of Merv, of the generic term "Mervousness." This external force

involved the Government of India in the humiliations of the Afghan War of 1838, with the tragic destruction of the retiring Indian force between Kabul and Jelalabad, slightly relieved by the heroic defence of Jelalabad and the firmness of General Pollock in refusing to withdraw the punitive army until he had set his mark on Kabul by the razing of the famous Bala Hissar fortress. It involved us in the second Afghan War of 1878, which left the baffling problem of no stable government in Afghanistan. There was a gleam of light when Abdurrahman Khan, whom we set up at Kabul to relieve us of our perplexities, proved himself a strong and capable ruler, if one ruthless in his methods. But in the early 'eighties the two States were on the verge of war over a squabble for the possession of Penjdeh, and then men began to think a little more clearly. There began a series of boundary delimitations and agreements which clarified the situation, without however finally settling it. The old controversy broke out in another form when intrigues with a Buriat monk, Dorjieff, during Lord Curzon's viceroyalty, gave rise to the grave suspicion that the scene had only shifted to Tibet. An expedition to Lhasa rent the veil which had so long concealed the mysterious city and dispersed the miasma of this intrigue. But it was not until the conclusion of the Anglo-Russian agreement of 1907 that the two countries arrived at a stage long sought by those who looked beyond their noses. The actual authors of the Agreement were Lord Grey, the Foreign Secretary, and Lord Hardinge, formerly British Ambassador in Portugal, but it had been desired by their predecessors, whose efforts were rendered nugatory by the intransigent attitude of the dominant forces in Petrograd. It was not until Tsarist Russia was defeated on the battlefields of Manchuria by Japan, and disappeared as a sea power in the decisive battle of Tsushima, that an atmosphere was created favourable to the conclusion of an Agreement. This embraced the whole frontier zone and placed Afghanistan beyond the sphere of Russian influence. There were many unsatisfactory features in the Agreement especially in regard to Persia, for which we had to pay a considerable price in the attitude of Persians in the War. But again taking long views, the Agreement fully justified itself in a broad definition of the interest of the two countries, which put an end to the period of excursions and alarms up to the outbreak of the War. Russia then ceased to be a material factor in the Indian Frontier Problem. With the establishment of the Soviet Government in Moscow uneasiness returned, for the geographical and allied circumstances which influenced the policy of the Tsarist regime exert precisely the same pressure upon its successor.

German Influence.—As nature abhors a vacuum, so in the case of States bordered by higher civilisations, no sooner does one strong influence recede than some other takes its place. Long before the signing of the Anglo-Russian Agreement the shadow of the German menace had begun to appear on the horizon. Imitative, not creative, in this, as in most other activities, the Germans adapted their methods from the penetration by railway which was so marked a feature of Russian expansion in Manchuria, brought to an end by the disastrous issue of the war with Japan. The seeds of the German effort were sown when the Kaiser, extending the hand of Christian fellowship to the Sultan of Turkey, Abdul-Hamed, at a time when that sovereign was ostracised by Europe for his direct complicity in the massacre of Armenians, or rather one of the massacres of Armenians, made German influence supreme at Constantinople. His theatrical tour through Palestine, which was generally treated in Europe as an exhibition of opera bouffe, soon bore fruit in the acquisition by German interests of the principal railways in Anatolia. Later it fructified more effectively in the Baghdad Railway concession, under which German interests secured the right of extending the Anatolian lines from the port of Haidar Pasha, opposite Constantinople, to a port in the Persian Gulf. Now successive British Statesmen of both parties had declared that the acquisition of a territorial foothold in the Persian Gulf by any power—Russia and the port of Bunder Abbas being then in view—would be regarded as an unfriendly act. There followed a replica of the period of alarms and excursions which had disfigured our relations with Russia. Undaunted, even when their endeavour to secure British co-operation in the enterprise failed, and when the Revolution in Turkey which set the Committee of Union and Progress in power entailed a temporary interruption of their influence at Constantinople, the Germans pressed forward with their enterprise. They pushed the Anatolian railways as far east as Bourgulu, and constructed a line northwards from Baghdad to Samara. They sent a mission to explore the potentialities of the port of Koweit in the Persian Gulf, and set the Turks in motion to subordinate the Sheikh of Koweit to direct Turkish sovereignty, with a nominal view to extending the Baghdad railway from Basra to Koweit, or the vicinity of Koweit at the deep water inlet behind Bubian Island. They commenced the most difficult part of the work in piercing the Amanus and Taurus ranges by a series of tunnels, and laid the rails on the other side of the mountains across the Euphrates to Ras-al-Ain. Behind this railway activity stood a grandiose policy, which is indicated in what became known in Germany as "B.B.B."—Berlin, Byzantium, Baghdad. Throughout the progress of these schemes, which did not stop short of Baghdad, but were directed through a port in the Persian Gulf at India, the Germans were anxious to secure the co-operation of Great Britain, if they could do so on their own terms, that is to say without affecting the enterprise as a dominant German adventure. Shortly before the commencement of the war of 1914-18 the protracted negotiations with London which had this end in view ended in a definite agreement between the two Powers. Under this agreement the Gulf section of the line was to have been British, and the other portion German. But this agreement which had not been signed became waste paper with the outbreak of the war, and the German plans vanished in thin air with the complete defeat of Turkey and Germany. Nevertheless the railway did not stand still during the war. Germany made immense efforts to complete the difficult tunnel sections and the work was substantially finished when the Armistice was signed.

Turkey and the Frontier.—The position of Turkey on the Indian frontier was never of any considerable importance in itself, and never assumed any significance, save as the *avant courier* of Germany, when she passed under the tutelage of that Power, and for a limited period during the war. Although so long established in Mesopotamia, Turkey was not very firmly seated in that country, the Arabs tolerated rather than accepted Turkish rule so long as they were substantially left alone, and the administration, it is understood, never paid its way. For a brief period Midhat Pasha raised the status of Mesopotamia, and after the Revolution that fine soldier Nazim Pasha became a power in the land. But speaking broadly Turkey remained in Mesopotamia because it was no one's interest, even that of the Arab, to turn her out. When however Germany developed her "B.B.B." policy, Turkey was used as a stalking horse. She moved a small force to the Peninsula of Al-Katr in order to frighten the Sheikh of Bahrein, and tried to convert the nominal suzerainty exercised, or rather claimed, over the Sheikh of Koweit into a *de facto* suzerainty, exercised by military force. These efforts faded before the vigorous action of the British Government which concluded a binding arrangement with the Sheikh of Koweit, and the position of the Turks at Al-Katr was always very precarious. On the outbreak of the war, however, the situation profoundly changed. When the sound and carefully executed expedition to Basra and its strategic hinterland was developed into the insane enterprise to capture Baghdad by *coup de main*, with very inadequate forces, and still more inadequate transport, we found ourselves involved in military operations of the most extensive and unprofitable character. These were completely successful with General Maude's occupation of Baghdad. After the Russian *debâcle* we found ourselves involved in a new front, which stretched from the Euphrates to the wildest part of Central Asia, producing military exploits of an almost epic character, but exercising little influence on the war. They were brought to an end by pressure not on extensive wings, but at the heart of Turkish Power. The aftermath of the war left us in an indefinite position in Mesopotamia, with indefinite frontiers. This enabled the Turks, if they were so disposed, to be troublesome through guerrilla warfare in the Mosul Zone, and by stirring up the Kurds, who are the Ishmaelites of Asia Minor. The conclusion of the Treaty of Lausanne in 1923 brought temporary relief, but it did not settle the main issue, the frontier between Turkey and Iraq. Under the Treaty it was provided that if the two parties could not agree to a boundary line delimitation should be left to the League of Nations. Negotiations were promptly opened at Constantinople, but it was immediately found that there could be no mutual agreement; the Turks demanded the whole of the Mosul vilayet, and the British delegates declared that Mosul and its hinterland were necessary to the existence of Iraq. The issue therefore went to the League of Nations. That body despatched a neutral commission to study the position on the spot; this commission reported that the best settlement would be for the Mosul vilayet to be incorporated in Iraq, if the British Government were prepared to prolong its mandate over that State for a period of twenty-five years. When the report of this commission came before the League in 1925 Britain gave the necessary guarantee, and the Council of the League unanimously allotted the Mosul vilayat to Iraq. The Turkish delegates, who at first recognised the decisive authority of the League, then declared that they would not be bound by its decisions. So the matter rested at the end of the year, with Iraq in occupation of the disputed Territory up to the temporary frontier which was known as the Brussels Line.

France and the Frontier.—It is difficult to find any sound policy behind the efforts of France to obtain a coaling station at Muscat in the Persian Gulf, and her long opposition to the steps necessary to extirpate the slave trade, and hold in check the immense traffic in arms which was equipping all the tribesmen on our North-West Frontier with rifles of precision and a large supply of ammunition. We can find no more definite purpose in it than a general pin-pricking policy a desire to play the part of Russia, and perhaps a source of annoyance to Great Britain, which would form a useful lever for the exaction of considerable cessions in West Africa, particularly in the neighbourhood of Gambia, as the price of abstention. These embarrassments were slowly removed one by one after the conclusion of the Anglo-French Entente. Far otherwise was it in the East. The consolidation of French authority in French Indo-China was the prelude to designs for the expansion of this authority at the expense of Siam and to find compensation there for the veiled British protectorate of Egypt. There had earlier been muttering in Burma. We were established in Lower Burma in the 'thirties and in the 'eighties the foolish and tyrannical King Theebaw, in Upper Burma, became an impossible neighbour, and ambitious Frenchmen were not averse to fanning his opposition to the British. However, if any hopes were entertained of extending the Asiatic possessions of France in this direction they were dissipated by the Second Burmese War and the firm establishment of British rule. Far otherwise was it on the confines of Siam. It was the fixed purpose of British policy to preserve Siam as a buffer state between Burma then a regular Province of the Indian Empire and French Indo-China. This policy was definitely challenged by French encroachments on Siam. Matters approached a crisis in 1893, and we were within measurable distance of a situation which might have ended in open war between the two States. But as in the case of Penjdeh, and later when Major Marchand marched across Africa to Fashoda, the imminence of hostilities made statesmen on both sides ask themselves what they might be going to fight about. They found there was nothing essential and an agreement was negotiated between the two Powers, which secured the independence and integrity of Siam. With the collapse of France in the second world war, however, both Indo-China and Siam were thrown on the mercy of Japan, who joined the Axis powers against the Allies in December, 1941.

The New Frontier Problem.—The whole purpose of this brief sketch has been to show that for three generations—most assuredly since the events leading to the Afghan War of 1838—

the Indian frontier problem has never been a local problem. It has been dominated by external influences—in the main the long struggle between Great Britain and Russia, for a brief period the German ambition to build up a dominant position in the East through the revival of the land route, and to a much lesser extent by the ambitions of France and Turkey. The circumstances affecting the Frontier from centres beyond it have greatly changed. Old dangers have disappeared. Recent events in China and the development of aggressive air power have during the past year given the Indian North-Eastern frontier a vital aspect which it has never before borne. And, generally, conditions have become more like those normal to critical land frontiers anywhere in the world in this present time of swift communications, aerial operations and easy propaganda. Consequently, a great deal of new attention is necessarily being directed to local aspects of the general problem. The tribesman on the Indian north-west border-land was always an opponent to be respected. Brave, hardy, fanatical, he has always been a first-class fighting man. Knowing every inch of the inhospitable country to which punitive operations must of necessity take place he has hung on our rearguards and given them infinite trouble. Even when armed with a jezail and when every cartridge had to be husbanded with jealous care, the tribesman was a respectable antagonist. Now these tribesmen are everywhere armed with magazine rifles, either imported through the Persian Gulf when gunrunning was a thriving occupation, stolen from British magazines, or secured from Russian and Afghan sources. They have an abundant supply of ammunition. Considerable numbers of the fighting men have been trained in the ranks of the Indian Army, either as Regulars in the Pathan regiments, or else in the tribal militias. We found this to our cost in the events following the Afghan War of 1919. The Afghan regular army was of little account. The tribesmen who rose at the call of the jihad, especially in Waziristan, were of great account. They gave our troops the hardest fighting they have ever had on the Frontier; their marksmanship and fire discipline were described by experienced soldiers as admirable. The tribal militia for all practical purposes disappeared. What was to take its place?

Immediately following the Afghan War, the frontier positions were garrisoned by regular troops, but this was only a temporary measure. It may be said that the crux of the situation was in **Waziristan**. This sector of the Frontier has always been the most difficult of the whole, because of the intractable character of the people, and of their inveterate raiding activities. Besides, possessing a bolt hole into Afghanistan they had in the past evaded effective punishment. In view of the complete disappearance of the external menace, and the consequent lapsing of any necessity to preserve open lines of communication which would enable us to go to the support of Afghanistan, now formally recognised in the Treaty of 1921 as a completely independent State, there were many who urged the desirability of complete withdrawal, even to the line of the Indus. This extreme school gained little support. Our position in Quetta on the one side and Peshawar on the other is fully consolidated, and no good case could be made out for withdrawing from it. On the other hand, here was a strong case made out for leaving the tribesmen severely alone from the Gomal to the Kurram, and dealing with them if they emerged from their fastnesses. The military standpoint was that the Waziristan tribes are intractable; that it was unfair to impose on troops the frequent necessity of punitive operations in most arduous conditions; and that the only solution of the question was the occupation of dominant points in Waziristan, as far north as Ladha, and linking these posts with our military bases, and particularly with the termini of the Indian frontier railways, by good motor roads.

This controversy lasted long. It resulted in a typically British compromise which specially arose from the changed conditions in which we found ourselves in 1922, when our troops were in occupation of Waziristan as a result of the operations forced upon us for the suppression of the tribal outbreak which the Afghans stirred up in support of their invasion of India in 1919. The ensuing policy has been aptly described as the "half-forward" policy. It is in truth a repetition of the Sandeman policy, adapted to local conditions. There has been no withdrawal in the ordinary sense of the term, but the limit of the North Waziristan occupation was temporarily fixed at Razmak, not at Ladha. A network of consequential roads was pushed forward. In South Waziristan, Wana had been re-occupied, partly in response to a pressing invitation from the Wana Wazirs, because they wanted to share the benefits which they saw British occupation to be bringing to their cousins northward of them. In February, 1933, control over tribal territory was pushed forward beyond Razmak towards the Afghan border because of a rebellion on the Afghan side and of the need to assist the King of Kabul by preventing excursions by bodies of Wazirs into His Majesty's disturbed territory. The work of control and of civilization rapidly progressed in the whole territory. Of this particulars are given elsewhere in this chapter. One of its recent fruits was a request by the Afridis for roads in their country of Tirah. A beginning with construction was made, but dissensions within the tribe in regard to it caused the work to be suspended. The desirability of better controlling the Afridis was demonstrated in 1930 when, incited by Congress party agents from India, the young Afridis invaded the Peshawar Plain and the need for the adoption of a more active policy in Waziristan was shown by a rising of the Tori Khel Wazirs in 1936-37. A serious military campaign in Waziristan in 1936-37, necessitated by the disturbing religious agitation, showed that conditions there were far from settled. The extent of the trouble there resulted in serious official review of the whole problem once again.

The main Indian rail-head, which for many years terminated at Jamrud, at the easterly entrance to the Khyber Pass, was in the autumn of 1925 extended to Landi Khana, at the opposite end of the Pass and within a mile of the frontier between India and Afghanistan.

I.—THE PERSIAN GULF.

From what has been said before it will be seen that the keynote of this discussion of Indian frontier policy is that the external menace has largely disappeared. No part of the frontier is more powerfully influenced by this consideration than the Persian Gulf. Our first appearance in the Gulf was in connection with the long struggle for supremacy with the Portuguese, the French and the Dutch, who had established trading stations there. With the capture and destruction of the great entrepot which the Portuguese had established at Ormuz, the supersession of the land by the sea route, and the appearance of anarchy in the interior the importance of the Gulf declined. The Indian Government remained there primarily to preserve the peace. This work is quietly and efficiently performed. Piracy was stamped out, the Trucial Chiefs, who occupy the Pirate Coast, were gradually brought into close relations with the Government, the vessels of the Royal Navy kept watch and ward, and our Political Agents regulated the external affairs of the Arab rulers on the Arab coast. In return for these services, Great Britain claimed no selfish advantages. The waters of the Gulf were kept free to the navigation of the ships of all nations, and though Great Britain could have made any territorial acquisitions she pleased she retained possession of only the tiny station of Bassidu. Left to herself Great Britain desired no other policy, but for a quarter of a century the Gulf was involved in European affairs. France sought to acquire a coaling station at Jissa, near Muscat, and obstructed the efforts of the British Government to stamp out the slave trade and to check the immense traffic in arms which was equipping the tribes on our land frontier with weapons of precision and quantities of ammunition. All causes of difference were gradually removed by agreements following the Anglo-French Entente. Russia sent one of her finest cruisers to "show the flag" in the Gulf, and established consular posts where there were no interests to preserve. She was credited with the intention of occupying a warm water port, and in particular with casting covetous eyes on the most dreadful spot in the Gulf, Bunder Abbas. This menace declined after the signing of the Anglo-Russian Agreement and disappeared with the collapse of Russian power following the Revolution. Then Turkey, either acting for herself, or as the *avant courier* of Germany, under whose domination she had passed, began to stir. She threatened the Sheikh of Bahrein by the armed occupation of the peninsula of Al-Qatar, and moved troops to enforce her suzerainty over Kuwait, the best port in the Persian Gulf and a possible terminus of the Baghdad Railway. Further to consolidate her interests, or to stake out a claim, Germany sent the heavily-subsidised ships of the Hamburg-America line to the Gulf, where they comported themselves as the instruments of Imperial policy rather than as inoffensive merchantmen. She also strove, through the agency of the firm of Wonkhaus, to acquire a territorial footing at Sharjah. These events stirred the British Government to an unusual activity in the waters of the Gulf.

Counter Measures—The first effective steps to counter these influences were taken during the vigorous Viceroyalty of Lord Curzon, who visited the Gulf during his early travels and incorporated a masterly survey of its features in his monumental work on Persia. He appointed the ablest men he could find to the head of affairs, established several new consulates, and was instrumental in improving the sea communications with the Gulf ports. The British Government also took alarm. They were fortified in their stand against foreign intrigue by the opinion of a writer of unchallenged authority. The American Naval writer, the late Admiral Mahan, placed on record his view that "Concession in the Persian Gulf, whether by formal arrangement (with other Powers) or by neglect of the local commercial interests which now underlie political and military control, will imperil Great Britain's naval position in the Farther East, her political position in India, her commercial interests in both, and the Imperial tie between herself and Australasia." The Imperial standpoint, endorsed by both Parties in the State, was set out by Lord Lansdowne in words of great import :—"We (i.e., His Majesty's Government) should regard the establishment of a naval base or of a fortified port in the Persian Gulf by any other Power as a very grave menace to British interests, which we should certainly resist with all the means at our disposal." The negative measures following these declarations were followed by a constructive policy when the oil fields in the Bakhtiari country, with a great refinery, were developed by the Anglo-Iranian Oil Company, in which the British Government has a large financial stake. Since that date the Persian Gulf has become the "Air Suez Canal" of the Empire, the main Imperial line of air communications running down its Arab littoral, and an important oil field has been discovered and is being operated at the Island of Bahrein. The Company is a branch of the Californian Standard Oil Company and being American owned has introduced the U.S.A. into the political complex of the Gulf. Another branch of the same Company and struck oil in Hasa—a portion of Ibn Saud's Arabian kingdom shelving on the Gulf—and a British company is prospecting with success in Kuwait. An interesting new feature in 1931 was the decision of the Persian Government to instal a Navy of their own in the Gulf. The fleet consisting of two sloops and four launches, all suitably armed, was built in Italy and duly arrived at its destination in 1932. It was at the outset officered by Italians. The immediate reason for the new fleet was that an increase in the Persian Customs tariff for revenue purposes led to extensive smuggling. The fleet was required to check it. The British Government in 1935 announced their decision to transfer their principal naval station in the Persian Gulf from Henjam, on Kishm island, off the Persian shore at the entrance of the Gulf, which they held on lease from the Persian Gulf to Bahrein, on the Western, Arabian coast of the Gulf. This move was calculated to remove causes of friction.

Pearls are found on the Arab coast of the Persian Gulf between Kuwait and Muscat.

Rupee currency is in use on the Arab coast except Muscat where the currency is Maria Theresa dollars but Indian currency is also accepted.

Muscat.

Muscat, which is reached in about forty-eight hours from Karachi, is outside the Persian Gulf proper. It lies three hundred miles south of Cape Musandim, which is the real entrance to the Gulf, but its natural strength and historical prestige combine to make it inseparable from the politics of the Gulf, with which it has always been intimately associated.

Formerly Muscat was part of a domain which embraced Zanzibar, and the Islands of Kishm and Larak, with Bunder Abbas on the Persian shore. Zanzibar was separated from it by agreement, and the Persians succeeded in establishing their authority over the possessions on the eastern shore.

The relations between Britain and Muscat have been intimate for a century and more. It was under British auspices that the separation between Zanzibar and Muscat was effected, the Sultan accepted a British subsidy in return for the suppression of the slave trade and in 1892 sealed his dependence upon us by concluding a treaty pledging himself not to cede any part of his territory without our consent. The Sultan paid a State visit to New Delhi late in 1937 and thereafter to London, whither he journeyed *via* the Far East and America. On his return home *via* India the Sultan concluded a new treaty with the representatives of His Majesty's Government in 1938.

The Pirate Coast.

Turning Cape Musandim and entering the Gulf Proper, we pass the Pirate Coast, controlled by the seven Trucial Chiefs. The ill-name of this territory has now ceased to have any meaning, but in the early days it had a very real relation to the actual conditions. The pirates were the worst of their kind, and they did not hesitate to attack on occasion, and not always without success, the Company's ships of war. Large expeditions were fitted out to break their power, with such success that since 1820 no considerable punitive measures have been necessary. The Trucial Chiefs are bound to Great Britain by a series of engagements, beginning with 1806 and ending with the perpetual treaty of 1853 by which they bound themselves to avoid all hostilities at sea, and the subsequent treaty of 1873 by which they undertook to prohibit altogether the traffic in slaves. The relations of the Trucial Chiefs are controlled by the British Resident at Bushire, who visits the Pirate Coast every year on a tour of inspection.

The commercial importance of the Pirate Coast is increasing through the rise of Dubai. Formerly Lingah was the entrepot for this trade, but the exactions of the Belgian Customs officials in the employ of Persia drove the traffic from Lingah to Dubai. The Trucial Chiefs are Dubai, Abu Dhabi, Sharjah, Ajman, Umal Quwain and Rasal Khaimah and Hira.

Bahrein.

North of the Pirate Coast lies the little Archipelago which forms the chiefship of the Sheikh of Bahrein. Of this group of islands only those of Manama and Muharraq are of any size, but their importance is out of all proportion to their extent. This is the great centre of the Gulf pearl fishery, which, in a good year, may be worth half a million pounds sterling. The anchorage is wretched, and at certain states of the tide ships have to lie four miles from the shore, which is not even approachable by boats; and passengers, mails and cargo have to be landed on the donkeys for which Bahrein is famous. But, in spite of this, the trade of the port is very large and the Customs revenue substantial in consequence, which makes the Sheikh the richest ruler in the Gulf.

The importance and wealth of these islands has been immensely increased by the development of the Bahrein oil fields referred to above.

In the neighbourhood of Bahrein is the vast burying ground which has hitherto baffled archæologists. The generally accepted theory is that it is a relic of the Phœnicians, who are known to have traded in these waters.

The British Government, as was mentioned earlier in this review, announced in 1935 that they proposed transferring the principal British Naval station in the Gulf from Henjam, on the Persian side of the water, to Bahrein. The same place has since been utilised for the provision of a large aerodrome for the service of the British Imperial air line between London and Australia, which is thus enabled to take a route down the Western side of the Persian Gulf and thus avoid difficulties in Persia.

Kuwait.

In the north-west corner of the Gulf lies the port which has made more stir than any place of similar size in the world. The importance of Kuwait lies solely in the fact that it is a possible Gulf terminus of the Baghdad Railway. This is no new discovery, for when the Euphrates Valley Railway was under discussion, General Chesney selected it under the alternative name of the Grane—so called from the resemblance of the formation of the Bay to a pair of horns—as the sea terminus of the line. Nowhere else would Kuwait be called a good or a promising port. The Bay is 20 miles deep and 5 miles broad, but so shallow that heavy expense would have to be incurred to render it suitable for modern ocean-going steamers. It is sheltered from all but the westerly winds; and the clean thriving town is peopled by some 80,000 inhabitants, chiefly dependent on the sea for the mariners of Kuwait are noted for their boldness and hardihood.

Khorramshahr (formerly Muhammerah).

On the opposite side of the entrance to the Shatt-el-Arab lie the territories of Khorramshahr. The town, favourably situated near the mouth of the Karun River, has grown in importance since the opening of the Karun River route to trade through the enterprise of Messrs. Lynch Brothers. This route provides the shortest passage to Ispahan and the central tableland, and already competes with the older route by way of Bushire and Shiraz. This importance has grown since the Anglo-Persian Oil Company—now called the Anglo-Iranian Oil Company—established refineries at Abadan for the oil which they win in the rich fields which they have tapped near Ahwaz.

Iraq.

In a sense Iraq and Turkish Arabistan can hardly be said to come within the scope of the frontiers of India; yet they are so indissolubly associated with the politics of the Gulf that they must be considered in relation thereto. Basrah is the present sea terminus of the Baghdad Railway and is also an important air port on the Empire air route. It stands on the right bank of the Shatt-el-Arab, 70 miles from its mouth, favourably situated to receive the whole water-borne trade of the Tigris and Euphrates Rivers. The local traffic is valuable, for the richness of the date groves on either side of the Shatt-el-Arab is indescribable, there is a considerable entrepot traffic. Whilst Basrah is the port of entry for Baghdad and for the trade with Persia which follows the caravan route *via* Kermanshih and Hamadan Baghdad is the Capital town.

Iraq is an independent Arab State set up in what formerly was Mesopotamia, under British Aegis under the sovereignty of King Feisal I. He was, on his death in 1933, succeeded by his son, King Ghazi, who died in a motor accident in Baghdad in April, 1939. His three-year old son, Amir Feisal, was then proclaimed King, and Amir Abdulillah, uncle of the new ruler, was appointed Regent.

When the 1914-18 War was over we found ourselves committed to immense, undefined and burdensome responsibilities in that land. The sound concepts which dictated the original expedition were dislocated in the foolish advance to Baghdad; then the great military enterprises necessitated by the fall of Kut-al-Amara carried our frontier north to Mosul and the mountains of Kurdistan, east to the Persian boundary, and west to the confines of Transjordan. Amongst ardent Imperialists, there was undoubtedly the hope that this immense area would be in one way or another an integral part of the British Empire. The cold fit followed when the cost was measured, and the Arabs rose in a revolt which showed that any such domination could only be maintained by force of arms and that the cost would be prodigious. In these circumstances King Feisal agreed to come from the Hedjaz and was installed on the throne under the aegis of Great Britain.

Still we were committed to the support of the new kingdom, and that most dangerous condition arose—responsibility without any real power unless King Feisal was to be a mere puppet, immense expenditure and indefinite military commitments. In these circumstances there was an insistent demand for withdrawal from the land. British policy moved slowly towards that end, but a definite step was taken in 1923. The Secretary of State for the Colonies announced this policy in a statement which is reproduced textually, for the purpose of reference. Addressing the House of Lords on May 3rd he said—

Your Lordships will remember that the Cabinet have been discussing this matter for some time and decisions have now been taken. Sir Percy Cox has accordingly been authorised by His Majesty's Government to make an announcement at Baghdad, the terms of which I propose to read out to Your Lordships. This announcement was drawn up in consultation with King Feisal and his Government, and has their cordial assent. It is being published at Baghdad to-day.

The announcement is as follows:—

"It will be remembered that in the autumn of last year, after a lengthy exchange of views, it was decided between the Governments of His Britannic Majesty and His Majesty King Feisal that a Treaty of Alliance should be entered into between His Britannic Majesty and His Majesty the King of Iraq. This Treaty, which was signed on the 10th October, 1922, and the term of which was to be twenty years (subject to periodical revision at the desire of either party) provided for the establishment of an independent Constitutional Government in Iraq, enjoying a certain measure of advice and assistance from Great Britain of the nature and extent indicated in the text of the Treaty itself and of subsidiary Agreements which were to be made thereunder.

"Since then the Iraq Government has made great strides along the path of independence, and stable existence and has been able successfully to assume administrative responsibility and both parties being equally anxious that the commitments and responsibilities of His Majesty's Government in respect of Iraq should be terminated as soon as possible, it is considered that the period of the Treaty in its present form can conveniently be shortened. In order to obviate the inconvenience of introducing amendments into the body of a Treaty already signed, it has been decided to bring about the necessary modifications by means of a protocol which, like the Treaty itself, will be subject to ratification by the Constituent Assembly.

"Accordingly a protocol has now been signed by the parties in the following terms:—

It is understood between the High Contracting Parties that, notwithstanding the provisions of Article 18, the present Treaty shall terminate upon Iraq becoming a member of the League of Nations and in any case not later than four years from the ratification of peace with Turkey. Nothing in this protocol shall prevent a fresh agreement from being concluded with a view to regulate the subsequent relations between the High Contracting Parties; and negotiations for that object shall be entered into between the n before the expiration of the above period.

It will be noticed that under this protocol the Treaty in its present form was to terminate on the entry of Iraq into the League of Nations or in four years, whichever might be earlier.

The position of Iraq as regards the League was that when the Treaty was ratified His Britannic Majesty was bound under Article 6 to use his good offices to secure the admission of Iraq to membership of the League of Nations as soon as possible. His Majesty's Government would be in a position to take this step on the fulfilment of the two following essential conditions, namely, the delimitation of the frontiers of Iraq, and the establishment of a stable government in accordance with the Organic Law.

The Council of the League of Nations in January, 1932, adopted the report of the Iraq Commission recommending the termination of the mandate subject to the admission of Iraq to membership of the League and Iraq entering into a number of undertakings, with regard to treatment of minorities and the administration

of justice. This meant the termination of the mandate when the next Assembly of the League voted for the admission of Iraq to League membership.

Under the Treaty of Lausanne between Turkey and the Powers, which was signed in 1923, it was agreed that the frontier between King Feisal's State and Turkey, the important frontier because the future of Mosul was in dispute, should be settled by the League of Nations, should Great Britain and Turkey be unable to come to agreement by direct negotiation. These direct negotiations were opened at Constantinople, but no agreement was reached, so the question was opened *before* the Council of the League in September 1924. Whilst the matter was under discussion complaint was made by Great Britain that Turkey had violated the provisional frontier drawn in the Treaty of Lausanne, and certain irregular hostilities were carried on in the disputed zone. This matter too was remitted to the League, and a further provisional boundary was drawn, which was accepted by both parties.

Here the matter remained until the autumn of 1925. In order to secure the material for a decision the League of Nations despatched a neutral commission to Mosul to investigate the situation. This commission produced a long and involved report, but one which led by devious paths to a commonsense recommendation. It was that the first essential in the Mosul vilayet is stable government. The desires of the people were for incorporation in the State of Iraq. If therefore the British Government was willing to extend its mandate over Iraq for a further period of twenty-five years—a guarantee of stable government—then Mosul should be incorporated in Iraq; if Britain was not willing, then Mosul should return to Turkey. When the matter came before the Council of the League Great Britain gave the necessary guarantee. The Turks thereupon challenged the whole competence of the Council to give an award under the terms of the Treaty of Lausanne. The issue was remitted to the Court of International Justice at The Hague which decided in favour of the competence of the Council. Great Britain having given the necessary assurance that she was prepared to extend her mandate over Iraq for a further twenty-five years, the Council of the League allocated the whole of the area in dispute right up to the temporary frontier—commonly called The Brussels Line—to Iraq. The Turks refused to accept the award and withdrew from Geneva, threatening force. Later, wiser counsels prevailed and in 1926 Turkey accepted a frontier substantially as drawn by the League.

Relations between Britain and Iraq were therefore further defined by a second treaty concluded in January, 1926, which provided that Great Britain should as soon as possible recommend Iraq for admission to membership of the League of Nations. This recommendation was made and accepted in October, 1932, whereupon the Mandate was terminated and Iraq became an independent sovereign state and a member of the League of Nations. The Treaty of 1926 was replaced by Treaty of Alliance signed on the 30th June, 1930, to come into force "as soon as Iraq had been admitted as a member of the League of Nations." It provides, *inter alia*, that each of the two High Contracting parties shall immediately come to the aid of the other in the event of war.

It is important to remember that there is a considerable difference between the vilayet of Basra and the other portions of the Iraq State. Basra has for long been in the closest commercial contact with India and her trade with Bombay remains an important source of her wealth. The people of Basra Consequently look with sympathy towards India and as a commercial community are slow to take part in political adventurers. This was shown in 1920 and in 1941. Basra has always been and is likely to remain a stronghold in Iraq of the well-wishers both of India and Great Britain.

Iraq's alliance with Great Britain was emphasised by the Iraqi Prime Minister, General Nuri Said Pasha, in April, 1939. Broadcasting to the nation, General Nuri said that alliance with Britain and the neighbouring States, coupled with sincere friendship with Turkey and Iran, were two principles on which Iraq's foreign policy was based.

On the outbreak of war with Germany in September, 1939, Iraq severed diplomatic relations with Germany in accordance with the terms of her treaty with Great Britain, but for several years the German minister in Baghdad had been working against British influence. As Hitlerism went from strength to strength, German influence in Iraq grew in volume and intensity, until, when the war began, the expulsion of the German minister by the Cabinet threw into sharp relief the pro-German sympathies of the army leaders and the younger ambitions men who fawned upon them. Later the Cabinet fell and was succeeded by ministries backed by Rashid Ali and the army. When Italy entered the war, this cabinet took the first step in breach of the Anglo-Iraq Treaty of Alliance by refusing to break off diplomatic relations with Italy, with the result that the Italian Legation in Baghdad became an active centre of Axis propaganda and espionage. In April, 1941, a *coup d'état* put Rashid Ali into power. The administration that followed turned openly hostile to the British, demanded that no more British troops should be landed to protect lines of communication through Iraq and, when this demand was refused, began hostilities in the hope of Axis support. Iraqi forces shelled Habbaniyah, the British Air Base, and rounded up British residents in Baghdad. The rebellion was quickly quelled and the rebel leaders, finding their position untenable, fled the country. On May 30, 1941, the Lord Mayor of Baghdad accompanied by Iraqi Army and police officers came to the British Commander to ask for an armistice, which was quickly arranged and legal Government in Iraq was restored with the return of the Regent.

With the restoration of constitutional government under the Premiership of Nuri al Said, Iraq quickly returned to normal.

On the 16th January, 1943, Iraq declared war on the Axis Powers, and a few days later she acceded to the United Nations Pact signed at Washington on the 2nd January, 1942.

In April, 1945, the Iraqi Government accepted the invitation of the United States Government to participate in the San Francisco Conference and a delegation was sent, headed by Arahad al Umari, the Minister for Foreign Affairs. This

delegation, in concert with delegations from other Arab States, later signed the Charter of the United Nations.

Iraq has also played a prominent part in the formation of the Arab League, a confederation of Arab States which was convened in Cairo in April, 1945, to discuss Middle Eastern affairs and to promote the planning of practical Arab co-operation.

The Iraqi Army has now been reformed and reorganised with the assistance of a British Military Mission, and is quickly becoming an efficient force which can be used, if necessary, to maintain internal security within the country.

In October, 1943, the Regent paid an official visit to the United Kingdom, where he had the honour of being entertained by Their Majesties the King and Queen for two days at Buckingham Palace. He returned later in the year, after having toured war-time Britain, which enabled him to form a personal appreciation of the extent and scope of the British war effort. He left Iraq again in May, 1945, on another official visit, this time to the United States, spent a short time in Canada, and then proceeded once more to the United Kingdom.

Iraq has filled a place of considerable strategic importance in the war during the invasion of Russia by Germany and the aggressions of Japan in the East. The Gulf Ports, and the roads, railways and airways of Iraq and Persia became a main route for the supply of the U.S.S.R. upto 1944, particularly when the normal sea route was hazardous. Iraq has furnished a vital link in the long Allied lines of communication to the Far East; and the export of oil to the Mediterranean through the pipeline from Kirkuk, and down the Shatt el Arab by tanker from Abadan has continued without interruption.

The Iran Shore.

The Iran shore presents fewer points of permanent interest. The Iranian Government has developed Bandar Shahpur as the port at the southern territory of the new Trans-Iranian Railway. The port facilities are inadequate and the site is malarious. The importance of Bushire is administrative rather than commercial. It is the headquarters of Iran authority. It is also the main entrepot for the trade of Shiraz, and competes for that of Ispahan. But the anchorage is wretched and dangerous, the road to Shiraz passes over the notorious kotals which preclude the idea of rail connection. Further south lies lingah, reputed to be the prettiest port on the Iran coast, but its trade is being diverted to Debal. In the narrow channel which forms the entrance to the Gulf from the Arabian Sea is Bunder Abbas. Here we are at the key of the Gulf. Bunder Abbas is of some importance as the outlet for the trade of Kerman and Yezd. It is of still more importance as a possible naval base. To the west of the town, between the Island of Kishm and the mainland, lie the Clarence Straits which narrow until they are less than three miles in width, and yet contain abundance of water. Here, according to sound naval opinion, there is the possibility of creating a naval base which would command the Gulf. The great obstacle is the climate, which is one of the worst in the world. On the opposite shore, under the shadow of Cape Musandim, lies another sheltered deep-water anchorage, Elphinstone's Inlet, where the climate conditions are equally vile. But between these two points there is the possibility of controlling the Gulf just as Gibraltar controls the Mediterranean. For many years Bunder Abbas loomed large in public discussions as the possible warm water port for which Russia was seeking. There was established a British Naval station at Henjam, a small island close to Kism, where the station was constructed under agreement with the Persian authorities. Its evacuation by Great Britain in favour of Bahrein was decided upon by the British Government in 1935. On the Mekran coast there is the cable station of Jask, and the possible port of Chamber. An interesting development in the Gulf within the past decade was the institution of an Iran Navy.

II.—SEISTAN.

The concentration of public attention on the Persian Gulf was allowed to obscure the frontier importance of Seistan. Yet it was for many years a serious preoccupation with the Government of India. Seistan lies midway north and south between the point where the frontiers of Russia, Persia and Afghanistan meet at Zulfikar and that where the frontiers of Persia and our Indian Empire meet on the open sea at Gwattur. It marches on its eastern border with Afghanistan and with Baluchistan, it commands the valley of the Helmand, and with it the road from Herat to Kandahar, and its immense resources as a wheat-producing region have been only partly developed under Persian misrule. It offers to an aggressive rival, an admirable strategic base for future military operations; it is also midway athwart the track of the shortest line which could be built to connect the Trans-Caspian Railway with the Indian Ocean, and if and when the line from Askabad to Meshed were built, the temptation to extend it through Seistan would be strong. Whilst the gaze of the British was concentrated on the North-West Frontier, and to possible lines of advance through Kandahar to Quetta, and through Kabul to Peshawar there can be little doubt that Russian attention was directed to a more leisurely movement through Seistan, if the day came when she moved her armies against India.

Whether with this purpose or not, Russian intrigue was particularly active in Seistan in the early years of the century. Her agents moved into Seistan and through the agency of the Belgian Customs officials, "scientific missions" and an irritating plague cordon sought to establish influence, and to stifle the British trade which was gradually being built up by way of Nushki. These efforts died down before the presence of the McMahon mission, which, in pursuance of Treaty rights, was demarcating the boundary between Persia and Afghanistan, with special reference to the distribution of the waters of the Helmand. They finally ceased with the conclusion of the Anglo-Russian Agreement. Since then the international importance of Seistan has waned.

The natural conditions which give to Seistan this strategic importance persist. For a time, British influence increased in substance through the Seistan trade route. The distance from Quetta to the Seistan border at Killa Robat is 465 miles, most of it dead level, and it was provided with fortified posts, dak bungalows, wells, and all facilities for caravan traffic. The railway was pushed out from Spezand, on the Bolan Railway, to Nushki, so as to provide a better starting point for the caravans than Quetta. This line was extended to Duzdap (now called Zahidan) 54 miles on the Persian side of the Indo-Persian Frontier, during the Great War as a military measure, but the traffic after the re-establishment of peace supported only two trains a week. There then arose trouble owing to Persian insistence on the collection of Customs duties on rations taken across their frontier for the railway staff. This led to the stoppage of train running on the Persian side of the Frontier and the establishment of railhead at Nokkundi 80 miles on the Indian side of the frontier. Negotiations for years dragged on to bring about a reasonable settlement in regard to the situation. The Persian Foreign Minister, Mons. B. Kazemi, paid a visit to New Delhi in November 1935, and travelled eastward from Persia by the Baluchistan route. He was interested, as his Government's representative, in the development of railways in Seistan and in securing British-Indian assistance in that enterprise. Only informal conversations on the subject took place. No constructive result has become apparent.

III.—IRAN.

From causes which only need to be very briefly set out, the Iran question as affecting Indian frontier policy has receded until it is of no account. Reference is made in the introduction to this section to the fact that the conclusion of the Anglo-Russian Agreement left us a bitter legacy in Persia. That Agreement divided Iran into two zones of influence, and the Iranians bitterly resented this apparent division of their kingdom between the two Powers, though no such end was in view. German agents, working cleverly on this feeling, established an influence which was not suspected, and when World War I broke out they were able to raise the tribes in opposition to Great Britain, in the South, and after the fall of Kutal-Amara, when a Turkish Division penetrated Western Iran, they exercised a strong influence in Teheran. With the defeat of Turkey and the Central Powers this influence disappeared, but at that time there was no authority in Iran besides that of the British Government, which had strong forces in the North-West and controlled the southern provinces through a force organised under British officers and called The South Persian Rifles. It was one of the first tasks of the British Government to regularise this position, and for this purpose an agreement was reached with the then Persian Government, the main features of which were :—

To respect Persian integrity ;
To supply experts for Persian administration ;
To supply officers and equipment for a Persian force for the maintenance of order,
To provide a loan for these purposes ;
To co-operate with the Persian Government in railway construction and other forms of transport.

Both Governments agreed to the appointment of a joint committee to examine and revise the Customs tariff.

The second agreement defined the terms and conditions on which the loan was to be made to Persia. The loan was for £2,000,000 at 7 per cent. redeemable in 20 years. It was secured on the revenues and Customs' receipts assigned for the repayment of the 1911 loan and should these be insufficient the Persian Government was to make good the necessary sums from other sources.

The Present Position—We have given the main points in the Anglo-Iran agreement, because few documents have been more misunderstood. Those who desire to study it in greater detail will find it set out in the Indian Year Book for 1921, page 138 *et seq.* It has been explained that most Iranians construed it into a guarantee of protection against all external enemies. When the British troops in the north-west retired before the Bolsheviks, the Iranians had no use for the Agreement and it soon became a dead instrument. It was finally rejected and the advisers who were to have assisted Persia under it withdrew.

A remark frequently heard amongst soldiers and politicians in India after the World War I was that Great Britain must take an active hand in Iran because she could not be a passive witness to chaos in that country. The view always taken in the Indian Year Book was that the internal affairs of Iran were her own concern ; if she preferred chaos to order that was her own look-out, but left alone she would hammer out some form of Government. That position has been justified. The Sirdar Sipah, or commander-in-chief, a rough but energetic soldier, gradually took charge of Iranian affairs and established a thinly-veiled military dictatorship which made the Government feared and respected throughout the country for the first time since the assassination of Shah Nasr-ed-din. A body of capable Americans under Dr. Millispaugh restored order to the chaotic finances. These two forces operating in unison gave Iran the best government she had known for a generation. But the Sirdar Sipah chafed under the irregularities of his position, with a Shah spending his time in Europe and wasting the resources of the country. He moved to have his position regularised by the deposition of the absentee Shah and his own ascent of the throne. At first he was defeated by the opposition of the Mullahs, but in 1925 prevailed, and the Shah was formally deposed and the Sirdar Sipah chosen monarch in his place under the title of Reza Shah Pahlavi. The change was made without disturbance, and Iran entered on a period of peace and consolidation which removed it from the disturbing forces in the post-war world. Since then considerable progress has been made with the reform of the administration. The general situation in Iran was gravely disturbed in 1932 by the sudden termination by the Iran Government

of the Anglo-Iran Oil Co.'s concession, a matter affecting one of the biggest industrial undertakings in the world and millions sterling of capital. The intervention of the British Government led to the reference of the trouble to the League of Nations and this paved the way for negotiations between the Company and the Iran Government. While these were being settled some progress was also made with general negotiations between the British and Iran Governments for an agreement covering all outstanding points of difficulty between them.

In July, 1941, Britain drew the attention of the Iranian Government to the danger of allowing German tourists in their country. A large number of German technicians and camouflaged agents had been infiltrating into Iran. The Iran Government's reply being unsatisfactory, the British and Soviet representatives made a new *Demarche* to Iran in August 1941, without any result. On one point, however, the Government of Iran made some concession to British feelings, that of restraining the activities of Rashid Ali and his supporters from Iraq who had been actively consorting with Axis representatives. The British and Russian *Demarche* requested the expulsion of Germans from Iran. On the Iran government's failure to do so in August, 1941, the British and Soviet Governments decided to take action. The Soviet Government in their note to Iran pointed out that they found themselves confronted with the necessity of taking immediate steps and exercising their right by virtue of paragraph 6 of the 1921 treaty in the form of sending troops to Iranian territory for temporary occupation in order to safeguard the security of the Soviet. It assured the Iran Government that those measures were not in any way directed towards Iran. The Soviet had no territorial desire nor any intention of infringing the independence of Iran. The note also assured the Iran Government that as soon as the danger threatening them was past the Soviet Government, in obedience to the obligations undertaken in the 1921 treaty, would withdraw their forces from Iranian territory. The British Ambassador in Teheran presented a similar note simultaneously.

Following on the Allied plan of action British and Indian forces entered Iran at three points. The Soviet troops entered from the Caucasus. The Allied forces met with a slight resistance at first but on August 28th, 1941, the Iran Government issued to their forces the order to cease fire, a new Cabinet being formed under the Prime Ministership of Mr. Ali Furughi. It entered into negotiations with the Allies and concluded peace. One of the clauses of the peace terms was that the Iranians should facilitate the transit of supplies and war materials to Russia. Iran agreed to the closing of German, Italian, Rumanian and Hungarian Legations. Further, German nationals were handed over to the Allies. The terms also included the withdrawal of the Iranian troops from certain zones. In September, 1941, the Shah of Iran, Reza Shah Pehlvi abdicated in favour of the Crown Prince, Shanpur. Reza Shah Pehlvi died in July 1944.

IV. THE PRESENT FRONTIER PROBLEM.

There yet remains a small part of British India where the King's writ does not run. Under what is called the Durand Agreement with the Amir of Afghanistan, the boundary between Indian and Afghanistan influence was settled, and it was delimited in 1903 except for a small section which was delimited after the Afghan War in 1919. But the Government of India have never occupied up to the border. Between the administered territory and the Durand line there lies a belt of territory of varying width extending from the Gomal Pass in the south, to Kashmir in the north; this is generically known as the Tribal Territory. Its future is the keynote of the interminable discussions of frontier policy for nearly half a century.

This is a country of deep valleys and secluded glens, which nature has fenced in with almost inaccessible mountains. It is peopled with wild tribes of mysterious origin, in whom Afghan, Tartar, Turkoman, Persian, Indian, Arab and Jewish intermingle. They had lived their own lives for centuries, with little intercourse even amongst themselves, and as Sir Valentine Chirol truly said "the only bond that ever could unite them in common action was the bond of Islam." It is impossible to understand the Frontier problem unless two facts are steadily borne in mind. The strongest sentiment amongst these strange people is—or was until comparatively recently—the desire to be left alone. They value their independence much more than their lives. The other factor is that the country does not suffice even in good years to maintain the population. They must find the means of subsistence outside, either in trade, by service in the Indian Army or in the Khassadars, or else in the outlet which hill-men all the world over have utilised from time immemorial, the raiding of the wealthier and more peaceful population of the Plains. The internal peace enforced among them by British control has in late years led to an increase in their number and this has aggravated their economic problem.

Frontier Policy.—The policy of the Government of India toward the Independent Territory has ebbed and flowed in a remarkable degree. It has fluctuated between the Forward School, which would occupy the frontier up to the confines of Afghanistan, and the school of Masterly Inactivity, which would leave the tribesmen entirely to their own resources, punishing them only when they raided British territory. Behind both the policies lay the menace of a Russian invasion, and that coloured our frontier policy until the Anglo-Russian Agreement. This induced what was called Hit and Retire tactics. In the half century which ended in 1897 there were nearly a score of punitive expeditions, each one of which left behind a legacy of distrust, and which brought no permanent improvement in its train. The fruit of the suspicion thus engendered was seen in 1897. Then the whole Frontier, from the Malakand to the Gomal, was ablaze. The extent of this rising and the magnitude of the military measures which were taken to meet it compelled a consideration of the whole position. The broad outlines of the new policy were laid down in a despatch from the Secretary of State for India, which prescribed to the Government the "limitation of your inter-

ference with the tribes, so as to avoid the extension of administrative control over tribal territory." It fell to Lord Curzon to give effect to this policy. The main foundations of his action were to exercise over the tribes the political influence requisite to secure our Imperial interests, to pay them subsidies for the performance of specific duties, but to respect their tribal independence and leave them, as far as possible, free to govern themselves according to their own traditions and to follow their own inherited habits of life without let or hindrance.

New Province.—As a first step Lord Curzon took the control of the tribes under the direct supervision of the Government of India. Up to this point they had been in charge of the Government of the Punjab, a province whose head is busied with many other concerns. Lord Curzon created in 1901 the North-West Frontier Province, and placed it in charge of a Chief Commissioner, with an intimate frontier experience, directly subordinate to the Government of India. This was a revival of a scheme prepared by Lord Lytton in 1877, and often considered afterwards, but which had slipped for lack of driving power. Next, Lord Curzon withdrew the regular troops so far as possible from the advanced posts, and placed these fortalices in charge of tribal levies, officered by a handful of British officers. The most successful of these was the Khyber Rifles, which steadfastly kept the peace of that historic Pass until 1919. At the same time the regular troops were cantoned in places whence they could quickly move to any danger point, and these bases were connected with the Indian Railway system. In pursuance of this policy frontier railways were run out to Dargai, and a narrow-gauge line, since converted to the broad-gauge, was constructed from Kushalgarh to Kohat, at the entrance of the Kohat Pass, and to Thal in the midst of the Kurram Valley. These railways were completed by lines to Tank and Bannu. By this means the striking power of the regular forces was greatly increased. Nor was the policy of economic development neglected. The railways gave a powerful stimulus to trade and the Lower Swat Canal converted fractious tribesmen into successful agriculturists. This policy of economic development is receiving a great development through the completion of the Upper Swat Canal (*q. v.* Irrigation). Now it is completed there are other works awaiting attention. For many years this policy was completely justified by results.

A New Policy.—It saved us from serious complications for nearly twenty years, although the position could never be said to be entirely satisfactory, particularly in Waziristan, peopled by the most reckless raiders on the whole border-line, with a bolt hole into Afghanistan when pressed from the British side. It endured through the Great War and did not break down until the Amir of Afghanistan sought refuge from his internal troubles in a *jehad* against India. In this insane enterprise the Afghans placed less reliance in their regular troops which have never offered more than a contemptible resistance to the British forces than in the armed tribesmen. In this they were justified, for the Indian Military authorities failed to give timely support to the advanced militia posts, some of these posts were ordered to withdraw, the Militia collapsed and the most serious fighting was with the tribesmen. The Southern Waziristan Militia inevitably broke and there was serious trouble throughout the Zhob district. The Afridis, our most serious enemies in 1897, and the most powerful of the tribes on the North-West Frontier, remained fairly quiet throughout the actual hostilities with Afghanistan, but later it was necessary to take measures against a leading malcontent and destroy his fort at Chora. The Mahsuds and the Wazirs broke into open hostilities. Their country lies within the belt bounded by the Durand Line and the Afghan frontier on the west, and by the districts of Bannu and Dera Ismail Khan on the east. Amongst them the Afghan emissaries were particularly active and as they could put in the field some 30,000 warriors, 75 per cent. armed with modern weapons of precision, they constituted formidable adversaries. They refused to make peace even when the Afghans caved in. They rejected our terms and active measures were taken against them. The fighting was the most severe in the history of the Frontier. The Mahsuds fought with great tenacity. Their shooting was amazingly good; their tactics were admirable, for amongst their ranks were many men trained either in the Militia or in the Indian Army; and more than once they came within measurable distance of considerable success. They were assisted by the fact that the best trained troops in the Indian Army were still overseas and younger soldiers were opposed to them. But their very tenacity and bravery were their own undoing; their losses were the heaviest in the long history of the Borderland and when the Mahsuds made their complete submission in September 1921 they were more severely chastened than at any time during their career.

A New Chapter.—As the result of the Afghan War of 1919, Indian frontier policy was again thrown into the melting pot. There was much vague discussion of the position in the course of the months which followed the Afghan War and the troubles in Waziristan which succeeded it, but this discussion did not really come to a head until February-March 1922. The Budget then presented to the country revealed a serious financial position. It showed that despite serious increases in taxation, the country had suffered a series of deficits which had been financed out of borrowings. Further heavy taxation was proposed in this Budget, but even then the equilibrium which, the financial authorities regarded as of paramount importance was not attained. When the accounts were examined, it was seen that the heaviest charges on the exchequer were those under Military Expenses, and that there was an indefinitely large and seemingly unending expenditure on Waziristan. This forced the Military, and allied with it the Frontier, expenditure to the front. In actual practice the discussion was really focussed on Waziristan. In essentials it was the aged controversy—shall we deal with this part of the Frontier on what is known as the Sandeman system, namely, by occupying commanding posts within the country itself, dominating the

tribesmen but interfering little in their own affairs; or shall we revert to what was known as the close border system, as modified by Lord Curzon, of withdrawing our regular troops to strategic positions outside the tribal area, leaving the tribesmen, organised into militia, to keep the passes open, and punishing the tribesmen by expeditions when their raiding propensities become unbearable.

The Curzon Policy.—The Curzon policy, adopted in 1899, to clear up the aftermath of the serious and unsatisfactory Frontier rising in 1897, was a compromise between the "occupation" and the "close border" policies. It was based on the withdrawal of the regular troops so far as possible to cantonments in rear whilst the frontier posts, such as those in the Tochi at Wana and in the Khyber and Kurram were held by militia, recruited from amongst the tribesmen themselves. The cantonments for regular troops were linked so far as possible with the Indian railway system, so as to permit of rapid reinforcement. But it must be remembered that like all Frontier students, Lord Curzon did not regard this as the final policy. He wrote in the Memorandum formulating his ideas: "It is of course inevitable that in the passage of time the whole Waziri country up to the Durand line will come more and more under our control. No policy in the world can resist or greatly retard that consummation. My desire is to bring it about by gradual degrees and above all without the constant aid and presence of British troops." The Curzon policy, though it was not pursued with the steadfastness he would have followed if he had remained in control, gave us moderate—or rather it should be said bearable—frontier conditions until the Afghan War. It then broke down, because the tribal militia, on which it was based, could not, when left without the support of regular troops in the day of need, withstand the wave of fanaticism and other conditions set up by the Afghan invasion of 1919. The Khyber militia faded away; the Wazir militia either mutinied, as at Wana, or deserted. The pillar of the Curzon system fell.

The Policy.—The policy first adumbrated to meet these changed conditions was outlined by Lord Chelmsford, the then Viceroy, in a speech which he addressed to the Indian Legislature. He said it had been decided to retain commanding posts in Waziristan; to open up the country by roads; to extend the main Indian railway system from its then terminus, Jamrud, through the Khyber to the frontier of Afghanistan and to take over the duties of the Militia by regular troops. That immediate policy was soon modified so far as the policing of these frontier lines by regular troops was concerned. Such duties are unpopular in the regular army, which is not organised and equipped for work of this character. Irregulars have always existed on the frontier, and as they had disappeared with the Militia, it was necessary to recreate them. The new form of irregular was what have been called Khassadars and Scouts. The Khassadar is an irregular in the extreme. He has no British officers and no uniform, except a distinguishing kind of *pagri*. In contradistinction to the old Militia, he finds his own rifle. As one informed observer remarked, the beauty of the system is that so long as the Khassadars, under their own headmen, secure the immunity of the caravans and perform their other police duties, they draw their pay and no questions are asked. If they desert in the day of trouble, they lose their pay but the Government loses no rifles, nor does it risk mutiny or the loss of British and Indian officers. But the application of this policy produced an acute controversy. It was one thing to say that commanding posts in Waziristan should be retained; it was another to decide what these posts should be. We must therefore consider the special problem of Waziristan. The Scouts are a mobile, mounted, irregular force not territorially recruited, officered by British officers.

V.—WAZIRISTAN.

Geographically, Waziristan is a rough parallelogram averaging 60 miles from East to West and 160 from North to South. The western half consists of the Suleiman Range gradually rising up to the ridge from five to ten thousand feet high, which forms the water-shed between the Indus and the Helmund Rivers and corresponds with the Durand Line separating India from Afghanistan. This is the western boundary. On the east is the Indus. North is the water-shed of the Kurram River running East and West about 30 miles north of Bannu separating Waziristan from the Kohat District. South is a zigzag political boundary from the Durand Line running between Wana and Fort Sandeman in Baluchistan with a turn southwards to the Indus.

The western half is a rugged and inhospitable medley of ridges and ravines straggled and confused in hopeless disarray. The more inhabited portions lie well up the slope at heights of four to six thousand feet. Here are our outposts of Wana and Razmak some 15 and 20 miles respectively from the Durand Line, in the centre of the grazing district, the latter within five miles of important villages of Kaniguram and Makin.

The submontane tracts from the hills to the Indus vary from the highly cultivated and irrigated land round Bannu to the sand desert in the Marwat above Pezu.

Where irrigation or river water is obtainable cultivation is attempted under conditions which can hardly be encouraging. Other tracts like that between Pezu and Tank, usually pastoral, can only hope for an occasional crop after a lucky rainfall.

Inhabitants.—The inhabitants, unable to support existence on their meagre soil, make up the margin by armed robbery of their richer and more peaceful neighbours. The name originates according to tradition from one Wazir, two of whose grandsons were the actual founders of the race. Of the four main tribes Darweshkhel, Mahsuds, Dawars and Batanni, only the first two are true Wazirs. Their villages are separate though dotted about more or less indiscriminately, and inter-marriage is the exception—in fact all traditionally are in open strife, a circumstance which, until some bright political comet like the Afghan War of 1919 joined them together, has materially aided our dealings with them.

Unlike other parts of India, however, these wild people acknowledge little allegiance to maliks or headmen. No one except perhaps the Mulla Powindah till his death in 1913 could speak of any portion of them as his following.

Policy.—The policy of the British was at first one of non-interference with the tribes. Even now only part of the country is administered. Gradually it was found that more and more supervision became necessary to control raiding and this was attempted by expeditions to portions of the country with Regulars, followed by building posts and brick towers to be held by Militia. These posts were at first placed at the points where raiders usually debouched. The Political Officers, at first supported by Regulars, built up from 1904 onwards a force of some 3,000 Militia with British Officers at their disposal, who were backed up by the garrisons at Bannu and Dera Ismail Khan. In addition certain allowances were made to the tribes for good behaviour, prevention of raids and surrender of offenders when required; also for tribal escorts as necessary. Gradually, as occasion required, posts were occupied. Wana was occupied in 1895 at the request of the Wana Wazirs. Similarly the Tochi in 1896. In the comprehensive expedition of 1895-96 when this policy was put into effect, the British arms were shown in every remote valley in the vain hope of taming the Mahsuds it was hoped the various posts would prove a pacifying influence and a rallying ground for Government supporters. From 1904 to 1919 they were held by Militia. Roads and communications were improved and tribal allowances augmented by sales of produce to the troops on a liberal scale.

A Compromise.—A full statement of the policy finally adopted by Government in view of the situation left upon their hands after the Mahsud rebellion was made by the Foreign Secretary, Sir (then Mr.) Denys Bray, in the course of a Budget discussion in the Legislative Assembly on 5th March 1923. He outlined neither a Forward policy nor a Close Border policy. Both these terms had, in fact, ceased to be appropriate. Circumstances had so changed that neither the one plan nor the other remained within the bounds of reasonable argument.

The Foreign Secretary explained that the ingredients of the Frontier problem at the present day were essentially three, namely, the Frontier districts, the neighbouring friendly State of Afghanistan, and the so-called Independent Territory, this last being the belt of unsettled mountain country which lies between the borders of British India and India. He proceeded specially to show that this belt was, in fact, within India "....It is boundary pillars that mark off Waziristan from Afghanistan. It is boundary pillars that include Waziristan in India. We are apt to call Waziristan independent territory; and it is only from the point of view of our British district that the tribes are trans-frontier tribes. From the point of view of India, from the international point of view that is, they are cis-frontier tribesmen of India. If Waziristan and her tribes are India's scorges, they are also India's responsibility—and India's alone. That is an international fact that we must never forget."

Sir Denys next referred to the triumph of the Sandeman policy in Baluchistan. He pointed out that some people long ago believed that the same policy would prove effective in Waziristan. "But what was a practical proposition 20 or 30 years ago is not necessarily so now. The task is infinitely more difficult to-day, chiefly because the tribesmen are infinitely better armed; their arms having increased at least tenfold during the last 20 years." Dealing with the Close Border prescription he showed that if one erected a Chinese wall of barbed-wire fence along the plain some distance below the hills, "all the time the problem in front of us would be going from bad to worse, with the inevitable increase of arms in the trans-border and with that inevitable increase in the economic stringency in this mountainous tract, which would make the tribesmen more and more desperate, more and more thrown back on barbarism.....A rigid Close Border policy is really a policy of negation, and nothing more.....We might gain for our districts a momentary respite from raids but we would be leaving behind a legacy of infinitely worse trouble for their descendants."

The settled policy of Government in Waziristan, Sir Denys showed, was the control of that country through a road system, of which about 140 miles would lie in Waziristan itself and one hundred miles along the border of Derajat, and the maintenance of some 4,600 Khassadars and of some 5,000 irregulars, while at Razmak, 6,500 feet high and overlooking northern Waziristan, there would be an advanced base occupied by a strong garrison of regular troops. Razmak he showed to be further from the Durand Line than the old-established posts in the Tochi. In the geographical sense, therefore, the policy was, in one signal respect, a backward policy. None the less, it was a forward policy in a very real sense, for it was a policy of constructive progress and was a big step forward on the long and laborious road towards the pacification, through civilization, of the most backward and inaccessible, and therefore the most truculent and aggressive tribes on the border. "Come what may, civilization must be made to penetrate these inaccessible mountains or we must admit that there is no solution to the Waziristan problem, and we must fold our hands while it grows inevitably worse."

The policy thus initiated for a period proceeded with results according to the highest reasonable expectations and exceeding the most sanguine hopes of most people concerned in its formulation.

The roads were policed by the Khassadars, who in the main, until the Tori Khel rebellion of 1936-37 upset some of them, proved faithful to their trust. The open hostility of the Wazir tribesmen to the presence of troops and other agents of Government in their midst, which at the outset they showed by shooting up individuals and small bodies of troops at every opportunity, faded away, and the people showed an understanding of the rule of law, and, under the control exercised, a readiness to conform to it. In various small but significant ways, methods of civilization caught the imagination of the people and won their approval. Thus, the safety of the roads was encouraged, and became buttressed by a considerable development of motor-bus traffic. The roads, as the King's

Highway, are officially held to be sacrosanct, that is no shooting up or other pursuit of personal or tribal feuds is permitted upon them. This permits villagers to proceed to and from the plains and towns in safety. Under the influence of their women, the tribesmen applied that the ban against shooting upon the highway would be extended to all the country for three miles on either side of the highway. Tentative efforts to introduce primary education proved possible and achieved as much success as could be expected. The hospitals and dispensaries maintained for irregular troops, called Scouts, employed about the country, attend to the wants of the tribespeople who come to them. So much has this arrangement been appreciated that the Mahsuds formally applied for the establishment of a hospital of their own. With grim humour, they offered to provide such an institution with the necessary surgical instruments, saying that they had saved this from the time when the British formerly left the country. In other words, they offered what they had captured or looted during the 1919 emeute.

Wana was occupied, following an encouraging petition from the local Wazirs, in 1929. A motor road had already been run out from Jandola through Chagmalai and the Shahur Tangi to Sarwekai. A brigade of troops, hitherto stationed at Manzai, whereabouts the Takki Zam, after flowing down its deep valley from central Waziristan, debouches on to the Derajat, was accordingly ordered up to Wana in the autumn of 1929. It proceeded throughout the journey thither without opposition and was warmly welcomed by the tribes people at Wana, where it established itself in a favourably sited camp notfar from the fort which was the earlier centre of British occupation. There it remains.

The area cultivated by the villagers of Wana plain doubled by the end of 1931 and the people declared their readiness to surrender their firearms if their neighbours also gave up theirs or were deprived of them. A road has been built connecting Fort Sandeman *via* Gulkach, on the Gomal river, with Tanai, on the Sarwekai-Wana road. A motor road has also been constructed from Razmak through Kaniguram, in the heart of the Mahsud country, to Wana. It was completed in 1933 and the only disputes connected with its construction arose from the rivalry of the tribesmen whose villages lie along the route and who sometimes fought one another to secure road-making contracts.

Congress Agitation.—A startling new development upon the North-West Frontier during 1930 was the spread thereto of agitation carried on by the Indian National Congress in the interior of India in pursuit of its efforts to bring political pressure to bear upon the Government of India, and ,above them, His Majesty's Government. The Congress at its annual session at Lahore in the week following Christmas, 1929, adopted a programme aiming at the separation of India from the British Empire and at the promotion of revolution in India to secure this end. In particular, it avowedly set out "to make Government impossible." Revolutionary agitation, and especially a campaign to promote disobedience of the civil law in order to bring the administration to a standstill, commenced all over India immediately after the Congress meetings. The settled districts of the N.W.F. P. were the scene of this, in common with the rest of the land. The agitation was there carried on by Congress agents organised in what are known as Khilafat Committees. For their purpose they made special use of misrepresentations of the Sarda Act, recently passed by the Indian Legislature by the official and Hindu votes against the opposition of the Muslim non-official members. This measure makes illegal and provides penalties for the marriage of boys and girls below stated minimum ages. The age at which marriage may take place is also in general terms laid down for Mohammedans by their religious law. Hence, the Muslims in British India, while acknowledging that the Sarda Act would not in practice affect them, because its provisions in no way over-rule their religious law, nevertheless saw in the measure an act affecting the domain of their religious law, and passed in spite of their dissent, in a Legislature in which Muslims are, by themselves, a hopeless minority. They regarded its enactment as a grave illustration of their fears that under any scheme of democratic self-government in India, Muslim interests would not be safe against disregard by the Hindu majority.

Outbreak at Peshawar in 1930.—This Muslim apprehension, after the passing of the Act, strongly influenced the attitude of the community towards all questions of political reform, and the lever which misrepresentation of the Act provided for stirring up anti-Government agitation in the almost wholly and fanatical Muslim province in the north can easily be understood. Grossly untrue propaganda was carried on ; it was, for instance, alleged that under the Act all girls must be medically examined before marriage. An elaboration of this untruth was that the Government were recruiting a large body of Hindu inspectors to make the examinations. And the agitation was deliberately pushed outwards from the settled districts of the N. W. F. P. into the tribal areas. Waziristan was amongst the first of them to be inundated with the propaganda. This was in March-April 1929. The poison spread outwards from Peshawar into Tirah about the same time. The agitation was sedulously carried on in the district northward of Peshawar city and from thence was pushed into Mohmand country. The first point of violent combustion was Peshawar city, where the mob murderously broke out on 23rd April 1930. Within a short time, Afridi bands descended the ravines and nullahs from Tirah to join in the fray. The Mohmands became greatly excited and sent down bands to sit near the border and watch for an opportunity to join in. The Upper Tochi Wazirs simultaneously took to arms and shortly afterward the Mahsud Wazirs, about Ladha, did the same. At this stage, the development of the Air arm in India proved of incalculable value. Aeroplanes patrolled the whole country and were frequently employed by the political authorities to take preventive and punitive action by bombing. The road system, meanwhile, enabled troops to be moved at will to positions of advantage for dealing with whatever serious tribal aggression appeared likely.

In the result, the Mohmands, after being bombed several times, found discretion the better part of valour and made no descent in

force. The Afridis twice endeavoured to raid Peshawar in force but by combined air and land action were both times driven back to their hills with no achievement to report. The Orakzais of southern Tirah threatened to descend by the Ublan Pass upon Kohat and their western clans attacked a post in the Upper Kurram and endeavoured to attack Parachinar. Helped by the machinations of Congress agents, they succeeded in drawing two or three clans of Afghan tribesmen across the border into the fray. Combined air and ground action crushed these efforts. The Tochi Wazirs heavily attacked Datta Khel, but were speedily brought to order by force. The Mahsuds were similarly repulsed and punished when they assaulted Sorarogha, in the valley of the Takki Zam.

All outbreaks of revolt were suppressed in the same manner and the establishment of new fortified posts on the Peshawar plain, immediately opposite the main valleys leading out of Tirah, and the construction of roads for their service, now indicate the application of the new frontier policy in that region. The Afridis long refused to assent to these, but being thereby deprived of access to their normal winter grazing grounds on the Khajuri and Aka Khel plain, and prevented from visiting Peshawar, their marketing centre, they came in and accepted peace under the new conditions before the opening of the winter of 1931-32. The Afridis later asked for roads into Tirah but are not yet sufficiently agreed among themselves about the point for construction successfully to proceed.

Mohmand Outbreak in 1933.—Disturbances in the Mohmand country during the summer of 1933 both illustrated the operation of the modern Frontier policy and the need to keep it a live policy if it is to be of any use at all. The Mohmands may for the purposes of present description be divided into two categories namely, the Upper Mohmands, who live in the highlands of the Mohmand country, and the Lower Mohmands, whose country stretches from the lower altitudes of the same hills down to the Peshawar Plain. Through the country of the Upper Mohmands passes the Durand line but the Afghan Government have never agreed to its delimitation in part of this region and consequently its place has long been taken over a considerable portion of the length of the Frontier by what is described as the Presumptive Frontier. The exact position of this latter has never been settled between the two governments and it is consequently sometimes difficult to say whether people from particular villages belong to one side or to the other of it.

In 1932, during the revolutionary Red Shirt campaign, in connection with the Indian National Congress, in the Peshawar Plain, the Upper Mohmands decided to join in the disturbances and raids in the administered territory immediately northward of Peshawar. The Lower Mohmands are described as the Assured Tribes. The meaning of the description is that the British Indian authorities assure them protection against the attacks of the Upper Mohmands and they, on the other hand, are bound by promises of good behaviour. The Assured Tribes in 1932 interfered with the programme of the Upper Mohmands or raiding the plain and the Upper Mohmands in 1933, when spring and early summer once more facilitated their methods of campaigning, commenced retributory raids upon the Halimzai and other Assured clans. The attacked clans appealed to the political authorities for help and that help they were obliged to give.

About the same time as this trouble was germinating, there appeared in Bajaur, a country immediately to the north of that in which the events just described developed, a Pretender to the Afghan throne. He was accompanied by two companions and started a campaign in Bajaur for a revolution or such other trouble as might be possible in Afghanistan. This compelled the British Indian authorities to take measures in fulfillment of their obligations of good neighbourliness to Afghanistan.

Road construction from the Peshawar-Shabkadr road northwards through Ghalanai into the Halimzai country and towards the passes which lead from that country into the upper extremities of the Bajaur Valley was undertaken and two brigades of troops, with other details, were sent forward up it to assist in dealing with the Upper Mohmands. At the same time, aeroplanes bombarded the village of Kotkai in Upper Bajaur, which had given shelter to the Pretender, further aerial demonstrations were made and the Bajauris were given an ultimatum demanding the surrender of the Pretender by a given date.

The Upper Mohmands continuing aggressive and the Bajauris obdurate, there was good prospect of a campaign over the same country as that covered by the campaign of 1897. It seemed likely that the Ghalanai Road would be continued into the upper extremity of Bajaur and that another road for troops would also have to be constructed from Malakand up the Bajaur valley itself so that by the meeting of the two roads in Upper Bajaur, there would become established a circular road through this part of the tribal territory, resembling that running through North Waziristan.

In the end, the Upper Mohmands, partly doubtless because of punishment which they received in certain encounters with our troops and partly probably because of influence brought to bear upon them from Kabul, retired to their hills and after negotiations entered into bonds to keep the peace; and the Bajauris, while maintaining on grounds of tribal custom their refusal to surrender the Pretender, nevertheless expelled that person from their territory, probably into Afghanistan. Here, then, the trouble ceased. The nett result of it was the construction of the road through Ghalanai and the rapid development of bus services and other activities of civilization which speedily took place along it.

The Upper Mohmands made another descent in the summer of 1935. The Lower Mohmands quarrelled among themselves over the distribution of road maintenance contracts and the Upper Mohmands decided to fish in the troubled waters. Successful military operations ended in the Upper Mohmands suing for peace—and in the Ghalanai road being carried forward over the Nahakki Pass and down beyond it on to the plain which extends to the natural road junction where the Upper Bajaur Valley meets the Upper Mohmand country.

Tori Khel Rebellion.—The Wazirs and Mahsuds in 1930 showed signs of rebelling against Government in parallel with the Afridis. Congress party agents endeavoured to persuade them to do so. They were at the outset firmly dealt with and peace was thus assured almost without its having been broken. All went peacefully until the autumn of 1936 and then trouble was produced in North Waziristan by the faqir of Ipi, a man who was formerly in subordinate Government service in the Settled Districts and afterwards settled at the place from which he took his best known name. A Muslim lad was accused in 1936 of kidnapping a Hindu girl of Bannu. Apparently, she eloped with him. She was restored to her parents by order of the Civil Court, on the ground that she was a minor. There was a good deal of communal excitement about the matter and the faqir started an agitation about it in the Tribal country, alleging that the return of the girl to her Hindu parents was an interference with Islam. There was also, in 1936, a dispute between Muslims and Sikhs in Lahore over the possession of an old building said to have been a mosque. This was settled in the Lahore High Court in favour of the Sikhs and the Punjab Muslims accepted the decision. The faqir of Ipi lumped together the Bannu Girl Case and the Lahore (Shahidganj) Mosque Case and upon them raised among the Waziristan Tribes the slogan, "Islam in Danger." His demand for a holy war was only taken up by a sub-section of the Tori Khel section of the Wazirs of Northern Waziristan. Their elders begged Government to order a flag march of troops through their country so as to increase the credit of the loyalist element. This Government did. The troops were heavily fired upon and had to fight their way out. Efforts to round off the matter before it developed into a major affair failed and there followed a war in which the Tori Khel were the only tribal section avowedly at war with Government but all the other tribesmen of the country were hardly more than nominally friendly, some joined in gang-fighting the authorities and others connived at such acts. Not until the fall of winter towards the end of 1937 were the Tori Khel and the bands of irreconcilables under daring leaders whom the faqir inspired by his agitation, beaten by extensive military operations into asking for peace. The faqir has not been caught and continues a trouble-some influence. The summer campaign in 1937 involved the employment of 50,000 troops. Before they were withdrawn in the following winter 106 miles of new roads opening up some of the hitherto inaccessible country in and about the upper reaches of the Shaktu river were made. The faqir of Ipi, however, assisted by several notorious outlaws continued to keep Waziristan, particularly the North, in a disturbed condition throughout 1938 and on into 1939. It was therefore, found necessary to keep an extra brigade in the territory and spasmodic operations against recalcitrant gangs proceeded by land and air and have not yet succeeded in restoring normal conditions. In the summer of 1938 a temporary complication was provided by the appearance amongst the Mahsuds of a Syrian called the Shami Pir who was only just prevented from leading a tribal incursion to support a rebellion against the Government of Kabul. The persistence and expense of the trouble in Waziristan, constituting as it does a heart-breaking set-back to the "policy" which had seemed for fifteen years to be achieving material results, has provoked renewed discussion of Frontier policy especially in regard to military commitments which were examined by a Defence Committee under the chairmanship of Lord Chatfield who visited India on behalf of His Majesty's Government towards the end of 1938. Although hostile sections still persisted with mischief there was thought by April 1939 to be sufficient justification for the hope that the period of major military operation was over and Waziristan was in consequence returned to the charge of His Excellency the Governor of the N.W.F.P., in his capacity as A.G.G. for the tribal areas. Sporadic disturbances have continued into the period of the second world war and the Fakir remains a disturbing influence.

Waziristan Outrages 1939.—During 1939 Waziristan was in a state of continual unrest. The list of offences committed by the Ahmedzai tribesmen, by the end of the year mounted to over fifty cases of major outrage. They included blasting of bridges and destruction of communications, holding up and looting lorries, sniping, kidnapping and several cases of murder. The situation became intolerable and necessitated military operations. Two columns of troops were sent to the Ahmedzai salient and it took three months to subdue the hostile elements and clear it of offenders and outlaws.

A detailed investigation into the economic conditions in the tribal areas, as a preliminary step to the adoption of measures aimed at radical improvement of the tribesmen, was thereupon believed to be opportune and would probably have been attempted but for the pre-occupation of the war.

VI. AFGHANISTAN.

The relations of Afghanistan with the Indian Empire were for long dominated by one main consideration—the relation of Afghanistan to a Russian invasion of India. All other considerations were of secondary importance. For nearly three-quarters of a century the attitude of Great Britain toward successive Amirs has been dictated by this one factor. It was in order to prevent Afghanistan from coming under the influence of Russia that the first Afghan War of 1838 was fought—the most melancholy episode in Indian frontier history. It was because a Russian envoy was received at Kabul whilst the British representative was turned back at Ali Masjid that the Afghan War of 1878 was waged. After that the whole end of British policy toward Afghanistan was to build up a strong independent State, friendly to Britain, which would act as a buffer against Russia, and so to order our frontier policy that we should be in a position to move large forces up, if necessary, to support the Afghans in resisting aggression.

Gates to India.—A knowledge of the trans-frontier geography of India brought home to her administrators the conviction

that there were only two main gates to India—through Afghanistan, the historic route to India, along which successive invasions have poured, and by way of Seistan. It was the purpose of British policy to close them, and of Russia to endeavour to keep them at any rate half open. To this end, having pushed her trans-Persian railway to Samarkand, Russia thrust a military line from Merv to the Kushklinsky Post, where railway material is collected for its immediate prolongation to Herat. Later, she connected the trans-Siberian railway with the trans-Caucasian system, by the Orenburg-Tashkent line, thus bringing Central Asia into direct touch with her European magazines. Nor has Great Britain been idle. A great military station has been created at Quetta. This is connected with the Indian railway system by lines of railway which climb to the Quetta Plateau by the Bolan Pass and through the Chapper Rift, lines which rank amongst the most picturesque and daring in the world. From Quetta the line has been carried by the Khojak tunnel through the Khwaja Amran Range, until it leads out to the Afghan Border at New Chaman, where it opens on the route to Kandahar. In view of the same menace the whole of Baluchistan has been brought under British control. Quetta is now one of the great strategical positions of the world, and nothing has been left undone which modern military science can achieve to add to its natural strength. In the opinion of many military authorities it firmly closes the western gate to India, either by way of Kandahar, or by the direct route through Seistan.

Further east, the Indian railway system was carried to Jamrud and by the autumn of 1925 to the Khyber Pass to Landi Kotal and down the other side of the Pass to Landi Khana on the Afghan Frontier. A first class military road sometimes double sometimes treble, also leads up the Pass to our advanced post at Landi Kotal, and then descends until it meets the Afghan Frontier at Landi Khana. In this wise the two Powers prepared for the great conflict which was to be fought on the Kandahar-Ghazni-Kabul line.

Relations with India.—Between the advanced posts on either side stands the Kingdom of Afghanistan. The end of British policy has been to make it strong and friendly. In the first particular it has early and largely succeeded. The second aim may now also be said to have been attained. When the late Abdurrahaman was invited to ascend the throne, as the only means of escape from the tangle of 1879, none realised his great qualities. Previously the Amir of Afghanistan had been the chief of a confederacy of clans. Abdurrahaman made himself master in his own kingdom. By means into which it is not well closely to enter he beat down opposition until none dared lift a hand against him. Aided by a British subsidy of twelve lakhs of rupees a year, increased to eighteen by the Durand Agreement of 1893, and subsequently to over 20 lakhs, he established a strong standing army and set up arsenals under foreign supervision to furnish it with arms and ammunition. Step by step his position was regularised. The Anglo-Russian Boundary Commission,—which nearly precipitated war over the Penjdeh episode in 1885,—determined the northern boundaries. The Pamirs Agreement delimited the borders amid those snowy heights. The Durand Agreement settled the border on the British side, except for a small section to the west of the Khyber, which remained a fruitful source of trouble between Afghanistan and ourselves until 1919, when the Afghan claims and action upon the undemarcated section led to war. That section was finally surveyed and the frontier determined shortly after the conclusion of peace with Afghanistan. Finally the McMahon award closed the old feud with Persia over the distribution of the waters of the Helmand in Seistan. This frontier has since been reaffirmed by a Turkish boundary commission appointed by Iran and Afghanistan conjointly. It was estimated by competent authorities that about the time of Abdurrahaman's death, Afghanistan was in a position to place in the field, in the event of war, one hundred thousand well armed regular and irregular troops, together with two hundred thousand tribal levies, and to leave fifty thousand regulars and irregulars and a hundred thousand levies to maintain order in Kabul and the provinces. But if Afghanistan were made strong, it was not made friendly. Abdurrahaman Khan distrusted British policy up to the day of his death. All that can be said is that he distrusted it less than he distrusted Russia, and if the occasion had arisen for him to make a choice, he would have opposed a Russian advance with all the force at his disposal. He closed his country absolutely against all foreigners, except those who were necessary for the supervision of his arsenals and factories. He refused to accept a British Resident, on the ground that he could not protect him, and British affairs were entrusted to an Indian agent, who was in a most equivocal position. At the same time he repeatedly pressed for the right to pass by the Government of India and to establish his own representative at the Court of St. James.

Afghanistan and the War.—These relations were markedly improved during the reign of His Majesty the Amir Habibullah Khan. It used to be one of the trite sayings of the Frontier that the system which Abdurrahman Khan had built up would perish with him, for none was capable of maintaining it. Habibullah Khan more than maintained it. He visited India soon after his accession and acquired a vivid knowledge of the power and resources of the Empire. He strengthened and consolidated his authority in Afghanistan itself. At the outset of the war he made a declaration of his complete neutrality. It is believed—a considerable reticence is preserved over our relations with Afghanistan—that he warned the Government of India that he might be forced into many equivocal acts, but that they must trust him; certainly his reception of Turkish, Austrian and German "missions" at Kabul, at a time when British representatives were severely excluded, was open to grave

misconstruction. But a fuller knowledge induced the belief that the Amir was in a position of no little difficulty. He had to compromise with the fanatical and anti-British elements amongst his own people, inflamed by the Turkish preaching of a jehad, or holy Islamic war. But he committed no act of hostility; as soon as it was safe to do so he turned the members of these missions out of the kingdom. At the end of the war his policy was completely justified; he had kept Afghanistan out of the war, he had adhered to the winning side; his authority in the kingdom and in Central Asia was at its zenith.

Murder of the Amir.—It is believed that if he had lived Habibullah Khan would have used this authority for a progressive policy in Afghanistan, by opening up communications and extending his engagements with India. He was courted by the representatives of Persia and the Central Asian States as the possible rallying centre of a Central Asian Islamic confederation. At this moment he was assassinated on the 20th February 1919. The circumstances surrounding his murder have never been fully explained; but there is strong ground for the belief that it was promoted by the reactionaries who had harassed him all his reign. These realised that with his vindication by the war their time of reckoning had come; they anticipated it by suborning one of his aides to murder him in his sleep. His brother, Nasrullah Khan, the nominee of the fanatical element, was proclaimed Amir at Jelalabad in his stead, but public opinion in Afghanistan revolted at the idea of the brother seizing power over the corpse of the murdered man. His sons, Hayat and Amanullah, were not disposed to waive their heritage. Amanullah was at Kabul, controlling the treasury and the arsenal and supported by the Army. Nasrullah found it impossible to make head against him and withdrew. The new Amir, Amanullah, at once communicated his accession to the Government of India and proclaimed his desire to adhere to the traditional policy of friendship. But his difficulties at once commenced; he had to deal with the war party in Afghanistan; he was confronted with the dissatisfaction arising from the manner in which the murderers of Habibullah had been dealt with; the fanatical element was exasperated by the imprisonment of Nasrullah; and the Army was so incensed that it had to be removed from Kabul and given occupation to divert its thoughts. A further element of complexity was introduced by the political situation in India. The agitation against the Rowlatt Act was at its height. The disturbances in the Punjab and Gujarat had taken place. Afghan agents in India, of whom the most prominent was Ghulam Hyder Khan, the Afghan postmaster at Peshawar, flooded Afghanistan with exaggerated accounts of the Indian unrest. The result of all this was to convince the Amir that the real solution of his difficulties was to unite all the disturbing elements in a war with India. On the 25th April his troops were set in motion and simultaneously a stream of anti-British propaganda commenced to flow from Kabul and open intrigue was started with the Frontier tribes, on whom the Afghans placed their chief reliance.

Speedy Defeat.—The war caught the Army in India in the throes of demobilisation and with a large proportion of the seasoned troops on service abroad. Nevertheless the regular Afghan Army was rapidly dealt with. Strong British forces moved up the Khyber and seized Dakka. Jelalabad was repeatedly bombed from the air and also Kabul. Nothing but a shortage of mechanical transport prevented the British forces from seizing Jelalabad. In ten days the Afghans were severely defeated. On the 14th May they asked for an Armistice. With the usual Afghan spirit of haggling, they tried to water down the conditions of the armistice, but as they were met with an uncompromising emphasis of the situation they despatched representatives to a conference at Rawalpindi on the 26th July. On the 8th August a Treaty of Peace was signed which is set out in the Indian Year Book, 1923, pp. 196-197.

Post-War Relations.—It will be seen that under this Treaty the way was paved for a fresh engagement six months afterwards. During the hot weather of 1920 there were prolonged discussions at Mussoorie between Afghan Representatives and British officials under Sir Henry Dobbs. These were private, but it is believed that a complete agreement was reached. Certainly after an interchange of Notes which revealed no major point of difference it was agreed that a British Mission should proceed to Kabul to arrange a definite treaty of peace. This Mission crossed the border in January 1921 and entered Kabul where a peace treaty was signed.

The main points of the Treaty are set out in the Indian Year Book, 1923, pp. 197, 198-199.

Afghanistan after Great War I.—Since the War the relations between Afghanistan and Great Britain have been good and improving. There were painful episodes in 1923 when a murder gang from the tribal territory in the British side of the Frontier committed raids in British India, murdering English people and kidnapping English women and then took refuge in Afghanistan. In course of time this gang was broken up. His Majesty the King of Afghanistan had troubles within his own borders which made him glad of British help. The main object of his government was to strengthen the resources of the country and to bring it into closer relation with modern methods of administration. But Afghanistan is an intensely conservative country and no changes are popular; especially violent was the opposition to a secular form of administration and education. The direct result was a formidable rebellion of Mangals and Zadrans in the Southern Provinces, and serious reverses to the regular troops sent against the rebels. At one time the position was serious, but the rebels were not sufficiently united to develop their successes, and with the aid of aeroplanes and other assistance afforded by the Government of India the insurrection was broken. Whilst this assistance was appreciated, the whole business gave a serious set-back to the reforms initiated by His Majesty; he had to withdraw almost the whole of his administrative code and to revert to the Mahommedan Law which was previously in force.

Soviet Penetration.—Taking a long view, a much more notable development of the policies of Afghanistan, at the period to which the foregoing notes apply, was the penetration of the Russians, who had converted the former Trans-Caspian States of Tsarist Russia into Soviet Republics. The object of this policy was gradually to sweep into the Soviet system the outlying provinces of Persia, of China and of Afghanistan. In Persia this policy was foiled by the vigour of the Sipar Salah, Reza Khan. In Chinese Turkestan it was pursued with qualified success. In Afghanistan it also made certain progress. The first step of the Russians was to extend the Soviet Republics of Tajikistan, Uzbekia and Turkmanistan so as to absorb all Northern Afghanistan. This was later, apparently, abandoned for the moment for a more gentle penetration. Large subsidies, mostly delivered in kind, were given to Afghanistan. Telegraph lines were erected all over the country; roads were constructed, large quantities of arms and ammunition were supplied, whilst an air force with Russian pilots and mechanics was created and was largely developed. In return the Russians received important trading facilities.

Russo-Afghan Treaty.—Outwardly the relations between the two States are friendly. In December 1926 the Afghan papers published the text of a new treaty concluded with Soviet Russia, which was signed on August 31st, but it provided that it should in no way interfere with the secret treaty signed in Moscow on February 28th, 1921. The principal clauses of this treaty, as disclosed in the Afghan papers, are as follows:—

Clause 1.—In the event of war or hostile action between one of the contracting parties and a third power or powers, the other contracting party will observe neutrality in respect of the first contracting party.

Clause 2.—Both the contracting parties agree to abstain from mutual aggression, the one against the other. Within their own dominions also they will do nothing which may cause political or military harm to the other party. The contracting parties particularly agree not to make alliances or political and military agreements with any one or more other powers against each other. Each will also abstain from joining any boycott or financial or economic blockade organised against the other party. Besides this in case the attitude of a third power or powers is hostile towards one of the contracting parties, the other contracting party will not help such hostile policy, and, further, will prohibit the execution of such policy and hostile actions and measures within its dominions.

Clause 3.—The high contracting parties acknowledge one another's Government as rightful and independent. They agree to abstain from all sorts of armed or unarmed interference in one another's internal affairs. They will decidedly neither join nor help any one or more other powers which interfere in or against one of the contracting Government. None of the contracting parties will permit in its dominions the formation or existence of societies and the activities of individuals whose object is to gather armed force with a view to injuring the other's independence, or otherwise such activities will be checked. Similarly, neither of the contracting parties will allow armed forces, arms, ammunition, or other war material, meant to be used against the other contracting party to pass through its dominions.

Clause 6.—This treaty will take effect from the date of its ratification, which should take place within three months of its signature. It will be valid for three years. After this period it will remain in force for another year provided neither of the parties has given notice six months before the date of its expiry that it would cease after that time.

On March 23rd there was also signed in Berlin a treaty between Germany and Afghanistan which amounted to no more than the establishment of diplomatic relations.

A British Minister is established in Kabul as well as the representatives of other European States. The representatives of Afghanistan are established in India and in London, and at some of the European capitals. The various subsidiary agreements under the Treaty have been carried into effect.

The King's Tour.—In the closing months of 1927 His Majesty King Amanulla, accompanied by the Queen and a staff of officials, commenced a long tour to India and Europe. It is understood that this was one of the cherished ambitions of his father, King Habibullah, who was assassinated in 1919. King Amanulla, when he set out, was warmly welcomed in India and received a great popular greeting in Bombay both from his co-religionists and from members of other communities, who forgot the invasion of India in 1919. He then took ship to Europe. He was the guest of His Majesty King George V in London, and visited the principal European capitals. He made a State visit to Turkey, and returned to Afghanistan by way of Soviet Russia and Persia. A series of treaties with the governments of the countries visited was announced and the King returned to Kabul in the late summer of 1928, the tour having been unclouded by any untoward incident. Afghanistan was peaceful during his long absence.

Reforming Zeal.—King Amanulla returned to his realm full of reforming zeal. He was much impressed by the political and social institutions of the western lands he visited, and in particular by the dramatic forcefulness with which Mustapha Kemal Pasha had driven Turkey along the path of "reform," or perhaps it would be more correct to say westernisation. In this he was encouraged by the Queen, who was desirous of seeing the women of Afghanistan enjoy some of the freedom and opportunity won by and for the women of the West. Edict after edict was issued, changing the whole structure of Afghan society. New codes and taxes were imposed; it was proposed that women should emerge from their seclusion and doff the veil; the co-education of boys and girls was prescribed; in September Government officials were forbidden to practise polygamy; in October European dress was ordered for the people of Kabul. At the same time, the pay of the regular troops fell into arrear.

With every appreciation of the spirit and direction of these changes, friends of His Majesty advised the King to moderate the pace. They reminded him that in 1924 far less drastic changes had brought serious trouble in their train. In May of that year the "Lame Mullah" raised the standard of rebellion amongst the Ghilzai and Mangal clansmen of Khost. The Mullahs were openly active against the King and His Majesty was equally frank in his hostility to them. Possibly also well-wishers suggested that what was possible in Turkey, after centuries of close contact with the West, and where the ground had been prepared by missionary effort and a long struggle for the emancipation of women, might be less easy in Afghanistan, where there had been no contact with the western world.

A Change of Kings.—Events moved rapidly in 1929. A notorious north Afghan *budmash*, Bacha-i-Saqqao, raised the standard of revolt and inflicted severe losses on the Afghan Regular troops, discontented as they were by arrears of pay. Day by day the Afghan representatives in various parts of the world issued messages asserting that the rebels had been destroyed, and a rapid series of pronouncements declared the withdrawal of all the reforms and the establishment of a Council of Provincial Representatives. Communications with the outer world were broken. King Amanulla and his family fled from Kabul to Kandahar and then from Kandahar *viâ* Quetta to Bombay where they took ship to Europe. King Amanulla on his arrival at Rome entered into possession of the Afghan Legation, where he remained. Bacha-i-Saqqao declared himself King of Afghanistan, and for a few months held his position in Kabul. Without money, administrative experience or a disciplined following his throne was a thorny one and he was harassed by constant attacks. The Royal Air Force in India meanwhile went to the rescue of the British Nationals beleaguered in and around Kabul and in a series of brilliant flights evacuated all without the slightest hitch. The most formidable of the new king's adversaries were led by General Nadir Khan, a scion of the old ruling house, with a wide knowledge of the world. Heavy fighting took place. Fortunes varied. Nadir Khan almost gave up his chances as finally lost. But a band of Wazirs from the British side of the border attracted by prospects of loot, joined Nadir and finally seized Kabul in his name and interest. Nadir Khan thus became victor and shortly afterwards, at the wish of the Afghans, Bacha-i-Saqqao was executed with other rebels, and when the year closed Nadir Khan was to all seeming in firm possession of the Kingdom. He despatched members of his family to the principal Afghan Legations in Europe. A Shinwari rising near the exit from the Khyber Pass took place in February 1930, and was repressed with unexpected success and vigour. There followed a serious rebellion in Kohidaman, Bacha-i-Saqqao's country. This also was promptly quelled. And thereafter Nadir Shah ruled without challenge. He devoted himself to the reorganisation of his Army. England was strictly neutral during the successive stages of the revolution, but promised support to Afghanistan to help her maintain internal peace when she had restored it and this promise was fulfilled by the provision of an interest free loan of £200,000 to King Nadir and by the supply of rifles and ammunition to him. He gave evidence of his friendliness towards Britain and India. He co-operated effectively to prevent tribes on his side of the Frontier joining those on the British side against the Government of India in response to the Congress agitation in the summer of 1930. The trade routes were re-opened and the new King again took up Amanullah's mantle of reform but in a statesmanlike manner which carried the Mullahs along with him.

Murder of Nadir Shah.—This ordered march of progress was tragically interrupted by the murder of His Majesty Nadir Shah on the afternoon of 8 November 1933. His Majesty was attending a football tournament prize-giving, when a young man among the gathering stepped forward and fired several revolver shots into him at close range, killing him instantly. It later appeared that the assassin committed the crime in revenge for the execution of a prominent Afghan who had been caught deeply involved in treasonable activities after he had been mercifully treated for earlier behaviour of the same kind. The assassin's father was stated to have been this man's servant. The murder was not followed by general or widespread disorder. The members of Nadir Shah's family and his prominent officers of State stood loyally by his heir, his son, Muhammed Zahir. The latter was duly placed on his father's throne and his accession was in due course acknowledged and confirmed throughout the kingdom in the traditional manner. The new King started his reign with a high reputation for courage and steadiness. He early issued assurances to his people that he would continue the policy of his father in affairs of State. No untoward events have occurred in the years that have since past during which the young King has by this sagacity and good government gradually strengthened his position on the throne and, by the development of communications and trade, done much to encourage the establishment of settled conditions among his people. A mutual desire for close relations and particularly economic understanding led in 1938 to exploratory negotiations between India and Afghanistan with a view to seeking some form of trade agreement.

The Chief Ministers of the Afghan State are Muhmud Hashim Khan (Prime Minister) and Shah Mahmud Khan, two surviving brothers of Nadir Shah, and the King's uncles. With their help the stability of the Afghan Kingdom has been successfully maintained. Their policy has remained not unfriendly to Britain and India, and they have adhered to the Saadabad Pact with Turkey, Iran and Iraq. All the great European Powers and Japan maintain Embassies or Legations in Kabul, and it must be recorded of the present Afghan Government that in tune with the ideas of their predecessors and in the interest of their continued independence as they see it, they have pursued a policy of balance in their relations with the Powers, but with careful adjustments.

VII.—TIBET.

Tibet has long held the imagination of India. To India she owes the main elements of her religion, Buddhism (first introduced in the seventh century A.D.), and also of her literature —a Tibetan alphabet based on the Dev Nagri Sanskrit character was first compiled at the time of the introduction of Buddhism, and many translations from Pali and Sanskrit manuscripts were made. But Tibet's chief interest to India in the modern world lies in the fact that she is co-terminous with India and Nepal for some 2,000 miles, and that "along this enormous distance her physical nature constitutes a barrier equal or superior to anything that the World can show elsewhere". At present India's North-East Frontier presents no problem similar to that of the North-West. In order that this may so continue, it is an Indian interest that Tibet should remain a strong mistress in her own house.

In earlier days, Tibet was a successful military power capable of threatening Indian and Chinese neighbours alike: an inscription of the eighth century A. D. at Lhasa indicates that China paid tribute at that time to Tibet. The introduction of Buddhism apparently softened earlier aggressive militarism. The conversion of Kublai Khan, the first Mongolian Emperor, to Lamaism led to strong cultural connections between the Mongolian Emperors of China and Tibet. It was a Mongolian Prince who, in the sixteenth century A. D., established the present line of Dalai Lamas. Early in the 18th century, taking advantage of internal dissensions in Tibet between Mongols and Tibetans, the newly established Manchu dynasty adopted an aggressive policy. From that time until the Chinese revolution (1911) the Manchu dynasty maintained officers at Lhasa, although their authority decreased in time to a merely nominal suzerainty, until finally in 1911 the Chinese forces were ejected and permitted safe conduct through India.

Modern Indian Relations with Tibet. In the latter part of the 18th century Warren Hastings succeeded in establishing friendly contacts with the Tashi Lama at Shigatse. But this led to nothing of a permanent nature owing to unfortunate suspicion that the British had encouraged the Nepalese invasion of Tibet in 1792. From then on Tibet remained a closed country, except to the courageous Pundits of the survey of India and a few others such as Manning, until the Younghusband expedition of 1904. In 1873 the Chinese agreed to protect any British Mission which might enter Tibet; but the mere fact that the British accepted Chinese sponsorship in such a matter appears to have aroused Tibetan resentment and necessitated the abandonment of the proposed Mission. This indication of weakness led to a Tibetan invasion of Sikkim. The Chinese were incapable of exercising any remedial influence and after one year's delay the Tibetans were expelled by force. A treaty and trade regulations were concluded with the Chinese in 1890 to regulate the frontier, but it soon became evident that the Tibetans had no intention of acknowledging such an agreement, and that the Chinese were unable to secure it respect. After some years of frustration Lord Curzon sought to remedy matters by means of direct approach to the Dalai Lama, but all his letters were rejected and returned unopened.

At the same time the Dalai Lama was in direct intercourse with the Tsar of Russia. His emissary was a Siberian named Dorjief, who had established a remarkable ascendancy in the counsels of the Dalai Lama. After a few years' residence at Lhasa, Dorjief went to Russia on a confidential Mission in 1899. At the end of 1900 he returned to Russia at the head of a Tibetan Mission of which the head was officially described in Russia as "the senior Tsanit Khomba attached to the Dalai Lama of Tibet". This Mission arrived at Odessa in October 1900 and was received in audience by the Tsar at Livadia. Dorjief returned to Lhasa to report progress, and in 1901 was at St. Petersburg with a Tibetan Mission where, as bearers of an autograph letter from the Dalai Lama, they were received by the Tsar at Peterhoff. They were escorted home through Central Asia by a Russian force to which several Intelligence Officers were attached. At the time it was rumoured that Dorjief had, on behalf of the Dalai Lama, concluded a treaty with Russia, which virtually placed Tibet under the protectorate of Russia. This rumour was afterwards officially contradicted by the Russian Government.

Expedition of 1904.—In view of these conditions the Government of India proposed in 1903 to despatch a mission, with an armed escort to Lhasa to discuss the outstanding questions with the Tibetan authorities on the spot. To this the Home Government could not assent, but agreed in conjunction with the Chinese Government, to a joint meeting at Khamab Jong, on the Tibetan side of the frontier. Sir Francis Younghusband was the British representative. But after months of delay it was ascertained that the Tibetans had no intention of committing themselves. It was therefore agreed that the mission, with a strong escort, should move to Gyantse. On the way the Tibetans developed marked hostility, and there was fighting at Tuna, and several sharp encounters in and around Gyantse. It was therefore decided that the mission should advance to Lhasa, and on August 3rd, 1904, Lhasa was reached. There Sir Francis Younghusband negotiated a convention by which the Tibetans agreed to respect the Chinese Convention of 1890, to open trade marts at Gyantse, Gartok and Yatung; to pay an indemnity of £500,000 (seventy-five lakhs of rupees); the British to remain in occupation of the Chumbi Valley until this indemnity was paid off at the rate of a lakh of rupees a year. In a separate instrument the Tibetans agreed that the British Trade Agent at Gyantse should have the right to proceed to Lhasa to discuss commercial questions, if necessary. Later the amount of indemnity was reduced from seventy five to twenty five lakhs rupees, to be paid in 3 years; the period of occupation

of the Chumbi Valley was likewise reduced. In June, 1906, the British concluded a convention with China which purported to regulate the position in Tibet. Thereunder Great Britain agreed neither to annex Tibetan territory nor to interfere with the internal administration of the country, and China undertook not to permit any other foreign state to do so. The Chinese Government paid the indemnity in 3 years and the Chumbi Valley was evacuated. The only direct result of the Mission was the opening of the three trade marts (Yatung, Gyantse, and Gartok) and the establishment of a Trade Agency at Gyantse.

Chinese Action.—The approach of the Younghusband Mission to Lhasa led to the flight of the Dalai Lama to Urga, the sacred Buddhist city in Mongolia, leaving the internal Government of Tibet in confusion. The 1906 convention explicitly re-affirmed a Chinese suzerainty over Tibet which had in fact become sketchy; and the Chinese, thus strengthened, proceeded to convert Tibet from a loose form of vassalage into a province of China. In 1908 Chao Erh-feng, acting Viceroy in the neighbouring Province of Szechuen, was appointed Resident in Tibet: his ruthlessness and severity backed by the wild atrocities of the Chinese soldiers exasperated the populace. The fugitive Dalai Lama had returned by the end of 1909 expecting to resume his temporal and spiritual sovereignty. But it was evident that the Chinese intended to deprive him of all temporal power; and the report that a strong Chinese force was moving on to Lhasa so alarmed the Dalai Lama that he fled from Lhasa, and by the irony of fate, sought refuge in India. He was pursued to the frontier by Chinese troops and took up his abode in Darjeeling, whilst Chinese forces overran Tibet.

Later Stages.—The British Government acting on the representations of the Government of India, made strong protests to China against this action. They pointed out that Great Britain, while disclaiming any desire to interfere with the internal administration of Tibet, could not be indifferent to disturbances to the peace of a country which was a neighbour, on intimate terms with other neighbouring States on our frontier, especially with Nepal, and urged that an effective Tibetan Government be maintained. The attitude of the Chinese Government was that no more troops had been sent to Tibet than were necessary for the preservation of order, that China had no intention of converting Tibet into a province, but that being responsible for the good conduct of Tibet, she must be in a position to see that her wishes were respected by the Tibetans. Finally, the Chinese remarked that the Dalai Lama was such an impossible person that they had been compelled again to depose him. Here the matter might have rested but for the revolution in China. That revolution broke out in Szechuen, and one of the first victims was Chao Erh-feng. Cut off from all support from China, surrounded by a hostile and infuriated populace, the Chinese troops in Tibet were in a hopeless case; they surrendered, and sought escape not through China, but through India, by way of Darjeeling and Calcutta. The Dalai Lama returned to Lhasa, and in 1913, in the House of Lords on July 28, Lord Morley stated the policy of the British Government in relation to these changes. He said the declaration of the President of the Chinese Republic saying that Tibet came within the sphere of Chinese internal administration and that Tibet was to be regarded as on an equal footing with other provinces of China, was met by a very vigorous protest from the British Government.

In June 1913 the Chinese Government agreed to a tripartite conference between representatives of Tibet, China and Great Britain. The conference met at Simla in 1914, under the presidency of Sir Henry McMahon, and initialled a convention. *Inter alia* this convention recognises the autonomy of Tibet proper ('Outer Tibet'), and creates a zone ('Inner Tibet') under Chinese authority subject to certain already existing Tibetan rights. The Chinese Government were unable to accept the boundaries between Inner and Outer Tibet laid down in the Convention, and so refrained from ratifying it, though they accepted the terms of the Convention in all other respects; but the two remaining parties accepted it as binding between themselves.

In 1918 Chinese aggression led to strong and successful Tibetan retaliation. At a time of Chinese weakness Great Britain did its utmost to urge moderation on Tibet, and deputed Mr. (afterwards Sir E.) Teichman to the scene of hostilities. He succeeded in effecting a truce in September 1918; unfortunately it was not possible to convert this truce into anything of the nature of a permanent settlement owing to the growing predominance at that time of the Chinese militarist element under Japanese influence.

In the period of uncertainty following the truce of September 1918, the Dalai Lama sent a pressing invitation to Mr. (later Sir Charles) Bell, who had just resigned the post of Political Officer in Sikkim, to visit Lhasa with a view to assisting in a settlement between Tibet and China. While a refugee in India from Chinese aggression, the Dalai Lama had established warm friendship with Mr. Bell. After some hesitation, the Government of India permitted Mr. Bell to accept this invitation. He reached Lhasa in November 1920 and stayed there a year.

The British Government and the Government of India did not succeed in effecting a permanent settlement between China and Tibet,—the chaotic condition of the former country at that time and the precarious condition of the Government in addition to the preoccupations of the Washington Conference impeded their efforts; these efforts did, however, succeed in bringing about state of practical equilibrium between the two protagonists. But Bell's Lhasa visit will be mainly memorable for the permanent contribution he made to the good relations between Tibet and her southern neighbour; this visit also furnished the foundation for Bell's three valuable studies, "Tibet, Past and Present", "The People of Tibet", and "The Religion of Tibet".

In 1922 in response to the repeated request of the Tibetan Government the Government of India arranged for the construction of telegraphic communication with Lhasa.

During the years following the Washington Conference, Chinese disunity made any permanent settlement between Tibet and China impossible, in spite of the wishes of the Tibetan Government for such settlement.

During the years 1931 to 1933, local disputes and the agressiveness of local Chinese war-lords led to a period of confused fighting. In the southern sector civil war in Szechuen led to an armistice in November 1932; by February 1933, on the Northern sector (owing, it appears, to shortage of military supplies) the Signing war-lord was ready for a truce.

In 1933 the great 13th Dalai Lama died. Since then a Regent has presided over the destinies of Tibet. A new Dalai Lama - now aged 12 - was discovered and installed with traditional ceremonial in September 1939. The Tibetan Government admitted to Lhasa a Chinese Mission of condolence on the death of the 13th Dalai Lama and a complimentary Mission on the occasion of the Installation of the 14th Dalai Lama.

The Second World War had no direct effect on Tibet. Tibet's main export, wool, increased in value. The Tibetan Government agreed to the transport through Tibet of supplies of a non-military nature required for China, and this traffic brought and still brings large profits to those engaged in it.

Relations between the Government of Tibet and Nepal are regulated by a treaty of 1856 since which date Nepal has maintained a representative at Lhasa, at present Major Kaisher Bahadur.

The Republic of China has had a representative at Lhasa (at present C. H. Chen), since 1939.

British Indian relations with Tibet are conducted through the agency of the Political Officer in Sikkim, with the assistance of Trade Agents at Gyantse, Yatung and Gartok. Since Sir Charles Bell's visit in 1920-21, the Political Officer in Sikkim has visited Lhasa on several occasions at the invitation of the Tibetan Government, viz. 1924 (Colonel F. M. Bailey); 1930 and 1932 (Colonel J. L. R. Weir); 1933 & 1935, (F. M. Williamson); 1936, 1940 (Installation of the 14th Dalai Lama) and 1944 (Sir Basil Gould); 1945-6 (A. J. Hopkinson). In 1936 Sir Basil Gould left behind one of his colleagues. Since that date a representative of the Government of India has maintained direct contact with the Government of Tibet at Lhasa.

In 1946 the Tibetan Government deputed a Good-will Mission from Lhasa bearing victory congradulations. The Mission, numbering 8 officials, first proceeded to New Delhi where they formally presented letters and gifts from the Tibetan Government to His Majesty the King Emperor, His Excellency the Viceroy and the President of the United States. They were formally received by His Excellency the Viceroy and the American Commissioner in India, the Hon'ble George Merrell, and attended Victory celebrations. There after they did a short tour to places of interest in India. On the completion of this tour they proceeded to China by air where they made similar formal presentations to His Excellency Chiang-Kai-Shek and were formally received by him.

For the year ending 30th June, 1945 Tibetan imports *via* Sikkim were valued at approximately Rs. 80 lakhs and exports at approximately Rs. 35 lakhs. The main item under the former head was cotton piecegoods; also Indian Tea. The main export item was wool.

Political Officer in Sikkim: A. J. Hopkinson, C.I.E., I.C.S.

VIII.—THE NORTH-EASTERN FRONTIER.

The position on the northern frontier has been considered as if the British line were contiguous with that of Tibet. This is not so. The territories on this frontier are actually the Kashmir State, the independent Kingdom of Nepal, the Sikkim State, Bhutan and Burma. From Chitral to Gilgit now the northernmost posts of the Indian Government, to Assam, with the exception of the small wedge between Kashmir and Nepal, where the British district of Kumaon is thrust right up to the confines of Tibet, for a distance of nearly fifteen hundred miles, there is a narrow strip of territory between British India and the true frontier. The first of these frontier States is **Kashmir**. The characteristics of this State are considered under **Indian States** (*q.v.*); it is almost the only important Indian State in India with frontier responsibilities and it worthily discharges them through the agency of its efficient Indian State troops composed mainly of the Rajput Dogras, who make excellent fighting material. One of the most important trade routes with Tibet passes through Kashmir—that through Ladak. Then comes the long narrow strip of **Nepal**. This Gurkha Kingdom stands in special relation with the British Government. It is the main Indian outpost against Tibet or against foreign aggression through Tibet. Beyond Nepal are Bhutan and Sikkim (*q.v.*) whose rulers are Mongolian by extraction and Buddhists by religion. In view of Chinese aggressions in Tibet, the Government of India in 1910 strengthened their relations with Bhutan by increasing their subsidy from fifty thousand to a lakh of rupees a year, and taking a guarantee that Bhutan would be guided by them in its foreign relations. Afterwards China was officially notified that Great Britain would protect the rights and interests of Sikkim and Bhutan.

Assam and Burma.—There now remain the Assam border tribes—the Monbas, Lamai (Mijis), Nisu (Daflas), Abors and others—residing between the administered border of Assam and the external frontier of India, in this region drawn by agreement with Tibet in 1914 by Sir Henry McMahon and known as the McMahon line. Excepting the Abors, none

of these tribes has in recent years given serious trouble but in 1911 the murder of Mr. Williamson and Dr. Gregorson by the Minyong Abors made necessary an expedition to the Dihang valley of the Abor country on the N. E. Frontier. A force of 2,500 and about 400 military police was employed for six months in subduing the tribe. After two or three small actions the murderers were delivered up. At the same time friendly missions were sent to the Mishmi and Nisu countries. The country is some of the most difficult in the world and the maintenance of close contact with the tribes has always been far from easy. In the hills between Assam and Burma various Naga tribes predominate from Manipur northwards, and tribes of the Chin-Lushei stock from Manipur southwards. Administration has not yet been extended to all the Naga tribes and cases of head hunting still occur in the more remote areas.

NEPAL.

The small hilly independent Kingdom of Nepal is a narrow tract of country extending for about 520 miles along the southern slope of the central axis of the Himalayas. It has an area of about 56,000 square miles, with a population of about 5,580,000, chiefly Hindus. The greater part of the country is mountainous, the lower slopes being cultivated. Above these is a rugged broken wall of rock leading up to the chain of snow-clad peaks which culminate in Mount Everest (29,002 feet) and others of slightly less altitude. The country before the Gurkha occupation, was split up into several small kingdoms under Newar kings. The Gurkhas under Prithi Narayan Shah overran and conquered the different kingdoms of Patan, Kathmandu, and Bhatgaon, and other places during the latter half of the 18th century and since then have been rulers of the whole of Nepal. In 1846 the head of the Rana family, Maharaja Jung Bahadur Rana, obtained from the sovereign the perpetual right to the office of Prime Minister of Nepal, and the right is still enjoyed by the descendents of the Rana family. In 1850 Jung Bahadur paid a visit to England and was thus the first Hindu Chief to leave India and to become acquainted with the power and resources of the British nation. The relations of Nepal with the Government of India are regulated by the treaty of 1816, which brought to an end the Nepal War, and subsequent agreements. By virtue of the same Treaty either Government maintained a representative at the Court of the other and Nepal's treaty relations with Tibet allow her to station a Representative at Lhasa. Ever since the conclusion of the treaty of 1816, the friendly relations with the British Government have steadily been maintained. During the first World War this cordiality was evidenced by the valuable friendly help in men and money which was give and which was appreciatively mentioned in both Houses of Parliament and by Mr. Asquith in his Guildhall speech in 1915. The message from His Majesty the King Emperor to the Nepalese Prime Minister sent on the termination of hostilities and published at the time, as also the Viceroy's valedictory address to the Nepalese contingent on the eve of its return home after having laudably fulfilled its mission in India eloquently and gratefully acknowledged the valuable help rendered by Nepal for four and a half years during the 1st Great War. In recognition of this help Nepal received an unconditional annual present of rupees ten lakhs from the British Government to be paid in perpetuity. To strengthen further and cement the bonds of friendship that had subsisted so long between the two countries, a new Treaty of friendship was concluded between the Government of Nepal and Great Britain on the 21st December 1923.

In 1938, when the war clouds gathered in Europe, Nepal under the then Prime Minister, Maharaja Joodha Shum Sher Jung Bahadur Rana, came forward with an offer of help to Britain but happily war was averted for the time being. A year later when Britain was forced to declare war on Germany, Nepal again came forward with her offer of help and in the early part of 1940 sent 5 Battalions of her regular army to India for the defence of her frontiers against foreign aggression. Three battalions of these took an active part in checking the inroads of the Japanese and driving them back deep into Burma while the two Auxiliary Pioneer Battalions which were sent later played no less important a part in the construction of the Ledo road. In recognition of this help the annual present referred to above was enhanced to twenty lacs of rupees and payment of the capitalised value of fifty percent of it was made.

From the foregoing account of the history of Nepal it will be seen that the Government of the country has generally been in the hands of the Minister of the day. Since the tie of Jung Bahadur this system of government has been clearly laid down and defined. The sovereign or Maharajadhiraja, as he is called, is but a dignified figure head whose position can best be likened to that of the Emperor of Japan during the Shogunate. The present King, His Majesty Maharajadhiraja Tribhuvana Bir Bikrama Jung Bahadur Shah Bahadur Shum Sher Jung Deva, ascended the throne on the death of his father in 1911. The real ruler of the country is the Minister who, while ruling the country, couples with his official rank the title of Maharaja. Next to him comes the Commander-in-Chief, who ordinarily succeeds to the office of Minister.

On the demise of H. H. Maharaja Bhim Shum Sher Jung Bahadur Rana after only a short tenure of office, his next brother Ojaswi Rajanya Projjwala Nepal Tara, Atul Jyotirmaya Tri Shakti Patta, Ati Pravala Gorkha Dakshina Bahu Prithuladheesha His Highness Maharaja Joodha Shum Shere Jung Bahadur Rana, G.C.B., G.C.L.B., G.O.L., G.C.S.I., G.C.S.I., G.C.SS.M.L., G.C.I.E., G.K.R.K., Yitang Paoting Shun Chiang Luh Chuan Shang Chiang, Honorary General in the British Army, Honorary Colonel of all the Gurkha Rifle Regiments

of the Indian Army, succeeded to the office of Prime Minister and Supreme Commander-in Chief, Nepal, on 1st September 1932. The rich experience he had earned in responsible offices as he had rose step by step coupled with the broader outlook of affairs gained from the visit to England with his brother the late Maharaja Chandra Shum Shere enabled the Maharaja fully to grasp the significance of the social, economic and political problems that held and still hold the world in their grip. A deep thinker, a close observer and a man with independent views, he had after much and careful deliberation matured his plans and with the courage of his convictions set himself to the carrying out of his programme. A Nepalese Legation was established in London as much to bring still closer the more than century old friendship with the British Government as also to implement fully the traditional treaty rights. The first Envoy Extraordinary and Minister Plenipotentiary (Commanding General Bahadur Shum Shere Jung Bahadur Rana) left Nepal as the head of a Mission carrying the Insignia of the newly inaugurated Royal Order of "The Ojaswi Rajanya" for H. M. The King-Emperor. With grim determination the Maharaja fought the ravages of the Great Earthquake—an unwelcome and undreamt of calamity at the very threshold of his regime—and he evolved a better and a more beautiful Kathmandu within a period not hoped for by even the most sanguine of the people. The political reorganisation in the country which had to be carried out to stabilise the Government gave ample indication of his clear foresight. The Eastern Terai district headquarters in the Kingdom, extending to some 300 miles, are now in telephone connection with the capital on the most modern line as a preliminary to link up the Western and hill districts in course of time. The remotest suburbs can now be reached from the towns in the valley by fair motorable roads and the main thoroughfare has been and is being daily improved. An up-to-date fire brigade fulfilling an urgent and long-felt want, a new and larger electric installation giving further impetus to home industries, the first industrial exhibition of local manufactures and crafts, all proclaim its many-sided activities. The postal union connection with the Government of India now offers a much needed facility to correspondence between the Nepalese at home or abroad in India. With the permanency in the tenure of Army service and inauguration of a Savings Fund for the benefit of the units, the modernisation of arsenal equipment and arrangement for the manufacture of up-to-date propellants, the military side of the country has been brought more in line with present day requirements. The first Bank in Nepal and the first Jute and Cotton Mills in the Terai were established in Maharaja Joodha's regime and are functioning to-day. Sugar, cotton, wool and other industrial ventures on a moderate scale are in active discussion. A second railway in the country links up Jayanagar on the B. N. W. Railway with Janakpur, the capital of Rajarshi Janak of Ramayana fame. Further to symbolise the friendship entertained for the British Government a second Mission carrying the Insignia of the Royal Order of Nepal went in charge of Commanding General Kaiser Shum Shere Jung Bahadur Rana and Lieutenant General Narayan Shum Shere Jung Bahadur Rana, the Maharaja's nephew and son, for H. M. King George VI who also represented the Kingdom of Nepal in the Coronation of H. M. the King Emperor. On the 29th November 1945 His Highness Maharaja Joodha Shum Shere Jung Bahadur Rana, who was then 71, in view of his advanced age and desirous of spending the evening of his life in retirement and meditation abdicated in favour of his nephew, Commander-in-Chief General Padma Shum Shere Jung Bahadur Rana who assumed the office of the Prime Minister and Supreme Commander-in-Chief. His Highness Ojaswi Rajanya, Projjwola Nepala Tara, Atul Jyotirmaya Tri-Shakti Patta, Ati Pravala Gorkha Dakshina Bahu Prithuladheesa Nepala Pratap Bardhak Maharaja Padma Shum Shere Jung Bahadur Rana, G.C.S.I., G.B.E., K.C.I.E. St. R. K., Honorary Lt.-General in the British Army, Honorary Colonel of all the Gurkha Rifle Regiments in the Indian Army, who is the eldest son of His Highness Maharaja Bhim Shum Shere Jung Bahadur Rana, was born in 1882. When 16 years old he joined the Army of which he became the Commander-in-Chief in 1934. He personally supervised the construction of the first hydro-electric installation, the first aerial ropeway and the first railway in Nepal, the motor road from Amlekhganj to Bhimphedi, the telephone line linking the Capital to the Frontier, and was Director General in Charge of these Departments, 1910-15 and 1919-32. He was General Officer Commanding the Nepalese Contingent stationed in the N. W. Frontier during World War I, 1915-19, and also commanded the Nepalese Contingent during the 3rd Afghan War, 1919 (mentioned in despatches, British War Medal and India General Service Medal with Clasp). He supervised the despatch of the Nepalese Contingent to India during World War II and saw the troops off beyond the Frontier. When the great earthquake of 1934 created havoc in the valley of Kathmandu, His Highness, who then was the Senior Commanding General, exerted himself to the utmost and moving about through the desolation had a lot in distributing relief to the stricken and encouraging them. Deeply religious-minded as he is, he has set himself heart and soul into doing the best for his country and people.

Rice, wheat and maize form the chief crops in the low-lands and in some parts of the hills too. Mineral wealth is supposed to exist but has not as yet been either prospected or developed. Communication in the hills is necessarily primitive owing to the difficult nature of the country but improvements are in evidence and progressive. Since 1920 the vehicular traffic from Amlekhganj to Bhimphedi, the base of a steep ridge in the main route to the capital of the country from British India, goes over a good and permanent well maintained road linking up with the ropeway of 18 miles which was opened in 1927, and a motor trolley service which was installed in 1934 joins up the ropeway terminus with the Customs House for transport of goods traffic. The telephone from Kathmandu to Birganj,

which has been extended to Raxaul, now forms part of the 300 miles main line extending from Kathmandu to Biratnagar and Dhankuta in the easternmost part of the Nepal Terai. The revenue is about two crores of rupees per annum. The standing army is estimated at 45,000 the highest posts in it being filled by relations of the Minister. The State is of considerable archaeological interest and many of the sites connected with scenes of Buddha's life have been identified in it by inscriptions on pillars.

British Envoy Extraordinary and Minister Plenipotentiary:—Lieut.-Col. G. A. Falconer, C.I.E.; *First Secy*:—Lt.-Colonel N. M. Macleod, I.G.R.; *Archivist*—Rai Sahib Raja Ram Singh.

BHUTAN.

Bhutan (area 18,000 sq. miles) is an independent Himalayan State, under the protectorate, in respect of foreign relations, of His Majesty's Government, possessing a fertile soil and temperate climate. The population, computed to number about 300,000, are sturdy folk of of Tibetan affinities; in recent times there has been a considerable Nepalese immigration in the foot-hill region.

Though politically independent of Tibet, Bhutan is susceptible to Tibetan influence, for the Bhutanese share the religion and culture of Tibet, and look to the Dalai Lama as their spiritual head. In former times, China exchanged presents with Bhutan, but did not establish effective suzerainty.

For some 250 miles Bhutan dominates a tract of land, singularly rich and fertile, situated partly in Bengal and partly in Assam, known as the 'Eighteen Duars' ("Duar" being a "door" or "pass".) This area and what is now the State of Cooch Behar formed the traditional happy hunting-ground of Bhutanese free-booters. Indeed it was the forcible abduction of the Cooch Behar Raja and his brother that led indirectly to the first intercourse between 'John Company' and Bhutan. This Bhutanese aggression was followed by a small successful expedition under a Company Officer. This led the then Tashi Lama (who was also Regent of Tibet) to address a friendly letter to Warren Hastings, interceding on behalf of the erring Bhutanese. Warren Hastings immediately responded by deputing Bogles 'Good-will Mission'. Bogle travelled via Bhutan, and en route established cordial relations there (1774). These continued till 1792. In that year Nepal invaded Tibet. The Chinese suspected that the Bengal authorities had engineered this invasion, and by their influence induced the Bhutanese to shut the door.

The suspicion and hostility thus engendered was accentuated, when the Company, extending its influence to Assam, on the expulsion of the Burmese (1825), became heir to the uneasy relations existing between the Assamese and Bhutan: conditions prevailed comparable with those in the Derajat on the Waziristan border at their worst. Between 1837 and 1864, thirty cases of plundering occurred, and at least 25 Indians were known to have been carried off into slavery. Meanwhile 50 outrages were committed in Cooch Behar territory (one involving over Rs. 20,000 worth property), and 69 residents of the state were kidnapped.

The Indian Mutiny of 1857 served to postpone settlement. An envoy (Mr. A. Eden) sent in 1863, charged with proposals of a conciliatory character, but instructed to demand the return of all captives and plundered property and security for the future peace of the frontier, was insulted in open Darbar and put under duress. The Bhutan War of 1864 led to the conclusion of the Treaty of Sinchula in January, 1866. Bhutan ceded in perpetuity the whole of the 18 Duars and in return received a subsidy of Rs. 50,000 a year.

Since that date relations with Bhutan have been excellent, and the bonds between Bhutan and India have grown closer, until finally, in 1910, in return for an increase in the subsidy of Rs. 50,000 paid under the Sinchula Treaty to Rs. 1,00,000, that treaty has been amended to include a provision that Bhutan's foreign relations should be controlled by the British Government at the same time undertaking to exercise no interference in the internal administration of Bhutan. Under another agreement the Bhutan Government has undertaken to remove all liquor shops from within a 10-mile zone of the British District borders in return for an annual compensation of Rs. 1,00,000. In 1907 the leading chief of Bhutan, Tongsa Penlop Ugen Wangchuk was elected by the unanimous votes of Bhutan Chiefs and a number of monks as hereditary Maharaja of Bhutan. He was succeeded in 1926 by his eldest son now his Highness Maharaja Sir Jigme Wanchuk K.C.S.I., K.C.I.E.

Railways to India.

The prospect of linking Europe and Asia by a railway running eastwards through Asia Minor has fascinated men's minds for generations. The plans suggested have, owing to the British connection with India, always lain in the direction of lines approaching India. More than 50 years ago a Select Committee of the House of Commons sat for two years to consider the question of a Euphrates Valley railway. The Shah of Persia applied to the British Foreign Office for the investment of British capital in Persian railway construction many years before the end of the nineteenth century. A proposal was put forward in 1890 for a line of 1,000 miles from Cairo and Port Said to Koweit, at the head of the Persian Gulf. While these projects were in the air, German enterprise stepped in and made a small beginning by constructing the Anatolian railway system. Its lines start from Scutari, on the southern shore of the Bosphorus, opposite Constantinople, and serve the extreme western

end of Asia Minor. And upon this foundation was based the Turkish concession to Germans to build the Baghdad Railway.

Meanwhile, Russia was pushing her railway from various directions into the Central Asian territory running along the northern frontiers of Persia and Afghanistan to the borders of Chinese Turkestan. The construction of a Trans-Persian railway, connecting India, across Persia, with the Russian lines between the Black Sea and the Caspian Sea came to the forefront after the conclusion of the historic Anglo-Russian agreement regarding Persia.

The Germans pushed forward their Baghdad railway project with a calculating shrewdness arising from their estimate of the value it would possess in their grand aim to overthrow the British Empire. The outbreak of the great war and the success of the Germans in inveigling Turkey into it saw the final stages of the construction of the railway pressed forward with passionate energy. Thus, before the overthrow of the Turks and Germans in Asia Minor and of the Germans in France the railway was completed and was in use from Scutari across Anatolia, over the Taurus Mountains to Aleppo and thence eastward across the Euphrates to a point between Nisbin and Mosul. The Germans had also by that time constructed a line to Baghdad at the eastern end of the route, northwards from Baghdad to a point a considerable distance beyond Samara.

The war compelled the British to undertake considerable railway development northward from Basra, the port at the mouth of the Shat-el-Arab, the broad stream in which the Tigris and Euphrates, after their junction, flow into the head of the Persian Gulf. The system consists of a metre-gauge line from Basra *via* Nasirieh, on the Euphrates, thence northwards to Baghdad, the line passing a considerable distance westward to Kut-el Amara, of historic fame. From Baghdad the line runs eastward approximately to the foot of the pass through which the Persian road crosses the frontier of that country. A line branches off in the neighbourhood of Kifri in the direction of Mosul. It has for some time been open as far as Kirkuk, 200 miles northward of Baghdad and 112 miles southward of Mosul. Similarly, the Taurus railway has long been open eastward of Aleppo as far as Tel Kochek, on the Syrian frontier, a few hours' road motor run, north-west from Mosul. Through passenger services between Iraq and Istanbul are run, a road motor service is linking the railway termini at Kirkuk and Tel Kochek. The gap in the railway has now been closed, and through communication was established at the end of 1940. A line also runs westward from Baghdad to Feluja, on the Euphrates.

The Trans-Persian line to join the Russian Caucasian system and the Indian railways first assumed proportions of practical importance in the winter of 1911. Both the Russian and the Indian railway systems were by then well developed up to the points likely to be the termini of a Trans-Persian line. The Russian system reached Julfa, on the Russo-Persian frontier in the Caucasus. During the war this line was carried thence southward into the region east and south-east of Lake Urumia. The Indian railway system, on the borderland of India and Persia, was similarly much extended and improved during the war. A new agreement which was negotiated between England and Persia specially provided for British assistance in the development of Persian natural resources and particularly for the extension and improvement of Persian roads suitable for motor traffic, but the agreement came to naught.

A railway connection between the Indian and the Russian systems has again assumed considerable importance after the German attack of Russia and the alignment of Britain, India and Russia along with other democracies like China and U.S.A. against the aggression of Germany and Japan. With the whole of the European west coast under German control or domination and the eastern shores of Siberia rendered unapproachable by the Japanese, the only route which British and Indian supplies to Soviet Russia can take is *via* Iran. The Quetta-Nushki line which had been extended during the last Great War upto Duzdap (or Zahidan) in Persia had been put out of use afterwards beyond Nok-kundi. This is again being set in order but it is not known upto the time of writing whether through rail connections are being arranged to the Soviet front in Caucasia from either the Persian Gulf or British Baluchistan in India.

There also remains the possibility of linking the Russian and Indian railway system by way of Afghanistan. The suggestion has often been made in recent years that the Russian line from Merv to Herat, on the northern frontier of Afghanistan, should be linked to the Indian line which proceeds from Quetta to the Afghan border on Chaman. The completion of a broad-gauge line extending the Indian railway system through the Khyber Pass to Landi Khana, at its western extremity, opens a prospect of further possible rail connections with Afghanistan.

The main interests behind Iranian railway communications had hitherto been the replacement of mule tracks by rail roads, providing convenient rail connections between the posts in Persian Gulf and the interior to develop import and export trade and to give thorough connections between the different countries all round Iran. The Iranian railways have, however, assumed special importance of late on account of supplies from the allies to U.S.S.R. through Iran.

The Fighting Forces

(Indian Army)

The great sepoy army of India originated in the small establishments of guards, known as peons, enrolled for the protection of the factories of the East India Company; but sepoys were first enlisted and disciplined by the French, who appeared in India in 1665. Before this detachments of soldiers were sent from England to Bombay, and as early as 1665 the first fortified position was occupied by the East India Company at Armagon, near Masulipatam. Madras was acquired in 1640, but in 1654 the garrison of Fort St. George consisted of only ten men. In 1661 Bombay was occupied by 400 soldiers, and in 1668 the number was only 285 of whom 93 were English and the rest French, Portuguese and Indians.

After the declaration of war with France in 1744 the forces were considerably increased, but this did not prevent the French capturing Madras in 1746. Following the French example, the English raised considerable sepoy forces and largely increased the military establishments. In 1748 Major Stringer Lawrence landed at Fort St. David to command the forces of the Company. The English foothold in India was then precarious and the French under Dupleix were contemplating fresh attacks. It became necessary for the English Company to form a larger military establishment. The new commandant at once set about the organisation and discipline of his small force, and the garrison was given a company formation. This was the beginning of the regular Indian Army of which Lawrence subsequently became Commander-in-Chief. In Madras the European companies were developed into the Madras Fusiliers; similar companies in Bengal and Bombay became the 1st Bengal and 1st Bombay Fusiliers. The native infantry were similarly organised by Lawrence and Clive. By degrees Royal Regiments were sent to India, the first being the 39th Foot, which arrived in 1754.

Struggle with the French.—From this time for a century or more the army in India was engaged in constant war. After a prolonged war with the French, whom Dupleix had by 1750 raised to the position of the leading power in India, the efforts of Stringer Lawrence, Clive, and Eyre Coote completed the downfall of their rivals, and the power of England was established by the battle of Plassey in Bengal; and at Wandewash in Southern India, where the French were finally defeated in 1761. A number of independent States, owning nominal allegiance to the Emperor at Delhi, had risen on the decline of the Mughal Empire, some ruled by Mahratta Princes and others by Musalman adventurers such as Hyder Ali of Mysore. A prolonged struggle ensued with the latter and his son and successor Tipu Sultan, which ended only with the defeat and death of Tipu and the capture of Seringapatam in 1799.

Reorganisation of 1796.—In 1796 the Indian armies, which had been organised on the Presidency system, were reorganised. The European troops were 13,000 strong and the Indians numbered some 57,000, the infantry being generally formed into 75 regiments of two battalions each. In Bengal, regiments were formed by linking existing battalions of ten companies each with large establishments of English officers. The Madras and Bombay armies were at the same time reorganised on similar lines, and cavalry and artillery companies were raised.

In 1798, the Marquis of Wellesley arrived as Governor-General, firmly imbued with the necessity of destroying the last vestiges of French influence. In pursuance of this policy he reduced Mysore, where Tipu was intriguing with the French, and then turned his attention to the Mahratta States, in which Sindhia had established power over the Mughal Emperor at Delhi by means of a large regular army officered by Europeans under the French adventurer Perron. In campaigns against Sindhia in Hindustan by a British Army under General Lake, and in the Deccan against that prince and the Raja of Berar by an army under General Wellesley, afterwards Duke of Wellington, the power of these Chiefs was broken in the battles of Laswari and Assaye. French influence was finally destroyed, and the Mughal Emperor was released from the domination of the Mahrattas. Subsequently Holkar also was reduced, and British power established on a firm footing.

Mutiny at Vellore.—The Indian Army had been from time to time subject to incidents of mutiny which were the precursors of the great cataclysm of 1857. The most serious of these outbreaks occurred at the fort of Vellore in 1806 when the native troops suddenly broke out and killed the majority of the European officers and soldiers quartered in the fort, while the striped flag of the Sultan of Mysore, whose sons were confined there, was raised upon the ramparts. The mutiny was suppressed by Colonel Gillespie, who galloped over from Arcot at the head of the 19th Light Dragoons, blew in the gate of the fort, and destroyed the mutineers. This retribution put a stop to any further outbreaks in the army.

Oversees Expeditions.—Several important overseas expeditions were undertaken in the early part of the nineteenth century. Bourbon was taken from the French; Ceylon and the Spice Islands were wrested from the Dutch, and Java was conquered in 1811 by a force largely composed of Bengal troops which had volunteered for this service.

In 1814, the Nepal War took place in which the brave Gillespie, who had distinguished himself in Java, was killed when leading the assault on the fort of Kalunga. The Gurkhas were overcome in this war after offering a stout resistance.

In 1817, hostilities again broke out with the Mahrattas, who rose against the British during the progress of operations against the Pindaris. Practically the whole army took the field and all India was turned into a vast camp. The Mahratta Chiefs of Poona, Nagpur, and Indore rose in succession, and were beaten, respectively, at Kirkee, Sitabaldi, and Mehidpur. This was the last war in Southern India. The tide of war rolled to the north never to return. In the Punjab, to which our frontier now extended, our army came into touch with the great military community of the Sikhs.

In 1824, the armies were reorganised, the double-battalion regiments being separated, and the battalions numbered according to the dates they were raised. The Bengal Army was organised in three brigades of horse artillery, five battalions of foot artillery, two regiments of European and 68 of Indian infantry, 8 regiments of regular and 5 of irregular cavalry. The Madras and Bombay armies were constituted on similar lines, though of lesser strength.

First Afghan War and Sikh Wars.—In 1839, a British Army advanced into Afghanistan and occupied Cabul. There followed the murder of the British Envoys and the disastrous retreat in which the army perished. This disaster was in some measure retrieved by subsequent operations, but it had far-reaching effects on British prestige. The people of the Punjab had witnessed these unfortunate operations, they had seen the lost legions which never returned, and although they saw also the avenging armies they no longer regarded them with their former awe. Sikh aggression led to hostilities in 1845-46, when a large portion of the Bengal Army took the field under Sir Hugh Gough. The Sikhs were defeated after stubborn fights at Mudki and Ferozeshahr, the opening battles, but did not surrender until they had been overthrown at the battles of Aliwal and Sobraon. Two years later an outbreak at Multan caused the Second Sikh War when, after an indecisive action at Chilianwala, our brave enemies were finally overcome at Gujerat, and the Punjab was annexed. Other campaigns of this period were the conquest of Sind by Sir Charles Napier, and the Second Burmese War, the first having taken place in 1824.

The conquest of the Punjab extended over the frontier to the country inhabited by those turbulent tribes which have given so much trouble during the past sixty years while they have furnished many soldiers to our army. To keep order on this border the Punjab Frontier Force was established, and was constantly engaged in small expeditions which, while they involved little bloodshed, kept the force employed and involved much arduous work.

The Indian Mutiny.—On the eve of the mutiny in 1857 there were in the Bengal Army 21,000 British and 137,000 Indian troops; in the Madras Army 8,000 British and 49,000 Indian troops; and in Bombay 9,000 British and 45,000 Indian troops. The proportion of Indian to British was therefore too large for safety. The causes of the mutiny were many and various. Among these were the annexation policy of Lord Dalhousie, especially that of Oudh from which the greater part of the Bengal Army was drawn; interference with the privileges of the sepoy with respect to certain allowances; and lack of power on the part of commanding officers either to punish or reward. The final spark which fired the revolt was the introduction of a new cartridge. The muskets of those days were supplied with a cartridge in which the powder was enclosed in a paper cover, which had to be bitten off to expose the powder to ignition. In 1857 a new cartridge was introduced with paper of a glazed texture which it was currently reported was greased with the fat of pigs and cows, and therefore unclean alike for Mahommedans and Hindus. This was interpreted as an attempt to destroy the caste and the religion of the sepoys. Skilful agitators exploited this grievance, which was not without foundation, and added reports that flour was mixed with bone-dust and sugar refined with the blood of oxen.

Disaffection culminated in mutiny at Berhampur and in an outbreak at Barrackpore where sepoy Mangal Pande attacked a European officer. The next most serious manifestation was the refusal of men of the 3rd Bengal Cavalry at Meerut to take the obnoxious cartridge. These men were tried and sentenced to long terms of imprisonment, their fetters being riveted on parade on the 9th May. Next day the troops in Meerut rose, and, aided by the mob, burned the houses of the Europeans and murdered many. The troops then went off to Delhi. Unfortunately there was in Meerut no senior officer capable of dealing with the situation. The European troops in the place remained inactive, and the mutineers were allowed to depart unmolested to spread the flames of rebellion.

Delhi is the historic capital of India. On its time worn walls brood the prestige of a thousand years of Empire. It contained a great magazine of ammunition. Yet Delhi was held only by a few Indian battalions, who joined the mutineers. The Europeans who did not succeed in escaping were massacred and the Delhi Emperor was proclaimed supreme in India. The capital constituted a nucleus to which the troops who revolted in many places flocked to the standard of the Mughal. An army was assembled for the recovery of Delhi but the city was not captured until the middle of September. In the meantime mutiny had spread. The massacres of Cawnpore and Jhansi took place, and Lucknow was besieged until its relief on the 27th September. The rebellion spread throughout Central India and the territory that now forms the Central Provinces, which were not recovered until Sir Hugh Rose's operations in 1858 ended in the defeat of the Rani of Jhansi.

Minor Campaigns.—During the period until 1879, when the Second Afghan War began, there were many minor campaigns including the China War of 1860, the Ambeyla Campaign, and the Abyssinian War. Then followed the Afghan War in which the leading figure was Lord Roberts. There were expeditions to Egypt and China, and Frontier Campaigns of which the most important was the Tirah Campaign of 1897. There were also the prolonged operations which led up to or ensued upon the annexation of Burma, several campaigns in Africa, and the expeditions to Lhasa. But until 1914, since the Afghan War, the army of India, except that portion of the British garrison which was sent to South Africa in 1899, had little severe fighting, although engaged in many arduous enterprises.

Reorganisation after the Mutiny.—In 1857 the East India Company ceased to exist and their army was taken over by the Crown. At this time the army was organised into three armies, *viz*: Bengal, Bombay and Madras, the total strength being 65,000 British and 140,000 Indian troops.

Several minor re-organisations took place during the following years, such as the linking of three Regiments together and the raising of Class Regiments and Companies. In 1895 the next large reorganisation took place. This was the abolition of the three Armies and the introduction of the command system. Four Commands were formed, viz: Punjab, Bengal, Madras and Bombay.

Lord Kitchener's Scheme.—This system lasted until 1904 when under Lord Kitchener's re-organisation the Madras Command was abolished and the Army divided into three Commands—the Northern, Eastern and Western, corresponding to the Punjab, Bombay and Bengal Commands.

In 1907, Lord Kitchener considered that consequent on the delegation of administrative powers to Divisional Commanders, retention of such powers by Lieutenant-Generals of Commands led to delay in the dispatch of business. The Command system was therefore abolished and India was divided into two Armies—the Northern and Southern—each under a General Officer who was responsible for the command, inspection and training of the troops, but was given no administrative responsibilities.

Early in the War both Army Commanders took the field and were not replaced until 1916 and 1917, when both had practically the same functions as their predecessors. It was then realised that administration was being unduly centralised at Army Headquarters and the machinery was becoming clogged with unnecessary details. To secure efficiency at A. H. Q., therefore, a certain measure of decentralisation was carried out in 1918. With the alteration of the designation "Army" to "Command" at this time, a considerable increase was made in the administrative staffs of the two Commands, and the General Officers Commanding were given powers to deal with all administrative questions other than those dealing with matters of policy, and new principles of war.

The commands were increased to four in 1920, each under a General Officer Commanding-in-Chief. One of these, namely Western Command, was abolished on the 1st November, 1938, and replaced by an Independent District.

The Chatfield Committee.—In September, 1938, an announcement was made on behalf of His Majesty's Government, that the outcome of the discussions regarding the role of land and air forces in India in relation to the defence problems of India, and the Empire which had been authorised in March of that year, had been considered by His Majesty's Government.

The need for early action to place the defence organisation of India on a more satisfactory basis was accepted, and, at the suggestion of the Government of India, an expert body of inquiry known as the Chatfield Committee was appointed by His Majesty's Government to visit India.

In the meantime and in the light of the progress made during the discussions that were held in the summer of 1938, His Majesty's Government in September, 1938, made certain offers of assistance, subject to approval of Parliament. These were an increase of £500,000 to the annual grant of £1,500,000 which had been paid to the Government of India, since 1933, in aid of India defence expenditure, a capital grant up to £5,000,000 for the re-equipment of certain British and Indian units in India, and the provision of aircraft for the re-equipment of certain squadrons of the Royal Air Force. It was further agreed that four British battalions should be transferred from the Indian to the Imperial establishment.

The following is the substance of the main recommendations of the Chatfield Committee Report:

Modernised Re-equipment.—The Committee reported that in the interests of Indian defence the whole of the army forces in India should be modernised with only such minor variations as would not affect the general level of efficiency.

The types of modernised units were to be as follows:—

British and Indian Cavalry light tank regiments equipped with light tanks and armoured carriers for reconnaissance;

Indian cavalry armoured regiments equipped with light tanks and armoured cars;

Indian cavalry motor regiments—provided with motor transport for conveyance of the personnel who would be normally on foot;

British and Indian field artillery regiments—all regiments were to be mechanised and in due course equipped with 25 pounder guns;

Sappers and miners units—with mechanised first line transport and mechanical power tools;

British and Indian infantry battalions—armed with rifles, brens and 2 in mortars and fully mechanised first line transport;

Units on the North-Western Frontier would retain a certain proportion of pack mules.

It therefore recommended a thorough-going scheme for re-equipment of all branches of the service. One of the most important features of the modernisation proposals was the mechanisation of the bulk of the cavalry and of the first line transport of a large portion of the infantry with the object of greatly increasing the mobility of the units.

With this end in view the Chatfield Committee recommended that the basis of distribution of the Army in India should be (A) Frontier Defence, (B) Internal Security, (C) Coast Defence, (D) External Defence Troops.

With the increased efficiency and mobility afforded by modernisation it becomes possible to provide equal security with fewer troops, though it has to be recognised that the maintenance costs of a modernised unit are higher. The committee carefully considered these factors in relation to the defence requirements of India and to the need for keeping the maintenance costs of the Army within the compass of what India can afford.

The total reduction of British troops as measured with the establishment on July 1, 1938, was approximately 25 per cent. A reduction in the number of units was also involved.

Supply of Munitions.—The principle that India should as far as possible be made in all major respects self-sufficient in munitions in time of war was accepted, and a scheme for re-organising, and, where necessary, expanding the Ordnance Factories in India was recommended.

Defence Gift to India.—His Majesty's Government have taken full account of the heavy capital cost involved, which has been estimated at some £34,330,000, or Rs. 45 crores. Accepting that this capital expenditure cannot be found out of the resources available in India, His Majesty's

Government have offered to provide it from the Home Exchequer. The sole condition attached to this magnificent gift is that India should bring her defence forces up to the standard of equipment necessitated by modern warfare and adjust her strategical plans to the conditions now obtaining in the world.

It is estimated that a period of five years would be required for the completion of the modernisation plan and the provision of the total capital sum would accordingly be spread over this period. Of the total amount three-quarters would be provided as a free gift while one-quarter would be advanced by way of a loan. The interest on this portion, however, would be entirely remitted for the first five years; thereafter interest would become payable together with instalments of capital.

India's Defence Liabilities.—In estimating India's defence requirements, the Committee had to consider how far the prevailing conceptions as regards India's liability for defence could be held valid in the light of modern conditions. Hitherto the principle has been accepted that India should be responsible for the "minor danger" of the maintenance of internal security and for the defence of her land frontiers, while Great Britain should be responsible for the "major danger" of an attack by a great Power upon India, or upon the Empire through India.

Modern developments have, however, clearly shown how vulnerable India is to attack in other forms than those that were envisaged when the principle was first laid down. Such attacks, if they should ever mature, would so vitally affect India's own well-being that they would demand her immédiate co-operation in effective measures for her defence. In such cases India's defence would clearly be most effectively and economically assured by co-operation in the defence of points outside India strategically essential to her security.

Thus the Committee recommended as a general principle that the forces maintained by India should be adequate not merely for the narrower purposes of purely local defence, but also to assist in maintaining what they described as "India's external security," and further that India should acknowledge that her responsibility could not in her own interests be safely limited to the local defence of her land frontiers and coasts.

It was fully appreciated that the forces maintained by India could only bear a small share in these wider responsibilities, and that she could not necessarily bear in full the cost of such forces as were maintained in India. The committee recommended therefore that the contribution hitherto paid by the British Government should be continued at the higher level of £2,000,000 a year to which it has been provisionally raised by Government.

On this basis it is estimated that it should be possible for India, without enlarging the annual provisions for defence expenditure, to meet the whole maintenance costs of the forces organised and equipped on the scale proposed. From this main principle it follows that if forces held in India for the purposes covered by the joint responsibility are used outside India in an emergency affecting India's external security, their ordinary maintenance charges should continue to be borne by India.

The margin for external defence suggested is one-tenth of the forces maintained in India in the case of the Army.

Present System of Administration.

The essential features of the Army, as constructed on its present basis, will be found in "The Army in India and its Evolution," a publication issued in 1924 with the authority of the Government of India.

The Secretary of State, as one of His Majesty's ministers, has a special responsibility and authority in regard to the Defence administration in India.

The Secretary of State's principal adviser on Indian military affairs is the Secretary in the Military Department of the India Office. The post is filled by a senior officer of the Indian Army with recent Indian experience. The Military Secretary is assisted by one first grade staff officer, selected from the Indian Army. In order that he may keep in touch with the current Indian affairs, the Military Secretary is expected to visit India during the tenure of his office. In addition, by a practice which had obtained for many years, a retired Indian Army officer of high rank used to have a seat upon the Secretary of State's Council, prior to its dissolution.

The superintendence, direction and control of the civil and military government of India are vested in the Governor-General in Council, who is required to pay due obedience to all such orders as he may receive from the Secretary of State. The Viceroy's Executive Council exercise in respect of Defence administration the same authority and functions as they exercise in respect of other departments of the Government; in the first phase of the representative institutions conferred upon India by the Montagu-Chelmsford Reforms Scheme, Defence expenditure and the direction of Defence policy have been excluded from the control of the Indian Legislature.

The Commander-in-Chief.—The Commander-in-Chief, besides being a member of the Viceroy's Executive Council is also member of the Council of State. As War Member of the Executive Council he is responsible for the whole of the control of the R.I.N., the Indian Army and the Air Forces while in India Command, as well as the control of the department which administers these services. Below him comes the Secretary to the Government of India in the War Department (War Secretary) who controls the department, and has constitutional right of access to the Governor-General, and the right to call for papers on any subject assigned to his department (which includes all the subjects dealt with at Defence Headquarters).

The War Department deals with all army services proper, and also the administration of the Royal Indian Navy and the Air Forces in India, in so far as questions requiring the orders of the Government of India are concerned. It deals also with all questions connected with the administration of Ecclesiastical affairs. The War Department Secretariat has no direct relations with commanders of troops or the staffs of formations subordinate to General Headquarters. The Army administration is represented in the Legislature by the War Member in the Council of State and by the War Secretary in the Legislative Assembly.

In 1941 when India assumed considerably wider responsibility for the actual conduct of the war, a Defence Consultative Committee of both the Central Indian legislatures and the National Defence Council was created, on which, besides members of the Legislature, representatives of the States and other public men agreed to serve. The National Defence Council has since been abolished.

South East Asia Command.—A new command, South East Asia Command, was formed in November, 1943. Formerly at New Delhi, the headquarters of SEAC was later transferred to Kandy, Ceylon and then to Singapore. Important formations which have been operating under SEAC include the East Indies Fleet, Allied Air Command, 12th and 14th Armies. Admiral Lord Louis Mountbatten is the Supreme Allied Commander.

Regular British Forces in India.

The British Armoured, Artillery and Infantry divisions of the army in India are units of the British service. No individual British service unit is located permanently in India. Units of the British Army are detailed for a tour of foreign service, of which the major part is as a rule spent in India. In the case of British infantry battalions the system is that one battalion of a regiment is normally on home service while the other is overseas. This of course does not apply in war time. Various units of the Royal Armoured Corps and the Royal Artillery also carry out tours of duty in India.

The Indian Army.

The Indian Army is divided into numerous Arms of the service, in just the same way as the British Army.

The Indian Armoured Corps—Was formed from the Indian Cavalry Regiments, and many new Regiments have been raised. The first unit was mechanised in January 1940 and general mechanisation began between October 1940 and January 1941. The Regiments are organised in a variety of ways, depending on their role, and are divided into Indian Armoured Regiments, Indian Armoured Car Regiments, Divisional Reconnaisance Regiments, Indian Motorised Regiments and Frontier Armoured Regiments. The majority of the tank and armoured car crews of the Indian Armoured Corps are now Indians. The men are drawn from every community and they are provided with heavy, medium and light tanks, armoured cars and carriers and trucks.

The Indian Artillery.—Is divided into a number of branches, the most famous of which is the Mountain Artillery. There is also Field Artillery, Anti-Tank Artillery, light and heavy Anti-Aircraft Artillery and Coast Defence Artillery.

The Corps of Indian Engineers.—Is normally divided into the Sapper and Miner groups and the Military Engineer Service. There are now many other branches, such as Bridging Units and Bomb Disposal Units, Works Service (Construction) and Works Service (E. & M.) Groups, Railway and Inland Waterways Transportation Groups. There are three Sapper and Miner groups: Queen Victoria's Own Madras Sappers and Miners, King George V's Own Bengal Sappers and Miners, The Royal Bombay Sappers and Miners.

The Corps of Indian Mechanical and Electrical Engineers.—Counterpart of the Royal Mechanical and Electrical Engineers in the British Service, this was formed in May 1943, to take over the engineering functions and technical personnel hitherto controlled by the I.A.O.C.

The Indian Signal Corps.—The Corps is organised on the same lines as a Sapper and Miner Corps, with headquarters for recruiting and training personnel, and detached field units for the various army formations. The head of the corps is the Signal Officer-in-Chief in the General Staff Branch at G. H. Q. He acts as a technical adviser on questions connected with signals, and is also responsible for the technical inspection of all signal units. A chief signal officer with similar functions is attached to the headquarters of each Army Command. The British portion of the Corps has now been amalgamated with the Royal Corps of Signals.

The Indian Infantry.—During 1945 several changes took place in the designation and titles of Indian regiments, the most important being the change in title of the 4th Bombay Grenadiers which became the Indian Grenadiers and the 19th Hyderabad Regiment which was renamed the Kumaon Regiment. All other India regiments with the exception of the Punjab Regiments dropped their numerical designations.

Thus the regiments of the Indian Army now read: The 1st Punjab Regiment; The 2nd Punjab Regiment; The Madras Regiment; The Indian Grenadiers; The Mahratta Light Infantry; The 8th Punjab Regiment; The 5th Jat Regiment; The Baluch Regiment; The Sikh Regiment; The Frontier Force Regiment; The Frontier Force Rifles; The 14th Punjab Regiment; The 15th Punjab Regiment; The 16th Punjab Regiment; The Dogra Regiment; The Royal Garhwal Rifles; The Kumaon Regiment; The Assam Regiment; The Bihar Regiment; The Mahar Regiment; The Ajmer Regiment; The Sikh Light Infantry; The Chamar Regiment and ten regiments of the Gurkha Rifles.

The number of Battalions in each Regiment varies. Parachute Battalions were raised in the early part of 1942 and are organised on similar lines to the Indian Infantry.

As a result of experience gained during the war, two regiments of the Indian Army are to become machine gun regiments. The two regiments which have been chosen are the 14th Punjab and the Mahar Regiments.

Royal Indian Army Service Corps.—The Royal Indian Army Service Corps is the counterpart of the Royal Army Service Corps of the British Army. It has developed from the Commissariat Department of an earlier period, and its immediate predecessor was the Supply and Transport Corps, by which name the service was known up to 1923. The Royal Indian Army Service Corps which is under the control of the Quartermaster-General, is constituted in three main branches, namely: (*a*) Supply, (*b*) Animal transport, and (*c*) Mechanical Transport.

Apart from units and vehicles employed in the conveyance of military stores, the mechanical transport service also provides motor ambulance convoys for hospitals, animal transport ambulance sections and field medical units and vehicles for other miscellaneous purposes.

The mechanical transport was taken over by the Royal Indian Army Service Corps in 1927. The Officers for the service were mainly drawn from the Royal Army Service Corps, and by transfers from both British and Indian units.

Medical Services.—The military medical services in India are composed of the following categories of personnel and subordinate organisations:—

(*a*) Officers and other ranks of the Royal Army Medical Corps serving in India.
(*b*) Officers and other ranks of the Army Dental Corps.
(*c*) Officers of the Indian Army Medical Corps. This Corps came into existence on April 3rd, 1943 and is organised on the lines of the R.A.M.C. It embodies all members of the I.M.S., the I.M.D. & I.H.C.
(*d*) I. M. S.
(*e*) Queen Alexandra's Imperial Military Nursing Service.
(*f*) The Queen Alexandra's Military Nursing Service for India.
(*g*) The Indian Military Nursing Service.
(*h*) The Auxiliary Nursing Service.

Of these categories, the officers and men of the Royal Army Medical Corps and the Army Dental Corps, the assistant surgeons of the Indian Medical Department (I. C.) and the Queen Alexandra's Imperial Military Nursing Service and the Queen Alexandra's Military Nursing Service for India are primarily concerned with the medical care of British troops; while the Indian Army Medical Corps and the Indian Military Nursing Service are concerned, primarily, with the medical care of Indian troops.

Indian Army Ordnance Corps.—This Corps is the equivalent of the Royal Army Ordnance Corps in the British Army. It is divided into two section, Stores and Workshops. The former deals with the issue and repair of equipment, arms and ammunition, while the latter is responsible for the repair and maintenance of mechanical transport.

INDIAN ARMY CORPS OF CLERKS.

For the efficient administration of the Indian Army, much depends on the Indian Army Corps of Clerks, who form in the main the clerical staff of Army Commands, Districts and various military establishments in India.

With the outbreak of World War II a vast expansion took place, when the peace-time strength of 800 all ranks, equally divided into two wings, British and Indian, was increased.

Wherever the Indian Army fought, men of this Corps were with them.

Veterinary Services in India.—The Veterinary services are responsible for the veterinary care, in peace and war, of animals of British troops, Indian cavalry and artillery, R.I.A.S.C. units, the remount department (excluding horse-breeding operations), etc. The veterinary services include: The establishment of Royal Army Veterinary Corps officers, serving on a tour of duty in India and those of the continuous service cadre. The establishment of warrant and non-commissioned officers, India Unattached List, and veterinary assistant surgeons of the Indian Army Veterinary Corps.

Educational Services.—The education of the army is under the control of the Army Educational Corps and of Indian officers borne supernumerary to the establishment of units of the Indian Army.

Military Farms Department.—This department, which is under the control of the Quartermaster-General consists of two branches:-

(I) The military grass farms, which provide fodder for the army.

(II) The military dairy farms, for the provision of dairy produce for hospitals, troops and families.

Frontier Militia and Levy Corps.—These forces are "Civil" troops, *i.e.*, they are administered and paid by the Civil authorities and not by the Army. They are, however, officered by Officers of the Regular Indian Army. These forces were raised for duty on the North-West Frontier.

Air Forces in India Command.

The Air Forces in India Command are controlled by the Commander-in-Chief in India as part of the defence services of the British Commonwealth. The Air Force budget is incorporated in the Defence Services estimates. The Air Officer Commanding-in-Chief in India is an Air Marshal whose rank corresponds to that of a Lieutenant General in the Army.

The Royal Indian Air Force had its origins in the recommendations of the Skeen Committee in 1926. Six years later the Indian Air Force Act was passed by the Indian Legislature and the first flight was formed in April, 1933. From that first flight, with its three aeroplanes and six pilots trained at the R.A.F. College Cranwell, has grown a Service which, by the end of 1945, should have ten squadrons and an anti-aircraft co-operation unit, a force equivalent in aircraft strength to thirteen squadrons.

Training Facilities.—These have expanded throughout the length and breadth of India, covering all phases of instruction for flying and ground personnel. The expansion during the last three years has been phenomenal. Training is of the same high standard as in the R.A.F. Provided with some of the latest equipment and under the able guidance of highly skilled instructors, technical schools are turning out first-class mechanics who are not only absorbed into the R.I.A.F. but are also working side by side with R.A.F. personnel in India.

I.A.T.C.—Early in 1943 the Indian Air Training Corps was inaugurated and is now functioning at all the 19 Indian Universities including three Universities in the Indian States.

Students in India have now an opportunity for preparing and training for a career in the flying branch of the Indian Air Force while they are at their regular studies. At the end of the training which this scheme offers it is left to them to decide for themselves whether they wish to join the Service.

During the training, candidates not only receive instruction on ground subjects such as theory of flight, aircraft recognition, aero engines, etc., but also experience of at least three hours flying, approaching more closely to service conditions.

Trained originally for Army Co-operation work, Indian pilots had their first operational experience over the difficult flying country of the North-West Frontier. They shared with the R.A.F. the duty of policing tribal territory until the summer of 1941 when they took over the work completely. Several pilots have been mentioned in despatches and one has been awarded the D.F.C.

On the outbreak of war in 1939 the Indian Air Force Volunteer Reserve, together with a number of R.A.F.V.R. officers resident in India, was formed for the purpose of guarding India's coasts and keeping the shipping lanes open. It did this with conspicuous success until the end of 1942 when it was embodied in the R.I.A.F.

During the Burma campaign in 1942 the R.I.A.F had its first experience of operations against a major power, No. 1 Squadron earning a special message of congratulation from the Commander-in-Chief, Field-Marshal Sir Archibald Wavell. Its commanding officer won the D.F.C. Nos. 3 & 6 Coast Defence Flights also operated with success in Burma.

R.I.A.F. Squadrons—From November 1943 upto the end of the Burma Campaign full use was made, for the first time of R.I.A.F. squadrons in offensive operations. The main weight of the battle effort has been felt by the Japanese on the Arakan front. The R.I.A.F. also distinguished itself during the Imphal siege and supported the eventual victorious advance into Burma.

Equipped with Spitfires and Hurricanes, squadrons of the R.I.A.F. have been operating continuously on the Burma front. Their particular duties include the attack on enemy troops and supply dumps and lines of communication, tactical and photographic reconnaissance, close support to the army, and fighter and escort work with supply-dropping aircraft.

Besides operating as complete squadrons and units with Eastern Air Command in Burma there are thousands of ground crews, technicians and airmen of all trades working with R.A.F. units all over India.

On March 12, 1945 His Majesty the King approved the designation of "Royal" as a prefix to the Indian Air Force in recognition of the work done during the short history of India's own Air Force.

The Government of India have recently decided to maintain the Royal Indian Air Force after the war at an initial strength of not less than 10 squadrons plus the necessary training and other ancillary units required to provide a fully balanced force and to ensure adequate scope for a career to the permanent personnel of all ranks. This is only an initial minimum strength which will be expanded as rapidly as conditions permit and as personnel becomes available.

Indian Army Expansion.—The Government of India announced their decision, in June, 1940, to expand the Indian Army by an initial increase of 100,000 men to be armed and equipped as a modern field army, subsequent increases to be governed by the military situation and the capacity of the authorities to equip those recruited. The 8 unit—and later the 21 unit—complete Indianisation scheme was abandoned and the whole Indian Army is now being supplied with officers, Indian and European, wherever they can be obtained. Since then various other expansions have been announced and the total of India's armed forces is now over two million.

During 1940 the financial settlement with His Majesty's Government enabled the mobilization and development of India's resources for war to be expanded with the utmost rapidity and the cost to the Indian taxpayer, according to the Finance Member, represented no more than a fair charge to India for her own requirements. In addition to her contributions to the conduct of the war on many fronts, India reached the stage when virtual self-sufficiency in matters of local defence was no longer a distant dream. When the war began India's main assets were an enormous supply of man power and an abundance of raw materials. In the first twelve months of war she became a producer of a great range of manufactured stores.

Schemes for the expansion of the armed forces had to depend on the availability of supply both from the United Kingdom and other overseas sources and from the development of Indian industries, but by November 1940 the Finance Member was able to announce that the country was engaged in producing as a first step and in a comparatively short time an army of close upon half a million men of all arms, properly trained, equipped and mechanized according to modern standards.

Schools for advanced training in all branches of military knowledge and in the use of new weapons have been vastly increased. During 1941 and 1942 the infantry and artillery had again increased their remarkable expansion of the first 15 months of war, particularly the anti-aircraft units. The artillery as a whole expanded by a further 200 per cent from the beginning of 1941, the R.I.A.S.C. motor transport units some 500 per cent and the Indian Engineers to ten times their previous strength. Expansion in the training of Sapper and Miner and other technical troops has been equally striking.

India's two million volunteer Army continued to expand in 1944 and 1945, but with the end of the war in August, demobilisation of this vast force began.

DEMOBILISATION OF INDIAN FORCES.

Following the signing of the Armistice in August, 1945, plans for the demobilisation of the Indian Army were soon announced. These plans were, of necessity, of an interim nature as until situations in various recovered territories became clear, requirements for occupation duties could not be properly assessed. However, an approximation was made and the Government of India proceeded with the initial stages of demobilisation in mid-September.

It was at once clear that the majority of Viceroy's Commissioned Officers, other ranks and enrolled non-combatants would wish to continue service but against this desire a very considerable reduction was necessary to bring the Army down to the numbers required for immediate post-war needs. The initial surplus amounted to 850,000 men of whom approximately 130,000 were recruits no longer required as reinforcements to maintain the forces in the field.

At first it was decided that the first process of demobilisation should be spread over eight months and the "target date" for the release of 850,000 men was fixed for May 31st, 1946. But as certain units were not being disbanded fast enough to provide men for demobilisation, this date was put back to July 31st. By the end of April, 1946, a total of 569,990 men had been released from the Indian Army.

Women's Auxiliary Corps (India).—The Women's Auxiliary Corps (India) was formed in April 1942 with the object of releasing men for work in forward areas. British, Indian and Anglo-Indian women undertook a variety of work ranging from staff and administrative appointments to technical work with all three fighting services. In February 1944, a Naval Wing was formed for personnel serving with the R.I.N. Training of recruits was carried out in three large training centres and officers received their instruction at O.C.T.U., Officers' School and Staff College. Service was entirely voluntary and for the duration of the war or for as long as service was required. The Corps will be disbanded on 1st April 1947.

India's War Production.—The development of India's equipment position was phenomenal, and her own war production capacity was so far developed that she was able to supply her armies with a large part of their weapons and equipment, as well as contingents overseas. Up to V-J day, approximately 2,48,000 chassis of nearly 30 different types were assembled in 5 plants in India. About 2,02,000 bodies of 50 different types were built mainly with Indian material and Indian labour. Over 7,000 armoured bodies were produced in various railway workshops. Progress was made in the manufacture of armoured plate and armoured fighting vehicles were satisfactorily produced. Various new types of small arms ammunition and artillery ammunition came from the ordnance factories and about 620 million rounds of small arms ammunition were repacked for U.S. Army Forces during the 5th and 6th years of war. Probably the greatest advances were made in the supply of clothing and equipment. In the first four years of the war, the output of tailored items rose to a peak of over 12 million items. Nearly 40 million boots, chappals and canvas rubber shoes were produced up to the end of 1945. A considerable quantity of these were sent overseas both to the Middle East and other theatres of war. Over 13½ million blankets, 48 million pairs of woollen socks, 28½ million cotton shirts, 12¼ million pairs of drill trousers were produced. The production of rifles in India during the war was nearly 574,000. Over 80 items of ammunitions including light machine guns, bayonets, guns and carriages were produced in India's factories. Among other important items of armament stores which were produced in quantity were Bren gun tripods, anti-airer ft gun sights, binoculars, stereoscopes, clinometers and telescopes. Mention must also be made of the production of trawlers and assault crafts which played a great part during the Burma campaign.

Indian Officers' Pay.—A radical change was made during 1945 in the pay of Indian Commissioned Officers. With effect from November 1, 1944, I.C.O.'s became entitled to receive, as a wartime measure, the basic pay of rank and lodging allowance admissible to single British officers and a family allowance applicable to married British officers. Thus the pay of I.C.O.'s when serving in India is now the same as that of British officers of the Indian Army less Indian Army allowance. When I.C.O.'s serve overseas they receive expatriation allowance at the rates of Indian Army allowance admissible to British officers of the Indian Army serving overseas.

The Auxiliary Force.

After the Great War of 1914-18, the question of universal training for European British subjects came up for consideration, and it was decided that in India, as elsewhere in the Empire, the adoption of compulsory military service would be undesirable. It was recognised, however, that India needed some adequate auxiliary force, if only on a voluntary basis, that could be trained to a fairly definite standard of efficiency; and in the result, an Act to constitute an Auxiliary Force for service in India was passed in 1920. Under this Act membership is limited to European British subjects, and the liability of members for training and service is clearly defined. Military training is graduated according to age, the more extended training being carried out by the younger members, the older members being obliged to go through a musketry course only. It was laid down that military service should be purely local.

To meet the emergency created by the late war, a bill was introduced in Parliament by the Secretary of State for India, in June, 1940, empowering the Governor-General to conscript European British subjects in India.

The Auxiliary Force comprises all branches of the service, cavalry, artillery, engineer, infantry—in which are included railway battalions, machine gun companies, a Signal Company, and the Medical and Veterinary Corps. Units of the Auxiliary Force are under the command of the local military authority, and the latter has the power of calling them out for service locally in a case of emergency. Their role is to assist in home defence. Training is carried on throughout the year. Pay at a fixed rate is given for each day's training and, on completion of the scheduled period of annual training, every enrolled member of the force is entitled to a certain bonus. Men enroll in the Auxiliary Force for an indefinite period. An enrolled person is entitled to claim his discharge on the completion of four years' service or on attaining the age of 45 years. Till then he can only be discharged on the recommendation of the advisory committee of the area.

Indian Territorial Force.

The Territorial Force is one of the several aspects of the Indianisation of the military services. The force is intended to cater, amongst other things, for the military aspirations of those classes of the population to whom military service has not hitherto been a hereditary profession. It is intended, at the same time, to be a second line to and a source of reinforcement for the regular Indian army. Membership of the force for this latter reason carries with it a liability for something more than purely local service or home defence. It may, in certain circumstances, involve service overseas. The force is the direct successor of the Indian section of the Indian Defence Force created during the Great War of 1914-18. It has been modelled on the old militia in England. The essence of its scheme of organisation consists in training men by means of annual embodiment for a short period in successive years. By this means Indian Territorial Force units can be given sufficient preliminary training in peace to enable them, after a comparatively short period of intensive training, to take their place by the side of regular units in war.

The Indian States Forces.

The Indian States Forces, formerly designated "Imperial Service Troops," consist of the military forces raised and maintained by the Rulers of Indian States at their own expense and for State service. It has been the custom in emergency for State troops to be lent to the Government of India, and the Government of India have on many occasions received military assistance of great value from this source. But the rendering of such aid is entirely at the discretion of the Ruling Princes and Chiefs. Government, on the other hand, provide permanently a staff of British officers, termed "Military Advisers and Assistant Military Advisers," to assist and advise the Ruling Princes in organising and training the troops of their States.

Officers.

Before the war there were three main categories of officers in the Indian Army: those holding the King's Commission, those Indian Commissions and those holding the Viceroy's Commission. The latter are all Indians, apart from the Gurkha officers of Gurkha battalions, and have a limited status and power of command, both of which are regulated by the Indian Army Act and the rules made thereunder.

King's Commissioned Officers were obtained either from the Military Colleges or the Universities in England. Up till 1932 these commissions were open to either Englishmen or Indians.

In 1932 the Indian Military Academy at Dehra Dun was opened to undertake the training of Indian Officers. They were granted Indian Commissions and have identical powers to those of King's Commissioned Officers within the Indian Army.

During the late war, no regular commissions were granted except to those cadets who were already under training when the war began. Instead, Emergency Commissions were given to British candidates and Indian Emergency Commissions to Indians. The Commissions had the same status as Regular Commissions but were limited to the duration of the war and a period thereafter.

Now that the war has ended, Regular Commissions have been re-started. The sources of supply are the Indian Military Academy and selected officers from among those holding Emergency Commissions. It is also expected that the Universities will provide some candidates for Regular Commissions. Only British subjects of Indian nationality are eligible for these commissions.

As an interim measure a limited number of Short Term Commissions are being given to suitable candidates most of whom will be Indian Emergency Commissions Officers. These Commissions are granted for a limited period and are designed to fill the gap between demobilisation of the war commissioned officers and the re-establishment of a full intake of Regular officers from the Military Academy.

Opportunities for promotion to officer status from the ranks will continue to be available.

The King's Indian Orderly Officers.—Since the earliest times Indian officers have been a link between Indian ranks and British officers. These Indian officers hold Viceroy's Commissions, as distinct from the King's Commissions held by British officers and Dehra Dun graduates. They are for the greater part promoted from the ranks. The highest rank is subedar-major in the infantry and artillery regiments, risaldar-major in the cavalry.

Their brilliant full-dress uniforms have one particularly distinctive decoration. The aiguillettes, or gold cords upon the shoulder, are made to a pattern chosen by Edward VII in 1903 for the King's Indian Orderly officers alone.

For this supreme honour, officers are hand-picked from all branches of the Indian Army, specially selected by the Commander-in-Chief himself.

Inheriting a record of service which dates back to the early days of the East India Company, long-serving Indian officers regard these four annual appointments as the supreme honour. The first Indian officers associated with the Sovereign were in command of detachments sent to London for Queen Victoria's Jubilees in 1887 and 1897. It was then realised that some personal link should be maintained between the King-Emperor and the Indian Army.

On January 1st, 1903, the Viceroy issued a General Order announcing certain favours and concessions to the Army in India in connection with Edward VII's Coronation, among them the annual appointment of Indian Orderly Officers.

Six Indian Orderly Officers were appointed in 1903, a number reduced to four in 1904. These four are appointed each year for the London season, from April to August. They attend the King at Courts and Levees, standing near the throne, at all reviews and at such ceremonies as Trooping the Colour. Upon these occasions they appear in full dress. For garden parties and similar engagements they are dressed in grey coats of knee length.

For their services in London, the Orderly Officers receive the Royal Victorian Medal, a souvenir of their supreme honour.

Army in India Reserve of Officers.—Previous to the War of 1914-18 there existed what was called the Indian Army Reserve of Officers, a body of trained officers available to replace casualties in the Indian Army. The war proved that for many reasons this reserve did not fully meet requirements and in 1922 the Army in India Reserve of Officers was constituted.

The revised Regulations for the A. I. R. O. published in 1934 provide that the following gentlemen may be granted commissions in the Reserve:—

(1) Ex-Officers who, having held King's commission in any Branch of His Majesty's British, Indian or Dominion Forces, either naval, military (including the Auxiliary Force (India) and Indian Territorial Force) Marine or Air, have retired therefrom and are no longer liable for service therein, and who are resident in India, Burma or Ceylon.

(2) Civil officials of gazetted status serving under the Government of India or a local Government, whose services can be spared in the event of general mobilization being ordered.

(3) Private gentlemen who are resident in India, Burma or Ceylon.

Ceylon Government officials are not eligible for appointment to the Army in India Reserve of Officers.

Applicants for Category-Medical (includes Dental) must possess a qualification registrable in Great Britain and Ireland under the Medical Acts in force at the time of their appointment.

Dental applicants must possess a qualification registrable in Great Britain and Ireland under the Dentists Acts in force at the time of their appointment.

Applicants for Category-Veterinary must be in possession of the diploma M.R.C.V.S.

India in Great War I

In a despatch by the Commander-in-Chief published in July, 1919, the whole operations of the Indian Army during the war were reviewed. His Excellency gives in it the following figures showing the extent of India's contribution in terms of men. On the outbreak of war, the combatant strength of the Indian Army, including reservists, was 194,000 Indian ranks; enlistments during the war for all branches of the service amounted to 791,000, making a total combatant contribution of 985,000. Of this number, 552,000 were sent overseas. As regards non-combatants, the pre-war strength was 46,000; an additional 427,000 were enrolled during the war and 391,000 were sent overseas. The total contribution of Indian personnel has thus been 1,457,000, of whom 943,000 have served overseas. Casualties amounted to 106,594, which include 36,696 deaths from all causes. The number of animals sent overseas was 175,000.

India in Great War II

India's magnificent contribution in the late war was both substantial and valuable. Units of the R.I.A.S.C. went to France in 1939 and gained particular praise for their courage and bravery in adversity. Indian formations were in action in Syria, Iraq, Iran, British and Italian Somaliland, the Sudan, Eritrea, Hong Kong, Borneo, Malaya and Burma and Italy. The total of her fighting forces reached a strength of more than two million.

Africa.—Essential prelude to the conquest of Hitlerite Europe was the purging of Nazi influence from North Africa. Here, in 1940, assembled an Allied army of which the Fourth and Fifth Indian Divisions were destined to play a leading role.

Against Marshal Graziani's Libyan army of more than 300,000 men, this Allied force under the command of Gen. (now Field-Marshal) Wavell marched into the Western Desert. In the great clash at Nibeiwa they captured the Italian camp, thousands of prisoners and vast quantities of stores. Then came the Italian disaster at Sidi Barrani where, in December, 1940, 20,000 Italians capitulated and Wavell's men swept on to Sollum, Bardia, Tobruk, Derna and Benghazi.

In the meanwhile the Fifth Indian Division was busy with the Italians in East Africa. Early in 1941 this division drove the enemy from Gallabat, Gedaref and Butana Bridge and then, with the Fourth, continued the pursuit deep into Eritrea.

Victories at Barentu and Ad Teclesan paved the way for the triumph at Keren where, after two weeks of bitter fighting, the Italians hoisted the white flag. The Fifth went on to Asmara, Massawa fell and in May, 1941, the Viceroy of Abyssinia surrendered at Amba Alagi.

Back again to the Western Desert went the Fourth and Fifth in June to meet a new menace —Rommel's panzers. Under the command of Gen (now Field Marshal) Sir Claude Auchinleck our forces fought hard but were slowly pushed back to Mersa Matruh. Benghazi was cut off and Tobruk fell.

Many weary months of disappointment followed but at El Alamein in June, 1942, came the turn of the tide. In this, the Fifth's last action before leaving for Iran *en route* to India, the division, on the Ruweisat Ridge, captured about 2,000 prisoners. In October the Allies passed to the offensive at El Alamein. The avalanche had started to come to a halt only on the other side of Africa.

The Germans were rolled back from Egypt, then across Cyrenaica and towards Tripolitania. The new year came and still the retreat continued at the Mareth Line, the enemy's defences crumbled and he retreated still further west. There followed the Fourth's brilliant action in the Wadi Akarit area and the pursuit went on.

Sfax was by-passed, Sousse was occupied in the middle of April, 1943, and at Garci the Germans turned once more to fight—and lost. Soon the Eighth Army linked up with the British First Army and together they burst open the gates of Tunis in May. The Fourth Indian Division played a prominent part in this final action and—a fitting climax to the whole campaign—Gen. von Arnim, who had taken over from Rommel as commander of Axis forces in Africa, was compelled to surrender to the famous Indian formation.

Italian Campaign.—In the liberation of Europe, Indian troops played a worthy part. By their exploits in Italy they proved to the world that the valour of India's arms is second to none. Three famous Indian divisions were concerned in the hard-fought campaign that ended in the capitulation of the Germans.

The Eighth Indian Division came into the line in October, 1943. Before the end of that year it had crossed three rivers: the Biferno, Trigno and Sangro, in the face of severe opposition and after breaking the German winter line, got past the Moro river. The Fourth Indian Division entered the arena in December, 1943, and after a short spell on the Orsogna and Maiella sectors arrived on the Cassino front in February, 1944. Spearheading the American Fifth Army's offensives against Cassino the division fought one of the fiercest battles of the war. In April, 1944, the third of the trio, the Tenth Indian Division took up positions on the Adriatic sector.

When the great offensive against Cassino started in May, 1944, the Eighth was assigned the most vital role, that of crossing the Rapido river, south of the town. After a tremendous effort our forces outflanked Cassino and the enemy stronghold fell. After the capture of Rome the Tenth moved to the Perugia-Tiber area, the Eighth took over the Certaldo-Poggibonsi sector and the Fourth, after clearing Pescara and Chieti, began a drive along the Upper Tiber and Arno valleys in conjunction with the 10th.

The Eighth crossed the Arno river, entered Florence and fought its way to the Sieve valley, the Tenth pushed along the upper reaches of the Tiber and the Fourth moved across to the Adriatic to spearhead the Eighth Army's all-out attack on the Gothic Line, striking the first blow at these redoubtable positions on the Foglia river, capturing Monte Calvo and fighting north, forced a bridgehead through the Marano to enter the citadel of San Marino.

In the breaking of the Gothic Line the remaining two Indian divisions also played a decisive part. In the 5th Army sector the Eighth Division went through Mount Giovi, crossed the Sieve, captured Mount Vernecka and occupied the fortress feature of Femina Morta. While in the mountains overlooking Bologna the Eighth was called upon to help repel the German offensive in the Serchio valley and earned the praise of the Commanding General for their stout-hearted defence.

Meanwhile the Tenth kept moving against stubborn resistance and, going past Pietrolunga and Alpe di Catania, captured M. Filleto. Prior to taking part in the final phases of the campaign the division also captured Farneto.

Early in April, 1945, the Eighth Army crossed the Santerno. By the middle of the month they had smashed through the Argenta gap, Bologna was liberated on April 21 and major elements struck north after crossing the Po. By the end of April the Eighth Army was consolidating on the Paive. Twenty-five German divisions had been smashed and prisoners totalled 120,000.

On the afternoon of April 29, the enemy estimated at nearly one million under the command of Gen. Vietinghoff surrendered unconditionally. The Italian campaign was over.

Praising the *jawan* for his great fight in the Battle of Europe, Lt.-Gen. Mark Clark, Commanding General, Allied Armies in Italy, said "The achievements in combat of these Indian soldiers are noteworthy.....No obstacle has succeeded in delaying them for long or in lowering their high morale or fighting spirit. The Fourth, Eighth and Tenth Indian Divisions will for ever be associated with the fighting for Cassino, the capture of Rome, the Arno Valley, the liberation of Florence and the breaking of the Gothic Line. I salute the brave soldiers of these three great Indian divisions."

Victory in Burma.—The virtual end of the Burma campaign was heralded by the capture of Rangoon in May, 1945.

The road to victory was no easy one. In the spring of 1942 our troops faced annihilation when the Jap hordes swarmed into Burma and forced them, fighting every foot of the way, into Assam itself where they turned at bay and let the enemy's effort spend itself.

There followed weary months of relentless patrolling during which our little army used every dodge to keep the enemy guessing until we had built up sufficient strength to strike back. Early in 1943 came our counter-blow when the first Wingate expedition penetrated into Burma as far as the Irrawaddy.

In the meantime great preparations were afoot in India for our coming offensive. In March, 1943, the blow fell and Wingate's men struck once again this time by air in the heart of enemy occupied territory. Simultaneously the Japs launched what proved to be their last serious attempts to invade India when they attacked the Seventh Indian Division in the Arakan.

At the Ngakyedauk Pass the Seventh first held the Japs and then, with the aid of the 14th Indian Division, who came to their help, systematically isolated and cut up the enemy. Foiled in the south the Japs turned north and struck at the Dimapur road but the gallant defence of Kohima proved to be the turning point of the campaign and the enemy began a retreat which ended in his final defeat.

The year 1944 was one of further victories. Meiktyina, Mogaung, Tamu, Sittang, Tiddim, Fort White, Kalemyo.

By the end of 1944 a desperate situation faced the Japs. The 14th Army had crossed the Chindwin and was advancing into Central Burma towards Mandalay.

It was in this phase that Gen. Sir William J. Slim, then commanding 14th Army, sent an entire corps secretly on a 320 miles march down the Gangaw valley to approach Mandalay from the rear. Meiktila was captured, and, unable to cope with this double threat, the enemy were forced to surrender Mandalay to the 19th Indian Division on March 20. The pursuit continued on to Yenanguaung, Toungoo, Prome and Pegu.

Meanwhile, seven major amphibious assaults, Myebon, Akyab, Ponnagyun, Ramree Island, Letpan, Taungup and Ru-Ywa, had carried Fifteenth Indian Corps far down the Arakan coast.

Finally an amphibious assault was mounted against Rangoon in conjunction with 14th Army's rapid approach from the North. The 26th Indian Division had left Ramree Island and sailed to the Gulf of Martaban. The advance on Rangoon developed into a race between this force and their comrades in arms pushing South to the capital from Pegu. The latter lost by a narrow margin for, with the dropping of paratroops South of Rangoon, assault craft brought 26th Indian Division up the Rangoon river to the greatest prize of the war.

Rangoon was occupied on May 3rd and the link-up between our two forces took place a fortnight later.

Thousands of Japs, stranded by our rapid push towards the capital, made desperate attempts to cross the Sittang and outwit our encircling forces. A few did escape, but without supplies, ill-armed and in unfriendly country they perished in the fever-laden swamps and jungles in which they sought refuge. More than 10,000 of the enemy were killed in this area, the last of the war.

The debacle of the Japanese was complete. Indian Army troops fanned out over South-East Asia, occupying territory that had awaited liberation for more than three years.

The end of the long road came at Singapore on September 12, 1945, when the entire Japanese Expeditionary Forces, Southern Regions, were finally surrendered to Admiral Lord Louis Mountbatten, Supreme Allied Commander, South-East Asia, by Field Marshal Count Terauchi.

India's War Supplies.

India's contribution in the economic sphere has been no less important. The utmost use was made of India's agricultural, industrial and mineral resources. The value of war orders handled by the Supply Department alone came to over Rs. 841 crores from 1939 to end of 1945.

Bodies for armoured fighting vehicles, mine sweeping trawlers, new types of weapons and ammunition and various items of personal and other equipment were produced. It was during this war that India began to make a number of special steels. Machine tools were also made and supplied in large quantities. Her ancient silk industry was revived to meet the demands for parachutes. Rubber production was increased and went hand in hand with developments in the use of substitutes and planting of new and novel rubber yielding plants. During the war, India made notable gains in munition production. In 1943-44, gun and mortar ammunition increased to 35 times the pre war output, guns and carriages and bayonets 20 times the pre-war quantity and small arms ammunition more than 4 times their pre-war output. Grenades, mines, bombs and pyrotechnic stores most of which were not made in India before the war were now manufactured, and in the last year of war the output steadily increased. A feature of special significance during the war was the manufacture of radar development equipment.

For the 24 years of the North African war, India was responsible for supplying the bulk of stores for this theatre of operations. Allied troops in the Mid-East wore clothes made in India, to a considerable extent, and walked in boots supplied by Indian factories. Nearly 90 per cent of the tents which protected the troops from the torrid heat, the canvas ground sheets which kept away the sands of the deserts from tanks, plates meters and vehicles and nearly all the timber came from India. She sent over 1,500,000 tons of stores in a steady stream. Other vital supplies to the Mid-East included assault craft, camouflage paints, nets and hemp, medical stores and equipment for the comfort of troops. Important supplies were also sent to Russia.

INDIAN SAILORS', SOLDIERS' AND AIRMEN'S BOARD.

These Boards are probably the most important and valuable non-official institutions connected with the Armed Forces. They were constituted on 7th February 1919, in place of the Central Recruiting Board, the purpose of which was fulfilled with the end of the last War. The object was at the outset to deal with a number post-war problems—the finding of employment for soldiers released from the colours, the relief of the dependents of those who had lost their lives in the war and of those who were wounded, the selection for further service, the education of soldiers' children and the safeguarding of the general interests of soldiers and their dependents. As years passed, the Board had gradually to adjust itself to normal peace conditions and it was decided to maintain it permanently for a series of duties which have from time to time expanded and developed.

The Board on 31 December 1922 had the balance of the war fund, known as the Imperial Indian War Relief Fund, handed over to it. It formed the nucleus of its finances. The latter have since been husbanded with great success. The face value of the securities constituting the fund amounted on 31 March 1941 to Rs. 17,11,200, bearing an annual interest of Rs. 59,892.

The Board is composed of three members of H. E. the Viceroy's Executive Council nominated by H. E. the Viceroy, of whom one is President, H. E. the Governor of the Punjab, the Defence Secretary, the Adjutant-General in India and the Financial Adviser, Military Finance. An Under-Secretary in the Defence Department normally acts as Secretary to the Board, in addition to his other duties.

The Board has its seat at New Delhi and co-ordinates the activities of provincial boards which exist in each province. Under the control of these Provincial Boards there exists throughout the country a network of District Boards reinforced in some cases by Tehsil or Taluka Committees and other kindred bodies.

All District Soldiers' Boards were in 1931 put on a uniform footing, with the civil head of the District as President and a serving soldier as

Military Vice-President. The latter was either a Recruiting Officer or an Indian Army Officer detailed by Army Headquarters—except in the North-West Frontier Province where the President was a soldier and the Vice-President a civilian. Five years' experience showed the organisation to need revision if it was to serve its purpose in the most efficient manner. This was achieved without interference in the internal constitution of the Boards. To preserve continuity and provide constant supervision, it was decided to make Indian Infantry Training Battalions and similar units, which are not liable to changes of station, responsible for providing the Military Vice-Presidents for the District Soldiers' Boards in their neighbourhood. At the same time full advantage was taken of the experience and influence of Recruiting Officers, who were appointed additional Vice-Presidents of District Soldiers' Boards in their Recruiting areas.

In May 1940, Army Headquarters appointed regimental officers as whole-time Deputy Military Vice-Presidents with the express object of frequently touring areas covered by a fixed number of District Soldiers' Boards. Three such officers were appointed for the Punjab and the North west Frontier Province. These were subsequently replaced by Civil Liaison Officers.

From 79 District Soldiers' Boards in British India when war broke out the number has risen to 166, besides 36 State Soldiers' Boards.

The following are the objects and duties of the District Soldiers' Boards :—

(*a*) Constantly to endeavour to promote and maintain a feeling of good-will between the civilian and military classes ;

(*b*) To give all possible assistance to the President of the Board in his capacity as head of the district in all administrative matters connected with the ex-soldier or his family ;

(*c*) To demonstrate the benefit of and so promote the desire for mutual co-operation between ex-soldiers and civilian officials ;

(*d*) To represent and explain to the civil authorities all matters of particular moment to ex-soldiers that require the attention of the local administration ;

(*e*) Generally to watch over the welfare of the ex-soldier and his family, and the interests of serving soldiers absent with their units.

As regards item (*e*), quoted above, the function of the Board and corresponding organisations cover a wide range. Their main tasks are enumerated below :—

(*a*) To ascertain and intimate the whereabouts of an absent soldier to his dependents and to communicate to him news of all important matters affecting his family's welfares.

(*b*) To procure legal advice in the case of a law-suit against an absent soldier where there is no male member of his family capable of protecting his interests ;

(*c*) To assist an absent soldier's family in the event of disease or famine ;

(*d*) To assist ex-soldiers and their dependants in securing medals, pensions, arrears of pay, etc. ;

(*e*) To investigate cases of ex-soldiers invalided out of the Indian Army for chronic diseases such as tuberculosis, leprosy, diabetes, etc., and to report them to the Provincial Branch of the Indian Red Cross Society for medical assistance ;

(*f*) To investicate applications for relief from the various military charitable funds.

Another leading development has been the institution of Welfare workers and sevadars. They are, in fact the touring representatives of boards, the latter being particularly concerned with investigation of the troubles of the serving man's womenfolk.

Boards, which have become the recognised centre to which the man comes when in trouble, have also attached to them information bureaux which are linked to the regional exchange organisation set up by the Labour Deptt. to find employment for ex-Servicemen.

It is inevitable that, with every able-bodied man absent with the Colours during the war, the affairs of boards and their welfare workers should have been left in the hands of the pensioners of the war of 1914-18. These men have done sterling work but, only naturally, they are out of touch with the needs of the modern Soldier. The latter is now returning home in large number and it is up to him to see that the personnel of boards is overhauled so that they can effectively discharge the duties assigned to them.

THE VICTORIA CROSS.

The announcement, made at the Delhi Durbar in 1911, that in future Indians would be eligible for the Victoria Cross, gave satisfaction which was increased during World War I and afterwards by the award of that decoration to the following :—

Subedar (then Sepoy) Khudadad Khan, 129th Baluchis.—On 31st October 1914, at Hollebeke, Belgium, the British Officer in charge of the detachment having been wounded, and the other gun put out of action by a shell, Sepoy Khudadad, though himself wounded, remained working his gun until all the other five men of the gun detachment had been killed.

Naik Darwan Sing Negi, 1-39th Garhwal Rifles.—For great gallantry on the night of the 23rd-24th November, 1914 near Festubert, France, when the Regiment was engaged in retaking and clearing the enemy out of our trenches and, although wounded in two places in the head, and also in the arm, being one of the first to push round each successive traverse in the face of severe fire from bombs and rifles at the closest range.

Subedar (then Jemadar) Mir Dast, 55th Coke's Rifles.—For most conspicuous bravery and great ability at Ypres on 26th April 1915, when he led his platoon with great gallantry during the attack, and afterwards collected various parties of the Regiment (which no British Officers were left) and kept the

under his command until the retirement was ordered. Jamadar Mir Dast subsequently on this day displayed remarkable courage in helping to carry eight British and Indian Officers into safety, whilst exposed to very heavy fire.

Rifleman Kulbir Thapa, 23rd Gurkha Rifles.—For most conspicuous bravery during operations against the German trenches south of Mauquissart. When himself wounded, on the 25th September 1915, he found a badly wounded soldier of the 2nd Leicestershire Regiment behind the first line German trench, and though urged by the British soldier to save himself, he remained with him all day and night. In the early morning of the 26th September, in misty weather, he brought him out through the German wire, and, leaving him in a place of comparative safety returned and brought in two wounded Gurkhas one after the other. He then went back in broad daylight for the British soldier and brought him in also, carrying him most of the way and being at most points under the enemy's fire.

Havildar (then Lance-Naik) Lala, 41st Dogras.—Finding a British Officer of another regiment lying close to the enemy, he dragged him into a temporary shelter which he himself had made, and in which he had already bandaged four wounded men. After bandaging his wounds he heard calls from the Adjutant of his own Regiment who was lying in the open severely wounded. The enemy were not more than one hundred yards distant, and it seemed certain death to go out in that direction, but Lance-Naick Lala insisted on going out to his Adjutant, and offered to crawl back with him on his back at once. When this was not permitted, he stripped off his own clothing to keep the wounded officer warmer and stayed with him till just before dark when he returned to the shelter. After dark he carried the first wounded officer back to the main trenches, and then, returning with a stretcher carried back his Adjutant. He set a magnificent example of courage and devotion to his officers.

Sepoy Chatta Singh, 9th Bhopal Infantry.—For most conspicuous bravery and devotion to duty in leaving cover to assist his Commanding Officer who was lying wounded and helpless in the open. Sepoy Chatta Singh bound up the officer's wound and then dug cover for him with his entrenching tool, being exposed all the time to very heavy rifle fire. For five hours until nightfall he remained beside the wounded officer shielding him with his own body on the exposed side. He then under cover of darkness, went back for assistance and brought the officer into safety.

Naik Shahamad Khan, 89th Punjabis.—For most conspicuous bravery. He was in charge of a machine-gun section in an exposed position in front of and covering a gap in our new line within 150 yards of the enemy's entrenched position. He beat off three counter-attacks, and worked his gun single-handed after all his men, except two belt-fillers, had become casualties. For three hours he held the gap under very heavy fire while it was being made secure. When his gun was knocked out by hostile fire he and his two belt-fillers held their ground with rifles till ordered to withdraw. With three men sent to assist him he then brought back his gun, ammunition, and one severely wounded man unable to walk. Finally, he himself returned and removed all remaining arms and equipment except two shovels. But for his great gallantry and determination our line must have been penetrated by the enemy.

Lance-Defadar Govind Singh, 28th Cavalry.—For most conspicuous bravery and devotion to duty in thrice volunteering to carry messages between the regiment and brigade headquarters, a distance of 1½ miles over open ground which was under the observation and heavy fire of the enemy. He succeeded each time in delivering his message although on each occasion his horse was shot, and he was compelled to finish the journey on foot.

Rifleman Karan Bahadur Rana, 23rd Gurkha Rifles.—For conspicuous bravery and resource in action under adverse conditions, and utter contempt of danger during an attack. He with a few other men succeeded, under intense fire, in creeping forward with a Lewis gun in order to engage an enemy machine-gun which had caused severe casualties to officers and other ranks who had attempted to put it out of action. No. 1 of the Lewis gun party opened fire and was shot immediately. Without a moment's hesitation Karan Bahadur pushed the dead man off the gun, and in spite of bombs thrown at him and heavy fire from both flanks, he opened fire and knocked out the enemy machine-gun crew. Then switching his fire on the enemy bombers and riflemen in front of him, he silenced their fire. He kept his gun in action, and showed the greatest coolness in removing defects which had twice prevented the gun from firing. He did magnificent work during the remainder of the day and when a withdrawal was ordered assisted with covering fire until the enemy was close to him. He displayed throughout a very high standard of valour and devotion to duty.

Risaldar Badlu Singh, 14th Lancers' attached 29th Lancers.—For most conspicuous bravery and self-sacrifice on the morning of the 23rd September 1918, when his squadron charged a strong enemy position on the west bank of the River Jordan. On nearing the position Risaldar Badlu Singh realised that the squadron was suffering casualties from a small hill on the left front occupied by machine-guns and 200 infantry. Without the slightest hesitation he collected six other ranks and with the greatest dash and an entire disregard of danger charged and captured the position, thereby saving very heavy casualties to the squadron. He was mortally wounded on the very top of the hill when capturing one of the machine-guns single-handed, but all the machine-guns and infantry had surrendered to him before he died. His valour and initiative were of the highest order.

Rifleman Gobar Sing Negi, 2nd Battalion, 39th Garhwal Rifles.—For most conspicuous bravery on 10th March 1915 at Neuve Chapelle. During an attack on the German position he was one of a bayonet party with bombs who entered their main trench, and was the first man to go round each traverse, driving back

the enemy until they were eventually forced to surrender. He was killed during this engagement.

Sepoy (Now Subedar-Major and Honorary Captain) Ishar Singh, 28th Punjabis.—For devotion and bravery "quite beyond all praise" in Waziristan on 10th April, 1921. He received a severe gunshot wound in the chest while serving a Lewis gun, and when all the havildars had been killed or disabled he struggled to his feet, called to his assistance two men and charged and recovered the gun, restoring it to action. He refused medical attention insisting first on pointing out where the other wounded were and on carrying water to them. While the medical man was attending to these wounded he shielded them with his body and he submitted to medical attention himself only after he was exhausted through three hours continual effort and by loss of blood.

WORLD WAR II'S V. Cs.

During World War II the Indian Army won 31 V.Cs. Twelve of these awards went to Gurkha Regiments and of these four were awarded to the 5th Royal Gurkha Rifles—three to the regiment's 2nd Battalion. The valorious conduct of the men of the Indian Army is shown in the fact that, next to the United Kingdom it has won more V.Cs. than any other force of the British Empire.

2nd-Lt. Premindra Singh Bhagat (now Major), Royal Bombay Sappers and Miners. For courage and endurance during the advance from Gallabat into Abyssinia in 1941. He was with the leading mobile forces, commanding a section of Sappers and Miners who were responsible for clearing a way through the extensive minefields layed by the Italians. After working for forty-eight hours, during which time his carrier had been twice blown up, and many of his men killed he refused to take more than a short rest before carrying on for another two days, as he had learnt the system on which the mines were layed. When he finally collapsed from exhaustion, with both eardrums burst, he had cleared 15 minefields covering 55 miles of road.

Subedar Richpal Ram, 9th Rajputana Rifles, posthumous award. For exceptional gallantry and initiative in two operations on Feb. 7 and Feb. 12 during the attack on Kyeu. On the first date, his Company Commander having been wounded, he assumed command of the company and rushed the final objective with about thirty men in a bayonet charge. He held on there, completely isolated, and beat off six counter-attacks in four and a half hours in the early morning. On Feb. 12 he led another attack on the same position with the greatest determination. When his foot was blown off and he lay dying from other wounds, he waved his men forward and his last words were "We will capture the objective."

Havildar Parkash Singh, (Now Subedar), 5/11th Punjab Regiment. For rescuing the crews of disabled bren carriers and retrieving their weapons during the fighting in Burma in January, 1943. In an attack on Jap positions at Donbaik in the Mayu peninsula two of our bren carriers were put out of action and as the crews had run out of ammunition the enemy rushed them. Hav. Parkash Singh drove forward in his carriers and rescued these men and their weapons. A fortnight later in the same area three of our carriers were immobilised by the enemy on an open beach covered by Jap guns. With complete disregard for his safety Hav. Parkash Singh again sallied forth, rescued two of the crews and retrieved their weapons.

Subedar (now Subedar-Major) Lal Bahadur Thapa, 1/2nd Gurkha Rifles, won the V. C. for "unsurpassed bravery" at Rass la Zondi Tunisia, in April 1943. Ordered to secure the only passage by which a commanding feature could be seized by us, he led two sections, under a hail of automatic and mortar fire across open ground and up a gully. Fighting every inch of the way he killed two men with his kukri and two of more with his revolver. With only a couple riflemen he reached the objective where two more of the enemy fell to his kukri. Having secured the feature the three Gurkhas covered their company's approach up the defile.

Company Havildar-Major Chhelu Ram, 4th Rajputana Rifles, won the V. C. posthumously at the Djebel Garci, Tunisia, in April 1943. Dashing through intense enemy fire he silenced an enemy post single handed. When his company commander was mortally wounded he tended him in the open and in doing so was himself seriously wounded. Despite this he reorganised his company to meet a heavy counter attack and rushed from point to point shouting: "Jats and Mohammedans, there must be no withdrawal . . . . . Advance!" Hundred men drove off the enemy with bayonets stones and rocks. Still urging on his men Company Havildar Major Chhelu Ram died from his grievous wounds.

Havildar (now Jemadar) Gaje Ghale, 2/5th Royal Gurkha Rifles won the V. C. during an assault against the Japs in the Chin Hills in May, 1943. Leading his men along a knife-edged ridge with precipitous sides, he was wounded in the arm, chest and leg by a grenade. Under very heavy fire and disregarding his serious injuries he led his men to close grips with the enemy and bitter hand to hand fighting ensued. He was soon covered with blood from his neglected wounds but, shouting the Gurkha battle cry, "Ayo Gurkhali!" he headed assault after assault. Spurred on by his example his platoon stormed and carried the hill position at very heavy cost to the Japs.

Naik (now Havildar) Nand Singh, 1st 8th Regiment, was decorated with the supreme award, capturing for despite being wounded six times a Jap position single handed in March, 1944. Leading his men up a steep slope in the Kalapanzin Valley, in the Arakan, he dashed forward alone and captured a Jap trench. Wounded in the thigh he then crawled forward under heavy fire and captured a second trench despite incurring wounds in face and shoulder from a grenade which burst in front of him. A few minutes later the whole of his section being killed or wounded, Naik Nand Singh charged a third Jap trench, captured it and killed all its occupants with his bayonet.

Jemadar Abdul Hafiz, 3rd Jat Regiment, won the V. C. posthumously near Imphal in April, 1944. Ordered to drive the Japs from a prominent feature he led two sections up a bare hillside swept by enemy machine-gun and mortar fire. Wounded in the leg Jem.

Abdul Hafiz nevertheless reached the enemy position, seized one of their machine-guns by the barrel while one of his men disposed of the gunner. He then took a bren gun from one of his wounded men and advanced with such ferocity that the Japs fled. Mortally wounded in the chest, his last words were: "Reorganise! I will give you covering fire." But he had not the strength to pull the trigger of his gun and fell back dead on the battlefield.

Sepoy (Now L. Naik) Kamal Ram, 3/6th Punjab Regiment, is the Indian Army's youngest winner of the V.C., which he was awarded for gallantry in his first action, just after crossing the River Garl in Italy, in May, 1944. Volunteering to deal with one of four German posts holding up his company's advance, he crawled forward and killed the occupants of the post and then disposed of a German officer who confronted him with his pistol levelled. Still alone, Sep. Kamal Ram shot the German gunner in the second post and hurled grenades into the third. The remaining Germans surrendered. Later he helped to capture a fourth post and then his company advanced. In the fighting which followed Sep. Kamal Ram rushed a house, killed one of the enemy and captured two others.

Rifleman Ganju Lama, M.M., 7/7th Gurkha Rifles, won the supreme award for knocking out two Jap tanks single handed and, though himself seriously wounded, killing their crews with hand grenades. On June 12th, 1944, Jap tanks and infantry broke into our perimeter at Singthoukhong, Imphal Plain. Under close fire Rfn. Ganju Lama crawled forward and got his PIAT (an anti-tank weapon) into action only 30 yards from the enemy. Despite a broken wrist and other wounds he destroyed two of the enemy tanks, advanced and engaged their crews. Not until he had wounded or killed all the enemy did he allow himself to be evacuated to have his wounds dressed. Only a month before he had won the M. M. for destroying a Jap tank with his PIAT.

Naik Agansing Rai, 5/5th Royal Gurkha Rifles won the V.C. along the Fishenipur-Silchar track, Assam, in June 1944. When his company was held up by withering Jap machine gun fire he led his section against an enemy position and captured it. His company then swept up to this position and Nk. Agansing Rai went on to deal with a 37 mm gun pounding the company from close range. Rushing forward with a bren gun he killed three of the enemy, this section dealing with the rest of the gun's crew. Later, with Tommy gun in one hand and a grenade in the other, he advanced on a third enemy held position and killed all its four occupants.

Subedar Netrabahadur Thapa, 5/5th Royal Gurkha Rifles, was awarded the V.C. posthumously for his magnificent defence of an isolated position near Bishenpur in June 1944. Persistent Jap attacks broke down under the spirited defence put up by this Viceroy's Commissioned officer and his men on a feature known as "Water Piquet." The Gurkhas refused to yield a foot of ground despite ruthless assaults and very heavy artillery fire. At one time Sub. Netrabahadur Thapa and his runner advanced and caused considerable havoc by well-placed grenades. The thought of withdrawal never entered this V.C.O's. head but after a night of grim fighting he was killed by bullets and grenades. When his body was found he was still holding his kukri; by his side lay a Jap with his skull cleft.

Naik Yeshwant Ghadge, 3rd Mahratta Light Infantry, won the V.C. posthumously during the Allied drive along the Upper Tiber towards the Gothic Line, Italy, in July 1944. With all the men of his section killed or wounded Nk. Yeshwant Ghadge rushed a German machine-gun position, grenaded the gunner and shot one of the crew. Running out of ammunition he grasped his tommy gun by the barrel and beat to death the two remaining enemy. Shortly afterwards he was shot in the chest and back by snipers and died in the post which he had captured single handed. He performed these deeds knowing quite well that he could expect no assistance at that particular time.

Rifleman Tulbahadur Pun, 3/6th Gurkha Rifles, won the V.C. at Mogaung, Burma, in June, 1944. While attacking a railway bridge near the town two platoons of Gurkhas were pinned to the ground by intense Jap fire. Most of Rfn. Tulbahadur Pun's section were wiped out but the section commander led the two remaining members in a desperate charge against the enemy. They were met with murderous fire and Rfn. Tulbahadur alone was left still on his feet. Seizing a bren gun he charged across open ground firing as he ran towards a strong enemy bunker. Single-handed he captured the position and killed all its defenders. He then gave covering fire to the remnants of his platoon and the position was consolidated. In the same action the V.C. was awarded posthumously to Capt. Mohad Ahmad who was Rfn. Tulbahadur Pun's section commander.

Rifleman Sher Bahadur Thapa, 1/9th Gurkha Rifles was posthumously awarded the V.C. in September 1944 for his bravery during the fighting near San Marino, Italy. Under persistent fire he charged a German post, killed a machine gunner and put several of the enemy to flight. When his section commander was wounded Rfn. Sher Bahadur Thapa rushed a party of Germans who tried to attack him. Lying in the open, he then opened fire and silenced one machine-gun after another and checked the Germans who tried to infiltrate to his position. When his ammunition was exhausted he dashed forward and rescued two of his wounded comrades. While returning the second time he paid the price of his heroism and fell, riddled by machine gun bullets fired at point blank range.

Jemadar acting Subedar Ram Sarup Singh, 2/1st Punjab Regiment was decorated posthumously for his gallantry near Tiddim, Burma in October 1944. The subedar led a bayonet charge which dislodged the Japs from their bunkers on a feature known as "Big Hill." But the enemy rallied and counter attacked. Bleeding profusely from two wounds Subedar Ram Sarup Singh reorganised his men and led them in another charge against the enemy. After bayoneting four Japs he received a burst of machine-gun fire in the chest. With his last breath he shouted to his havildar: "I am dying but you carry on and finish off these devils." When volunteers were called for to bring in the body of Subedar Ram Sarup Singh every man in the hero's company stepped forward.

Sepoy (now L/Naik) Bhandari Ram, 16th Baluch Regiment won the V.C. in November, 1944, for silencing a Jap machine-gun post under circumstances of great gallantry, in East Mayu, Arakan. Heavy fire from the post 25 yards from the sepoy wounded him and two of his comrades. Sepoy Bhandari Ram, with wounds in his shoulder and leg, crawled forward to the enemy position and immediately became a target for Jap machine-guns and grenades. Bleeding profusely from multiple wounds he nevertheless got to within five yards of the enemy, put a grenade to his mouth, removed the pin with his teeth and hurled it into the Jap post. The gun was silenced and the position taken. Suffering acutely and semi-conscious, Sepoy Bhandari Ram's only thought was whether the action had been successful or not.

Rifleman Thaman Gurung, 1/5th Royal Gurkha Rifles, was awarded the V.C. posthumously in an action at Monte San Bartolo, Italy, in November 1944. He made a lone charge in which he captured some Germans in a slit trench. He then shot up more of the enemy in other trenches to enable his platoon to advance. Later he stood in full view on a bullet swept summit to keep the Germans occupied with tommy gun, grenades and Bren gun, pouring burst after burst into their positions while Gurkha sections were being withdrawn. He fell mortally wounded when the last section was on its way to safety.

Jemadar Parkash Singh, 14th Frontier Force Rifles, received the posthumous award for his inspired leadership during the 14th Army's advance towards Mandalay. The main weight of a Jap night attack was directed against his position. Wounded in the leg he dragged himself on hands and knees and assumed command of his platoon when his platoon commander had been put out of action. Supported by his batman he was seen firing a two inch mortar and when no more mortar bombs remained he collected ammunition, distributed it to his men and then manned a machine gun. Sustaining two more wounds he nevertheless continued to direct his men but a fourth wound proved fatal and he died telling his superior officer not to worry about him.

Lance-Naik Sher Shah, 7/16th Punjab Regiment, won the V.C. posthumously at Kyeyebyin, Kaladan, in January 1945. Returning to his position after the second of two lone stalks to break up the enemy concentrating against his section, he was injured by a shell splinter and his leg shattered. But he continued to fire his weapon and when asked whether he had been hit he replied that his wound was slight. Afterwards it was discovered that his leg was missing. L/Nk. Sher Shah went on firing until shot through the head. Twenty-three dead and four wounded Japs were found next day in front of his position.

Naik Gian Singh, 4/15th Punjab Regiment, won the supreme award on the Kanaye-Myingyan road in Burma in March 1945. He made a lone rush against enemy foxholes and though wounded in the arm continued throwing grenades. After killing several Japs he went on to annihilate an anti-tank gun crew and captured the weapon single-handed. Over 20 Jap dead were found in the area, most of them having fallen to Nk Gian Singh. While his comrades prepared for another attack he was ordered back to the regimental aid post but at his request he was granted permission to lead his section until the whole action had been completed.

Naik Fazal Din, 7th Baluch Regiment, won the V.C. posthumously near Meiktila, Burma, in March 1945. After he had personally silenced an enemy bunker he and his section were confronted by six Japs led by two officers. A Baluch bren gunner killed one officer and another Jap but was himself killed. Going to his assistance Nk. Fazal Din was run through the chest by the second officer's sword. As the officer withdrew the weapon Nk. Fazal Din seized it, killed the officer with it and, despite his terrible wound, slew two more Japs. After reaching platoon headquarters to report he collapsed and died shortly afterwards.

Havildar Umrao Singh, Royal Indian Artillery, was decorated for his bravery in the Kaladan Valley in December, 1944. He was in charge of a gun in an advanced section of his battery which was attacked by the Japs. Though twice wounded by grenades in the first enemy assault he inspired his men to beat off the Japs. In a second and third attack his example and leadership resulted in the repulse of the enemy. When the final attack came and his position was overrun he seized a gun bearer (a heavy gun tool) and laid about him in furious hand-to-hand fighting. Hav. Umrao Singh was found unconscious later with seven serious wounds. Besides his gun lay ten dead Japs.

Rifleman (now L/Naik) Bhanbhagta Gurung, 2/2nd Gurkha Rifles, won the V.C. for gallantry during an attack on the feature "Snowden East" on the mainland north-east of Ramree Island, Burma, in March 1945. He stood in an exposed position and killed an enemy sniper who was firing at his section. When his men were pinned to the ground near their objective he rushed into a Jap fox-hole, killed its two defenders and dashed into a second fox-hole to kill a Jap there. He then went on to clear two more positions. During these single-handed engagements he was subjected to very heavy fire. In the face of point-blank automatic fire Rfn. Bhagta Gurung next leapt on to a machine gun position and killed the gun's crew with his kukri. Finally he and two comrades repelled an enemy counter attack.

Sepoy Namdeo Jadhao, 1st Mahratta Light Infantry, for outstanding bravery during the crossing of the River Senio in Italy in April 1945. Under heavy machine-gun and mortar fire, Sepoy Namdeo Jadhao was wading across the river with his company commander when the officer and two other men were wounded and the rest of the party, with the exception of the sepoy, were killed. Namdeo Jadhao carried one of the wounded men through the water, up the bank and through mine belts to safety. He evacuated a second comrade in like manner and then crossed the exposed bank for a third time and silenced a German machine gun post. Unable to fire his tommy gun owing to a wound in his hand, he resorted to grenades, wiped out two more posts and was on the rest of his battalion across the river. This V.C. was one of two won by the Indian Army during the crossing of the Senio.

Lieut. Karamjeet Singh Judge, 4/15th Punjab Regt., Posthumous award for successive acts of superb gallantry near Myingyan, Central Burma in March 1945. Concealed enemy bunkers in the reverse slopes of broken and untankable ground constantly shelled and machine-gunned our troops. Time and again our infantry were held by machine-gun and small arms fire from bunkers not seen by our tanks. On every such occasion Lieut. Karamjeet Singh, with complete disregard for his personal safety, went forward through heavy fire to recall our tanks and to deal with the bunkers which he indicated to them. Leading one infantry charge after another, he wiped out ten Jap positions which had been battered by our tanks. Finally, Lieut. Karamjeet Singh was mortally wounded but his men, inspired by his example, went on and cleared the enemy from the entire area. In the words of the citation Lieut. Karamjeet Singh "dominated the entire battlefield."

Sepoy Ali Haider, 6th Frontier Force Rifles, for conspicuous gallantry during the crossing of the River Senio in Italy in April 1945. While crossing the river Ali Haider's section came under heavy fire. Only three men, including himself, managed to get across and all further advance was arrested. Without orders Sepoy Ali Haider charged a German post 80 yards away, destroyed it with a grenade and took four prisoners. Although seriously wounded in the back he tried to charge a second post but was again wounded this time in the right leg and right arm. Weakened by loss of blood Ali Haider, with great determination, crawled forward and in a final effort threw grenades, rushed into the German post and silenced it. Taking advantage of this success the rest of Sepoy Ali Haider's company charged across the river and established a bridgehead.

Rifleman Lachhiman Gurung, 4 5th Gurkha Rifles, won the supreme award in May, 1945 for outstanding courage during fighting at Taungdaw on the Irrawaddy in Burma. Rifleman Lachhiman Gurung's platoon was surrounded for three days and two nights by the Japs but inspired by his courage his comrades beat back every assault. The Japs hurled innumerable grenades at the position two of which Lachhiman Gurung picked up and hurled back as they fell. While holding a third grenade the fingers of his right hand were blown off. Disregarding his terrible injuries he loaded and fired his rifle with his left hand at the enemy who, screaming and shouting, formed up shoulder to shoulder to rush the position. Wave after wave of fanatical attacks were thrown in by the enemy but all were repulsed with heavy casualties.

Three other V.Cs. awarded to the Indian Army during the late war were won by British officers serving with Indian troops, bringing the total awards of Victoria Crosses to the Indian Army to 31. The officers who won the supreme award are: Lt.-Col. (now Brigadier) A. E. Cumming, M.C., 2nd Frontier Force Regiment; Major F. G. Blaker, M.C., 3 9th Gurkha Rifles and Captain Michael Allmand, 3 6th Gurkha Rifles. The last two awards were posthumous.

The following awards for gallantry were won by the three fighting services from 3rd Sept. 1939 to 13th June 1946:—

ROYAL INDIAN NAVY.

The Royal Indian Navy traces its origin so far back as 1612 when the East India Company stationed at Surat found that it was necessary to provide themselves with armed vessels to protect their commerce and settlements from the Dutch or Portuguese and from the pirates who infested the Indian coasts. The first two ships, the Dragon and Hoseander (or Osiander), were despatched from England in 1612 under Captain Best, and since those days under slightly varying titles and of various strengths the Government in India have always maintained a sea service.

The periods and titles have been as follows:—

Hon. E. I. Co.'s Marine	..	1612—1686
Bombay ,,	..	1686—1830
Indian Navy ,,	..	1830—1863
Bombay Marine ..	..	1863—1877
H. M. Indian Marine ..	..	1877—1892
Royal Indian Marine ..	..	1892—1934
Royal Indian Navy ..	..	1934.

India's Naval Force has always been most closely connected with Bombay, and in 1668 when the E. India Co. took over Bombay, Captain young of the Marine was appointed Deputy

Governor. From then until 1877 the Marine was under the Government of Bombay, and although from that date all the Marine Establishments were amalgamated into an Imperial Marine under the Government of India, Bombay has continued to be the principal centre of Indian Naval training and to a large extent of administration. In the winter of 1940-41 Naval Headquarters moved to New Delhi.

During the War 1914-1918 Royal Indian Marine Officers were employed on many and various duties. Royal Indian Marine Ships served as Auxiliary Cruisers Officers also served in the Royal Navy.

Reorganisation Schemes.—After the War the Esher Committee arrived in India to report on the Indian Army and they strongly recommended that the R.I.M. should be reorganised as a combatant service.

But it then fell upon hard times; money was scarce, the report of the Inchcape Committee necessitated drastic retrenchments, and the working of the Montagu-Chelmsford reforms resulted in the Local Governments having to defray the cost of the work of R.I.M. ships on their various stations, on lighthouse duties, transport work, carrying of officials, etc.

A Combatant Service.—Happily for the Service, however, the Government of India in 1925 appointed a Departmental Committee under the Chairmanship of General Lord Rawlinson. This Committee recommended that the R.I.M. should be reorganised as a purely combatant Naval Service with the title of Royal Indian Navy, in the first instance to be commanded by a Rear-Admiral on the active list in the Royal Navy. The scheme was accepted by the Indian and Home Governments.

Accordingly on 2nd October 1934 the Royal Indian Navy was inaugurated, the historic ceremony taking place in Bombay.

The Royal Indian Marine which had rendered sterling service to India and the Empire in peace and war then ceased to exist.

The Chatfield Committee's report, presented in February 1939, made far-reaching recommendations in regard to the Royal Indian Navy. Shortly before the war, permission was given for the establishment of the Royal Indian Naval Reserve and the Royal Indian Naval Volunteer Reserve. With the outbreak of hostilities a large-scale programme for expanding the R.I.N. was taken in hand, and in the past 5½ years the increase in the number of ships, training establishments and personnel has been rapid. In fact, India's Naval Forces have expanded to more than 20 times their strength in ships and men since 1939.

Already in 1940 a senior boys' training establishment, H.M.I.S. BAHADUR, had been started at Karachi: in February 1942 a similar establishment for junior boys, aged 14 to 15½, H.M.I.S. DILAWAR, was opened in the same town. Boys enter H.M.I.S. BAHADUR direct after six months training in H.M.I.S DILAWAR.

Most of the men, however, enter the Navy as "special service ratings", enlisting for five years, or less if sufficient, for Active Service, and thereafter being transferred to the Royal Indian Fleet Reserve for a further five years. They are trained in a shore establishment. Officers of the Reserves undergo instruction in another shore establishment, H.M.I.S. FEROZE, those belonging to the Executive Branch taking short but intensive courses in seamanship, gunnery, signals, and other subjects. Part of this early instructional period is spent at sea. Having completed their training, Reserve Officers are posted for service afloat.

Naval Training Expansion.

The expansion of Naval training facilities has proceeded apace. Respectively the 15th and 16th establishments to be commissioned since 1939, H.M.I.S. AKBAR, at Bombay, provides initial training for all new entry ratings, while H.M.I.S. SHIVAJI, near Poona, trains engine room ratings. Some of these artificers receive preliminary technical instruction in the Civnaval Centre at Pilani (Jaipur).

Men of the Communications Branch are trained in H.M.I.S. TALWAR, Bombay, while ratings in the Seaman Branch qualify for gunnery rates in H.M.I.S. HIMALAYA, Karachi, and for anti-submarine defence in H. M. I. S. MACHHIMAR. In these three schools, Reserve Officers are also trained. A torpedo school, known as H.M.I.S. VALSURA, has been functioning in Jamnagar since December 1942. H.M.I.S. CHAMAK, the radar school at Karachi, was commissioned in June, 1945.

The growth in the number of the R.I.N.'s ships has been remarkable. In July 1941 was launched H.M.I.S. TRAVANCORE, the first vessel for the Royal Indian Navy to be built in Indian yards, followed in October by H.M.I.S. BARODA. Ships of this class are admirably fitted for minesweeping and patrol duties. Many ships completed in the British Isles saw much service in the Battle of the Atlantic as well as in Eastern waters.

Ships of the Royal Indian Navy assisted in the operations that led to the downfall of the Italian Empire in East Africa, taking part in the reoccupation of Berbera and the capture of Massawa. During the brief campaign that followed Nazi intrigues in Iran the Royal Indian Navy helped to convoy troops, support them on shore and seize German and Italian vessels.

In November 1942 one of H.M. Indian ships, *Bengal*, won world-wide renown by engaging in the Indian Ocean two Japanese raiders which were far more heavily armed and were ten times her size. One of the raiders was sunk, the other made off, and H.M.I.S. BENGAL reached port safely. In the early months of 1943 vessels of the R.I.N.'s Coastal Forces did good work in support of our troops on the Arakan coast. This included the interception of Japanese coastal craft conveying troops and supplies, participation in the raid on Myebon, and the bombardment of an enemy stronghold.

In 1944 ships of the Royal Indian Navy again co-operated with our land forces engaging the enemy on the Arakan Front. Support was afforded by bombarding enemy shore positions and by harassing the enemy's water-borne

supplies. In four months these ships steamed more than 30,000 operational miles on 43 separate missions in enemy waters.

The Royal Indian Navy was well represented in the eight amphibious operations by which the 15th Indian Corps advanced down the Arakan Coast from the Indian frontier to Rangoon in the spring of 1945.

Men of the R.I.N. Landing Craft Wing, who had been training secretly for more than two years, established their reputation on the beaches of Akyab, Myebon, Kyaukpyu, Kangaw, Ru-Ywa and Letpan. They formed the spearhead of each of these six assaults, carrying troops to the beaches and keeping them supplied during critical phases of the ensuing battles.

The Indian sloops NARBADA, JUMNA, KISTNA and CAUVERY fired tens of thousands of shells in support of the Army's coastal advance in Arakan, penetrating as far as thirty miles from the open sea to increase the effective range of their bombardments.

A floatilla of nine fleet minesweepers of the Royal Indian Navy cleared the approaches to the Rangoon River estuary before the arrival of the invasion convoy, whose escort included two Indian sloops—SUTLEJ and CAUVERY.

The period July to December 1945 brought to the R.I.N. the opportunity of operating in waters from Rangoon to Hongkong. R.I.N. fleet minesweepers played a prominent part in the operations around Malaya, and two sloops were serving with the British Pacific Fleet.

Throughout July 1945 H.M.I. ships NALBADA, GODAVARI and KISTNA maintained searching patrols in the Mergui Archipelago, the Torres Straits, and off the Tavoy and Tenasserim coasts. Many of the islands in the Archipelago were visited and landing parties went ashore to interrogate the inhabitants. The patrols were not on the whole eventful, but valuable intelligence was collected.

In July H.M.I.S. PUNJAB and H.M.I.S. DECCAN took part as danlayers to the 7th (RN) minesweeping flotilla in the minesweeping operations off Phuket Island, at the northern end of the Malacca Straits. The two ships assisted in fighting the fire in H.M.S. VESTAL after a suicide bomber had crashed on her deck and H.M.I.S. PUNJAB later took off the survivors. Both ships were complimented by the Captain, East Indies Escort Forces, for their work in this operation.

H.M.I. sloops NARBADA, GODAVARI, KISTNA, the fleet minesweepers of the 37th Minesweeping flotilla, H.M.I.S. BARRACUDA and the 56th M.L. flotilla took part in the general move eastwards to Malaya and the Netherlands East Indies. H.M.I.S. KISTNA arrived at Penang on 1st September in company with the 3rd Battle Squadron, and remained there giving assistance to the occupation forces till the middle of the month.

The 37th mine-sweeping flotilla played a prominent part in company with the 6th and 7th mine-sweeping flotillas in operations to clear British and Japanese mine-fields in the Singapore Roads and the Malacca Straits, and visited most of the ports in southern Malaya. H.M.I.S. BENGAL arrived in Singapore on 3rd September in company with the cruiser H.M.S. CLEOPATRA, wearing the flag of the Commander-in-Chief, East Indies Station, and the 6th mine-sweeping flotilla, these being the first British warships to return to Singapore.

On 26th September 1945 H.M.I.S. NARBADA arrived at Port Blair with the Naval Force Commander for the re-occupation of the Andamans and Nicobar Islands. The official surrender of the Japanese Forces in these islands was made to this Force.

H.M.I. Ships GODAVARI, CAUVERY and SUTLEJ have been operating with the British Pacific Fleet since the recapture of Singapore and have steamed many miles in Far Eastern Waters on the various duties required of occupation forces.

At the end of hostilities, the Royal Indian Navy's fleet comprised:

6 modern sloops, 3 old sloops, 4 corvettes, 16 mine sweepers (Bangors Bathurst class), 16 trawlers, 4 gunboats, 6 motor mine sweepers, 1 coastal force depot ship, 1 landing ship, Infantry, 1 salvage vessel, 22 auxiliary M.S. and patrol vessels, 27 Tairmile M.L.s, 23 harbour defence M.L.s and 21 flotillas of minor landing craft and L.C.T.s.

The personnel in the Service had increased to 5,051 officers and 27,651 ratings.

POST-WAR

Auxiliary vessels have almost all been returned to trade. The old sloops, gunboats, a number of trawlers, and nearly all vessels of the coastal forces and landing craft wing have been or are being paid off to care and maintenance for disposal. Most of the bases are also closing down one after an other. The post-war strength of the Navy has yet to be decided. Among the new ships commissioned since the end of hostilities are the three frigates DHANUSH, SHAMSHER and TIR, commissioned between November and December 1945. Two more frigates TRENT and TEST were taken over from the R.N. more recently. The R.I.N. is shortly acquiring three LEANDER class cruisers and it is hoped to commission the first one by the middle of 1947.

As a first step towards providing the anticipated requirements of regular officers for the post-war Royal Indian Navy, it has been decided to offer up to 156 permanent regular commissions to officers belonging to the permanent and temporary Royal Indian Naval Reserve and Royal Indian Naval Volunteer Reserve. Of these commissions 116 are to be offered to Indian officers and 40 to British officers. Selections have already begun.

Demobilisation, Release and Resettlement

Pending general demobilisation, releases in the Service of ratings and reserve officers were arranged according to "Priority Groups" and started in September 1945. H.M.I.S. FEROZE became the demobilisation centre for officers, while H.M.I.S. KUKAURI and H.M.I.S. CHEETAH were the demobilisation centres for ratings. By the beginning of June 1946 a 50% reduction in

the strength of personnel had been made, the strength of the Service at that time being:—Officers: 1,530. Ratings: 13,776.

Every effort is made to resettle those requiring help on release. Ratings are given facilities for pre-release training either educational or vocational. Those ratings whose educational standards are low are encouraged to qualify for the H.E.T. (Higher Educational Training) Certificate which is equivalent to the Matriculation. W/T ratings who desire to qualify for the P.M.G.'s W/T Competency Certificate are given further training in TALWAR. Vocational training is given in such occupations as fitter, mechanic, motor driver, electrician, dairy farmer, clerk, tailor, etc.

The Resettlement Section at NHQ works in co-operation with the Resettlement Directorate of the Welfare General's Branch, G.H.Q., in tackling the problems of Officers and Ratings awaiting release or already released. The various employment exchanges under the Department of Labour in the Government of India also work towards the same end.

The Women's Royal Indian Naval Service, formed originally in 1943 as the Naval Wing of the Women's Auxiliary Corps (India), took its present name and distinctive uniform and badges of rank in March 1945. The WRINS have been employed mostly in the Communications Branch, while some have been doing secretarial duties. The organisation expanded rapidly until, towards the end of the war, the number of officers reached 275 and, of ratings (Auxiliaries), 813. Release started in September 1945 and has been proceeding rapidly. Those desiring it have been given pre-release training in typewriting, shorthand, clerical work, domestic science, teaching, welfare work, etc.

Mutiny

On 18th Feb. 1946 mutiny broke out in H.M.I.S. TALWAR spreading to other ships and Naval establishments in Bombay. After a day or two, ships in other ports also joined. There was an exchange of fire between the mutineers in Castle Barracks, Bombay, and the Military guards. In Karachi H.M.I.S. HINDUSTAN also exchanged fire with the Military. The mutineers however surrendered on 23rd February. The Government of India has appointed a Commission to inquire into the causes and origin of the mutiny. The Report of the Commission is still awaited.

Agriculture.

The agriculture of the sub-continent of India, with its wide range of physical and climatological conditions, varies considerably in character and scope. There is scarcely any cultivated crop of the temperate, sub-temperate or tropical zones which cannot be grown in some part of this vast country from the warm, humid coastlands to the perennially temperate altitudes of its mountain ranges.

The total area of cultivable land in India, excluding Burma, is about 354 million acres which is exclusive of a forest area of approximately 68 million acres. The total gross cropped area, sown annually, is roughly 245 million acres. Of this vast area, 180 million acres are under cereal and pulse crops of all kinds which supply food and fodder for India's human population of 400 million and her animal population of 380 million head of cattle, sheep and goats.

In Indian agriculture, the dominant climatological factor is the monsoon and, in most parts of the country, the total annual rainfall is precipitated between the months of June and October. The winter and early summer months are generally dry and high temperatures prevail in the months of March to June, prior to the break of the monsoon rains. Thus the agricultural season is naturally divided into two main subdivisions, the Kharif season of the monsoon and the Rabi season of the cold weather. Each of these seasons has its own distinctive crops. The greater part of the Indo-Gangetic plain and the northern tracts of the Peninsula are served by the main monsoon which falls between June and October. During these months the average rainfall for the whole of India is about 47 inches, varying from 15 (or less) to 50 inches in the main cultivated tracts. Rainfall in the cold weather season between December and March is generally not more than 2 to 4 inches. The bulk of the rainfall in the south of India, including most of the Madras Province and the bulk of the territories of the two large Indian States of Hyderabad and Mysore, is received from the North-East monsoon and falls during the period October to February.

Soils.—Four main soil groups can be recognised in India, *viz.*, (1) the red soils derived from rocks of the Archæan system which characterise Madras, Mysore and the South-East of Bombay and extend through the East of Hyderabad and the Central Provinces to Orissa, Chota Nagpur and the South of Bengal. (2) The black cotton or *regur* soils which cover the Deccan trap and cover the greater part of Bombay, Berar and the Western parts of the Central Provinces and Hyderabad with extensions into Central India and Bundelkhand. The Madras *regur* soils though less typical are also important. (3) The great alluvial plains, agriculturally the most important tract in India as well as the most extensive, mainly the Indo-Gangetic Plain embracing Sind, northern Rajputana, most of the Punjab, the plains of the United Provinces, most of Bihar and Bengal and half of Assam. (4) The laterite soils which form a belt round the Peninsula and extend through East Bengal into Assam and Burma.

The increasing demands on the land from a constantly rising population have called forth greater attention to the question of a more effective land utilization. A considerable amount of scientific work is thus being done on all these groups to a greater or lesser extent

throughout the country, both as regards their classification as well as their crop-producing power. Soil studies have been given a new orientation and have received fresh stimulus due to the concept of the "soil profile" or entire vertical cut of the soil being taken as the unit of study instead of the superficial layer supporting vegetation. A notable instance of such work is the recent classification of the black cotton soils of the Bombay Canals and the investigations regarding their suitability for sugarcane growing. The importance of soil survey and soil-mapping is being gradually recognized in different parts of the country. In the Bombay Province the detailed survey and soil mapping of sugarcane lands on the estates of Sugar Factories has been taken up for the purpose of advisory work on sugarcane. The survey and mapping on contract basis on payment of two Sugar Factory estates has been completed and the work on five other Factories is in progress. At the Imperial Agricultural Institute, Delhi the collation of data on soil survey available in the various Provinces and States has now been completed after three years of work and will be shortly published. The important question of soil conservation and development is receiving greater attention and considerable work on both the aspects has been taken up in hand, particularly in the Punjab and in Bombay.

In addition to the four main groups of Indian soils mentioned above, the desert soils of India occupy a large tract in Eastern Sind extending over the whole length of that Province, along the edge of the Indus alluvium, Rajputana and the South Punjab of which the Thar a Rajputana desert alone occupies an area of 40,000 square miles. Alkali soils also form an important group of Indian soils which are known as *reh* or *usar* in the United Provinces, *kalar* in Sind, *rakkar* and *thur* in the Punjab and *chopan* or *kari* in Bombay Province. Such soils are characterised by a high degree of impermeability and "stickiness" together with high alkalinity and frequent presence of large excess of free salts. They are usually poor in nitrogen and humus and unsuitable for crop growing without previous reclamation. Forest soils occupy a large part of India. Investigations on the nature of soil profiles of the Chanbatia Hill in U.P. and of the Kulu forest in the Punjab indicate that these soils belong to the Brown Earth and Podsol groups.

AGRICULTURAL EQUIPMENT.

Finance.—In India, farming is carried on with the minimum of capital and there is practically no outlay on buildings, fencing and agricultural machinery. The cultivators are for the most part illiterate and agricultural indebtedness is high and rates of interest on loans are heavy. During the past twenty years, much progress has been made by the co-operative credit movement in many Provinces. In recent years it has been found necessary to supplement co-operative credit by the development of non-credit activities, *e.g.*, purchase and sale societies, "better-farming" societies, etc. Such societies have proved of great value to the cultivators and, in combination with measures for debt redemption, etc., will contribute largely to improvement in the economic condition of the agriculturists.

Livestock.—Practically all cultivation in India is done by bullocks and the efficiency and capacity of these in different districts varies considerably. The best types in common use are capable of handling what would be considered as light single-horse implements in Europe. Bullock power is also used for raising water from wells for field irrigation, for driving the chaffcutter and the sugarcane crusher and for treading out the grain in the threshing yard. In general, the Indian cultivator cares well for his draught bullocks which, in most cases, constitute the most important part of his moveable property.

Implements.—In general, cultivating implements are few and simple and remarkably well suited for the tillage operations for which they have been evolved. The ploughs are usually of wood, tipped with an iron or steel point, and stir rather than invert the soil. Iron ploughs are also extensively used in some districts. A heavy wooden beam is commonly employed to serve the combined purposes of roller, clod-crusher and soil-compactor. In the black cotton soil areas, the *bakhar*, a simple type of broad-bladed harrow, is in general use. In many Provinces, seed drills or seed tubes are utilised for drilling the crops in rows to facilitate inter-cultivation. In less advanced tracts, the seed is merely broadcast and ploughed into the soil. Practically no harvesting machinery is in use, the crops being cut or gathered by hand and threshed—in the case of grain crops—under the feet of bullocks. Cereal crops are winnowed by the agency of the wind although cheap mechanical winnowing machines, designed by agricultural engineers, are receiving attention from the more advanced cultivators. With reference to the introduction of improved agricultural implements, this work is now being largely done by private businesses and agencies which are extending rapidly in the rural areas. Work on mechanical cultivation is still largely in an experimental stage though tractor ploughing has proved very effective in the eradication of deep rooted weeds in the United Provinces, Bombay and certain Indian States. One notable development of recent years in connection with agricultural implements is the large extent to which improved types are now being manufactured and sold by village craftsmen.

Land Development. Considerable attention is paid in many areas of the country notable in Bombay and the Punjab to Land Development measures designed to check erosion from torrential and excessive rain-fall and to the preservation of soil and moisture, which are essential for the successful growing of crops. In Bombay a Land Development Section of the Agricultural Department had been formed in the year 1943-44 and this has now been expanded into a separate Land Improvement Department on a permanent footing under a strong and expert staff. This Department is undertaking large scale projects of Land Improvements which include bunding or terracing of the cultivated lands and trenching and afforestation of uncultivable lands lying in the upper catchments or water-sheds—all on contour alignments. This provides labour for the scarcity or famine areas and will help to protect the lands from famine or scarcity

in the future. The total acreage so far improved and protected in the South Circle alone is over four (4) lacks of acres under bunding and over 18,000 acres under trenching and afforestation. In the recently formed North Circle 165,000 acres have been dealt with.

This Department has also a Dry Farming Section which attends to the biological part of soil conservation work and also the maintenance of the bunds or terraces. Dry Farming methods are introduced on all such areas which are improved by bunding. Experience gained during the last three years has demonstrated to the cultivators that terracing and dry farming giving considerably increased yields both of grain and fodder. These beneficial effects tend to increase with time.

The original Bombay Land Improvement Schemes Act has been now considerably amended in the light of experience gained and is applied to several water-sheds.

Cultivation and Tillage.—The improvement of the ordinary cultivation and tillage methods in common use in India offers a wide field for increasing the yields of field crops and, consequently, the profits of the agriculturists. In many parts of India, cultivation is good but, particularly in the non-irrigated tracts and in areas liable to failure of rainfall, there is much room for improvement. In this connection, the research work on dry-farming methods, which is being conducted in Bombay, Madras and Hyderabad under the auspices of the Indian Council of Agricultural Research, is of very great importance.

Two economic factors which tend to keep down the standard of cultivation in many Provinces of India are the fragmentation and sub-division of holdings, resulting from Indian laws of inheritance, and certain systems of land tenure whereby the cultivator, as a tenant, has no interest in permanent improvement of his holding. In addition, the agriculturists rarely live on their lands but congregate in villages for mutual protection. Efforts are now being made in many Provinces to eliminate these factors, which contribute to a low standard of cultivation.

The main object of tillage methods for rabi, *i.e.*, cold-weather, crops is the conservation of soil moisture and the preparation of a good seed-bed to ensure germination of seed. To achieve these objects, the land is given repeated shallow ploughings or harrowings, which produce a surface mulch over a moist subsoil. For kharif, *i.e.*, hot-weather crops, the preliminary cultivation of the fields is usually much less thorough as sowings must commence as soon as the rains break. The practice of drilling the crops in rows is rapidly supplanting the old method of broadcasting in many tracts. The former method permits the intercultivation of the crops by bullock implements and greatly reduces the cost of weeding. Harvesting is generally done by hand implements. The use of tractor outfits for mechanical cultivation is still largely limited to large estates and, in certain tracts, to such specific purposes as the eradication of deep-rooted weeds.

Irrigation.—The Chief characteristics of the Indian rainfall are its unequal distribution throughout the country, seasonal irregularity of precipitation and liability to failure or partial deficiency in many tracts. The average annual rainfall for the whole country is about 45 inches and there is little variation from this average from year to year. But, within individual tracts, remarkably wide variations in total annual rainfall are found. At many recording stations, annual rainfall of less than half the average precipitation are not uncommon, and in cases of extreme drought, less than one quarter of average rainfall has been recorded in precarious tracts. Such tracts include practically the whole of the Punjab and North West Frontier Province, the United Provinces except the sub-montane regions, Sind, a large portion of Bihar, most of Madras and the Bombay Province, omitting the coastal belts, and portions of the Central Provinces. The Indian canal system (excluding Burma) is by far the largest in the world. Of the total cultivated area of 245 million acres, about 57 million acres are irrigated annually from one source or another. Of this huge area, 30 million acres are irrigated by canals, 14 million acres by wells and 10 million acres from tanks and other sources. Protective irrigation works have made agriculture stable instead of precarious in many districts. The great perennial canals in the North of India draw their supply from snow-fed rivers; the inundation canals run only when the rivers rise with the melting of the snow in April-May and must close when supplies fall at the end of the monsoon. Other canals depend for their supply during the dry part of the year on water stored behind great dams thrown across suitable gorges. Water rates are levied on the area of irrigated crops matured so that Government bears part of the risk of failure of crops. As there is a tendency on the part of the cultivators to waste large quantities of water, the system of charging for water on volumetric basis is being introduced on some of the Deccan Canals in Bombay. Different rates are charged for different crops and vary somewhat in different parts of India; rates are also lower when the water has to be lifted than when flow irrigation is given.

The Madras, Bombay and Sind Provinces possess some of the most spectacular irrigation schemes in the world. The Cauvery-Mettur irrigation system inaugurated in 1934 is considered to be the biggest in the British Empire and the largest single block masonry reservoir in the world, with a storage capacity of 93,500 million cubic feet. The Wilson Dam at Bhandardara, impounding 272 feet of water, is far and away the highest dam in India, whilst the Sukkur Barrage in Sind across the Indus irrigates a desert whose area far exceeds that of any other scheme conceived by engineers.

About one-quarter of the total irrigation of the country is got from lifting water from wells ranging in depth from a few feet to over fifty feet. Their numbers have greatly increased in recent years largely through Government advances for their construction. The recurring cost of this form of irrigation has, however, greatly increased owing to the high price of draught cattle and the increasing cost of their maintenance.

All agricultural departments are now giving increased attention to the better utilisation of underground water-supplies existing wells being improved by boring and tube wells of large capacity installed and equipped with pumping machinery. In scarcity areas the large scale bunding operations undertaken by the Bombay Department of Agriculture will lead to the increase in the water-supply of wells. Efficient types of water lifts are rapidly replacing the old-fashioned *mhotaa*.

Tank Irrigation is common in Central and Southern India. Large quantities of rain water are stored in lakes (or tanks) during the rainy seasons and distributed during the drier seasons of the year. Often the indirect effect of the tank in maintaining the sub-soil water level is as important as the direct irrigation.

Manures and Manuring.—The great bulk of Indian soils are deficient in organic matter. In other agricultural countries of the world, this want is usually met by the return of farmyard manure to the land or by the use of composts made from crop residues and similar waste organic materials. In India, however, cattle dung is largely utilised for village fuel but the practice of composting is now being rapidly developed in many areas. The cultivation of green manure crops is making headway, especially in the irrigated tracts, and many Provincial Governments allow concessions to encourage their extension. The use of certain oil-cakes, especially groundnut and castor cake, is on the increase and this method of manuring is now common with many irrigated crops. With regard to artificial fertilisers, nitrogenous organic manures, *e.g.*, ammonium sulphate and nitrate of soda, are being extended in use through the efforts of departmental and private agencies and the question of the manufacture of such manures in India is now receiving close attention of the Government of India and Provincial and State administrations.

Rice.—Rice is the most extensively grown crop in India, and on an average, occupies about 28% of the total cultivated area. It preponderates in the wetter parts of the country, *viz.*, in Bengal, Bihar and Orissa, and Madras. Exclusive of Burma, which is now politically separated from the Indian Empire, the area fluctuates slightly around 72 million acres and the yield is about 27 million tons. In 1941-42, total area under rice including Indian States was 75 million acres with a total yield of approximately 25 million tons. The crop requires for its proper maturing a moist climate with well assured rainfall. The cultivated varieties are numerous differing greatly in quality and in suitability for various conditions of soil and climate. Rice is either broadcast, drilled or transplanted. Broadcast rice is grown generally in low-lying areas and is sown before the monsoon. Sprouted seed is also sown broadcast in standing water after the onset of the monsoons, particularly in the salt-land paddy areas.

For transplanted rice the seedlings are raised in the nursery generally located in a high lying portion of the field and the nursery is rabbed or burnt over with cowdung or brush wood and grass. The seedlings get ready for transplanting within 4-5 weeks after sowing. The soil is generally prepared after the arrival of the monsoon and is worked into a puddle before the seedlings are transplanted. The seedlings are planted either singly or in small bunches containing from 4 to 6 plants each and are simply pushed into the mud at distances of 9 to 12 inches apart. The rice-fields are kept more or less under water until the crop shows signs of ripening. The area under improved varieties of rice distributed by the agricultural departments is now over 4 million acres. Various schemes for the intensification of research on rice in all the principal rice-growing provinces financed by the Indian Council of Agricultural Research are in progress.

India (excluding Burma) consumes more rice than she produces, the balance in the past having been provided almost entirely by Burma. Imports in 1941-42 were 986,000 tons, mainly from Burma, Siam and French Indo-China.

Wheat.—Wheat is grown widely throughout Northern India as a winter crop, the United Provinces and the Punjab supplying about two-thirds of the total area, and nearly three-quarters of the total outturn in India. This crop occupies, on an average, about 10 per cent. of the total cultivated area in the country. The majority of the varieties grown belong to the species *Triticum vulgare*. Bombay mostly grows durum wheats in which a number of improved strains are evolved and are spreading rapidly. A new improved wheat, called Nidhad-4, having the blood of durum, dicoque and dicoccum wheat species has been recently evolved with exceedingly good baking quality. Indian wheats are generally white, red and amber coloured and are mostly classed as soft from a commercial point of view. Most of the Indian wheats are soft weak wheats but there are some well-known Maccaroni wheats amongst them. The largest wheat acreage of recent years was that of 1933-34, namely, 36 million acres but the yield did not come up to the record harvest of 1939-40 which exceeded 10½ million tons. Recent crops have averaged about 9 million tons per annum which is only slightly, if anything, above internal requirements. With the development of irrigation from the Lloyd Barrage Canal in Sind and in the newer Punjab Canal Colonies a further increase in wheat production is certain. The crops generally grown after a summer fallow and except in irrigated tracts, depends largely on the conservation of the soil moisture from the previous monsoon. On irrigated land 2 to 4 waterings are generally given. The crop is generally harvested in February to April and the threshing and winnowing go on up till the end of May. The total area under improved varieties of wheat is now over 8 million acres. The Indian Council of Agricultural Research has appointed two Standing Committees to advise on problems connected with rice and wheat.

The Millets.—These constitute one of the most important groups of crops in the country, supplying food for the poorer classes and fodder for the cattle. The varieties vary greatly in quality, height and suitability to various

climatic and soil conditions. Perhaps the two best known varieties are Jowar (*Sorghum vulgare*) the *great* millet, and Bajra the Bulrush millet (*Pennisetum typhoideum*) which, between them, occupy about 50 million acres annually. In 1941-42, the total area under jowar and bajra in India was 36 million acres excluding Indian States. Generally speaking the jowars require better land than the bajras and the distribution of the two crops follows the quality of the soil. Both the crops are generally sown in the beginning of the monsoon and so they require to be thoroughly weeded. It is often grown mixed with the several pulses especially *Arhar* (*Cajanus cajan*—pigeon pea) and other crops, and is commonly rotated with cotton. The subsidiary crops are harvested as they ripen either before the millet is harvested or afterwards. In some provinces like Bombay *rabi* juar is also an important crop.

Pulses.—Pulses are commonly grown throughout India in great variety and form the backbone of the agriculture, since even the present moderate degree of soil fertility could not be maintained without leguminous rotations. They are a primary necessity in the food of a vegetarian population. The yields on the whole are fairly good, mixed cropping is common. The principal pulses are *Arhar* (*Cajanus cajan*), gram (*Cicer aristinum*), various species of *Phaseolus* and *Pisum*.

Cotton is one of the most important commercial crops in India. The average area under cotton in the quinquennium ending 1938-39 was 24.6 million acres and the average yield 5.5 million bales of 400 lbs. each. During the five year period ending 1943-44 the average annual acreage and yield decreased to about 21.9 million acres and 5.4 million bales respectively. In 1943-45 the estimated area and yield were 14.8 million acres and 5.4 million bales respectively. The ascertained area under improved varieties of cotton in 1944-45 was about 7.8 million acres. The consumption of Indian cotton in mill- in India amounted to 4,159,000 bales in 1944-45. The principal export is of short staple cotton below 7/8" in staple but there is also in normal years an export of medium and long staple Indian Cotton, of staple length 7/8" to 1-1/16", such as Punjab-American. There is no Indian cotton belt; Bombay Province, the Punjab, the Central Provinces and Berar, Madras Province, Sind and United Provinces and the Indian States of Hyderabad and Baroda, all have important cotton tracts producing distinct types. Sowing and harvesting seasons are equally diverse the former extending from May to December in different parts of the country and the latter from October to May and June. Yields vary greatly; in the best irrigated tracts the normal yield is about 200 lbs. of ginned cotton per acre, and yields much above this have been recorded, whilst in the poorest unirrigated tracts 60 lbs. per acre is a good crop. Of recent years, as the result of the work of the Agricultural Department and the Indian Central Cotton Committee, the quality and yield of staple cottons have improved and also the yield and cleanliness of the produce from the short staple tracts.

The Cotton Transport Act, the Cotton Ginning and Pressing Factories Act, the Bombay Cotton Market Act, the Central Provinces Cotton Markets Act and the Madras (Commercial Crops) Markets Act have all been passed at the instance of the Committee and are doing much to check adulteration and promote better marketing. In certain provinces, legislation has been enacted, or is under consideration, with the aim of preventing the growing of very inferior varieties and of stopping certain malpractices which affect the quality and reputation of Indian cotton. Agricultural Departments have continued their campaign of cotton improvement apart from improvements in methods of cultivation.

Exports.—The figures for export by sea of Indian cotton from British India to foreign countries for the five fiscal years (ending 31st March) 1938-43 are shown in the table below :—

(In thousand bales of 400 lbs. each.)

Countries	1938-39.	1939-40.	1940-41.	1941-42.	1942-43.

Other countries.	268	296	239	289	16
Total ..	2,703	2,918	2,168	1,438	301

Sugarcane. India, until recently a large importer of sugar, is now one of the most important sugarcane growing countries in the world. The area in 1945-46 was estimated to be 3,847,000 acres as against 4,134,000 acres in 1944-45. The crop is mostly grown in the submontane tracts of Northern India, more than half the area being in the United Provinces. The indigenous hard, thin low-sucrose canes have now largely been replaced by seedling canes of high quality mainly the production of the Imperial Sugarcane Breeding Station, Coimbatore. The total areas, under improved varieties of cane of India in 1941-42 and 1942-43 were estimated to be 2,823,207 acres and 3,004,047 acres representing approximately 77.9 and 80.0 per cent respectively of the total area. The number of factories in different Provinces and States has increased from 139 in 1932-33 to 167 in 1944-45 with 140 working factories during the season of 1944-45. The production of sugar direct from cane during the season of 1944-45 totalled 953,500 tons as against 1,216,400 tons in 1943-44, showing a decrease of 21.6 per cent. The percentage

recovery of sugar from cane during 1944-45 for the whole of India was 10.31. Owing to the international situation, sugar imports were negligible during 1944-45, but the supply position continues to be satisfactory.

Oilseeds.—**The crops classified under the heading are chiefly groundnuts, linseed, sesamum and the cruciferous oilseeds (rape, mustard, etc.). Although oilseeds are subject to great fluctuation in price and the crops themselves are more or less precarious by nature, they cover an immense area.**

Groundnut.—India has the largest area under groundnuts in the world. Madras ranks first, claiming more than 50 per cent. of the acreage and production, and is followed by Bombay and Hyderabad. The area under this crop in 1941-42 was 7 million acres. In that year the yield was approximately 3 million tons.

Linseed requires a deep and moist soil and is grown chiefly in the Central Provinces, Bihar and United Provinces. The crop is grown for seed and not for fibre and therefore, has developed a shorter and branching habit of growth. The yield varies from 400 to 500 lbs. per acre. It is grown chiefly for export. Since the outbreak of the Second World War, the area under this crop has fallen considerably owing to the stoppage of exports. The area under linseed was 3,318,000 acres with a yield of 564,000 tons in 1941-42.

Sesamum (Gingelly) is grown all over India. In some places it is grown as a monsoon crop and in others as a winter crop. In 1941-42, it occupied an area of 4,145,000 acres with a yield of 414,000 tons.

The Cruciferous Oilseeds form an important group of crops in Northern India where they grow freely and attain a fair state of development. The area under rape and mustard, including an estimated figure for the area grown mixed with other crop is about 5½ to 7 million acres annually. Production in 1941-42 was 1,004,000 tons from an acreage of 6,204,000 acres. A large portion of the crop is crushed locally for domestic consumption.

Jute is one of the most important cash crops. The fibre is obtained from two species of annual plants called *Corchorus capsularis* and *Corchorus olitorius*.

Jute is grown in the alluvial soils of Bengal, Bihar, Orissa and Assam, Bengal contributing to about 80% of the total acreage. The total acreage in India in 1937-38 was 2·9 million acres yielding about 12 million bales jute (one bale = 400 lbs.). It is a rainy season or *Kharif* crop and is sown broadcast during February to May on well prepared seed beds. Two to three inches of rainfall during sowing and alternate periods of sunshine and moderate rainfall (about one or two inches every week) thereafter, seems ideal for a good growth of the crop. It responds well to weeding and thinning processes which are usually given 2 or 3 times during the growing season.

The plants often grow to a height of 12 feet or more. Four to five months after sowing when they are in flower the plants are cut close to the ground. Cut plants are tied up into bundles and steeped under water for retting. In about 12 to 25 days, the retting is complete; the fibre is then carefully separeted out from the stalks, washed and dried. It is then ready for various commercial uses. The outturn of dry fibre of jute generally varies from 12 to 25 mds. with an average of 15 mds. per acre, depending upon soil fertility and other factors.

Quality in jute is judged by its strength, fineness, colour, lustre, length and uniformity. The types of goods ordinarily manufactured from jute fibre in India are hessians, sackings, canvas and tarpaulins; certain 'specialities' for example, rugs and carpets, linoleum hessians, etc., are also made on a small scale. Since the commencement of the second world war, however, jute has been put to many new lines of manufacture in India, e.g., sand bags, union fabrics (jute-cotton), tents, hoodcloth, netting, cords, etc.

India practically holds a monopoly of the production of raw jute. Attempts have been made and are still being made in different parts of the world to grow jute but nowhere has it been possible to grow jute on such a scale as to break down the monopoly of India.

Compulsory restriction of jute acreage in Bengal came into force from 1941. Total areas under the crop in India during the years 1940, 1941 and 1942 were 2,400,970, 21,03,055 and 2,010,475 acres respectively and the corresponding yields were 7,104,195, 6,205,205, and 7,004,140 bales respectively. The average area and the yield of the crop for a period of 10 years ended with 1940 was 23,14,000 acres and 84,74,000 bales respectively.

The annual world consumption of jute during the last 10 years varied from 77 to 126 lakhs of bales of 400 lbs. each, the average being about 98 lakhs of bales. Shipping difficulties and other factors arising out of the war adversely affected the jute trade in 1945.

Tobacco is grown here and there all over the country chiefly, however, in Bengal, Bihar, Bombay, Madras and Burma. Of two varieties cultivated *Nicotiana Tabacum* is by far the most common. Maximum crops are obtained on deep and moist alluvium soils and a high standard of cultivation including liberal manuring is necessary. The seed is germinated in seed beds and the young plants are transplanted when a few inches high, great care being taken to shield them from the sun till they are well established. The crop is very carefully weeded and hoed. It is topped after attaining a height of say, 2ft., and all suckers are removed. The crop ripens from February onwards and is cut just before the leaves become brittle. The greater part of the tobacco grown in India is intended for *Hooka* smoking and is coarse and heavy in flavour. Lighter kinds are also produced for cigar and cigarette manufacture. Of recent years there has been important development in the production, in commercial quantities, of better quality cigarette tobacco both in Madras and in Bihar. The area under tobacco in British India in 1940-41 was 11,25,000 acres as against

11,80,000 acres in 1939-40. The total yield of dried leaf was 423,000 tons in 1940-41 as against 449,000 tons in the preceding year. Bombay is known for the production of a good quality of Bidi Tobacco.

Live-stock Census.—The report on the 5th quinquennial Census of Live-stock in India, taken in January 1940, shows that there were then in British India, excluding United Provinces, Bihar and Orissa, 110 million heads of bovine cattle, made up roughly of about 87 million heads of oxen and 22 million heads of buffaloes.

For draught purposes cattle are mainly used everywhere though male buffaloes are important as draught animals in the rice tracts and damper parts of the country. For dairy purposes, the buffalo is important, the milk yield being high and the percentage of butter fat considerably above that in cow's milk. The best known breeds are the Murra buffaloes of the Punjab, the Jafferabai buffaloes of Kathiawar, and the Surti and Pandharpuri buffaloes of the Bombay Province. The cattle and buffalo population in India is abnormally high amounting to over 60 per cent. of the human population. The spread of cultivation has diminished the grazing grounds, insufficient fodder crops are raised and many of the cattle are small, ill fed and inefficient. Nevertheless the best Indian breeds have many merits. Of the draught types, the best known breeds are the Hissar (Punjab), Hansi (Punjab), Bhagnari, Baluchistan), Nellore (Madras), Amrit Mahal (Mysore), Kankrej (Gujarat), Kangayam (Madras), Khillari (U.P.), Malvi (C.I.), Khillar (Deccan), Nimar (East Khandesh), and Dangi (Konkan). Amongst the best milking breeds are the Sahiwal (Punjab), the Gir (Kathiawar) and Sindi (Sind). Of the dual-purpose (i.e. draught and milk combined) the best known breeds are Hissar (Punjab), the Haryana (Punjab cattle), the Thar-Parkar (Sind), the Kankrej (Gujarat) and the Gir (Kathiawar). On the Government cattle-breeding farms pedigree herds are being built up and from these selected bulls are issued, preference being given to special breeding areas to villages which undertake to exclude "scrub" bulls and where serious efforts to maintain a good strain of cow are made. Once established such breeding areas rapidly produce a supply of superior bulls for general distribution and in this way the valuable bulls from Government herds are used to advantage. The premium bull system is also working well in some tracts.

Cattle Improvement.—India possesses some very fine breeds of cattle, each breed being peculiarly suited to the area to which it is indigenous. To mention some, there is the heavy fast Kankrej breed in Gujarat, admirably suited to the sandy deep rutted roads found in this part. Then we have the Dangi or Kala Kheri born and bred in the hilly, heavy rainfall area of the western ghats. Rain and water logged conditions do not affect this breed; indeed, the more the rain, the better it thrives. On the plateau of the Central Deccan, we have the Khillar, a light fast draught animal which thrives on very meagre pastures and is essentially suited to the hard stony country in which it is reared.

A good deal has been done for the improvement of cattle. The various Provinces have farms on which pedigree bulls are bred and reared. These are placed out in suitable villages on a premium system. In the Province of Bombay, Herd Registers are maintained for 8 of the breeds of the Province, shows are held annually and progress is to be noticed in those areas in which such work has been undertaken. In addition, the Bombay Live-stock Improvement Act of 1933, known as the "Castration Act" which is intended to prevent promiscuous breeding by undesirable male stock in the villages has now been applied to 112 villages in the Province.

Sheep Improvement.—It has been estimated that the number of sheep in India is in the neighbourhood of 4½ crores and that the total quantity of wool produce is 8½ crore pounds annually. The production of wool per sheep varies greatly in different parts of the country. In the North-West Frontier Province, Baluchistan, Sind, the Punjab, United Provinces, Rajputana and Western India States, the annual production per sheep is estimated at between 2 lbs to 4 lbs, while in the rest of the Provinces it does not exceed 1 lb. The average for the whole of India is in the neighbourhood of 1·9 lb. per sheep per year. This would indicate the vast scope for increasing wool production.

The improvement of finer qualities of wool has been engaging the attention of the Imperial Council of Agricultural Research since 1933, and a systematic breeding on the five principal Indian breeds of sheep was undertaken in the Punjab (Hissar), Madras (Hosur and Bombay Province) and promising results have been achieved. The Wool Analysis Laboratory in Bombay has systematised the methods of valuation of wool for selective breeding and further research on wool fibre and its relation to sheep breeding is being carried out and successful results obtained in the districts.

Dairying.—India is still far behind other countries in the matter of dairy farming and in the retail dairy business. This is mainly due to the climatic conditions of the country and the vast distances to be covered in transporting milk. The only solution seems to be Co-operative dairy produce, handling and sale societies. Dairy farming in India is at present, a cottage industry, each household producing a few pounds of milk; at present this milk is converted by very wasteful methods into products that can be stored and transported long distances, such as ghee, (clarified butter), country butter, and Khawa, a desiccated whole milk produced by boiling milk and evaporating the water contents until a solid mass is obtained.

Each Province has its Agricultural College where Dairying in all its aspects is taught, and for higher training in this subject, there is the Imperial Institute of Animal Husbandry and Dairying. A good deal of research is still necessary.

The butter trade has improved considerably of late years. In cities pasteurizing plants for the retail milk trade are gradually increasing. Milk is now sold in sealed bottles; this trade, however, is small. The Indian milk consumer in large cities still demands his milk just prior to consumption. Unlike the two deliveries of milk in other countries, the milk producer in our large

cities has to deliver milk about 5 times a day; this naturally makes milk more expensive. India is experiencing the same difficulties as other countries when milk was produced in the cities (*i.e.*) the destruction of cows and calves in the cities when dry.

The Government of India maintain an Institute of Animal Husbandry and Dairying at Bangalore where students are given 2 year courses for the Indian Dairy Diploma.

Animal Husbandry.—Details of the steps taken and progress made in the control of disease and improvement of stock are given in a biennial review of animal husbandry in India.

The control of contagious diseases of live-stock in India is carried out by the Civil Veterinary Departments in the Provinces and major Indian States. The staffs of these departments are, for the most part, recruited from among the graduates of Indian Veterinary Colleges of which there are five, viz., one each at Lahore, Patna, Calcutta, Bombay and Madras. The chief research centre is the Imperial Veterinary Research Institute at Mukteswar in the United Provinces and its branch at Izatnagar, near Bareilly. This institute is maintained by the Government of India and has recently been considerably expanded, the latest additions being a poultry research station and a nutrition institute. A certain amount of research is also conducted at the Provincial Colleges.

In addition to research, the Imperial Veterinary Research Institute also manufactures large quantities of sera and vaccines for the use of the Provincial Departments in their fight against disease and until recently was the only manufacturing centre for these products. Serum institutes have, however, been opened in recent years at Madras and Bangalore, mainly for the manufacture of biological products for the use of the Madras and Mysore Civil Veterinary Departments respectively.

The chief diseases that the Civil Veterinary Departments have to deal with are glanders and Surra in equines, and rinderpest, foot and mouth disease, hæmorrhagic Septicæmia, black quarter and anthrax in ruminants while tuberculosis, Johne's disease and contagious abortion are assuming greater importance than in the past. Glanders and Surra are both scheduled diseases under the glanders and fracy act. Glanders is incurable but surra can now be successfully treated with Naganol. This disease (surra) also affects camels, cattle and dogs and in recent years its importance as a bovine disease has been more widely recognised.

Of the diseases of ruminants mentioned, all, with the exception of foot and mouth disease, can now be controlled either by the inoculation of protective sera or by vaccination.

The successful manufacture of anthrax "spore" vaccine at Mukteswar is another advance of great importance in the fight against live-stock disease in India.

Indian poultry are also subject to several contagious diseases. The dreaded "Ranikhet" disease is fairly wide-spread and its ravages have seriously interfered with the poultry industry. So far no treatment, either curative or prophylactic, has proved successful and the application of strict hygienic measures still remains the chief method of controlling it. Fowl pox and Fowl cholera vaccines are available for the protection of poultry against those diseases.

The introduction of disease into India is controlled by the application of the "Live-stock Importation Act" at all ports at which the landing of animals is permitted.

In addition to their duties in connection with disease control, the Civil Veterinary Departments also conduct the treatment of animals in hospitals and dispensaries. The institutions are for the most part maintained by Local Boards with financial assistance from Government, the professional staff usually being provided by the Governments.

AGRICULTURAL PROGRESS.

Agricultural Progress.—The historical aspect of agricultural development in India has been fully dealt with in the report of the Linlithgow Commission. The Famine Commission as long ago as 1866 made the first proposal for a separate Department of Agriculture but little resulted except the collection of agricultural statistics and other data with the object of throwing light on famine problems. The Famine Commission of 1880 by their masterly review of the possibilities of agricultural development revived interest in the matter and their proposal for a new Department for Agriculture and allied subjects in the Government of India and for provincial departments of agriculture bore fruit eventually. Provincial Departments mainly concerned themselves at first with agricultural statistics but experimental farms were opened at Saidapet in 1871, Poona in 1880, Cawnpore in 1881 and Nagpur in 1883; there were various sporadic attempts at agricultural improvement but no real beginning was made until technical agricultural officers were appointed. In 1901, the first Inspector-General of Agriculture was appointed and in the same year an Imperial Mycologist was added followed by an Imperial Entomologist in 1903. The present departments of agriculture, however, owe their existence to the foresight and energy of Lord Curzon whose famous despatch of 1903 marked the commencement of the reorganisation which took place in 1905. That scheme provided for a central research institute at Pusa, completely staffed provincial departments of agriculture with agricultural colleges and provincial research institutes and an experimental farm in each important agricultural tract. The Indian Agricultural Service was constituted in 1906. Since that date progress has been steady and continuous. With the advent of the reforms of 1919, agriculture became a provincial transferred subject but the Government of India retained responsibility for central research institutions and for certain matters connected with the diseases and pests of plants and animals. The Imperial Sugarcane-breeding station at Coimbatore is yet another branch of the Imperial Agricultural Research Institute.

Parallel developments took place in the provision made for matters connected with animal health. The now world-famous Imperial Institute of Veterinary Research at Mukteswar started in 1893 as a modest hill laboratory for research on rinderpest. It is now a fully equipped research institute which also manufactures protective sera and vaccines of which some 6 million doses are issued annually. The Civil Veterinary Department was formed in 1891 and until 1912 was under the control of the Inspector-General. The departments were completely provincialised in 1919, the Government of India continuing to finance and control the Mukteswar Research Institute and its branch station at Izatnagar (Bareilly).

Recent Progress.—As now constituted, the agricultural departments include a complete organisation for bringing the results of the application of science to agriculture into the village. At one end of the scale are the agricultural colleges and research institutes—at the other thousands of village demonstration plots where the effect of improved seed, methods, implements and manures is shown under the cultivators' own conditions. Intermediate links in the chain are the experimental farms, where scientific research is translated into field practice, demonstration and seed farms and seed stores. The ascertained results of the work of the agricultural department are striking enough. The latest available figure regarding the area under improved varieties of crops in British India was approximately 23·00 million acres. These figures by no means represent the whole extent to which improved strains have replaced old varieties as it is almost impossible to gauge the full extent of the "natural spread" of improved varieties. Improved methods of cultivation and manuring are steadily spreading, work is in progress on most of the major crops and each year brings new triumphs.

The Government of India have recently announced their intention to render further assistance to the agriculturists by providing better facilities for credit and for the marketing of agricultural produce. A central marketing section has been established under the Imperial Council of Agricultural Research. It works in collaboration with the special marketing staff appointed in the various provinces.

THE INDIAN COUNCIL OF AGRICULTURAL RESEARCH.

In Chapter III of their Report, the Royal Commission on Agriculture in India held that agricultural research in India was still in its infancy; that however efficient the organisation which was built up for demonstration and propaganda, it could not achieve a full measure of success unless it was based on research; that lack of co-ordination in agricultural research had prejudicially affected progress; that there was a wide field open for the co-operation of the Government of India and of Provincial Governments in regard to agricultural research; and that it was the duty of the Government of India in the discharge of the ultimate responsibility for the welfare of the vast agricultural population of this country, to advance research in every way possible without encroaching upon the functions of Provincial Governments in that sphere.

The Royal Commission, after discussing the possible methods by which closer contact might be established between scientific investigators working in the Institutions under the Central Government and investigators employed under the Provincial Governments, recommended the establishment of an Imperial Council of Agricultural Research to which the Imperial Agricultural Research Institutions and the Provincial Agricultural Research Institutions would stand in exactly the same relation

In the Department of Education, Health & Lands Resolution No. 826-Agr., dated 23rd May, 1929, the Government of India decided that the Imperial Council of Agricultural Research should be registered under the Registration of Societies Act, XXI of 1860, and the Council was accordingly registered as a Society under the provisions of that Act. The Royal Commission on Agriculture envisaged that the primary function of the Council should be to promote, guide and co-ordinate agricultural, including veterinary, research in India and to link it with agricultural research in other parts of the Empire and in foreign countries. It should make arrangements for the training of research workers, should act as a clearing house of information in regard not only to research but also to agricultural and veterinary matters generally and should take over the publication work which was being carried out by the Imperial Agricultural Department In the light of the experience gained during the years the Council has been in existence, it has recently been decided that the Council's functions should be enlarged to include work connected with the application of the results of research to field practice and the Council's function is now to undertake, aid, promote and co-ordinate agricultural and animal husbandry education, research and its application in practice, development and marketing in India by all means calculated to increase scientific knowledge of the subjects and to secure its adoption in everyday practice.

The Commission recommended that the Council should be entrusted with the administration of a non lapsing fund of Rs. 50 lakhs to which additions should be made from time to time as financial conditions permitted. The Government of India decided that an initial lump grant supplemented by a fixed minimum grant annually should be made to the Council. They decided that the initial grant should be Rs. 25 lakhs of which Rs. 15 lakhs would be provided in the budget for 1929-30 and from the next financial year onward the annual recurring grant would be fixed at Rs. 7.25 lakhs per annum of which Rs. 5 lakhs would be devoted to the furtherance of the scientific objects of the Council and the remaining Rs. 2.25 lakhs to the cost of its staff and Secretariat. In 1940 the Agricultural Produce Cess Act was passed under which a cess of ½ per cent *ad valorem* on certain commodities was levied for the purpose of providing funds for carrying out the general research programme of the

Council. The proceeds of the cess were expected to yield in a normal year about Rs. 14 lakhs.

As regards the constitution of the Council, the Government of India decided that the Council should be divided into two parts, a Governing Body which would have the management of all the affairs and funds of the Council subject to certain limitations and an Advisory Board the functions of which would be to examine all proposals in connection with the scientific objects of the Council which might be submitted to the Governing Body. The Governing Body of the Council consists of the Member of the Governor-General's Council in charge of the portfolio of Agriculture who is the ex-officio Chairman, the Vice-Chairman, I.C.A.R., the Ministers of Agriculture in the Provinces, one representative from the Council of State, two representatives from the Legislative Assembly, one representative of European business community and one representative of the Indian business community, two representatives of the Advisory Board, the Secretary to the Government of India in the Department of Agriculture and such other persons including nominees of Indian States as may be appointed from time to time by His Excellency the Governor-General. The Advisory Board consists of the Vice-Chairman of the Society (ex-officio Chairman) the Agricultural and Animal Husbandry Commissioners, the Directors of the I.A.R.I., the I.V.R.I. and the Indian Institute of Science, Bangalore, the Directors of Agriculture and members of the Society representing the Provincial Veterinary Departments of the Provinces, a representative of minor administrations, a representative of the Forest Research Institute, a representative of the Co-operative Department, a representative of the Indian Research Fund Association, four representatives of Indian Universities, a representative of the Indian Tea Association and the United Planters' Association of Southern India, representatives of the All-India Commodity Committees, persons nominated as members on the ground of scientific knowledge or other special qualifications and such other persons including nominees of Indian States as may be appointed from time to time by His Excellency the Governor-General.

At present the following Indian States are affiliated to the Council, *viz.*,—

Hyderabad, Mysore, Travancore, Bhopal, Cochin, Kashmir, Baroda, Gwalior, Bikaner and Patiala.

Officers of the Council.—

Chairman.—The Honourable Sardar Sir Jogendra Singh.

Vice-Chairman.—Sir Herbert R. Stewart, C.I.E., I.A.S. (on leave). Sardar Bahadur Sir Datar Singh (Officiating).

Joint Vice-Chairman.—Sardar Bahadur Sir Datar Singh.

Secretary.—M. S. Randhawa, I.C.S., F.N.I., F.I.A.Sc., F.N.A.

Under-Secretary.—Rai Sahib S. C. Sarkar, B.A.

Animal Husbandry Commissioner.—Major Grahame Williamson, O.B.E., M.R.C.V.S., D.V.S.M.

Agricultural Commissioner.—D. R. Sethi, C.I.E., I.A.S.

Assistant Animal Husbandry Commissioner.—H. K. Lal, F.S.C., M.R.C.V.S.

Assistant Agricultural Commissioner.—I. B. Chatterji M.Sc. (Agri.), L.Ag.

Statistical Adviser.—Dr. P. V. Sukhatme, D.Sc., Ph.D.

Agricultural Marketing Adviser.—Khan Bahadur A. R. Malik.

Editor, Council's Journals.—Dr. U. N. Chatterji, D.Sc., Ph.D.

IMPROVEMENT OF AGRICULTURAL MARKETING IN INDIA.

In view of the importance of agricultural marketing as an aid to the general economic recovery of the country, the Government of India decided to give effect to the recommendations made by the Royal Commission on Agriculture and generally endorsed by the Central Banking Enquiry Committee regarding marketing surveys. After consultation with Provincial Governments, it was decided that the first step should be the appointment of a highly qualified and experienced marketing expert with practical knowledge of agricultural marketing in other countries.

Central Agricultural Marketing Dept.—In accordance with this decision, the office of the Agricultural Marketing Adviser to the Govt. of India, which has since been redesignated as the Central Agricultural Marketing Department, was constituted with effect from 1st January 1935, at Delhi with Mr. A. M. Livingstone as the first Agricultural Marketing Adviser. After more than six years of useful activities in India, he relinquished charge of his office, on the 17th March, 1941. The present incumbent of the post is Khan Bahadur A. R. Malikh, M.A., B.Sc., (Edin.).

The post of Deputy Agricultural Marketing Adviser to the Government of India which had been added on to the Department in July 1940 was held in abeyance till September 1943, when it was revived and filled by Khan Bahadur A. R. Malik, M.A., B.Sc. (Edin.). On his appointment as Agricultural Marketing Adviser in August 1945, Khan Bahadur Malik was succeeded by Dr. T. G. Shivrame, B.Ag., Ph.D., F.S.S., F.R. Econs. S., as Deputy Agricultural Marketing Adviser. The technical Staff now consists of an Agricultural Marketing Adviser, a Deputy Agricultural Marketing Adviser, 3 senior Marketing Advisers, 4 Marketing Officers (including

Marketing Officer, Arecanuts) one supervising Officer (Grading Stations) and 16 Assistant Marketing Officers including an officer on Special Duty (Dried fish). The commencement of the year 1943 saw the bifurcation of the Dept. at two stations, viz., Delhi and Ajmer, but since January, 1946, the entire Dept. is located at Delhi.

With the help of suitable subsidies from the Imperial Council of Agricultural Research, the Provincial Governments established similar organisations in their respective areas and have, in some cases, further added to their staffs to meet the growing demand for developmental work of a practical nature. Certain leading Indian States have also co-operated by appointing full-time officers in their States and over 200 States have nominated officers to deal with marketing questions. In Provinces and States which have no Senior Marketing Officers the Director of Agriculture supervises the work of the marketing section. The Central Marketing Staff are responsible for the survey work in a large number of States which do not have staffs of their own. They also have to advise and assist the local marketing staffs in carrying out their work.

Marketing Scheme.—The Marketing Scheme was originally sanctioned for a period of five years and the new organisation was given the two-fold task of (*i*) carrying out marketing surveys and publishing reports describing in detail the present system of marketing of some of the more important agricultural and animal husbandry products with recommendations regarding the lines of future improvement and (*ii*) drawing up suitable grade specifications after examining the chemical and physical characteristics of market samples of such commodities and testing the working under practical conditions. Apart from the Report on Cold Storage and Transport of Perishable Produce, in Delhi, which was issued in 1937, All-India Marketing Survey Reports in respect of wheat, linseed, eggs, tobacco, grapes, coffee, potatoes, milk, groundnuts, rice, hides, sugar, citrus fruits, markets and fairs, co-operative marketing, lac, skins, coconuts, gram, bananas, cashewnuts, barley and sheep and goats have been published already, while the reports on fish, cattle and wool and hair are expected to be released shortly. The reports on some other commodities, viz., rapeseed, mustard and toria, stone and small fruits, maize and millets, sann hamp, castor seed, ghee and other milk products, sesamum and niger seed, meat, poultry, mangoes, pulses, fibres and chillies are in different stages of preparation and some of these have been completed and are in the press. A supplement to the wheat Report, bringing the statistical data given therein up-to-date, has also been completed and is being sent to the press. "A Handbook on the quality of Indian Wool", which is intended to serve as a guide to wool merchants and persons interested in wool and a "Preliminary Guide to Indian Fish, Fisheries and Methods of fishing and curing" have also been published. During the year 1943, at the instance of the Government of India, rapid marketing surveys were also conducted in respect of (*i*) Certain English Vegetables (peas, beans, cabbage, cauliflower, tomatoes, and carrots) and certain important pulses; (2) bones and bonemeals; and (3) Indian requirements of agricultural implements and machinery, and the relevant reports were submitted to Government. It is not intended to publish these reports at this stage. In 1944, the Department similarly carried out a rapid survey of milk production in Delhi Province in connection with a scheme for the supply of milk to Government servants in Delhi and New Delhi, and submitted the report to the Government. In 1945, a rapid survey on cardamoms was carried out and the report thereon submitted to Government. The question of publishing the report is under consideration. A similar survey on arecanuts was initiated towards the close of the year and the report thereon is being prepared for submission to Government.

Cold Storage Transport.—With a view to studying the commercial possibilities of cold storage transport of perishable products like fruits, etc., certain refrigerated transport trials were conducted during 1940-41 on two N.W.R. cold storage wagons. All-India survey work on cold storage was also carried out in part during that period. In view, however, of the recent transport difficulties and the consequent shortage of wagons, the experiment and survey on cold storage has had to be postponed for the present

Grading and Marking.—In discussing steps which might be taken to improve the general level of quality the Royal Commission thought that organised trade associations in India could give great assistance in applying effective pressure to secure improved quality from the producers. This view was fully borne out by the preliminary marketing surveys and two general lines of action were decided upon: first, the physical grading and packing of commodities such as fruits, eggs, etc., on the basis of statutory standards and, secondly, the standardisation of contract terms for staples such as cereals and oilseeds. The former involved legislation and the Agricultural Produce (Grading and Marking) Act, 1937, was passed in February 1937, for defining standards of quality and methods of marking in respect of prescribed grade designations applied to schedule products. As a result of consultation with provincial governments and representative trade and manufacturing interests, further commodities were added to the schedule to the Act, which now includes fruits, vegetables, eggs, dairy produce, tobacco, coffee, hides and skins, fruit products, *ata*, oilseeds, vegetable oils (including hydrogenated oils and vegetable fats), cotton, rice, lac, wheat, sann hemp, sugarcane gur (jaggery), myrobalans and *bura*. The grading and marking rules in respect of most of these commodities have been duly prepared and notified. Tentative grade specifications and rules for several varieties of rice and fruits have also been drawn up. Several Indian States have adopted similar legislation and are applying the AGMARK to the commodities graded in their areas.

The development of trading on the basis of the standard methods of grading is definitely "catching on". In the early stages, experimental grading stations are operated on the basis of provisional standards; subsequently

the process of grading and marking is done commercially on a voluntary basis by packers holding a Certificate of Authorisation issued by the Agricultural Marketing Adviser. The authorised packer may be the primary producer or co-operative society or an association of primary producers, village collectors and processors or the individual larger packer or manufacturer holding a key position in the process of distribution.

By the close of the year 1944, the standardised grading and marking of the many commodities referred to above was being carried out commercially at some 323 centres. During 1945 alone more than Rs. 731 lakhs worth of produce were sold under the Agmark as compared with about 813 lakhs in the previous year as per details below:

Commodity.	*Value of quantity graded during*	
	1944.	1945.
	Rs.	Rs.
Ghee	5,70,83,462	4,76,37,001
Butter	29,73,036	40,62,765
Edible Oils	16,67,460	48,85,910
Hides	10,73,572	9,42,292
Eggs	17,07,112	17,41,355
Rice	22,95,176	..
Ata	76,892	..
Tobacco	18,55,290	35,08,801
Sugarcane gur ..	80,699	49,041
Bura	80,675	446
Cotton	55,82,799	40,55,041
Sann Hemp ..	60,62,000	60,92,000
Fruits & Vegetables	3,01,358	2,14,765
Fruit Products ..	4,78,814	1,38,805
Potatoes	..	..
Total ..	8,13,13,275	7,31,28,271

It will, incidentally, be seen from the above statement that in the cases of a majority of commodities the grading scheme has held its own satisfactorily in spite of the abnormal circumstances created by the war such as scarcity and transport and movement restrictions, etc. The total value of the produce graded during the year 1945 was, however, less than that graded during the previous year, as certain commodities like *rice*, and *ata* were not graded during the year and the quantity graded also declined in a few cases, *e.g.*, ghee, owing to stricter quality control arrangements. To some extent a substantial military demand was responsible for keeping up the progress in the grading of commodities like ghee, butter and eggs. In the case of ghee, the decrease in the quantity graded was also due to the fact, that owing to the termination of hostilities, the quantity of military purchase declined during the latter half of the year particularly in the Kathiawar area. Grading of ghee recorded a sharp expansion in the U. P. both in 1944 and in 1945 mainly because of a decision of the Provincial Government to ban all exports of ghee out of the Province except for a limited quantity of Agmark graded ghee for civilian consumption in areas normally catered to by the U.P. The U.P. Government have also fixed higher prices for Agmark graded mustard oil as against the ungraded oil. The grading output of this commodity is, therefore, on the increase. It is noteworthy that this principle of standardising the quality of commodities subject to substantial inter and intra-provincial movements is becoming increasingly popular. The Bihar Government are now following the example of the U.P. Government and are exploring the possibilities of adopting similar arrangements in respect of the marketable and exportable surplus of ghee and mustard oil in that province. As a first Step, the Revised Ghee Grading Scheme, which is in force in the U.P., has been extended to Bihar. The egg grading scheme is also progressing satisfactorily, and recently the Eggs Grading and Marking Rules have been amended, thus reducing the number of grades from six to four in order to facilitate rapid marketing. An interesting experiment for marking the date of grading on the shell of graded eggs was initiated at Delhi and was attended with a fair amount of success. It is proposed to adopt the principle on a wider scale as soon as circumstances permit.

Staples like *rice* and *ata* being in short supply due to war conditions have, however, recently gone down in the grading scale. Towards the close of 1943 an experiment was initiated in Madras Province to grade *rice* according to *ad hoc* war quality specifications and to link up such grading with the activities of the local Civil Supplies Department. The scheme expanded considerably but had to be closed down towards the close of 1944 due to low arrivals in the market of good quality rice. The Department also decided recently to abandon the *ata* grading scheme as it was not considered to be of direct benefit to the producers. The view has generally been adopted that as far as possible the grading of commodities, the quality of which could not be verified by definite chemical tests, should not be allowed to expand on any considerable scale. An exception has, however, been made in regard to commodities like fruits and vegetables, sugarcane gur and *bura*, when graded by producers' organisations only. The task of assisting the formation of such organisations is also being pursued vigorously.

Special mention should be made here of the scheme for the grading and marking of sannhemp introduced towards the close of 1942. The scheme was drawn up as a result of complaints received from the Hemp Controller in the United Kingdom regarding the low quality of exports of hemp from India. The scheme follows the general lines of all other grading schemes under the Agmark in that grading is done by authorised packers holding certificates of authorisation issued by the Agricultural Marketing Adviser to the Govt. of India. The Govt. of India have, by a notification under the Sea Customs Act, prohibited the export of sannhemp not graded under the Agricultural Produce (Grading and Marking) Act, 1937. In order to ensure that grading is done correctly and in accordance with the Act and the Rules, a special inspectorate staff consisting of one Chief Inspector and 7 Inspectors has been appointed at stations at Benares, Calcutta, Vizianagram and Bombay. The major portion of the cost of this staff is recovered from the trade by means of a charge of six annas

per bale. The Vice-President of the London Hemp Association visited India towards the close of 1944 and discussed the scheme with the Agricultural Marketing Adviser and the Inspectorate staff. As a result of these discussions, certain modifications in the scheme will shortly be carried out so as to ensure harmonious working. The Dept. generally keeps in touch with importers abroad and takes into account their views as also those of the exporters in this country before making any modifications in the Scheme.

In the beginning of 1944 a conference of tobacco interests convened at Guntur decided that the quality of exports of all types of tobacco from India should be controlled and that no tobacco should be exported on consignment account unless it conformed to Agmark specifications. Accordingly, early in 1945, the Central Government banned under S.19 of the Sea Customs Act, the export of flue-cured Virginia, sun-cured Virginia, sun-cured Natu and Motihari tobaccos to a foreign country other than the U.K., unless it was graded under the Tobacco Grading & Marking Rules, and certified as such by the Inspectors appointed for the purpose. They also sanctioned the posts of one Chief Inspector and 8 Inspectors to be stationed at Guntur and other centres for purposes of quality control. Later, at a conference of the trade presided over by the Supply Member of the Government of India and attended by a representative of the Tobacco Leaf Section of the London Chamber of Commerce, it was decided to extend the scheme of restricted exports to the U.K. also, and accordingly the Government of India issued a notification withdrawing the exception allowed in the case of exports to the U. K. from the operation of their former Notification banning the export of ungraded tobacco. The result is that the four varieties of tobacco mentioned above cannot be exported to a foreign country unless they are graded according to Agmark specifications. The Indian Central Tobacco Committee, who were placed in charge of all developmental and marketing schemes concerning tobacco, accordingly sanctioned an additional staff of 1 Senior Inspector and 10 Inspectors for exercising quality control. The entire tobacco grading scheme is now being financed by the Committee from the funds placed at their disposal by the Government of India. The Chief Inspector and all Inspectors, except two, are stationed at Guntur, which is an important virginia tobacco centre, and certain other places situated close to it. Two Inspectors are stationed at Bombay and Calcutta to exercise control over the exports from those places. The Tobacco Grading Scheme has been in operation for about a year and it is hoped that as in the case of sannhemp the quality of the graded products has improved appreciably.

Early in 1944 a conference of fruit products manufacturers convened by the Central Agricultural Marketing Department decided in favour of legislative action for enforcing higher standards of hygiene and sanitation in the factories. The decision was duly considered by the Government of India, and towards the end of 1945 they promulgated the Fruit Products Control Order, 1945, under the Defence of India Rules. According to this Order no manufacturer can produce on or after 1-7-46 any kind of fruit or vegetable products in British India without holding a licence under the Order from the Agricultural Marketing Adviser, the licence being granted on the fulfilment of certain conditions with regard to hygiene, sanitation, grade specifications, etc. laid down in the Order. The term "fruit products" would cover squashes, juices, syrups, etc., and the term "vegetable products," pickles and other allied products. In this connection the Government of India have sanctioned the posts of 1 Senior Inspector and 10 Inspectors as Inspectorate Staff for the purposes of assisting the Agricultural Marketing Adviser in the grant of the licence, inspection of factories, exercise of quality control and other cognate matters.

Inspection of Graded Produce.—In order to ensure adequate control of quality and proper grading, several persons in the provinces and States were authorised by the Agricultural Marketing Adviser to inspect graded produce and grading centres. The co-operation of agricultural, veterinary and allied departments in all provinces was sought for in this connection and several of their officers were provided with the necessary authority to inspect grading stations and graded produce. Arrangements have also been made for controlling the quality of graded produce by systematically analysing samples collected by the inspecting staff both from the packers' premises as well as from the markets. Nearly 10,000 samples of ghee and quite a large number of edible oil samples were analysed at the Central Control Laboratory, Cawnpore, during the calendar year 1945. Several samples of graded gur, bura, butter and fruit products are being periodically analysed at the Imperial Agricultural Research Institute and two Assistant Chemists have been appointed for the purpose.

In the earlier stages, the analysis of ata samples was being done by the Cerealist, Agricultural College, Lyallpur, and to a limited extent by the Agricultural Chemist to the Government of the Central Provinces. In 1943, an Ata Analyst was appointed to assist the Cerealist at Lyallpur in this work. A Rice Analyst was also added to the headquarters staff and the entire analytical work on rice samples was made over to him. For the purpose of keeping a vigilant watch on the quality of Agmark eggs put in Delhi market, an Egg Grading Demonstrator has also been appointed and the number of stale eggs put on the market has decreased considerably.

The exercise of quality control by examination of samples at these laboratories naturally involves a certain amount of unavoidable expenditure. This is partly offset by the sale of AGMARK labels to authorised packers. It was, however, observed that the Agricultural Produce (Grading and Marking) Act, 1937, under which such recoveries were being made, did not permit the levy of any further charges than what the labels, etc., were costing to the Department. In order, therefore, that a portion, if not the whole, of the inspection cost could be recovered from the packers who were the chief beneficiaries from the grading scheme, the Act was amended in about the middle of 1943 so as to permit recoveries on

labels for this purpose as well as for arranging any special publicity with regard to particular commodities. In the early stages, before the grading of a particular commodity has passed the experimental stage and proved its merit, it has not always been found possible to get the packers to agree to contribute in this way. Steps are being taken, however, to make quality control as far as possible self-supporting, particularly with regard to commodities mainly produced for export, *e.g.*, sannhemp, or commodities like *ghee*, the grading of which has now become definitely established. The principle of recovering a part of the cost of quality control has also been extended to the commodities, edible oils, fruit products, rice, butter (and vanaspati which is not, however, being graded).

The fairly rapid expansion in the grading of *ghee* from year to year has also committed the Department to ensure that proper arrangements are instituted or existing ones stiffened in order to provide for an unfailing check on the quality of the graded products. Certain new measures have accordingly been instituted to guard against justifiable criticism in this regard. Firstly, rigorous tests have been introduced for examining the purity of *ghee* and ensuring its freedom from adulteration. A policy of making the chemists at the laboratories of authorised packers as government servants so as to ensure that they are free from possible influences has also been initiated, the experiment being, however, confined to the United Provinces and Bihar for the present. At a conference of *ghee* packers held on the 21st April 1945, the proposed measures have generally been agreed to and the conference have further agreed to a proportionate increase in the charges levied on graded ghee so as to make the scheme self-supporting.

As a further measure of improving the existing quality control arrangements, it was also decided to divide the areas in which the ghee grading centres are located into three important zones, each zone being placed under the charge of an Inspector. Two Inspectors have so far been appointed, one with headquarters at Delhi and the other with headquarters at Patna. A third Inspector will be appointed shortly. These Inspectors exercise very vigilant control over the quality of Agmark ghee in their respective areas, and as a result of the various quality control measures, the reputation of the purity of Agmark ghee is likely to be enhanced to a considerable extent. Owing to the fact that the Kathiawar and Baroda States contributed a large proportion to the ghee graded in the country, it was found necessary to establish a Subsidiary Laboratory in Kathiawar for doing the immediate work connected with the analysis of samples. The exact place where the Laboratory is to be located is under consideration. In 1945 especially, in view of the growing popularity of Agmark products, measures were directed particularly in regard to stricter quality control and they were enforced in the case of ghee to a great degree.

Standard Contract Terms.—The Standard Contracts terms for wheat and linseed, were finally agreed to by the Grain and Oilseeds Conference, 1938, and similar terms for groundnuts were settled at an informal Conference held at Bombay in January 1939. A fairly satisfactory measure of agreement has been obtained regarding the adoption of the terms and while certain trading associations have started trading on this basis, unanimous support was not forthcoming, owing partly to the existence of an excessive number of small "futures" trading associations scattered all over the country and partly to the opposition of one or two important trading institutions and certain influential exporting and importing interests.

With a view to bringing about uniformity in the different contract terms for wheat and linseed (including the Standard Contract) adopted by the trade, an informal Conference of the representatives of 3 important trade associations of Bombay was convened in February 1941. Besides suggesting certain changes in the tolerances and limits of rejection for damaged, slightly damaged and shrivelled grains, the Conference made 2 important recommendations, viz., that (1) 25 tons should be adopted as an alternative to 500 maunds as the minimum unit of transaction, and (2) that the Cwt. should be adopted as an alternative to the maund as the unit of quotation. In the case of linseed, the Conference further suggested that the cleaning charge under "Refraction" should be lowered. These latter suggestions were circulated to the trade interests concerned and they have been accepted.

In the case of wheat, it has been decided to amend the Standard Contract for wheat as finally agreed to in 1938 and thereby implement the above-mentioned recommendations.

The Standard Groundnut Contract was examined at the Bombay Conference, 1941, and several minor changes were suggested. These were afterwards circulated to the trade interests concerned. As regards Hand Picked Selected Groundnuts (kernels and nuts in shell), the Contract terms agreed to at a Conference held in 1940, were further revised and accepted by 2 leading trade associations of Bombay. Three leading exporters of groundnuts in Madras adopted the Standard Groundnut Contract from the beginning of 1942 and they have reported that the Contract terms have been readily accepted both by the sellers and purchasing agents and that they worked very well during the period of adoption. The question of enforcing the standard contract terms for groundnuts by legislation was examined at a conference of groundnut interests convened at Bombay in August 1944 under the joint auspices of the Central Agricultural Marketing Department and the Imperial Council of Agricultural Research. The conference agreed upon the various terms except in regard to driage and methods for estimating it, and recommended that the joint be examined by the Oilseeds Committee of the Imperial Council of Agricultural Research and till then the driage clause may be omitted. It was also felt that the trade should adopt the standard contract terms voluntarily, compulsion being introduced only if the trade fail to do so.

Standard Containers.—For most commodities the containers used in India are very variable in size. Owing to their fragile nature the contents are subject to appreciable damage which also varies in extent. To overcome these

difficulties, trials on a commercial scale were carried out in Madras, Travancore, Bengal, the Punjab, the North-West Frontier Province, Assam, Rampur State, United Provinces, etc., with boxes of standard patterns for use in transit of eggs and fruits. Careful records were kept of the results for comparing the standard and the ordinary containers.

In the Travancore experiment conducted during 1939 and 1940 covering about 3,00,000 eggs, the loss by damaged and broken eggs in the standard boxes was only 0.52 per cent. as compared with damage and loss through pilferage of 1.77 per cent. in the ordinary baskets. As a result of the experiments, almost the entire exports of eggs from the State to other markets like Madras were packed in the improved containers in 1941. This was facilitated by the grant of suitable concessions in freight rates by the railway companies. In the Bengal trials the total wastage in the standard boxes was 0.5 per cent. as compared with 2.5 per cent. in the case of baskets. The experiments conducted by the Rampur State revealed that in 3 out of 4 containers of eggs consigned to Nainital in August 1941, the contents were absolutely undamaged, while in the case of the fourth, the damage was only about 1 per cent. Such reductions in the physical loss of produce are of small magnitude, but even a saving of 1 per cent. on this score alone would represent an economy of something like Rs. 5¼ lakhs in the cost of distribution of the eggs put on the market. These experiments, however, received a set back during 1942 owing to transport difficulties created by the War.

Legislation Regulating Markets.— The draft model bill for the regulation of markets circulated by the Agricultural Marketing Adviser in the year 1938 formed the basis for necessary legislation in provinces and States. Agricultural Produce Markets Acts are now in force in the Punjab, North West Frontier Province, Sind, Madras, Bombay, Central Provinces, Mysore, Baroda, Gwalior and Hyderabad and the question is under consideration in other Provinces and States where no legislation already exists. The Regulated Markets are, however, mostly in respect of particular commodities which are of local importance. For instance in Amraoti in the C.P. the number of regulated markets for cotton is significant. It rose from 36 in 1942 to 39 in 1945, and the number of other agricultural markets from 5 in 1942 to 7 in 1945. In Madras, the Madras Commercial crops Markets Act, 1933, is in operation, and is applicable to cotton markets in Tirupur, Adoni and Nandyal, to groundnuts at Cuddalore, and to tobacco markets in Guntur district and Bezwada taluk. In Sind and the Punjab, the regulated markets are in respect of cereals and pulses. Among the Indian States, Hyderabad and Gwalior occupy premier places, the former having at present 28 regulated, markets, and the latter 36. It is, however, observed that due to abnormal conditions legislation relating to regulated markets is not making the desirable progress. It is, however, gratifying to note that the necessity for organising regulated markets has recently been stressed by the Central Food Advisory Council and attention of the Provinces and States has been drawn to the draft bill proposed by the Central Agricultural Marketing Department in 1938 in this connection.

The attempts at regulating the markets were fittingly strengthened and supplemented by the passage on the 28th March 1939, by the Central Government of the Standards of Weight Act, 1939. The Act came into force with effect from the 1st July 1942 and the Standards of Weights Rules, 1942 have also been prepared. The Rules will be enforced as soon as sets of standard weights are ready for distribution to the Provincial and State Governments.

Broadcasting Market Quotations—The dissemination of reliable and accurate market intelligence is an essential function of the marketing department. The solution of the problems of food administration and price control would have been facilitated if a properly co-ordinated All India Market News Service had been in existence from the beginning. Unfortunately, due mainly to lack of funds, the Central Agricultural Marketing Department had to rest content with a skeleton service of limited value. Similarly, except in the United Provinces, where a fairly comprehensive market intelligence service is being run under a special marketing staff, the arrangements in this behalf in the various provinces and States are totally inadequate.

The Central Agricultural Marketing Department at present broadcasts (1) the daily market rates of a number of commodities at Hapur market, (2) the daily quotation for a few commodities like rice, *gur*, *pistaches*, raisins and almonds at Peshawar and wheat, *rice*, cotton and wool at Karachi and sugar at Bombay, (3) a weekly market report dealing with the fluctuations in prices of commodities like wheat, rice, oilseeds, pulses and several graded articles at various centres in India. During the year 1943, at the instance of the Food Department arrangements were made to broadcast daily the market rates for coarse grains at a number of selected centres all over India; but this broadcast was discontinued after a short time. The Department is also issuing a monthly review of prices and stocks relating to various commodities.

Publicity for Agmark.—The necessity for publicity for any scheme of agricultural improvement should be obvious. Efforts are accordingly being made to keep the public informed of the activities of the Department through the media of newspapers, exhibitions of special posters at railway stations and other suitable public places, and by putting up demonstrations stalls at the various agricultural and industrial exhibitions in the provinces and States. In these exhibitions, public demonstrations are given of the technique of grading by exhibiting illustrative maps, diagrams and charts relating to the production, supplies and prices and by sale of the actual graded commodities. A brief pamphlet on the "Story of Agmark" has also been prepared for distribution to the public. In the recent period, publicity of the above sort has however been modest as it was not considered desirable to increase the demand for Agmark products when it might not be possible to meet it due to scarcity conditions. PLANNING YOUR TRANSPORT?

Haulage Problems

shrink

Haulage Problems shrink to a minimum when tackled in the modern way—by Trailer. This type of vehicle is the ideal solution for maintaining a steady stream of haulage under various conditions with maximum economy of Power.

TRAILERS in a range of 45 standard types are made by Taskers of Andover who for well over a hundred years have been associated with Transport on Road and Farmland.

Taskers produced during the War over 19,000 Trailers of which 3,500 were the famous R.A.F. 3- and 5-ton low loaders built specially for carrying whole aeroplanes. These were designed and built exclusively by Taskers and every one of them was produced at Andover.

The Taskers standard range starts at 3 tons with the 4-wheel independent type Trailer and carries on up to 25 tons for the big low loading Semi-Trailers.

it was found necessary to arrange for special publicity if any section of the trade in a particular commodity wanted it and was prepared to contribute towards the cost. The Agricultural Produce (Grading and Marking) Act, 1937, has therefore been suitably amended to recover such cost.

The question of setting up departmental AGMARK stalls was examined recently and it was considered necessary that their establishment and efficient running would be best facilitated only if the Agricultural Produce (Grading and Marking) Act, 1937, was suitably amended. Proposals for the same have accordingly been submitted to the Govt. of India recently.

Development of Export Markets. The Royal Commission on Agriculture and more recently the Indian Government Trade Commissioners abroad have pointed out repeatedly that the main obstacle in the way of attempts at pushing Indian agricultural products abroad was lack of standardisation in the quality and have stressed the need for an organised attempt to improve the quality of exported goods. The Central Agricultural Marketing Department has from the beginning paid close attention to this problem. A scheme for the grading and marking of seedlac exported out of India was initiated in 1941 and during the period from July 1941 to January 1942, 2 consignments of graded seedlac weighing about 2,194 maunds were sent to the United States of America. Though the report on the first consignment was favourable, the experiment had to be abandoned due to the abnormal conditions consequent on the War. A reference has already been made to the scheme for the grading and marking of sann hemp exported from India. This scheme is still in its formative stage and it is too soon to judge its usefulness. As a result of the joint efforts of the Central Agricultural Marketing Department and the Indian Government Trade Commissioner in Alexandria, Indian tobacco has also been introduced in the Egyptian market and trading has been carried on on the basis of Agmark grades. The Indian Government Trade Commissioner pointed out the danger of export of low quality tobacco and stressed the need for exporting commodity of standard quality only. The question of export of tobacco to Egypt is receiving the attention of Government. No large scale development in the export of tobacco to the United Kingdom and the Middle East markets is, however, possible during the War because of the increased demand in India for Indian tobacco to meet Defence requirements for cigarettes and because of the limitations imposed by transport difficulties. It is hoped that the termination of hostilities will render such a development possible.

In the recent past, contact was made with the Australian importers of goat skins through the Indian Government Trade Commissioner in Australia and information was obtained with regard to their requirements of quality in Indian goat skins. Similar enquiries have also been addressed to the Trade Commissioner at New York and London. Samples of goat hair collected from different parts of the country were also sent to the India Government Trade Commissioner in Australia for being shown to buyers in that country. It was found that while the Australian merchants were generally satisfied with Indian goat hair, they would require it in a specially dressed form if they were to take Indian goat hair on any large scale for commercial use. A specimen of this dressed hair as used in Australia was obtained and shown to the trade interests in India in order to find out whether such dressing could be done as a matter of course before exporting hair from India. The trade in India felt that such dressing was not possible in the absence of the necessary mechanical means and technical knowledge. With great difficulty some more information was secured on the point and it was decided to prepare a fairly large sample of such dressed hair and send it to Australia for evaluation. The sample was under preparation towards the close of 1944. Simultaneously, the question of drawing up suitable standards and specifications for goat hair has also been taken up. Recently ten bales of cleaned and washed wool were collected by the Department from Ajmer and Jodhpur and sent to the India Government Trade Commissioner, New York, for purposes of evaluation by the Incorporated Carpet Manufacturers' Association, New York. Further news regarding this consignment is still awaited. The quality of this wool sent was highly appreciated by the Association. In view of this success a scheme for the compulsory grading of wool under the Agmark with a view to developing foreign markets and for the appointment of the necessary inspectorate staff is under consideration. In order to ascertain the views of the trade in the matter a Conference of the important wool traders in the country was convened in January, 1946, and as recommended by the Conference, an *ad hoc* wool Committee was constituted by the Government of India in order to examine the question. The wool Committee is expected to submit its report as early as possible. Some time in 1942 this Department had collected certain samples of edible nuts, such as groundnuts in shell, cashewnuts, almonds and apricot stones, and sent them to the India Government Trade Commissioner, Canada, in order to find out whether there would be any possibility of their utilisation in Canada for the preparation of chocolates, etc. The nuts were shown to the importers and were approved. A proposal to send similar samples of wool, seed lac, groundnuts and cashewnuts, to the India Trade Commissioner with a view to exploring its possibilities of the development of trade in these commodities is under consideration. Samples of various commodities have recently been sent to the Imperial Institute, London, for exhibition purposes on the suggestion of the Director of Commercial Intelligence.

Apart from the activities detailed above, the Central Marketing Staff has to deal with numerous enquiries of a general nature. The marketing staffs in several provinces are also closely connected with price control activities and are required to supply useful information regarding the availability of several agricultural commodities in India for the use of the Defence Services. The Central Marketing Staff are frequently called upon to supply information regarding stocks, production, prices, etc., of various commodities to the Supply and Food Departments of the Government of India

The Department also offered material assistance to the Defence Services by arranging supplies of various foodstuffs to the military. For instance, several thousand maunds of Agmark ghee and butter were purchased by the Supply Department for the Defence Services during the last few years. Graded eggs in large numbers were supplied to the Army, Internment camps, hospitals, etc.

The above is only a brief sketch of the activities of the marketing staff. The detailed accounts, given in the published annual reports of the Agricultural Marketing Adviser, show that the scheme has recorded steady progress in spite of several difficulties such as lack of adequate funds and personnel and reluctance and hesitation on the part of the trade to follow new methods.

Early in 1945 the Government of India set up a Marketing Sub-Committee of the Policy Committee No. 5 on Agriculture, Forestry and Fisheries to examine the entire question of the improvement of agricultural marketing in India, the maintenance of standards of purity and quality, the establishment of warehouses and the organisation and functions of the Central and Provincial Marketing Departments. The Sub-Committee have just concluded their deliberations and are submitting their Report to the Government of India. The future policy with regard to agricultural marketing will largely depend on the recommendations contained in this Report.

List of the Central Marketing Officers and the Senior Marketing Officers in Provinces and Indian States :—

A.—Central Marketing Staff.

Agricultural Marketing Adviser to the Government of India. K. G. A. B. Meeks, M.A., B.Sc. (Edin.).

Deputy Agricultural Marketing Adviser to the Government of India. Dr. T. G. Shirname, B.Ag., D.I.C., I.A.S.(I.), (Bombay).

Senior Superintendent. S. A. Kirmani, B. Com.

Senior Marketing Officer. B. P. Bhargava, B.Sc., A.M. Inst. E.E. (on temporary deputation to the Food Department); Dr. B. S. Sen, D.Sc.; Dr. S. A. Yasin, M.Sc., D.I.C., M.R.C.V.S.; K. H. Advani, M.Sc. (Agri.).

Marketing Officer. Hukmat Khan, B.Sc. (Agri.), Trilok Prasad, M.A., LL.B., S. C. Chakravarty, B.Sc. (Edin.); I. A. Shah, B.A.

Superintending Officer attending Statistical Section. K. C. Chetia, B.Sc. (Edin.) (on leave); Fazal Haq, B.A., M.Sc. (Reading) (Officiating).

Assistant Marketing Officers. F. Haq, B.A., M.Sc. (Reading) Naval Islam (on temporary deputation to the office of the Chief Commissioner, Delhi); K. P. Jain, B.Sc., A.M.E.S.I.; V. P. Anantanarayanan, B.Sc. (Hons.) M.Sc. (On special duty); H. S. K. Lodi, B.A.; Partap Singh, B.Sc. (Agri.) on deputation as Chief Inspector, Sann Hemp Grading; R. A. Bhote, B.Sc. (Agri.), L.D.D.; B. D. Joshi, B.Sc. (Agri.); R. N. Chaturvedi, B.Sc. (Agri.); M. B. Navar, B.Sc. (Agri.), M.Sc.; H. G. Mathur, M.Sc. (Agri.); Syed Ali Imam Naqvi, B.Sc. (Agri.); R. V. S. Rao, B.Sc. (Agri.); R. S. Bhatnagar, B.Sc. (Agri.); V. P. Kachwaha, M.A., LL.B.; Rehman Khan, L.V.P.

Inspectorate Staff under the Sann Hemp Grading Scheme :—

Partap Singh, Chief Inspector, Shimpur (Benares).

R. N. Murty, Inspector, Calcutta.
Hibibur Rehman, Inspector, Shimpur.
O. N. Garg, Inspector, Vizianagram.
P. L. Mukerjee, Inspector, Sninpur.
M. R. Sharma, Inspector, Shimpur.

Inspectorate Staff under the Fruit Products Control Order, 1945 :

U. R. Bhal, M.A., Senior Inspector, Delhi.
S. M. Rafique, B.Sc. (Agri.), Delhi.
Mohd. Sadiq, B.Sc., Delhi.
Imtiaz Ahmad, B.Sc., Lyallpur.
Hardyal Singh, B.Sc., Lahore.
B. R. Suri, B.Sc. (Agri.), Bombay
H. S. Sandhu, B.Sc. (Agri.), Madras
Dava Nand, B.Sc. (Agri.), Karachi
A. A. Qureshi, M.Sc. (Hons.), Calcutta
K. C. Batra, B.Sc., Lucknow

B. Provincial Marketing Officers.

Madras. S. N. Venkatatarama Ayyar, B.A., B.Sc. (Ag.)
Bombay. V. D. Kathkhate, B.A. (Hons.), I.C.A.
Bengal. Dr. S. A. Hussain B.Com., Ph.D. (Lond.), (on leave).
United Provinces. J. A. Manawar, M.A., B.Sc. L.L.B., M.S.A. (Cant.), Acharya Hridaydeva, Shri Ram Singh (Food Grains).
Punjab. Dr. Avtar Singh, B.Sc. (Agri.), Ph.D. (Wales).
Bihar. Khafibur Rahman, B.A.
Orissa. R. N. Dwivedi, M.A.
Central Provinces. R. N. Gadre, I.A.S.
Assam. N. Zaman Ahmad, B.Sc. (Ag.).
North-West Frontier Province. D. M. Sapru, M.A., I.C.S. (Hons.).
Sind. Dr. L. M. Hira, C.I.V.C., A.R.San.I. (Lond.).

C. Minor Administrations.

Ajmer Merwara. R. K. Singh Patoda, B.Sc. (Agri.).
Baluchistan. R. Z. Khan, B.Sc. (Edin.), C.D.A. (Wye).
Coorg. P. M. Chengappa, Dip. Econ. C.H.D. (Mandi.), F.R.E.S. (Lond.)
Delhi. Lala Raj Narain, M.A.

D. Indian States Marketing Officers.

Hyderabad. Dr. Amir Ali Khan, Ph.D.
Mysore. M. D. Venkata Das, B.A.
Patiala. Sardar Bahadur Sardar Harchand Singh, B.Ag.
Bhopal. Jamil Mohd. Khan, B.Sc., LL.B.
Baroda. Dr. M. J. Patel.
Gwalior. N. R. Jatar.
Kashmir. The Hon'ble Development Minister and President, Jammu and Kashmir Marketing Board.
Jodhpur. R. S. Kishen Puri, B.A., LL.B.
Bikaner. The Rural Reconstruction Minister.

Supervising Officer (Grading Stations).—**F. A. Shah,** B.A.

Assistant Marketing Officers.—K. C. **Chetty,** B.Sc. (Edin.); F. Haq, B.A., M.Sc. (Reading); Nurul Islam (on temporary deputation to the Office of the Chief Commissioner, Delhi); Israrul Haq, L.V.P. (Hon.); V. P. Anantanarayanan, B.Sc. (Hons.), M.Sc.; K. P. Jain, B.Sc., A.U.B.T.I.; H. S. K. Lodi, B.A.; *Pratab Singh, B.Sc. (Agri.); *B. D. Joshi, B.Sc. (Agri.); *R. N. Chaturvedi, B.Sc. (Agri.); R. A. Bhole, L.D.D.; Parduman Singh, B.Sc. (Agri.); M. B. Nayar, B.Sc. (Agri.), M.Sc.

Inspectorate Staff under the Sann Hemp Grading Scheme:

Pratap Singh, Chief Inspector, Shivpur (Benares).

R. N. Murthy, Inspector, Vizianagram.

B. V. S. Rao Inspector, Bombay.

Habibur Rahman, Inspector, Shivpur (Benares).

O. N. Garg, Inspector Shivpur (Benares).

B Provincial Marketing Officers.

Madras.—S. N. Venkataramana Ayyar, B.A., B.Sc. (Ag.).

Bombay.—R. N. Trivedi, B.A. (Hons.), G.D.C.A.

Bengal.—Dr. S. A. Husain, B.Com., Ph.D. (Econ.) (London).

United Provinces.—John A. Manawwai, M.A., B.Sc. (Edin.), M.S.A. (Texas).

Punjab.—Dr. Arjan Singh, B.Sc. (Agri.), Ph.D. (Wales).

Bihar.—Khalilur Rahman, B.A.

Orissa.—R. N. Dwivedi, M.A.

Central Provinces.—R. N. Gadre, L.Ag.

Assam.—N. Zaman Ahmad, B.Sc., B.Ag., F.G., I.A.R.I.

North-West Frontier Province.—D. M. Sapra, M.A., F.R.E.S.

Sind.—Dr. L. M. Hira, G.B.V.C., A.R.San.I. (Lond.).

C. Minor Administrations.

Ajmer-Merwara.—R. K. Singh Paroda, Assistant Marketing Officer.

Coorg.—P. M. Chengappa, Dip. Econ., C.H.D. (Manchester), F.R.E.S. (London).

Baluchistan.—H. R. Kidwai, M.Sc., Assistant Marketing Officer.

Delhi.—The Superintendent of Industries, Delhi.

D. Indian States Marketing Officers.

Hyderabad.—Dr. Amir Ali Khan, Ph.D.

Mysore.—M. D. Vishwanath, B.A.

Patiala.—Sardar Harchand Singh, L.Ag.

Bhopal.—Jamil Mohammad Khan, B.Sc., LL.B.

Baroda.—M. J. Patel.

Gwalior.—N. R. Jatar, B.Sc.

Kashmir.—R. K. Khan, President, Jammu and Kashmir Marketing Board & Director of Statistics & Economic Intelligence.

Jodhpur.—Kishen Pari, B.A., LL.B.

Bikaner.—The Director of Industries & Commerce.

IMPERIAL INSTITUTE OF SUGAR TECHNOLOGY.

The Indian Sugar Committee of 1920 recommended *inter alia* the establishment of a Central Research Institute as necessary for the proper development of the Sugar Industry in this country.

The recommendation of the Sugar Committee was accepted and the Imperial Institute of Sugar Technology was started at Cawnpore by the Government of India on 1st October, 1936, to carry out research in the different branches of Sugar Technology and to help the Indian Sugar Industry in various ways by rendering technical assistance to Sugar Factories, by training students in all branches of Sugar Technology, by providing short term courses to technical men already engaged in the Industry, etc. From the 1st March 1945 the control of the Institute has passed over to the Indian Central Sugarcane Committee, formed by resolution of the Governor General in Council and registered under the Registration of Societies Act XXI of 1860. The Committee is constituted by members from every section of the industry, viz. cane growers, sugar manufacturers, sugar merchants and Sugar Technologists.

The Institute is financed by grants from the Sugar Excise Fund.

The work of the Institute has been organized under two broad heads, (*a*) office work including general administration and (*b*) research and teaching. The former includes the technical, the statistical and general sections; the latter consists of three main sections—Sugar Technology, Sugar Engineering and Sugar Chemistry, the last comprising of Sugar Chemistry, Organic Chemistry, Physical Chemistry and Bio-Chemistry. The laboratories are well equipped with instruments required for research on sugar and allied products. Attached to the Institute are the Experimental Sugar Factory, workshop, Sugar Engineering and Chemical Engineering laboratories, Sugar Research and Testing station, Bihari, Bureau of Sugar standards and the research scheme for the manufacture of sugar candy in India.

The functions of the Research and Testing Station at Bihari are (*a*) testing of existing plants and processes in use in the open pan industry, (*b*) undertaking research work for introducing improvements in the plants and processes, and (*c*) giving demonstration of new machines and improved process and (*d*) The Indian Central Sugarcane Committee have recently constituted a gur and khandsari sub-committee for advising on the lines of work of the Research Station.

Apart from the technical work under the Sugar Production Rules (1935) technical assistance and advice on various aspects of the sugar industry are given by the Institute to sugar factories, central and provincial governments, Indian States and others. The Institute endeavours to meet all technical requirements of factories so far as its staff and equipment permit. The more important types of work which the Institute undertakes for rendering technical assistance to sugar factories are—(*a*) advice to promoters of new factories, (*b*) advice relating to extensions and alterations of existing factories

* Temporarily diverted to the Sann Hemp Grading Scheme.

(*c*) advice relating to improvements in working of plant, (*d*) advice relating to improvements in manufacturing process, (*e*) technical control of manufacturing operations, (*f*) advice regarding working expenses and cost of production, (*g*) investigations into special problems and (*h*) analytical work.

The Sugar Trade Information Service under the control of the Director is run to meet the requirements of the sugar trade and industry in India.

The scope of the work of the Institute was brought to the notice of all persons interested in the sugar industry through a booklet entitled "Functions and Activities." In order to establish and maintain contact with the sugar factories and enable them to be in touch with research work carried out at the Institute and developments elsewhere, arrangements have been made for issuing brief summaries on matters of technical interest under the title of "Sugar Notes." Description and results of various experimental and research work carried out in the Institute are being published annually in the publication entitled "Scientific Reports of the Imperial Institute of Sugar Technology."

The Institute trains a limited number of men every year and gives them the highest and most complete training in their respective subjects. For most courses, a period of factory training is an essential condition for the grant of diploma or certificate. There are six regular courses of training for students desiring to qualify for technical posts in sugar factories, viz., Fellowship and Associateship courses in Sugar Technology and in Sugar Engineering and the Sugar Engineering Certificate Course the Sugar Boilers Certificates Course. Besides, facilities are provided for men already engaged in the industry to have the necessary technical training during the off-season provided they have the requisite educational qualifications. The off-season courses are—(*a*) Chemical Control, (*b*) Bacteriology, (*c*) Pan Boiling, (*d*) Fuel and Boiler Control, (*e*) Statistical Methods (for research students), (*f*) Statistics (for sugar students), (*g*) Dutch language, (*h*) German language, (*i*) Milling Plant operation and control and (*j*) Sugar storage.

In order to afford adequate facilities to the Sugar Factories in India for selecting properly qualified staff and at the same time to reduce unemployment amongst the educated technical workers in the sugar industry, the Institute maintains an Employment Bureau which collects authentic information about the qualifications and experience of those seeking employment in the sugar industry and makes it available free of charge to factories on receipt of enquiries.

AREA CULTIVATED AND UNCULTIVATED IN 1941-42 IN EACH PROVINCE.

Irrigation.

The chief characteristics of the Indian rainfall are its unequal distribution over the country, its irregular distribution throughout the seasons and its liability to failure or serious deficiency. The normal annual rainfall varies from 460 inches at Cherrapunji in the Assam hills to less than three inches in Upper Sind. The greatest rainfall actually measured at any station in any one year was 905 inches, recorded at Cherrapunji in 1861, while at stations in Upper Sind it has been nil. There are thus portions of the country which suffer as much from excessive rainfall as others do from drought.

The second important characteristic of the rainfall is its unequal distribution throughout the seasons. Except in the south-east of the peninsula, where the heaviest precipitation is received from October to December, by far the greater portion of the rain falls during the south-west monsoon, between June and October. During the winter months the rainfall is comparatively small, the normal amount varying from half an inch to two inches, while the hot weather, from March to May or June, is practically rainless. Consequently it happens that in one season of the year the greater part of India is deluged with rain and is the scene of the most wonderful and rapid growth of vegetation; in another period the same tract becomes a dreary, sun-burnt waste. The transition from the latter to the former stage often occurs in a few days. From the agricultural point of view the most unsatisfactory feature of the Indian rainfall is its liability to failure or serious deficiency. The average annual rainfall over the whole country is about 45 inches and there is but little variation from this average from year to year, the greatest recorded being only about seven inches. But if separate tracts are considered, extraordinary variations are found. At many stations annual rainfalls of less than half the average are not uncommon, while at some less than a quarter of the normal amount has been recorded in a year of extreme drought.

Scarcity.—Classing a year in which the deficiency is 25 per cent. as a dry year and one in which it is 40 per cent. as a year of severe drought, the examination of past statistics shows that, over the precarious area, one year in five may be expected to be a dry year and one in ten a year of severe drought. It is largely in order to remove the menace of these years that the great irrigation systems in some parts of India have been constructed. In the arid tracts where the annual rainfall is less than 15", no cultivation is normally possible without irrigation.

Government Works.—The Government irrigation works of India may be divided into two main classes, those provided with artificial storage, and those dependent throughout the year on the natural supplies of the rivers from which they have their origin. In actual fact, practically every irrigation work depends upon storage of one kind or another but, in many cases this is provided by nature without man's assistance. In Northern India, upon the Himalayan rivers, and in Madras, where the cold weather rains are even heavier than those of the south-west monsoon, the principal non-storage systems are found.

The expedient of storing water in the monsoon for utilisation during the subsequent dry weather has been practised in India from time immemorial. In their simplest form, such storage works consist of an earthen embankment constructed across a valley or depression, behind which the water collects, and those under Government control range from small tanks irrigating only a few acres each to the huge reservoirs recently completed in the Deccan which are capable of storing over 20,000 million cubic feet of water. By gradually releasing water from a work of the latter type, a supply can be maintained long after the river on which the reservoir is situated would otherwise be dry and useless.

Irrigation from wells has been practiced in India from times immemorial. In recent years, however, Government has installed in some places electrically driven tube wells for the supply of irrigation water to cultivators.

The Three Classes.—Previously all irrigation works were divided into three classes, Productive, Protective and Minor, but during the triennium 1921-24 the method of determining the source from which the funds for the construction of Government works were provided was changed, and now all works, whether major or minor, for which capital accounts are kept, have been re-classified under two heads, Productive and Unproductive, with a third class embracing areas irrigated by non-capital works. The main criterion to be satisfied before a work could be classed as productive was that it should, within ten years of the completion of construction, produce sufficient revenue to cover its working expenses and the interest charges on its capital cost. Most of the largest irrigation systems in India belong to the productive class. In recent years, the criterion mentioned above has been the subject of much criticism as it ignored the indirect benefits from irrigation projects. At the recommendation of the Central Board of Irrigation different Governments in India have this matter under their active consideration.

Unproductive works are constructed primarily with a view to the protection of precarious tracts and to guard against the necessity for periodical expenditure on the relief of the population in times of famine. They are financed from the current revenues of India, generally from the annual grant for famine relief and insurance, and are not directly remunerative, the construction of each such work being separately justified by a comparison of the value of each acre protected (based upon such factors as the probable cost of famine relief, the population of the tract, the area already protected and the minimum area which must be protected in order to tide over a period of severe drought) with the cost of such protection.

Nearly one-eighth of the whole area irrigated in India from Government works is effected by minor works for which no capital account is kept.

Growth of Irrigation.—There has, during the last sixty years, been a steady growth in the area irrigated by Government irrigation works. From 10¼ million acres in 1878–79 the area annually irrigated in British India rose to 19¼ million acres at the beginning of the century and to almost 40 million acres in 1945.

The main increase has been in the class of productive works, which irrigated 4¼ million acres in 1878-79 and rose to 20,756,209 acres in 1926-27. During the year 1941-42 the areas irrigated by productive and unproductive works amounted to 21.38 and 5.19 million acres respectively.

The area irrigated in 1941-42 was the largest in the Punjab in which province 12.78 million acres were irrigated during the year, excluding area irrigated through channels which lie in the Indian states. The Madras presidency came next, with an area of 7.71 million acres, followed by the United Provinces with an area of 5.99 million acres.

Capital and Revenue.—The total capital outlay, direct and indirect on irrigation and navigation works, including works under construction, amounted at the end of the year 1941-42 to Rs. 15,550 lakhs. The gross revenue for the year was Rs. 1,636 lakhs and the working expenses 481 lakhs, the net return on the capital being, therefore, 7·44 per cent.

The return on capital invested in productive irrigation works was highest in N.-W.F.P. where the yield was 12·29 per cent. The return was 8·44 per cent in the Punjab, 8·94 per cent in Bombay, 7·99 per cent in U.P. and 2·67 per cent. in Madras.

Charges for Water.—The charges for water are levied in different ways in the various provinces. In some, notably in Sind, the ordinary land revenue assessment includes also the charge for water, 9/10ths of this assessment being regarded as due to the canals. In others, as in parts of Madras and Bombay, different rates of land revenue are assessed according to whether the land is irrigated or not, and the assessment upon irrigated land includes also the charge for water. These methods may, however, be regarded as exceptional. Over the greater part of India water is paid for separately, the area actually irrigated is measured, and a rate is charged per acre according to the crop grown. Lower rates are often levied in cases where irrigation is by "lift", that is to say where the land is too high for the water to flow on to it by gravity and consequently the cultivator has to lift it on to his field.

Various other methods of assessment have been tried, such as by renting outlets for an annual sum, or by charging according to the volume of the water used, but these have never been successful. The cultivator fully understands the principle of "No crops, no charge" which is now followed as far as possible in canal administration, but has no confidence in a system under which his liability for water rate is independent of the area and quality of his crop.

The rates charged vary considerably with the crop grown, and are different in each province and often upon the several canals in a single province. Thus in the Punjab, they vary from Rs. 6 to Rs. 12–4–0 per acre for sugarcane, from Rs. 4–4–0 to Rs. 7–12–0 per acre for rice, from Rs. 3–8–0 to Rs. 5–8–0 per acre for wheat, from Rs. 4-8-0 to Rs. 6-8-0 per acre for cotton and from Rs. 2-4 to Rs. 4-8-0 per acre for millets and pulses. Practically speaking, Government guarantees sufficient water for the crop and gives it as available. If the crop fails to mature, or if its yield is much below normal, either the whole or part of the irrigation assessment is remitted.

A somewhat different system, the long lease system, is in force in parts of Bengal and the Central Provinces, under which the cultivators pay a small rate for a term of years whether they take water or not. In these provinces where the normal rainfall is fairly high, it is always a question whether irrigation will be necessary at all, and if the cultivators have to pay the full rate, they are apt to hold off until water becomes absolutely essential, and the sudden and universal demand then usually exceeds the supply. By paying a reduced rate every year for a term of years they become entitled to water when required; consequently there is no temptation to wait till the last possible moment, and the demand is much more evenly distributed throughout the season.

Taken as a whole, irrigation is offered on extremely easy terms, and the water rates represent only a very small proportion of the extra profit which the cultivator secures owing to the water he receives.

Central Board of Irrigation and Bureau of Information. Set up in 1927 with the main object of providing sub-committees to advise on technical questions, the Central Board of Irrigation, consisting of the Chief Engineers for Irrigation of the Provinces, expanded its activities in 1931 to co-ordinate research and maintain a Bureau of Information.

A new departure, instituted in 1942, was the inclusion of a limited number of Chief Engineers of Indian States by invitation as Board Members. The first two States to be represented were Bahawalpur and Mysore. Hyderabad has recently secured representation. In 1945, the constitution of the Board has been amended further to permit the Chief Engineer, Hydro-electric, of provinces and Engineers dealing with matters concerning Indian Waterways employed by the Government of India to be members of the Board. Though politically separate from India, Ceylon and Burma also send members to the Board.

A large number of Indian States and other authorities subscribe to the Bureau of Information of the Board.

The Research Committee and the Board meet every year, and the technical papers contributed and the discussion thereon are published in the Annual Reports (Technical) of the Board. The Board also publishes other technical literature on specific subjects including quarterly journal and monthly Abstracts.

A comprehensive library is maintained, literature on irrigation, hydro-electric engineering, river control and allied subjects being collected from all parts of the world and indexed in detail for the supply of information to the irrigation departments. Provincial

Governments and Indian States contribute to the cost of the Bureau in return for the information service offered.

Central Waterways, Irrigation and Navigation Commission.—Set up in 1945 by the Government of India with the object of creating a central fact-finding, planning and co-ordinating organisation for rendering advice to the Central, Provincial and State Governments in regard to Waterways, Irrigation and Navigation problems throughout the country, the Commission consists of a Chairman and two full time and two part time members, and technical and administrative staff to carry out these functions.

In exercise of the above responsibility, it is the function of the Commission to make investigations in regard to the control of water and waterways, to prepare projects, organise and co-ordinate the procurement and publication of statistical information relating to waterways, to advise the Government of India and Crown Representative on disputes between Provinces and/or States as to water rights, to initiate and devise schemes for training of Indian Engineers in the specialised fields of Waterways Irrigation and Navigation, and to advise the Central Govt. and the Crown Representative in regard to the settlement of priorities as between various flood control, irrigation and navigation projects.

Indian Waterways Experiment System. The year 1937-38, the Government of India, at the instance of the Central Board of Irrigation, took over from the Government of Bombay their Irrigation and Hydro-dynamic Research Station at Khadakwasla near Poona. This Station deals largely with hydro dynamic problems of all-India importance, such as the behaviour of rivers, the protection of bridges and the like. The authorities mainly interested in hydro-dynamic research are the Government of India, who administer small irrigation schemes in Baluchistan and Rajputana, and have large railway interests, and the Provincial Governments with large irrigation projects in operation.

The Station was originally being maintained by the Government of Bombay from Provincial revenues and in 1934-35, the cost of running it was roughly 1.02 lakhs. With the separation of Sind from Bombay, the irrigated area in the Presidency proper was reduced to about 400,000 acres and the Provincial Government did not feel justified in keeping up from their own revenues, a research station, the results of which would be applied mainly elsewhere. They, therefore, asked the Government of India to take it over with effect from April 1, 1937 when otherwise they proposed to close it down. The Government of India decided to maintain the Station from Central funds for the years 1937-38 and 1938-39 and in the meantime to consider the question of its future. Subsequently they decided to continue to maintain the Station for a further period of five years.

Locally, in 1944, the Government of India put this Station on a permanent basis and changed its name into "Indian Waterways Experiment Station".

In addition to the Central Station, six provinces maintain Irrigation Research Organizations, viz., the Punjab, United Provinces, Sind, Bombay, Bengal and Madras. Two Indian States, viz. Mysore and Hyderabad, also maintain Research Station.

The results obtained in each province are given in the table below :—

Provinces.	Average area irrigated in triennium 1936-39. Acres.	Area irrigated in 1941-42. Acres.
Madras	7,396,100	7,715,000
Bombay	466,200	536,000
Bengal	171,800	245,000
United Provinces	4,769,200	5,087,000
Punjab	12,190,800	12,779,000
Bihar	679,500	718,000
C. P. (excluding Berar)	519,100	610,000
N. W. F. P.	466,500	513,000
Orissa	366,100	*354,000
Sind	4,692,000	5,285,000
Rajputana	20,300	**
Baluchistan	104,700	142,000
Total ..	31,048,500	34,884,000

*Average for 1939-42. **Figures not available.

Productive Works.—Taking productive works only, the following table compares the average area irrigated by such works during the triennium 1936-39 with the area irrigated during the year 1941-42 :—

Provinces.	Average area irrigated in triennium 1936-39.	Area irrigated in 1941-42.
Madras	4,076,000	4,130,700
Bombay	7,100	7,800
Bengal	100,800	147,700
United Provinces	4,369,400	4,362,100
Punjab	11,376,300	11,989,700
Bihar	571,000	475,100
N. W. F. P.	207,700	218,000
Sind	4,558,700	4,566,100
Baluchistan	83,500	122,900
Total ..	25,350,500	26,020,100

Taking the productive works as a whole, the capital invested in them was, at the end of 1941-42, Rs.10,305 lakhs. The net revenue for the year was Rs. 1,066 lakhs giving a return 10.3 per cent. as compared with 9 per cent. in 1918-19 and 9¼ per cent. in 1919-20 and 7·68% in 1937-38. In considering these figures it must be remembered that the capital invested includes the expenditure upon several works which have only lately come into operation and others which were under construction, which classes at present contribute little or nothing in the way of revenue; moreover only receipts from water rates and a share of the enhanced land revenue due to the introduction of irrigation are credited to the canals, so that the returns include nothing on account of the large addition to the general revenues of the country which follows in the wake of their construction.

Unproductive Works.—Turning now to the unproductive works, the areas irrigated in the various provinces during the various periods were as below :—

Provinces.	Average area irrigated in triennium 1936-39. Acres.	Area irrigated in 1941-42. Acres.
Madras	284,200	376,600
Bombay	294,400	320,400
Bengal	45,200	65,800
United Provinces	389,600	1,619,300
Punjab	783,700	788,900
Bihar	107,800	117,000
Central Provinces (excluding Berar)	289,500	565,000
North-West Frontier Province	258,700	294,700
Orissa	272,000	353,300
Sind	115,500	698,300
Rajputana	20,300	**
Baluchistan	21,200	19,300
Total ..	2,882,100	5,218,600

Non-capital Works.—The results obtained from the non-capital works are given below :—

Provinces.	Average area irrigated in triennium 1936-39.	Average area irrigated in 1941-42.
Madras	3,035,900	3,207,400
Bombay	164,700	207,500
Bengal	25,800	31,800
United Provinces	10,300	5,500
Punjab	35,700	29,600
Bihar	700	**
Central Provinces (excluding Berar)	29,500	44,900
Orissa	94,500	**
Sind	18,700	20,600
Total ..	3,415,800	3,547,300

** Figures not available.

Irrigated Acreage.—A comparison of the acreage of crops matured during 1941-42 by means of Government irrigation systems with the total area under cultivation in the several provinces is given below :—

Provinces.	Area sown in 1941-42. Acres.	Area irrigated by Government irrigation works. Acres.	Percentage of area irrigated to total area sown.	Capital cost of Government irrigation & Navigation works to end of 1941-42. In lakhs of rupees.	Estimated value of crops raised on areas receiving State irrigation. In lakhs of rupees.
Madras	36,419,600	7,714,700	21.18	2,041	3,306
Bombay	28,023,700	535,700	1.91	1,080·7	590·23
Sind	6,003,600	5,285,000	88.0	2,842	••
Bengal	31,055,100	245,300	0.79	528·7	246·87
United Provinces	35,544,700	†5,986,900	16.84	@ 3,048	4,175
Punjab	32,200,200	‡12,778,600	39.56	3,978	••
Bihar	17,975,000	718,400	4.0	356	628
C. P.	10,897,600	609,900	5.07	652	281
Orissa	2,986,000	354,000	8.43	328·25	150.7
N. W. F. Province ..	2,687,000	512,700	19.08	316	309
Baluchistan	467,900	19,300	4.11	36·25	3·57
Total ..	213,360,000	34,760,500	16.28	15,206·90	9,699.37

•• Figures not available.

† Exclude 32,169 acres in Indian States irrigated by U. P. Irrigation works.

@ Includes Rs. 373 lakhs on Hydro-electric work.

‡ In addition 893,867 acres were irrigated on the Indian State Channels of the Western Jamna Canal, the Sirhind Canal and the Ghaggar Canal.

New Works. The two major works of importance recently completed are the Emerson Barrage in the Punjab and Ganges Tube well scheme in the United Provinces.

Emerson Barrage and Haveli Canals.—This project, which was completed in September 1939, consisted of building a barrage below the junction of the Chenab and the Jhelum, so as to utilize the winter infiltration and summer waters of the combined river to give controlled and better perennial irrigation of the Sidhnai canals off-taking from the Ravi and non-perennial controlled irrigation to the inundation canals taking out of the Chenab and also to irrigate some new areas. The canals are designed to provide a probable perennial irrigation of 513,344 acres in a gross area of 694,278 acres and a probable non-perennial irrigation of 452,000 acres in a gross area of 862,549 acres. The total expenditure on the works up to the end of 1942-43 was 3·78 crores.

Ganges State Tubewell Schemes.—This enterprise has enabled the groundwater reservoir underlying the plains of the Western United Provinces at a depth varying from 15′ to 45′ to be utilized for a widespread system of irrigation. The primary object of the tubewell system is to provide irrigation facilities in the cultivable tracts of those districts traversed by the Ganges hydro-electric grid which could not be commanded by canals owing to the limitations of river water. The total number of state tube wells running at the end of the year 1940-1941 was 1555, and the total area irrigated was 670,400 acres. The total capital outlay on the State Tubewell Scheme to end of 1941-42 was 1·69 crores and on the hydro-electric grid 3·73 crores.

WELLS AND TANKS.

Some of the important post-war River Development Schemes of the various Provinces are :—

Bengal: Improvement of Four National Waterways of The Province.—The scheme aims at maintaining a navigable route throughout the year at all stages of the tide for steamers and boats plying on

(*a*) the Hooghly and other rivers including the Sunderbans steamer route,

(*b*) the Lower Kumar and Bil Route,

(*c*) the Brahmaputra in Bengal, and

(*d*) the Ganges in Bengal from Western end to the confluence of the Meghna.

It is estimated to cost Rs. 2,76,00,000. Linked with this is another scheme for improvement of sixteen Provincial Waterways.

Damodar Flood Control Scheme.—Dams are proposed to be constructed at several sites on the Damodar river and its tributaries. The resulting reservoirs will serve the purpose of flood detention and also for storing water for use during the dry season. Part of the flood water and the whole of the effective storage water are proposed to be utilised for generating power. The increased dry weather discharge is proposed to be used for extending irrigation in the lower reaches of the river. The project will cost Rs. 55 crores.

Mor Reservoir Project.— The areas on the north and south bank of the river Mor are proposed to be irrigated by heading up water in river Mor by constructing a weir at Khatanga. The irrigation will be done by distributaries to be fed by two main canals, one for the north bank and the other for the south bank. It is also proposed to make a reservoir by constructing a dam across the Mor river Valley at Messanjoie in Sathal Pargamas. This reservoir will supply water during periods of draught and in cold weather.

Bihar: Drainage and Irrigation Schemes—Bihar.—It is proposed to carry out 82 drainage and irrigation schemes at a cost of Rs. 172 lakhs in the first five-year period. A vast area of land will be benefited by these drainage and irrigation schemes.

Kosi Project.—The Kosi Dam Project, designed to provide for flood control, silt control, soil observation, irrigation, drainage, reclamation of water logged areas, etc. will comprise the following component units and connected measures :—

(*i*) A dam, possibly 750 ft. high, across the Chhatra Gorge about a mile and a half above the temple of Barhakshetra.

(*ii*) Power Plant at the dam to generate 0.93 to 1.4 million kilowatts of cheap firm power depending on the amount of line storage.

(*iii*) A barrage across the Kosi, some distance below its debouch in the plains.

(*iv*) One canal taking off from the barrage on the right and one on the left to irrigate the areas.

(*v*) A barrage across the Kosi near the Nepal-Bihar border.

(*vi*) Two canals on the left and one canal on the right taking off from the Bihar Barrage.

(*vii*) Measures for soil conservation, reclamation of water logged lands, malaria control, etc.

The estimated cost is Rs. 50 crores.

Bombay: Bombay Government have decided to execute 22 irrigation Schemes costing in all Rs. 19 crores. The most important of these schemes are the Watrak Canal Project, Kaira Dist. (costing Rs. 105 lakhs and irigating 75,000 acres ultimately), Girna project (costing Rs 4 crores and irrigating 140,000 acres ultimately) and Mula project (costing Rs. 396 lakhs and irrigating 76,000 acres ultimately).

Madras: It is proposed to build a reservoir across the Tungabhadra at Mallapuram near Hospet with a canal 210 miles long on the right hand side. It is a multi-purpose scheme for development of irrigation and hydro-electric power. It is hoped that the scheme will be fully executed by 1953.

Pollavaram Reservoir Project. It is proposed to build a reservoir across the Godavri at Pollavaram and two canals on either side. The capacity of the reservoir will be 500,000 million cubic feet. The scheme will be executed in 15 years. It will be one of the biggest irrigation schemes in India.

Lower Bhavani Project (Coimbatore District).—It is proposed to build a reservoir across the Bhavani and a canal on the right side 80 miles long. The dam will be a composite one to store about 20,000 million cubic ft.

Gandikotah Reservoir Project (Cuddapah And Nellore Districts). It is proposed to build a reservoir across the Pennar at Gandhikotah gorge to hold about thirty-five thousand million cubic feet with canals on either side.

Orissa: Mahanadi Project. The multipurpose development project in the Mahanadi Valley in Orissa consists of three dams across the river with provision for power generation and for three canal systems for purposes of irrigation. The first dam will be at Hirakud, 9 miles from Sambalpur. The second dam will be located at Tikkerpara some 130 miles downstream and the third near Naraj about ten miles upstream of Cuttack. This scheme will approximately cost Rs. 50 to 70 crores and will also provide navigation facilities.

Punjab: Thal Project. The project consists of withdrawing water for irrigation from the Indus to the extent of 6,000 cusecs. Headworks and main line have partly been completed.

Bhakra Dam Project. It is a multi-purpose project for irrigation and development of hydro-electric power. It is proposed to construct a 480 feet high dam on the Sutlej at Bhakra with a live storage of 3·4 million acre feet. The scheme when completed in about ten years will cost in all about Rs. 42 crores.

Sind: Lower Sind Barrage (Hajipur Barrage) Irrigation Project. It is proposed to construct a Barrage in order to ensure adequate water supply to the Lower Sind. Four feeders, three on the left bank and one on the right bank will take off above the Lower Sind Barrage to be called Hajipur Barrage. Total cultivable area commanded will be approximately 25,60,400 acres. Rough estimated cost is Rs. 12 crores.

Upper Sind Barrage (Gudu Barrage) Irrigation Project.—It is proposed to construct a Barrage and headworks about ninety miles above Sukkur. Total cultivable area commanded will be approximately 23,23,600 acres. Rough estimated cost is Rs. 12 crores.

United Provinces: Nayar Dam. It is proposed to impound 1·4 million acre feet gross in the valley of the Nayar by building a dam 600 ft. high across the gorge in the river near Marora in Garhwal District. 0·8 million acre feet is expected to be available annually for irrigation draw-off. Primary power to the extent of 30,000 kW. and secondary power amounting to 70,000 KW. is also proposed to be generated at the dam site. The estimated cost is Rs. 865 lakhs.

Rihand Dam. It is proposed to impound 9 million acre feet gross in the Rihand Basin in Singhrauli Pargana, district Mirzapur, by a 250 feet high dam across the gorge near Pipri Village. Power will be generated by the artificial head created by the storage dam at a power station situated immediately below it. The capacity of the installed plant is expected to be 150,000 KW. The estimated cost is Rs. 6 crores.

Meteorology.

The meteorology of India like that of other countries is largely a result of its geographical position. The great land area of Asia to the northward and the enormous sea expanse of the Indian Ocean to the southward are determining factors in settling its principal meteorological features. When the Northern Hemisphere is turned away from the sun, in the northern winter, Central Asia becomes an area of intense cold. The meteorological conditions of the temperate zone are pushed southward and we have over the northern provinces of India the westerly winds and eastward moving cyclonic storms of temperate regions, while, when the Northern Hemisphere is turned towards the sun, Southern Asia becomes a super-heated region drawing towards it an immense current of air which carries with it the enormous volume of water vapour which it has picked up in the course of its long passage over the wide expanse of the Indian Ocean, so that at one season of the year parts of India are deluged with rain and at another persistent dry weather prevails.

Monsoons.—The all-important fact in the meteorology of India is the alternation of the seasons known as the summer and winter monsoons. During the winter monsoon the winds are of continental origin and hence dry, fine weather, clear skies, low humidity and little air movement are the characteristic features of this season. The summer rains cease in the provinces of the North-West Frontier Province and the Punjab about the middle of September after which cool westerly and northerly winds set in over that area and the weather becomes fresh and pleasant. These fine weather conditions extend slowly eastward and southward so that by the end of October, they embrace all parts of the country except the southern half of the Peninsula, and by the end of the year have extended to the whole of the Indian land and sea area, the rains withdrawing to the Equatorial Belt. Thus the characteristics of the cold weather from October to February over India are —Westerly winds of the temperate zone over the extreme north of India; to the south of these the north-east winds of the winter monsoon or perhaps more properly the north-east Trades and a gradually extending area of fine weather which, as the season progresses, finally embraces the whole Indian land and sea area. Two exceptions to these fine weather conditions exist during this period, *viz.*; the Madras coast and the north-west of India. In the former region the north-east winds which set in over the Bay of Bengal in October coalesce with the damp winds of the retreating summer monsoon, which current curves round over the Bay of Bengal, and blowing directly on to the Madras coast gives to that region the wettest and most disturbed weather of the whole year, for while the total rainfall for the four months June to September, *i.e.*, the summer monsoon, at the Madras Observatory amounts to 15·46 inches the total rainfall for the three months October to December amount to 31·78 inches. The other region in which the weather is unsettled, during this period of generally settled conditions, is North-west India. This region during January, February and part of March is traversed by a succession of shallow storms from the westward. The number and character of these storms vary very largely from year to year and in some years no storms at all are recorded. In normal years, however, in Northern India periods of fine weather alternate with periods of disturbed weather (occurring during the passage of these storms) and light to moderate and even heavy rain occurs. In the case of Peshawar the total rainfall for the four months, December to March, amounts to 5·75 inches while the total fall for the four months, June to September, is 4·65 inches, showing that the rainfall of the winter is, absolutely, greater in this region than that of the summer monsoon. These two periods of subsidiary "rains" are of the greatest economic importance. The fall in Madras is, as shown above, of considerable actual amount, while that of North-west India though small in absolute amount is of the greatest consequence as on it largely depend the grain and wheat crops of Northern India.

Spring Months.—March to May and part of June form a period of rapid continuous increase of temperature and decrease of barometric pressure throughout India. During this period there occurs a steady transference northward of the area of greatest heat. In March the maximum temperatures, slightly exceeding 100° occur in the Deccan; in April max. temperatures varying between 100° and 105° and in May between 105° and 110° prevail over the greater part of the interior of the country while in June the highest mean maximum temperatures, exceeding 110°, occur in the Indus Valley near Jacobabad. Temperatures exceeding 120° have been recorded over a wide area including Sind, Rajputana, the West and South Punjab and the west of the United Provinces, but the highest temperature hitherto recorded is 127° registered at Jacobabad on June 12th, 1919. During this period of rising temperature and diminishing barometric pressure, great alterations take place in the air movements over India, including the disappearance of the north-east winds of the winter monsoon, and the air circulation over India and its adjacent seas, becomes a local circulation, characterised by strong hot winds down the river valleys of Northern India and increasing land and sea winds in the coast regions. These land and sea winds, as they become stronger and more extensive, initiate large contrasts of temperature and humidity which result in the production of violent local storms. These take the forms of dust storms in the dry plains of Northern India and of thunder and hailstorms in regions where there is inter-action between damp sea winds and dry winds from the interior. These storms are frequently accompanied with winds of excessive force, heavy hail and torrential rain and are on that account very destructive being known as "Nor'westers" in Bengal.

By the time the area of greatest heat has been established over North-west India, in the last week of May or first week of June, India has become the seat of low barometric pressures relatively to the adjacent seas and the whole character of the weather changes. During the hot weather period, discussed above, the winds and weather are mainly determined by local conditions. Between the Equator and Lat. 30° or 35° South, the wind circulation is that of the south-east trades, that is to say from about Lat. 30°-35° South a wind from south-east blows over the surface of the sea up to about the equator. Here the air rises into the upper strata to flow back again at a considerable elevation to the Southern Tropic or beyond. To the north of this circulation, *i.e.*, between the Equator and Lat. 20° to 25° North, there exists a light unsteady circulation the remains of the north-east trades, that is to say about Lat. 20° North there is a north-east wind which blows southward till it reaches the thermal equator where side by side with the south-east Trades mentioned above, the air rises into the upper strata of the atmosphere. Still further to the northward and in the immediate neighbourhood of land there are the circulations due to the land and sea breezes which are attributable to the difference in the heating effect of the sun's rays over land and sea. It is now necessary to trace the changes which occur and lead up to the establishment of the south-west monsoon period. The sun at this time is progressing slowly northward towards the northern Tropic. Hence the thermal equator is also progressing northward and with it the area of ascent of the south-east trades circulation. Thus the south-east trade winds cross the equator and advance further and further northward, as the thermal equator and area of ascent follows the sun in its northern progress. At the same time the temperature over India increases rapidly and barometric pressure diminishes, owing to the air rising and being transferred to neighbouring cooler regions—more especially the sea areas. Thus we have the southern Trades circulation extending northward and the local land and sea circulation extending southward until about the beginning of June the light unsteady interfering circulation over the Arabian Sea finally breaks up, the immense circulation of the South-east Trades, with its cool, moisture laden winds rushes forward, becomes linked on to the local circulation proceeding between the Indian land area and the adjacent seas and India is invaded by oceanic conditions—the **south-west monsoon** proper. This is the most important season of the year as upon it depends the prosperity of at least five sixths of the people of India.

When this current is fully established a continuous air movement extends over the Indian Ocean, the Indian seas and the Indian land area from Lat. 30° S. to Lat. 30° N. the southern half being the south-east trades and the northern half the south-west monsoon. The most important fact about it is that it is a continuous horizontal air movement passing over an extensive oceanic area where steady evaporation is constantly in progress so that where the current enters the Indian seas and flows over the Indian land it is highly charged with aqueous vapours.

The current enters the Indian seas quite at the commencement of June and in the course of the succeeding two weeks spreads over the Arabian Sea and Bay of Bengal up to their extreme northern limits. It advances over India from these two seas. The Arabian Sea current blows on to the west coast and sweeping over the Western Ghats prevails more or less exclusively over the Peninsula, Central India, Rajputana and north Bombay. The Bay of Bengal current blows directly up the Bay. One portion is directed towards Burma, East Bengal and Assam while another portion sweeps over Bengal and after meeting the Himalayas gets deflected and blows as a south-easterly and easterly current right up the Gangetic plain. The south-west monsoon continues for three and a half to four months, viz., from the beginning of June to the middle or end of September. During its prevalence more or less general though far from continuous rain prevails throughout India, the principal features of the rainfall distribution being as follows. The greater portion of the Arabian Sea current, the total volume of which is probably three times as great as that of the Bengal current, blows directly on to the west coast districts. Here it meets an almost continuous hill range, is forced into ascent and gives heavy rain alike to the coast districts and to the hilly range, the total averaging about 100 inches, most of which falls in four months. The current after parting with most of its moisture advances across the Peninsula giving occasional uncertain rain to the Deccan and passes out into the Bay where it coalesces with the local current. The northern portion of the current blowing across the Gujarat, Kathiawar and Sind coasts gives a certain amount of rain to the coast districts and frequent showers to the Aravalli Hill range but very little to Western Rajputana, and passing onward gives moderate to heavy rain in the Eastern Punjab, Eastern Rajputana and the North-west Himalayas. In this region the current meets and mixes with the monsoon current from the Bay.

The monsoon current over the southern half of the Bay of Bengal blows from south west and is thus directed towards the Tenasserim hills and up the valley of the Irrawady to which it gives very heavy rain. That portion of this current which advances sufficiently far northward to blow over Bengal and Assam gives very heavy rain to the low-lying districts of East Bengal and immediately thereafter coming under the influence of the Assam Hills is forced upwards and gives excessive rain (perhaps the heaviest in the world) to the southern face of these hills. The remaining portion of the Bay current advances from the southward over Bengal, is then directed westward by the barrier of the Himalayas and gives general rain over the Gangetic plain and fairly frequent rain over the lower ranges of the Himalayas from Sikhim to Kashmir.

To the south of this easterly wind of the Bay current and to the north of the westerly

wind of the Arabian Sea current there exists a debatable area running roughly from Hissar in the Punjab through Agra, Allahabad and part of Chota Nagpur to Orissa, where one or the other current of the monsoon prevails. In this area the rainfall is conditioned by the storms from the Bay of Bengal which exhibit a marked tendency to advance along this track and to give it heavy falls of occasional rain.

The total rainfall of the monsoon period (June to September) is 100 inches over part of the west coast, the amount diminishes eastward, is below 20 inches over a large part of the centre and east of the Peninsula and is only 5 inches in South Madras; it is over 100 inches on the Tenasserim and South Burma coast and decreases to 20 inches in Upper Burma; it is over 100 in the north Assam Valley and diminishes steadily westward and is only 5 inches in the Indus Valley.

The month to month distribution for the whole of India including Burma is :—

May	3·1	inches.
June	7·9	,,
July	11·2	,,
August	10·3	,,
September	7·0	,,
October	3·3	,,

Cyclonic storms are an almost invariable feature of the monsoon period. In the Arabian Sea they ordinarily form at the commencement and end of the season, *viz.*, May and November, but in the Bay they form a constantly recurring feature of the monsoon season.

INDIA METEOROLOGICAL DEPARTMENT.

Functions of the Department.—The India Meteorological Department was instituted in 1875, to combine and extend the work of various provincial meteorological services which had sprung up before that date. The various duties which were imposed on the Department at the time of its formation were from time to time supplemented by new duties. Some of the peace time functions, more or less in the historical order in which they were assumed, may be briefly summarised as follows :—

(*a*) The issue of warnings to ports and coastal districts of the approach of cyclonic storms.

(*b*) The issue of storm warnings by wireless to ships in the Indian seas, and the collection of meteorological data from ships.

(*c*) The maintenance of systematic records of meteorological data and the publication of climatological statistics. These were originally undertaken in order to furnish data for the investigation of the relation between weather and disease.

(*d*) The issue to the public of up-to-date weather reports and of rainfall forecasts. These duties were originally recommended by a Committee of Enquiry into the causes of famine in India.

(*e*) Meteorological researches of a general character, but particularly regarding tropical storms and the forecasting of monsoon and winter rainfall.

(*f*) The study of agricultural meteorology, *i.e.*, the study of the meteorology of soil air and the air layers near the ground with particular reference to the growth of plants and crop production.

(*g*) **The issue of seasonal rainfall forecasts.**

(*h*) **The issue of telegraphic warnings of heavy rainfall and frost (cold wave) mainly to Government officials (*e.g.*, canal and railway engineers, Collectors, Directors of Agriculture, etc.) and through the newspapers to the public in general.**

(*i*) Supply of meteorological, astronomical and geophysical information in response to enquiries from officials, commercial firms or private individuals.

(*j*) Technical supervision of rainfall registration carried out under the control of provincial Government authorities.

(*k*) The study of temperature and moisture conditions in the upper air by means of instrument-carrying balloons and of upper winds by pilot balloons, and regular compilation of statistics of upper air data.

In addition to these meteorological duties the India Meteorological Department was from time to time made responsible for or undertook various other important duties, such as—

(*l*) Determination of time in India and the issue of time-signals, also the determination of errors of chronometers for the Royal Indian Navy.

(*m*) Observations and researches on terrestrial magnetism at Bombay and atmospheric electricity at Bombay and Poona.

(*n*) Regular study (mainly by spectroscopic examination) of the sun at the Solar Physics Observatory at Kodaikanal.

(*o*) **Maintenance of sciamological instruments at various centres.**

(*p*) Issue of weather forecasts to Civil Aviators.

(*q*) The issue of weather bulletins to farmers broadcast by the Provincial Broadcasting stations.

(*r*) Broadcast of collected Meteorological data from Indian stations daily for the benefit of Meteorological organisations of neighbouring Countries.

Normal Monthly and Annual Maximum Temperature in Shade at Some Stations in India.

MONSOON OF 1945.

Chief Features.—The Arabian Sea branch of the monsoon arrived at the usual time. While the Arabian Sea branch was generally strong and often vigorous, the Bay branch was less active and the monsoon depressions during July and August were fewer than usual. Consequently the rainfall in southwest Bengal, Orissa and Bihar was in defect during these two months. In the beginning of August heavy rain fell in and near the Bhutan hills causing floods in Bihar and north Bengal.

As in the previous year, very heavy rainfall occurred in Gujarat in the third week of September, resulting in the flooding of the Tapti, loss of crops and property and serious dislocation of railway traffic and communications.

The Arabian Sea monsoon burst on the south Malabar coast on the 5th June causing heavy rain. A second pulse of the advancing monsoon gave rise to a depression off the Kanara coast on the 9th which, although it became unimportant within two days, caused some heavy rain on the west coast. With the disappearance of the depression, the monsoon advanced slowly northwards but up to the 14th its activity was mainly confined to the coast south of Surat. An extension into Gujarat during the next two days resulted in widespread and locally heavy rain there.

In the first two weeks of June thunderstorms occurred in Assam and Bengal, and the Bay monsoon advanced feebly into east Bengal only by the middle of June. Under the influence of a 'low' which formed over Chota Nagpur on the 16th June, the Bay current extended westwards along the foot of the Himalayas and simultaneously the Arabian Sea branch extended into the Deccan and the central parts of the country. For the next ten days both the branches remained active, and widespread rain fell on the west coast, in the north of the Peninsula, the central parts of the country and north-east India. The Bay branch was temporarily drawn up to the Punjab and gave widespread rain there on the 17th and 18th.

The rainfall for the remaining days of the month was mainly controlled by a depression which appeared over Chota Nagpur on the 27th, and travelling westwards lay over Rajputana at the end of the month. It caused widespread and locally heavy rain in the central parts of the country, Rajputana and Gujarat.

Widespread and locally heavy rain fell in Sind, Gujarat as well as on the west coast on the first two days of July as the last month's depression over Rajputana merged with the seasonal 'low' over Baluchistan. The rainfall for the next four days was mainly determined by the movement of cyclonic storm which developed over the head of the Bay of Bengal and passing westnorth-westwards through Central India and the north Central Provinces, turned north-westwards and finally broke up on the Punjab-Kumaon hills on the 6th. Rainfall was widespread and locally heavy along and near its track. A second depression which formed over the head of the Bay on the 7th and moved inland as a low pressure area, served to maintain the Arabian Sea branch active over the west and north of the Peninsula, Gujarat and the central parts of the country for the next three days. From the 10th to 20th, both branches of the monsoon remained strong giving widespread rainfall over the country outside the southeast Peninsula and the Western divisions of northwest India. In Kathiawar there was widespread damage to property and livestock due to the incessant heavy downpours during this period. There was a temporary decrease in the rainfall activity for four days after which the monsoon continued active till the 28th. Both branches of the monsoon weakened thereafter and 'break' conditions set in. On the last two days of the month, rainfall was confined to the hills and the submontane regions from Bihar to the Punjab.

The 'break' that had set in at the end of July, continued till the 8th of August, and during this period rainfall was restricted to the west coast, north Bihar and east and north Bengal, while local thundershowers occurred elsewhere.

The Arabian Sea branch revived on the 9th and was vigorous for the next four days, giving very heavy rain in the north Konkan and extending into Gujarat and the central parts of the country. The activity of the Bay branch was confined to northeast India during the first half of the month. Under the influence of a shallow 'low' which appeared over the west United Provinces on the 17th, both branches of the monsoon extended well into the interior and for the next week well-distributed and locally heavy rain occurred over the country outside Sind, Baluchistan, Kashmir and the south Peninsula. The monsoon extended into Kashmir for three days in the beginning of the fourth week. Both branches of the monsoon weakened after the 25th and for the rest of the month rainfall was confined to the west coast and Assam only.

The rainfall during September was mainly associated with the passage across the country of four depressions from the Bay of Bengal. The first depression of the month developed off the Circars coast on the first and moved rapidly inland and lay as a shallow 'low' over north Hyderabad on the 2nd. It was responsible for widespread and locally heavy falls in Hyderabad, Berar and the Bombay Deccan on the 1st and 2nd; it also caused an extension of rain into the west Central Provinces, Gujarat and east Rajputana on the following two days.

The second depression started moving from the north Bay on the 7th; it reached east Rajputana on the 13th. Widespread and locally heavy rain fell in Orissa, Chota Nagpur, the north Central Provinces, Central India, east Rajputana, the east Punjab and the west United Provinces. Widespread thundershowers also occurred in Assam, Bengal and Bihar during the second week.

The third depression of the month formed off the Orissa Circars coast on the 19th and moved inland as a deep depression westwards up to Gujarat, recurved and passing through east Rajputana, broke up against the Punjab-Kumaon hills on the 26th. The passage of this depression through the Central Provinces, west

Central India and Gujarat was marked by very heavy falls of rain which resulted in the flooding of the Tapti and other rivers; in Gujarat serious dislocation of communications and loss of crops and property resulted from the heavy rainfall. Heavy falls also occurred in and near the Punjab-Kumaon hills and were responsible for floods in the Patiala State.

The monsoon withdrew from northwest India after the 25th and was generally weak elsewhere for the rest of the month. In association with a depression that formed in the north Bay of Bengal and moved inland through Orissa and Chota Nagpur to the east United Provinces, widespread and isolated heavy falls of rain occurred in these regions during the last three days of the month.

Taking the season as a whole the Bay monsoo was weak in June. Both branches strengthen in July and practically made up the rainfi defect of the previous month. The comple absence of depressions in August and the ' breal in the monsoon during the early part of t month caused a general defect in rain ov the country during the month. But this w more than compensated by the large exce of rainfall over most parts of the country September associated with its depressions.

The total rainfall for the season June-Septe ber-averaged over the plains of India-w 34.8 inches, 6 per cent above normal. Tl following table gives detailed information the rainfall of the different subdivisions.

Food and Famine.

Food production in India has through the ages periodically failed to meet the needs of the people. The country's history has consequently been punctuated by disastrous famines, the worst of which have killed millions of people and left wide tracts of country desolate. Famines may be said to arise when large groups of people fail to produce enough food for their own needs and lack the means of obtaining it from other sources. Such conditions may be precipitated either by successive failures of the monsoons, on which four-fifths of India's agriculture depends even today; by natural disasters such as floods or earthquakes, or by human agencies such as war and grain market speculation. It is however, rare for a famine to be directly traceable to only one cause. Usually several play their part. During World War II, which for a time cut off India from overseas sources of supply, a revolutionary change occurred in the country's food system. Shortage of supplies, monetary inflation and manipulation of markets necessitated official intervention to ensure that grain reached the people. Rationing, Government controlled grain shops, price control and monopoly procurement of food grain from the producer are features of the food supply systems introduced recently by provincial and state governments owing to the difficulty of obtaining adequate imports and the present inability of Indian agriculture to feed the population. It is likely that "managed" food will be a feature of Indian economy for some time to come. Thus the normal causes of famine, natural disaster, crop failure and speculation are to a great extent discounted today. Shortage has not been eradicated, but the grimmer aspects of starvation, epidemics and death can be held in check.

Early Famines.

References to famine are found early in India's history. Little is known of these early disasters; details are based on tradition and until late in the eighteenth century such visitations were regarded as natural calamities which man was powerless to prevent. The first definite outbreak known to historians was in 650 A.D. when famine raged throughout the country. There was another series of famine in 941, 942, and 1033, when whole provinces were depopulated and men were driven to cannibalism, according to tradition. The years 1148-1159 saw almost continuous famine in India. In 1344 famine was rampant in Upper India. The Emperor Muhammad Tughlak was unable to obtain necessaries for his own household and ordered the evacuation of Delhi's population to Deogiri (modern Daulatabad) in the Deccan. From 1396-1407 Durga Devi famine devastated the Deccan and so reduced the population that land went out of cultivation for years. The years 1595-98 saw famine in Northern India.

The Gujerat famine, one of the first about which precise details have survived, broke out in 1630. Towns and districts were stripped of inhabitants. In 1631 a Dutch merchant reported that only 11 of the 260 families at Swally had survived. The road from Swally to Surat was covered with bodies decaying on the highway where they died, there being no one to bury them. In Surat, that great and crowded city, he could hardly find any living persons; but "the corpses at the corners of the streets lie twenty together, nobody burying them. Thirty thousand had perished in the town alone. Pestilence followed famine."

In 1769-70 ten million people (one-third of the population) are estimated to have perished in a famine in Bengal. In 1783 came the Chalisa famine in North India, followed by the Doji Bara, or Skull, Famine in the Deccan in 1790-92. The Doji Bara is reputed to have been the severest famine ever known in India. It extended over Bombay, Hyderabad and the northern districts of Madras where relief works were opened, the first of their kind in the country. That is only a brief list. Between 1660 and 1750 there were 14 major famines about which little is known.

The causes of these famines were those already stated. Practically the whole of the food production was dependent on the vagaries of the monsoon. Internal wars were common and often coupled with them were wide-spread pillage, trade dislocation and general devastation. The fast communications of the nineteenth and twentieth centuries were not available for relief to be brought from outside the famine area. That these facilities have still not been developed on a large enough scale, or that there is an additional, unrecognised factor in the situation, has been proved by the famines of the last 100 years. Between 1838 and 1899 there were eight major disasters. The famines of 1838 and 1861 were in the North-Western Provinces (modern U.P.). In 1838, 800,000 people are estimated to have perished. In 1861 relief was provided in time.

Recent Famines.

Orissa was the scene of the next famine, in 1865-67. It affected 180,000 square miles and 47,500,000 people. The Bengal Government was slow in appreciating the need for action, but later food was poured into the area in prodigious quantities. Thirty-five million units were relieved (a unit is one person supported for one day) at a cost of Rs. 95 lakhs. The mortality was very heavy, and it is estimated that a million people or one-third of the population died in Orissa alone. This was followed by the Madras famine of 1866, and the famine in Western India of 1868-70. The latter famine introduced India to the great migration from Marwar which was such a distinguishing feature of the famine of 1899-1900; it is estimated that out of a total population of a million and a half in Marwar, one million emigrated. There was famine in Behar in 1873-74, then came the great South Indian Famine of 1876-78. This affected Madras, Mysore, Hyderabad and Bombay for two years and in the second year extended to parts of the Central and United Provinces and to a small tract in the Punjab. The total area

affected was 257,000 square miles and the population 58,500,000. Warned by the excessive expenditure in Behar and actuated by the desire to secure economy, the Government relief programme was not entirely successful. The excess mortality in this famine is said to have been 5,250,000 in British territory alone. Throughout British India 700,000,000 units were relieved at a cost of Rs. 8½ crores. Charitable contributions from Great Britain and the Colonies aggregated Rs. 84 lakhs.

The Famine Codes.

The experiences of this famine showed the necessity of placing relief on an organised basis. The first great Famine Commission which sat under the presidency of Sir Richard Strachey, elaborated the Famine Codes, which, amended to meet later experience, form the basis of the famine relief system to-day. They recommended (1) that employment should be given on the relief works to the able-bodied, at a wage sufficient for support, on the condition of performing a suitable task; and (2) that gratuitous relief should be given in their villages or in poor houses to those who are unable to work. They recommended that the food supply should be left to private agency, except where that was unequal to the demands upon it. They advised that the land-owning classes should be assisted by loans, and by general suspensions of revenue in proportion to the crop failure. In sending a Famine Code to the provincial governments, the Government of India laid down as the cardinal feature of their policy that the famine wage "is the lowest amount sufficient to maintain health under given circumstances. Whilst the duty of Government is to save life, it is not bound to maintain the labouring population at its normal level of comfort."

Provincial codes were drawn up, and were tested by the famine of 1896-97. In that disaster 307,000 square miles were affected, with a population of 69,500,000. The numbers relieved exceeded 4,000,000 at the time of greatest distress. The cost of famine relief was Rs. 7½ crores. revenue was remitted to the extent of Rs. 1½ crores, and loans given aggregating Rs. 1½ crores. The charitable relief fund amounted to about Rs. 1½ crores; of which Rs. 1¼ crores were subscribed in the United Kingdom. The actual famine mortality in British India was estimated at 750,000. The experiences of this famine were examined by a Commission under Sir James Lyall, which reported that the success attained in saving life and the relief of distress was greater than had ever been recorded in famines, comparable with it in severity, and that the expense was moderate. But before the Local Governments had been given time to digest the proposals of this Commission, or the people to recover from the shock, the great famine of 1899-1900 began.

The Famine of 1899-1900.

This famine affected 475,000 square miles with a population of 59,500,000. In the Central Provinces, Berar, Bombay, Ajmer, and the Hissar district of the Punjab famine was acute; it was intense in Rajputana, Baroda, Central India, Hyderabad and Kathiawar and was marked by several distinctive features. The rainfall over the whole of India was in extreme defect, being eleven inches below the mea In several localities there was practically r rain. There was in consequence a great fodd famine; with a terrible mortality among the cattle. The water supply was deficien and brought a crop of difficulties in its trai Then districts like Gujarat, where famine ha been unknown for so many years that the loca ity was thought to be immune, were affecte The people clung to their villages, in the hoj of saving their cattle, and came within th scope of the relief works when it was too lat to save life. A very large area in the India States was affected, and the Marwaris swep from their impoverished land right throug Central India like a horde of locusts, leavin desolation in their train. For these reason relief had to be given on an unprecedente scale. At the end of July 4,500,000 person were supported by the State, Rs. 10 crore were spent on relief, and the total cost wa estimated at Rs. 15 crores. The famine wa also marked by a widespread acceptance b Indian States of the duty hitherto shouldere by the Government of India alone—the suprem responsibility of saving human life. Aide by loans to the extent of Rs. 3½ crores, th Indian States did a great deal to bring thei administration into line with that in Britis India. Although actual deaths from starva tion were insignificant, the extensive outbreak of cholera, and the devastating epidemic o malaria which followed the advent of the rain induced a famine mortality of approximatel a million.

1943 Bengal Famine.

Localised famine conditions have recurre fairly frequently since 1901, but until 1943 i seemed that the procedure laid down by th Famine Codes was capable of dealing with a eventualities. Unfortunately, conditions i which the difficulty of obtaining relief supplie would be so great that the Codes' provision could not be filled, were not envisaged. Th state of affairs, however, arose in Bengal earl in 1943. The province is estimated to be 8 per cent self-sufficient for food and before 194 imported most of the balance of its needs fro Burma. The cutting off of this supply wa followed by a series of natural disasters, includ ing the Midnapore hurricane which late in 194 devastated a wide area and is estimated to hav destroyed 1,500,000 tons of rice. During th monsoon of 1943, when famine was already present in Bengal, floods in the Damodar rive held up relief supplies from the U.P. and Punjal at a critical period. Public nervousness ove the fall of Burma, the denial policy, by whic boats and the larger stocks of rice were remove from East Bengal to prevent their use by th Japanese, and the general shortage of food i most consuming centres in the country were al contributory causes of the famine. Whe shortages became apparent in Bengal thei effect was intensified by speculation on a mos outrageous scale. A few areas such as Midna pore, were short of food from natural cause Most of the other famine-stricken district suffered because rice prices were far beyon the reach of the people, because speculators ha drained the area of stocks, or because the avail able grain was hoarded by its owners.

According to the Famine Codes, assistance should have been provided from outside. In 1943 the problem was twofold. Very large supplies were not readily available elsewhere owing to the general dislocation of Indian grain markets; the movement of supplies into Bengal was difficult owing to the congested state of the railways. A fairly steady stream of grain did, however, reach Calcutta from July onwards, but the Bengal Government did not evolve a satisfactory plan of distribution. Many famine areas in the province were virtually without relief until the army assisted the civil authority to organise food distribution and medical relief in November, 1943. This relief, coupled with a record rice crop, which became available in January-February, 1944, overcame the immediate crisis.

Famine conditions were accompanied by epidemics of cholera, malaria, smallpox and dysentery which probably caused as many deaths as starvation itself.

The Famine Inquiry Commission, headed by Sir John Woodhead, was appointed in 1944 and published a separate report on Bengal. The Commission estimated that 1,500,000 people died in Bengal as a result of the famine and its accompanying epidemics. They considered 6,000,000 people, or one-tenth of the population of the province, were affected practically all of them belonging to the poorer classes in the rural areas. Though the basic cause of the famine was the failure of the 1942 winter rice crop, the Commission considered that high prices were at least as important as crop failures in causing starvation. Their report clearly exposed the failure of both the Bengal Government and the Government of India to take timely measures to keep the province's food situation under control. Not only was control of the procurement and distribution of food defective, but even medical relief, which could otherwise have mitigated the epidemics, was inadequate.

During 1943 famine broke out in the Bijapur district of Bombay and in the Ceded Districts of Madras. There were also acute food shortages in Orissa, in Travancore and Cochin and the Madras district of Malabar. In none of these areas did conditions approach the severity of the Bengal famine, mainly owing to the energy of the local authorities in organising relief and in controlling supplies and prices of food.

"Managed" Food.

Late in 1943 a plan to place food administration on an all-India basis was proposed by the Food Grains Policy Committee which for the first time examined critically the grain production and needs of each of the provinces. The Committee concluded that the country could be fed if a Basic Plan of procurement and distribution were followed and supplementary imports were forthcoming. Imports, it was laid down, should be a minimum of one million tons of grain a year, plus a buffer stock of half a million tons. Though more energetic efforts were made to send food to India, these import targets were never reached.

During 1944 and 1945 the crisis passed, partly owing to the bumper Bengal rice crop of the winter of 1943 and partly because food crops generally reached a satisfactory level all over the country in those years. The extension of rationing, mainly in the "deficit" provinces which had to depend partly on outside supplies, and the progressive elimination of speculators by placing grain dealing more and more in official hands also helped to steady the situation. During 1944 the Bombay Government pioneered a system of compulsory food production by which a proportion of every land holding had to be devoted to food grain. Government bought a proportion of the crop at a fixed price. Despite criticism, the scheme worked successfully and proved a very steadying influence when acute shortage reappeared in 1946.

Late in 1945 it became apparent that a world shortage of grain might develop and the Indian position gradually deteriorated when it was known that the monsoon crops were poor and that there would be a rice shortage. The end of the Far Eastern war gave rise to hopes that rice supplies from Burma and other eastern neighbours would soon be forthcoming, but little progress was made till late in 1946. An official survey published at the end of 1945 showed that 533 towns with a total population of 55 millions were rationed. In addition, the operation of crop levies had the effect of rationing in many rural areas, notably in Bombay. During 1946 both rationing and crop levies were gradually extended in new areas, particularly in the provinces which normally have food surpluses.

Famine Commission's Plans.

In September, 1945, the Woodhead Famine Inquiry Commission published their final report on the all-India situation. For the first time there was enunciated the principle that the State should recognise its ultimate responsibility to provide enough food for all. The Commission added, "In the past apathy and defeatism have been all too prevalent... Poverty and hunger have been too often accepted as part of the nature of things." The Commission's recommendations also included:

1. The constitution of an all-India Food Council to co-ordinate food administration throughout the country.
2. Complete monopoly by the State as the only satisfactory system of procurement and distribution of food grains.
3. Maintenance of agricultural prices at a fair level to both producer and consumer.
4. Maintenance of maximum and minimum prices for rice and wheat during the post-war transitional period at least till 1951-52.
5. The establishment by the Central Government of a single Department of Food and Agriculture, with food controls to remain in the first stage of the transitional period.
6. A great increase in the production of protective foods in order to improve standards of nutrition.

1946 Crisis.

Though late in 1945 hopes had been expressed that decontrol of food could begin begin soon, these were dashed in January, 1946, when the Food Member, Sir J. P. Srivastava, admitted that the situation was unsatisfactory. A cyclone had swept North Malabar and the Godavari delta and destroyed the rice crop. Rice had also suffered in the Tanjore delta owing to failure of the monsoon. Mysore and southern Bombay were suffering drought and Gujerat had been flood stricken.

By February scarcity areas were being announced in the Bombay Deccan and other Southern areas. On the basis of a 12-oz. daily ration Madras needed to import 1,800,000 tons of grain, Mysore 300,000 tons and Bombay some 400,000 tons. An overall deficit of at least 3,000,000 tons which were required from overseas was estimated. The Combined Food Board in Washington failed to allot more than a fraction of this amount and during February India sent a Food Mission to London and Washington in an attempt to secure improved supplies.

New Delhi produced a five point plan to meet the crisis by cutting grain rations from 16 oz. to 12 oz. daily; extending rationing to more towns; tightening provincial grain procurement; enforcing a statutory price control and a countrywide austerity drive. Added impetus was given to provincial "grow more food" drives and medical precautions were taken to prevent public health deteriorating.

In Washington in March the Combined Food Board, struggling to distribute an estimated 12,000,000 tons of foodstuffs to people estimated to require 21,000,000 tons, ended by making promises they could not keep, including a promise to supply 60 per cent. of India's demand. Britain diverted 200,000 tons of wheat to assist India and other hard-hit countries but the U. S. A. administration there soon faced with inability to procure grain supplies from their own farmers except at inflated prices. During April Mr. Herbert Hoover toured India's scarcity areas and estimated the country required 2,336,000 tons between May and September when he considered, quite groundlessly, that the crisis would pass. Though during June the U.S.A. was able to step up grain exports to a million tons a month, this rate could not be maintained.

In July Sir J. P. Srivastava announced that during 1946 India had received 533,000 tons of wheat and 33,000 tons of rice, with 155,000 tons of grain in transit and 342,000 tons awaiting shipment. Another 2,300,000 tons were required. India continued to receive shipments of food mainly wheat from Australia and some rice from Burma. During September rice began to arrive from Indonesia, though the U. S. shipping strike held up movement of 224,000 tons of American grain earmarked for this country.

Towards the end of September Dr. Rajendra Prasad, Minister for Food and Agriculture in the Interim Government, broadcast a review of the situation, in which he said that the position "was not altogether dark." He indicated, however, that in order to tide the country over until the *kharif* harvest a further cut in cereal rations might be necessary. He explained that there had been grave difficulty in obtaining supplies from overseas and that there had been a serious shortfall in the arrival of promised supplies. His review was not altogether well received as the impression was created that Government of India officials had not exerted the maximum amount of pressure to obtain supplies from overseas sources, and particularly from Siam to which country India made a loan of Rs. 5 crores in the expectation of rice supplies, which were however subject to grave delay. It was also felt that surplus grain producing provinces such as the Punjab were holding unnecessarily large reserves.

Food crop estimates were not unduly pessimistic. The official estimate of Bengal's rice crop showed an expected tonnage of 1,958,000 of clean rice in the *aus* crop against 2,110,000 last year. The *aman* or winter crop was tentatively estimated to produce 7,600,000 tons of clean rice. Control over food by the Central Government was continued by Ordinance when the Defence of India Rules expired at the end of September.

Hydro-Electric Development.

Cheap motive power is one of the secrets of successful industrial development and the favourable initial conditions caused by the war, the enthusiasm for industrial development which has seized nearly all classes of educated Indians, and the special attention which the circumstances of the war have compelled Government to direct towards the scientific utilisation of Indian natural resources all point to a rapid growth of industrial enterprise in all parts of India within the next few years. Indeed, the process, for which sound foundations had been laid before the war, is now rapidly under way. India is severely handicapped compared with other lands as regards the generation of power by the consumption of fuel, coal or oil. These commodities are all difficult to obtain, and costly in India except in a few favoured areas. Coal supplies, for example, are chiefly centred in Bengal and Chota Nagpur and the cost of transport is heavy. Water power and its transmission by electricity offer, on the other hand, good possibilities, both as regards the quantity available and the cheapness at which the power can be supplied, in certain parts of India.

Water power schemes, pure and simple, are generally difficult in India, because the power needs to be continuous, while the rainfall is only during a small portion of the year. Perennial rivers with sufficient water throughout the year are practically non-existent in India. Water, therefore, must be stored for use during the dry season. Favourable sites for this exist in many parts in the mountainous and hilly regions where the heaviest rainfalls occur and the progress already made in utilising such opportunities by the electrical transmission of power affords encouragement for the future. Further, hydro-electric schemes can sometimes be associated with important irrigation projects, the water being used for both electricity generation and irrigation.

The Industrial Commission emphasized the necessity for a Hydrographic Survey of India. On this recommendation the Government of India in 1918 appointed the late Mr. G. T. Barlow, C.I.E., then Chief Engineer, Irrigation Branch, United Provinces, to undertake the work, associating with him Mr. J. W. Meares, M.I.C.E., Electrical Adviser to the Government of India. Mr. Barlow died, but Mr. Meares issued a preliminary report in September, 1919, and a Triennial Report in 1921, indicating that a minimum continuous water power of nearly 6 million kilowatts with a maximum of 13 million kilowatts could be developed in India. This excluded practically all the great rivers, which were then uninvestigated. The Government of India has since formed a Central Technical Power Board for developing the hydro-electric resources of India and for carrying out a systematic hydro-electric survey in India. The present stage of progress and some of the plans under consideration for development of hydro-electric power in the post-war period in some of the major provinces and states are indicated in the following paragraphs.

Bombay Hydro-Electric Works.

The greatest Hydro-Electric undertakings in India are the three schemes developed and brought into operation by Tata Sons, Ltd., and continued under their management until 1929, when they were transferred to the management of the Tata Hydro-Electric Agencies, Ltd., in which Messrs. Tata Sons retained a substantial interest. These undertakings are:—

(*a*)	The Tata Hydro-Electric Power Supply Company, Ltd.	Supply started in	1915.
(*b*)	The Andhra Valley Power Supply Company, Ltd.	.. „	„ 1922.
(*c*)	The Tata Power Company, Ltd.	.. „	„ 1927.

These Hydro-Electric schemes have a combined normal capacity of 210,000 kW to 215,000 kW and provide electrical energy for the City of Bombay, Bombay suburbs, Thana, Kalyan and Ghatghar, Poona.

Bombay, after London, is the second largest City in the British Empire and is the largest manufacturing centre in India. Its population including suburbs at the 1941 census was 1,489,883 with a total population of approximately 2,000,000 in all of the areas served by these companies. Its cotton mills and other factories consumed about 150,000 H.P., which until these Hydro-Electric schemes came into operation, was entirely produced by thermal stations using fuel coming from great distances.

The favourable position of the Western Ghats which rise to a height of more than 2,000 feet above sea-level within a few miles of Bombay City, situated on the shores of the Arabian Sea with their heavy rainfalls was taken full advantage of for providing Bombay City and vicinity with an adequate and economical power supply.

The hydraulic works of the Tata Hydro-Electric Power Supply Company are situated near Lonavla at the top of the Bhor Ghats. The monsoon rainfall is stored in three lakes, namely, Lonavla, Walwan and Shirawta, from which it is conveyed in open masonry canals to the Forebay at Khandala and thence through steel pipes to the Power House at Khopoli at the foot of the Ghats, where the head at turbine nozzles is 1,725 feet or approximately 750 lbs. per sq. inch. The normal capacity of the Power Station at Khopoli is 48,000 kW. This scheme was formally opened by H.E. The Governor of Bombay on the 8th of February 1915.

Investigations in 1917-18 led to the discovery of a site on the Andhra River just to the North of the Tata Hydro-Electric Supply Company's lakes, where additional power could be developed. These investigations resulted in the formation of the Andhra Valley Power Supply Co. and the construction of the schemes, the principal features of which consist of a reservoir formed by a dam about 190 feet high, across

the Andhra River and a tunnel 8,700 feet long driven through solid trap rock to the scarp of the Ghats, from which the water is taken in steel pipes 4,600 feet long to the turbines in the generating station at Bhivpuri. The head of water at turbine nozzles is 1,740 feet or approximately 750 lbs. per sq. inch. The electrical energy is transmitted to Bombay over a transmission line 56 miles long for augmenting the supply from Khopoli. The present installed capacity at this station is 48,000 kW

The Tata Power Company's scheme on the Nila-Mula River to the South-East of Bombay was investigated and developed along lines similar to the Andhra Valley scheme and has a normal installed capacity of 100,000 kW. The power is transmitted to Bombay over a transmission line 76 miles long and is used to augment the supply of the two earlier companies to mills, factories and railways.

The Tata Hydro-Electric Power Supply Co., the Andhra Valley Power Supply Co. and the Tata Power Company operating as a unit under one management supply the whole of the electrical energy required by the Bombay Electric Supply & Tramways Co. Ltd., the majority of the mills and industries in Bombay City, the B. B. & C. I. Railway for their suburban electrification, the whole of the energy required by the G. I. P. Railway in Bombay City and for their main line traction up to Poona and Igatpuri, the whole of the electrical energy required by the Poona Electric Supply Company and the distributing licensees in Thana, Kalyan and the Bombay suburbs.

These three schemes operating as a unit under one management provide an adequate and economical power supply in the areas mentioned above for all purposes. The rate for energy delivered to the Mills, Factories and Railways has, for several years, shown a steady decrease and now averages 0·32 of an anna per unit, the downward trend of which will continue as industries develop and individual consumptions increase. This power supply greatly enhances the natural advantages Bombay has as a great manufacturing, trading and shipping centre.

For the development of industries and agriculture in the northern portion of Bombay Presidency, the Bombay Government has embarked on the provision of an electrical grid scheme somewhat on the lines of the British Grid. Besides taking power from the Tatas Hydro-Electric System and from some of the selected Steam Station, it is also proposed to construct initially two new hydro-electric stations at Bhandardena and Bhatgar for supplying power to this grid.

Development of Electric Supply in the Province of Bombay.

In the Province of Bombay, there are at present 68 licensees in operation. In the case of three of these, the licensees have hydro-electric stations, their installed plant capacity being 2,31,000 kW. These three licensees serve by bulk supply Bombay City, the Bombay Suburban District, Poona and about six other townships. Almost all the remaining 56 licensees generate their own electric energy. Of these, one has an installed capacity of 37,500 kW. another 3,624 kW, the remaining have relatively small power houses. Most of the licensees operate in urban areas.

The objects with which the Government of Bombay have set up the Electric Grid Department are: (1) to rationalise the generation of electricity by generating it at a few selected stations having natural advantages, (2) to make available progressively large amounts of electricity at low rates, and (3) to bring the energy within reach of a progressively increasing number of the urban and rural population.

The objects are to be achieved by the establishment of an Electric Grid System in regions which lend themselves to such development economically under Quasi-state control. New power stations—both hydro-electric and thermal—will be established. These and the existing efficient generating stations of licensees, wherever practicable, will be inter-connected by the Grid lines. Inefficient generating stations will be closed down and the licensees concerned supplied bulk power. Wherever possible, rural areas within the Grid regions will be supplied electricity from the System.

It is also intended to establish small Diesel Stations in isolated townships, which have some cottage industries and which cannot, within reasonable time, be served from the Grid.

To promote rapid development of the use of electricity by agriculturists and cottage and small scale industrialists specially in rural areas, it is proposed to assist them financially in acquiring electrical machinery and equipment on hire purchase terms.

Largely, at the initiative of the Government of Bombay, the Government of India introduced in the Central Legislature a Bill entitled "Electricity (Supply) Bill, 1946" during the Budget Session of 1946. When this measure is passed, Bombay Government proposes to set up the Bombay Electricity Board, which will be, under the provisions of the above enactment, charged with the work of rationalisation and development of Electric Supply in the Province.

Meanwhile, a Special Grid Department has been organised and the development programme under execution at present consists of: (1) North Gujarat Grid Scheme, (2) South Gujarat Grid Scheme, (3) Rural electrification and small town schemes based on small Diesel Stations.

North Gujarat Grid Scheme.

Two 15,000 kWs steam turbo sets are being installed by the Ahmedabad Electricity Company to supplement the existing steam station of 37,500 kWs, thus making a total installed capacity of 67,500 kWs at this place with facilities for further extension in the future. The general plan of development contemplated is that bulk power from the Company will be received in a Government-owned Receiving Station, located near the Company's power station premises, from where it will be transmitted in the south to Baroda and in the north to Kalol. It is proposed to construct a 66 kV H.T. line upto Baroda with main sub-stations at Barejadi, Nadiad, Anand and Baroda and a 33 kV line

Keeping **ELECTRICITY** *in its* **PROPER** *place*

MICA

Raw mica, block and splittings of all grades can be supplied, and our factory at Walthamstow is equipped with modern plant for the rapid and economic production of cut, gauged, machined, or made-up mica in the form of condenser films, discs, plates, washers, commutator separators, etc.

MICANITE

Micanite is built-up mica insulation and is manufactured and supplied in every commercial form including Commutator and Moulding Micanite, Flexible Micanite, Mica Tape, Micafolium, Heat Resisting Micanite, Commutator rings and tubes.

MICOFLEX-DURATUBE

Micoflex-Duratube is the registered trade name of our tubes and sleevings extruded in continuous lengths from Polyvinyl Chloride. There is a wide range of grades, sizes, and colours.

PAXOLIN

Paxolin is our registered trade name for our laminated plastics of the phenolic class. They are manufactured in various grades to suit specific applications and supplied in the form of sheets, tubes, and cylinders. Paxolin insulation is eminently suited for panels, bushings, and insulators, and we are fully equipped to carry out all the necessary machining and fabricating operations.

KENUTUF MOULDINGS

Kenutuf mouldings are available injection-moulded from Polyvinyl-Chloride.

EMPIRE

Empire insulation covers a wide range of varnished cloths, silks, woven glass, and papers, both black and yellow, supplied as sheet or as tapes both straight cut and bias. We also supply varnished cotton and silk sleeving.

THE MICANITE & INSULATORS CO. LTD.

EMPIRE WORKS, BLACKHORSE LANE, LONDON, E.17

Makers of MICANITE (Built-up Mica Insulation). Fabricated and Processed MICA, PAXOLIN (Synthetic-resin laminated sheets, rods, tubes and cylinders). High-voltage Bushings and Terminals for indoor and outdoor use. Empire Varnished Insulating Cloths and Tapes and all other forms of Electrical Insulation. Suppliers of Vulcanised Fibre, Leatheroid, Presspahn, etc. Distributors of Micoflex-Duratube Sleevings, Micoflex-Durasleeve (plastic covered flexible metal conduit) and Kenutuf Injection Mouldings (P.V.C.)

HELP ONWARD MARCH OF INDIAN BANKING

by patronising this Bank which offers best and most attractive banking facilities in all kinds of banking transactions.

Note : The Bank arranges overdraft, loans, cash credits, etc., against approved securities such as Stock Exchange shares, Government Paper, Gold, Bullion and Solid Ornaments, and against godown business. Bank arranges opening of Letter of Credits for importers from foreign countries on easy terms.

Every kind of banking transaction effected.

D. D. DESHPANDE,
Managing Director.

upto Kalol. From Barejadi, Nadiad and Anand sub-stations, an extensive 11 kV system will be put up to cover the territory within a radius of about 20 miles from each station.

The Baroda State Government have agreed to co-operate by taking supply in bulk at Baroda and Kalol for distribution within the State territory.

According to the present programme, Grid power will be available at Mehmedabad, Kaira, Mattar, Nadiad, Umreth, Anand and Borsad early in 1948. Extensions around these centres will then be undertaken as and when required.

South Gujarat Grid Scheme.

It has been decided to establish a new steam station in the Surat region comprising, initially, two numbers of 7,500 kW turbo sets. It is proposed to construct an E.H.T. line from Surat to Bulsar with main sub-stations at Navsari, Billimora and Bulsar. The Government of Baroda will take bulk power at Navsari and Billimora for distribution within the Baroda State territory. From these sub-stations, 11 kV system will be put up to cover the territory within a radius of about 20 miles from each centre.

According to the present programme, Grid power is expected to be available in this region by the end of 1948. Extensions from the main sub-stations will be undertaken thereafter as and when required. The line extension to the North of Surat will be undertaken if and when sufficient load is available in that area to justify capital expenditure on the line.

Rural Electrification and small Town Schemes.

The schemes so far sanctioned by Government consists of: (1) Electrification of the towns of Ratnagiri, Malvan, Vengurla, Chiplun and Khed, (2) Electrification of certain villages in the Satara taluka based upon power being taken from the existing power house of the Satara Electricity Co., (3) Electrification of certain villages in the Bulsar taluka, based on bulk electricity being taken from the existing power house of the Bulsar Electricity Co. Later on, when power becomes available from the Government's own station in Surat, power will be supplied from that Station, (4) Extension of such schemes to other talukas is being examined.

Neither of these can at present supply any large industrial load, but when item (3) is linked up with the new Surat Steam Station, there will be scope for supplying power for industrial use.

The Government of Bombay has an agreement with the Mysore Government for purchase of power from their hydro-electric station at Jog upto a maximum of 3,730 kWs. This power can be obtained sometime in 1947.

Salient features of hydro-electric projects which are likely to be undertaken within the next 10 years are given hereunder:

Koyna Hydro Project.

This scheme, when fully developed, is capable of meeting a maximum demand of the order of 200,000 kW, after reserving part of the storage for irrigation. Initially about 48,000 kW could be developed economically for supply to the Deccan including industrial areas of Sholapur, Satara and Poona districts. Power will also be available for lift irrigation in the Bijapur district and elsewhere. Electro-chemical industries and other similar loads could be established near the power station site with advantage and plant progressively increased. It is proposed to undertake preliminary investigation of this project as early as possible.

Kalinadi Hydro Project.

This scheme, when fully developed, is capable of meeting a maximum demand of the order of 80,000 kW. Initially 20,000 kWs may be developed, if load is available.

Bhatgar Hydro Electric Project.

A demand of about 10,000 kW can be met from this source, provided the power station is linked up either with Koyna when and if developed or Tata system at Poona. Consideration of this scheme will be taken up after 2 seasons' work has been put in on the proposed new irrigation dam at Vir, which will provide a balancing and supplementary reservoir.

Bhandardara-Randha Electric Scheme.

A demand of 16,800 kW can be met from this source. In addition to this, a further 7,500 kW can be obtained during the monsoon. This power can be firmed up by the establishment of a steam station of the installed capacity of 15,000 kW in this area. The scheme was sanctioned by the Government of Bombay in 1945 but its execution had to be postponed as under the present conditions, development of this source of power cannot be undertaken economically. The question of its execution will be reviewed in due course.

Government of Bombay have also under consideration the possibility of developing Narbada and Tapti River schemes on multipurpose basis and if it is found feasible to develop them an appreciable block of Electric Power will be available from these sources.

Mysore Hydro-Electric Works.

The first Hydro-Electric Scheme of any magnitude undertaken in India or indeed in the East, was that on the Cauvery River in Mysore State, which with its generating station, transmission line and distributing system was inaugurated in 1902.

The Cauvery River rises in the district of Coorg in the Western Ghats and flows across Mysore State. The principal object of this scheme was the supply of power to the mining companies on the Kolar Gold Fields about 92 miles from Sivasamudram, the site of the generating station. This transmission line was for a number of years the longest line in Asia. Since 1902 the supply of electrical energy from Sivasamudram has been provided

for Bangalore and Mysore cities and about 225 other towns and villages in the South-Eastern half of the State.

The initial undertaking has constantly been expanded and its total normal capacity now stands at 42,000 kW. This great increase has been made possible by the construction of the Krishnarajasagar reservoir, near Mysore City, which has a capacity of 44,000 million cubic feet of storage above the minimum draw off level.

The number of the consumers of all classes continues to increase rapidly every year with greatly increased power demands. The Government of Mysore have encouraged the use of electrical energy and have made a survey of hydro power resources of the State and prepared plans for the construction of a number of generating stations at the most economic sites in future.

The number of lighting and power consumers of all classes in about 225 towns and villages within the Mysore State has increased to more than 65,000. Demands for large additional blocks of power made it necessary for Government in continuing its policies for the industrial development of the State, to sanction the construction of a Power Station at the Shimsha Falls for the production of 17,200 kW. and the construction of a Power Station at the Jog Falls for the production at the first instance of about 48,000 kW. The power station at Shimsha Falls was completed in June 1940, thus bringing the total installed capacity of Sivasamudram and Shimsha Stations to about 59,200 kW.

At Jog Falls the construction of a power house and installation of machinery have made good progress and the first unit is expected to be in service generating 12,000 kW at 50 cycles by the end of March 1947. The State Government have also sanctioned the extension of the Jog Falls scheme for an ultimate installed capacity of 120,000 kW. All the machinery required for the extension have been ordered.

The Government have also approved the adoption of the standard frequency of 50 cycles throughout the State except in the Kolar Gold Fields area and also the construction of transmission lines for transmitting 50-cycle supply generated at Jog to the various parts of the State.

The transmission system consists of over 900 route-miles of 78,000 and 37,500 volt lines with a total of 1,200 miles of circuits. The transmission system is now being extended into every District within the State which together with the appropriate distribution systems will supply hydro-electric power to the four corners of State. With the construction of the new transmission lines and on the generation of power at Jog, nearly 600 miles of 110 kW transmission lines will be in service.

The use of electricity for improving the transports facilities in the State forms an important item under the "Post-War Development Schemes" and it is expected that in the next five years, introduction of electric trolley busses in Bangalore and electrification of railways between Mysore and Bangalore will be an accomplished fact.

Electricity in Travancore State.

The first electrical undertaking to operate in the State was the Hydro Electric Station established in the High Ranges by the Kanan Devan Hills Produce Co., Ltd., in 1905 which was intended to meet the power requirements of the Company for lighting and Factory drive. It was towards the close of 1927 that Government initiated a programme of electrical development in the State. A start in this direction was made by the establishment of a thermal station at Trivandrum, the capital of the State, in March 1929. The rapid expansion of the Trivandrum Electric Supply served as an incentive to private enterprise to come into the field. A thermal station was started at Kottayam in 1932 for the supply of power to that town under a license. Another private agency took up the supply of power at Nagercoil in 1934.

A scheme for the supply of power to Quilon was inaugurated by the Government towards the middle of 1934.

A license for the supply of power to the Taluks of Shencottah and Pathanapuram was granted to a private Agency in 1940 and the supply was inaugurated in 1941.

In view of the very large demand for electric supply being extended to several areas, the Government decided to initiate a large hydro-electric system to meet the growing demand for power. As a first step towards this objective, the Pallivasal Hydro-Electric Scheme was sanctioned by the Government in 1931 and the work was taken up immediately afterwards. The first stage of development was completed by the beginning of 1940 and the supply was commenced in March 1940. The Scheme utilises the water of the Mudirapuzha River diverted at Munnar through a tunnel 9 ft. by 8 in. and 10,200 ft. in length. Two parallel steel penstock lines each 7,800 ft. in length take the water to the generating station. The generating plant consists of three 5,000 kVA. Alternators generating at 11,000 volts directly coupled to Pelton wheels operating at 1,980 ft. head. Two of the machines are in normal service while the third serves as a stand-by. The normal generating capacity of the station is 9,000 kW, but during peak hours, the third unit is also commissioned to take up loads upto 1,500 kW, thereby raising the effective capacity of the station to 10,500 kW. Power is stepped up to 66,000 volts for transmission to the plains. The transmission system as now brought under use consists of 137 miles of 66 kW, double circuit lines on lattice steel towers, taking power to 5 major 66 kW sub-stations and 26 miles of 33 kV lines, 230 miles of 11 kV single circuit lines and 10.5 miles of double circuit lines connecting all the important centres in North and Central Travancore.

The availability of hydro-electric power in most of the important commercial and agricultural centres coupled with the impetus given to industrial and agricultural operations consequent on the situation created by the second World War, has resulted in a steadily growing demand for power. The connected load is over 17,000 kW with a maximum peak load of 10,300 kW. The total generation during the last financial year was 74.5 million units. About 72.5 per cent of the power generated is used for industrial purposes and the rest for agricultural and domestic needs. Electriolitic production of aluminium, tea factories, ceramics, textiles, paper, ply-wood, oil mills, saw mills, tile factories, mineral factories, engineering workshops, etc., constitute the main industrial load.

L. T. distribution is standardised at 400/230 volts. Asen treated teakwood poles supplied by the State Forest Department and wooden cross-arms, have been standardised for all 11 kV lines and a major part of the network.

The demand for power has been so pressing that action for augmenting the power supply was taken as early as 1941. Although the necessary orders for the plant were placed in 1941, the demands of the late War, which had necessarily to be given the highest priority, necessitated the execution of the orders being held in abeyance till 1944. The work of the installation of 3 more generating sets each of 7,500 kW capacity in the Pallivasal Station is now in progress. Two more pipe lines to supply water to these three generating sets are also being laid. One of the additional pipe lines and one 7,500 kW generating set are expected to be ready by the end of 1946. The additional power generated will be used mainly for aluminium production and for the manufacture of Ammonium Sulphate.

Owing to the delay in augmenting the generating capacity of the Pallivasal Station, it was found necessary to resort to other arrangements for making available additional power to meet the demands arising out of committments already made. As a result of the negotiations with the Government of Madras, it has been possible to get a block of 3,000 kW of power from the Papanasam System. A 66 kV single-circuit line connecting Kundara to Shencottah has been constructed and the supply from Papanasam has been inaugurated from the beginning of September 1946.

The demand for power as foreseen now is so heavy that it has become an urgent necessity to explore the possibilities for further hydro electric developments. Two more schemes are already under investigation. The first of these is proposed to be located a little lower down the present generating station. With the tail water of the main station, it is expected that this station could generate about 30,000 kW. The other station is proposed to be located further lower down the same river. The tail water of the second Station together with the discharge of two other tributaries of the Mudirapuzha River will supply the water for this scheme and the output of this station is estimated to be 40,000 kW. With the construction of suitable reservoirs for the collection of water, it is expected that the generating capacity of this station can be further augmented.

Power development from the Pampa River in Central Travancore is also under investigation. Preliminary forecasts show that it will be possible to develop about 1,00,000 H. P. from this Scheme.

The situation created by the second World War has given a strong impetus to industries in general and on the wake of it, a growing demand for power. During war-time, one of the major industrial concerns supplied with power from the Government System was the Indian Aluminium Co. Power was also being supplied to several industries engaged in war Work. Special mention may be made in this connection regarding the rule of electricity in food production activities both during and after the war as with the scarcity of fuel oil and oil engines, it has been necessary to resort to electric drive for de-watering operations in rice fields in the back-water areas and also for lift irrigation. Several thousands of acres of land both in Central and North Travancore have been put under cultivation with the aid of electric drive and as experience has shown that this is both economical and convenient, it is proposed to adopt this as a permanent arrangement.

HYDRO ELECTRIC DEVELOPMENT IN MADRAS.

Hydro-electric development in Madras until 1927 was confined to a few tiny plants in tea estates and to the small installation at Katori in the Nilgiris for making Cordite. In recent years there has been significant progress and Madras now ranks next to Bombay in its hydro-electric power output. Three hydro-electric stations are now in operation. Besides extensions to the existing plants, two more stations are under construction.

The water power sites in the province are mostly in the Western Ghats especially in the region of the Nilgiris and the Palnis. Sites in the Eastern Ghats are few and some of them are on border streams. A close estimate of the available power has not yet been made. The continuous power output from the sites which are definitely known to be worth development is over 220,000 kw. It is likely that further survey and investigation would locate more sites. While it is unsafe at this stage to give an estimate of the maximum water power available in the province it may be assumed to be around 500,000 kW continuous. This does not, however, include power that can be developed from future large irrigation dams like those projected at Polavaram on the Godavari.

To develop the available power resources in an orderly and rational way and make it available over the whole province cheaply and in abundance, an 'Electric Power Grid' for the province was conceived by the Madras Government over 15 years ago. It is a Scheme of inter-connected power houses, both hydro and thermal, feeding a net-work of transmission and distribution lines serving towns and villages.

Part of it is already in existence and the rest is to be built in appropriate stages corresponding to the industrial and social advance of the country.

The Grid in the south where it is well formed consists at present of three hydro-electric power stations, *viz.*, those at Pykara, Mettur and Papanasam. A fair part of 12 districts from Chittoor to Tinnevelly and Chingleput to Malabar is covered. 45 Municipal towns and 850 villages receive supply. The installed generating capacity of the three stations totals 104,000 kW. The Gird owned by the Government Electricity Department has over 3,000 miles of high tension lines operating at voltages from 11,000 to 110,000 and 1,850 miles of low tension distribution lines. There are 36 extra high tension sub-stations with transforming capacity totalling 189,000 kVA and 660 distribution transformer stations with an aggregate capacity of 30,600 kVA. The total load connected to the Grid is 160,600 kW. Among the important industries which are served are textile mills, cement factories, electro-chemical works, Steel-rolling mills and tea factories.

Rural electrification on a fairly extensive scale has also been carried out with a connected load of over 30,000 kW. There are over 4,500 electric pumps for irrigation and 600 rural factories for ginning cotton, hulling rice, pressing oil seeds, shelling nut, crushing cane and milling flour.

There are over 90,800 consumers of all classes, 71,600 served through the distributing licensees and 19,200 served by Government direct. The total power generated from the hydro-stations in 1945-46 was 309 million units representing 75 % of the total generation in the Province. The capital investment so far made is nearly Rs. 7.5 crores and the revenue in 1945-46 was Rs. 105 lakhs.

In the central and northern regions of the province the grid is yet to take shape. At present there are number of thermal stations each serving the local area but not inter-connected. When the big hydro-electric stations on the Machkund River in the Vizagapatam District and other extensions in progress are completed, the Grid will practically cover the whole province.

Pykara Scheme.—The scheme utilises the waters of the Pykara river which drains from the Nilgiri plateau having a catchment area of nearly 38 square miles and a fall of about 3,100 ft. The flow though perennial is very irregular and often drops to values around 20 cusecs during the dry season. The topography however embraces a number of feasible storage sites which could be developed according to the growth of Power demand. The estimated potential capacity of the full development is around 40,000 kW continuous.

The first stage of development was commenced at the end of 1929 and was completed at the end of 1932. This stage utilised the regulated flow of the river with small storages of 58 million cubic feet in the forebay and 28 million cubic feet in the Glenmorgan Reservior. The rapid growth of load necessitated the early construction of the Dam at Mukurti to store 1400 m.c. ft. with open spillways. The work was commenced in January 1935 and completed in June 1938. By installing automatic gates over the spillways the storage capacity has been raised to 1,800 m.c. ft. in April 1946. The final stage now sanctioned will provide a further increase of 2,000 m.c. ft. storage by the construction of a second dam across Pykara river.

Civil Works.—Water from the intake of the river is led by a flume to the forebay from whence it is led through a single 78" diameter steel pipe 1000 ft. long to a surge tank at the head of the penstocks. In the first stage two pipes each in 3 sections of diameter 27" 24" 21" with a total length of about 9,300 ft. were laid. In the second stage a third penstock of 42" 39" 37½" diameter was added.

Power Stations.—The initially installed plant comprises three 7,810 kVA, 3 phase, 600 r.p.m. alternators coupled to 10,900 HP. pelton wheels. Power is generated at 11,000 volts 50 cycles and stepped upto 110,000 volts by means of three 7,810 kVA, 3 phase, 11 kV 66-110 kV transformers.

In 1939 two 12,500 kVA generating units and two 12,500 kVA transformers were added. The Pykara-Coimbatore transmission line was changed from 66 kV to 110 kV operation to suit the increased load demand.

Transmission and Distribution.—Power is transmitted to Coimbatore, which is the main receiving station and also the chief load centre by means of a 50 mile double circuit 110 kV line. The line is extended therefrom at 66 kV to Tiruppur, Erode, Udumalpet, Sembatti and Madura. At Erode and Madura tie is established with the Mettur and Papanasam Systems respectively. Power is now supplied from Pykara to Calicut through a 66 kV line completed early this year.

This system has 1,180 miles of transmission lines of voltage ranging from 11,000 to 110,000 in service. There are 5 extra high tension sub-stations with transforming capacity of 67,750 kVA and 385 distribution transformer stations with an aggregate capacity of 18,400 kVA.

Mettur Scheme.—The engineering features of the Mettur Hydro-Electric Scheme provide an interesting contrast to the Pykara Hydro-Electric Scheme. The Mettur Dam, one of the largest structures of its kind in the world is 176 ft. high and can impound a total of 93,500 m.c. ft. of water. This storage is primarily for irrigation purposes but part of the water let down for irrigation is utilised to the best advantage for the generation of hydro-electric power.

During construction of the dam 4 cast iron pipes 8'-6" in diameter had been built into the structure and equipped with the necessary valves, gates, screens and other fittings. Each pipe is designed to discharge a maximum of 1,250 cusecs for power purposes.

Work on the initial installation with 8 units of 10,000 kW each was commenced in the latter part of 1935 and the station started operation in June 1937.

The operating head varies from 160 ft. at full reservoir level to a minimum of 60 ft. The average head is 135 ft.

Power House.—The Power house is situated immediately below the Mettur Dam. The units are 12,500 kVA, 250 r.p.m. generators coupled to overhung type twin horizontal Francis turbines one on each side. The turbines operate under a variable head from 60 to 160 ft. developing a maximum of 16,000 H.P. each. Power is generated at 11,000 volts, 50 cycles, 3 phase and stepped upto 66,000 volts (110,000 volts later) for transmission to various load centres.

The fourth generating unit recently added was commissioned into service in October 1946.

Transmission & Distribution System.—Power is transmitted to Singarapet in the North and Erode in the South by means of two 66,110 kV trunk lines (a total mileage of 100 miles) taking off from the Power Station. At Erode the Mettur System is linked with Pykara network. 66 kV lines have been extended in the north to Vellore, Tiruvannamalai and Villupuram and in the south to Trichinopoly, Tanjore and Negapatam. To ensure proper voltage regulation two 2,500 kVA synchronous condensers are installed at Trichinopoly.

Considerable lengths of 11.22 and 33 kV lines have been constructed for extending power to various places. 1,365 miles of high tension lines of all voltages are now in service. There are 24 E.H.T. Sub-stations with an aggregate transformer capacity of 46,850 kVA. The number of distribution transformer stations are 205 and have a total capacity of 8,300 kVA.

The Mettur Station is being linked with Madras thermal station by a 110 kV line between Singarapet and Madras. This interconnection will enable diversion of the surplus seasonal power at Mettur to Madras thereby saving coal. During dry months Madras will assist Mettur to enable larger firm demand being met in the Mettur System than is possible at present.

Papanasam Scheme.—This is the third hydro-electric scheme to be undertaken by the Madras Government. The first stage of the scheme was started in 1938 and the station commenced operation in July 1944.

The Tambraparni river drops about 300 ft. over the picturesque Papanasam falls at the foot of the Western Ghats in Tinnevelly District. The power development consists in regulating the river flow and harnessing the energy that was wasted over the falls. The catchment is benefited by both South-West and North-East monsoons, the latter generally preponderating.

Civil Works.—Six miles above the falls a reservoir of 5,500 m.c.ft. is formed by constructing a masonry dam 170 ft. above river bed and 900 ft. long. About ¾ mile above the falls the water is diverted from the river course by a weir 1,350 ft. long and 35 ft. high giving a spindage of 28 m.c.ft. for daily regulation. Water is conducted by two 9 ft. low pressure steel pipes from the diversion weir to the surge tank at the edge of the cliff and from thence through four 66" penstock pipes 520 ft. long down the hill slope to the power house which is located near the Agastya temple at the foot of the Papanasam falls. (One low pressure pipe and 3 penstocks only were installed in the first stage). The gross head developed is 330 ft.

Power House.—The generating plant consists of three vertical alternators of capacity 7,250 kVA, 600 r.p.m. coupled each to a Francis reaction turbine of 9,850 B.P.H. The generation is at 11 kV, 3 phase, 50 cycle and power is stopped upto 66 kV by means of three 7,250 kVA, 1,166 kV transformers.

To utilize fully the water that will be available in good rainfall years the fourth generator along with the second low pressure pipe line and penstock pipe are being installed now. They form the second stage of development at this site.

Transmission & Distribution.—The transmission system extends to Tuticorin, Kolipatti and Madura, and is linked with the Pykara Hydro-Electric System at Madura. For purposes of voltage regulation two 2,500 kVA synchronous condensers are installed at Madura.

The system has 382 miles of high tension transmission lines, 7 e.h.t. sub-stations with transformer capacities totalling 24,100 kVA and 75 distribution transformer stations with an aggregate capacity of 4,000 kVA.

Bulk power to the extent of 3,000 kW is being delivered to the Travancore Government at the State borders near Shencottah.

Five-year Programme.—During the war years no progress could be made and there was practical stoppage of all new schemes and extensions. The only work done was to complete with great difficulty the few schemes already started. The Madras Government have sanctioned a five-year programme of construction of the following new schemes and extensions.

1. Machkund Hydro-Electric Scheme including extensions to the Vizagapatam and Bezwada Thermal auxiliary plants.
2. Nellore Thermal Scheme.
3. Madras Thermal Extension Scheme and inter-connection with Mettur Hydro.
4. Ceded Districts Scheme.
5. Moyar Scheme.
6. Pykara Hydro-Electric Scheme Extensions.
7. Madura Thermal Scheme.

Machkund Scheme.—This Scheme is for harnessing the Machkund river in the Vizagapatam District on the borders of Madras and Orissa, at the Duduma falls where a gross head of 840 ft is available. 100,000 kW of power colud be developed at this site, and the scheme is proposed to be worked out in stages.

The initial stage will comprise a diversion dam across the Machkund river, a flume channel, a 3,000 ft. long low pressure tunnel and three penstock pipes leading to the power house. The power station will have 3 generating sets each

of 17,250 kW. In the later stage a dam is to be constructed at Jalaput and in the ultimate stage there would be 6 penstocks with generating units of capacity totalling 100,000 kW.

The civil works and power house have to be constructed in co-operation with the Orissa Government and Madras has undertaken to execute the project works. The work on the scheme has been commenced and the initial stage is expected to be completed by 1951.

A 300 mile 110 kW transmission line will carry the Madras Share of power to Vizagapatam, Rajahmundry and Bezwada. This scheme will be adequate to supply the power needs of the Vizagapatam, Godavari, Kistna and Guntur districts. Pending its completion, additional generating plant totalling 9,000 kW has been ordered for the Bezwada and Vizagapatam thermal stations to meet the interim demand of the region.

Nellore Scheme.—For the Nellore area a thermal station is planned at Nayudupetta with two 2,500 kW transportable power sets initially. The sets have been ordered and the plant will be working next year. The network of this area will be eventually linked with the Southern Grid.

Madras Thermal Extensions.—Supply for the Madras city area is now inadequate, on account of the load exceeding the capacity of the power house. The Madras city power undertaking of the Madras Electric Supply Corporation is to be acquired by the Government in August 47 and steps have already been taken to modernise the plant and increase its capacity. A new 150,000 kW Turbo-alternator set has been ordered as also the associated boilers and they would be in service in 1948-49. To meet the growing demand in the meanwhile, it is proposed to use two 2,500 kW transportable power units as a temporary measure to supplement supply. These units have also been ordered.

A 110 kV, 124 mile line interconnecting the Madras Thermal Station with the Mettur Hydro Station is being constructed for mutual exchange of power. It will be completed early in 1948.

Ceded Districts Scheme.—The Ceded Districts are proposed to be supplied with power purchased from the Mysore Jog Hydro-Electric Scheme. Supply will start in mid 1948. When the Tungabhadra hydro power station is built—around 1952—it will take over the area and supply from Mysore will be stopped.

Moyar Scheme.—The Moyar Scheme for developing power from the tail water of the Pykara power station with a head of about 1,280 ft. available at the Moyar Slope, 9 miles lower down, is now under construction.

The main features of the scheme are: 1. A channel about 7,600 ft. long to divert the tail water from the Pykara power station to the adjacent Avarihalla valley. 2. A regulating reservoir of 28 m.c. ft. at Maravakandi 4 miles lower down. 3. A flume channel about 24,000 ft. long from the reservoir to the forebay and headworks at Guruva-Gowda Hundi. The forebay is to have a storage of 6 m.c. ft. 4. A 7 ft. diameter low pressure pipe from forebay to the surge tank at the head of the penstocks and 3 penstocks 2,880 ft. long in two sections of 45" and 42" to the power station. 5. A power station with three 12,000 kW 428 r.p.m. alternators coupled to 18,000 H.P. two nozzle vertical type impulse wheels.

Power is to be generated at 11 kV, 3 phase, 50 cycle, stepped up to 110 kV and transmitted to Pykara and Erode through 110 kV double circuit transmission lines. This will be the 4th hydro-electric station of the Grid in the Southern part of the province and will meet the increasing demands of the Pykara and Mettur Systems for a few years.

Pykara Extensions.—The final stage of the Pykara project consisting of a second dam across the Pykara river to provide a storage of 2,000 m.c. ft. a new penstock, and two generating sets of 13,500 kW each at Pykara station has been sanctioned. This will not only meet the power deficiencies of Mettur and Papanasam stations during periods of unfavourable water conditions but will also meet the demands arising out of the large scale industrial and agricultural developments in the southern districts in the near future.

Madura Thermal Scheme.—To supplement the output in the Hydro-Grid during water scarcity, a thermal auxiliary station at Madura with an initial capacity of 4,000 kW is to be built shortly. The plant has been ordered.

These schemes which are all now under construction cover a major part of the province and will result in doubling the existing generating capacity. They are scheduled to be completed within five years and will cost Rs. 15 crores.

Works in Kashmir.

A scheme of much importance from its size, but more interesting because of the developments that may be expected from it than for the part which its current supply already plays in the life of the countryside, is one installed forty years ago by the Kashmir Durbar, utilising the river Jhelum, near Baniyar about fourteen miles from Baramulla. The headworks of the Jhelum power installation is situated six and a half miles from the power house, at Mohora and the main connection between the two is a timber flume. These works and the forebay at the delivery end of the flume have a capacity for carrying water sufficient for the ultimate generation of 20,000 electrical horse-power. Four pipes 792 feet long lead from the forebay to the power house and from forebay to water wheels there is an effective head of 399 feet. There are four horizontal water-wheels, each coupled on the same shaft to a 1,000 kVA, 3-phase, 2,300 volt, 25 cycle generator running at 500 r.p.m. The power house is of sufficient capacity to allow of 15,000 kW generating plant being installed within it. Two transmission lines run side by side as far as Baramulla, 21 miles from Mohora at which point one terminates. The other continues to Srinagar further 34 miles. The installation at Baramulla was originally utilised for three floating dredges

and two floating derricks, for dredging the river and draining the swampy countryside and rendering it suitable for cultivation. The lighting of Baramulla has been taken in hand with satisfactory results and the power load is building up. At Srinagar, the line terminates at the State silk factory, where current is supplied not only for driving machinery and for lighting, but also for heating. The whole of Srinagar city is now electrically lighted and there are a number of power loads.

Besides the Jhelum power installation, there are two other schemes, the Muzafferabad hydro-electric installation utilising a tributary of the river Kishen Ganga and the Jammu hydro-electric installation. The Muzafferabad power house has one 130 B.H.P. pelton wheel directly coupled to a 110 kVA, 3,300 volt, 50 cycle alternator. This serves Muzafferabad town and Domel on J. V. Road. The Jammu power house employs five generating sets. Of these, one 265 kW set is driven by a Diesel oil engine and the remaining four generating among themselves 1,226·5 kW, are driven by water turbines.

In addition to the above schemes, new sources of power capable of feeding large-scale manufacture are being explored in view of the beginning of large-scale industries in Jammu and Kashmir State, being explored. The State has already provided funds from capital expenditure not charged to revenue for the improvement of the State's electrical system. The necessity for augmenting the power supply in the Jammu area being many, a steam turbin driven generating plant of 1500 kW capacity is being installed or being located at Miran Sahib and connected with Jammu by a 6,600 volt line. This will enable necessary supply of power being made available for Jammu, Jammu Cantonment and Miran Sahib industrialisation. The cost of the scheme is estimated at Rs. 8,11,200.

A hydro-electric scheme with an ultimate capacity for generating 9,000 kW by harnessing the Sind River near Ganderbal is also under survey and a smaller scheme for supply of power at Pahalgam is now in progress, while other smaller schemes for Anantnag and Udhampur are under investigation. The utilisation of the Chenab River for developing a hydro-electric scheme on a large scale is also under consideration.

United Provinces Works.

The Ganges Canal Hydro-electric Grid supplies power at attractive rates for domestic, industrial and agricultural purposes to 14 districts in the west of the province and to Shahdara in Delhi province. Seven of the ten falls available for electrification have been developed and a standby steam power station at Chandausi of 7,000 kW has been constructed. From 1938 no less than 27,900 kW in all has been available. A new hydro-electric station at Mohammadpur with an installed capacity of 9,800 kW is under construction. A further steam station at Harduagunj with an installed capacity of 20,000 kW is nearing completion. Besides supplying some 93 towns with current for light and fans and minor industries, the grid provides energy for irrigation pumping from rivers and open and tube wells. The Ganges Valley State Well Scheme comprises about 2,000 tube-wells, covering the districts of Moradabad, Bijnor, Budaun, Muzaffarnagar, Saharanpur, Meerut, Bulandshahr Aligarh and Etah, introducing irrigation on the volumetric system over approximately one million acres hitherto without any source of irrigation. This supply of cheap power from some 2,300 sub-stations is already having an important bearing on the economic disposal of crops and the development of minor industries in the urban centres.

Investigations into the electrical and financial possibilities of a number of hydro-electric power generating stations have been completed and the work has already commenced on the Sarda Canal Hydro-Electric Scheme with an installed capacity of 55,200 kW. This station will be ultimately linked up with the large steam station at Cawnpore and the Ganges Canal Hy. Elec. Grid.

Punjab's Hydro-Electric Project.

Situated on a spur of the Dauladhar Range at elevations ranging between 6,000 and 4,000 feet above sea-level, and connected by means of a tunnel over 15,000 ft. long, are the works of what is known as the Uhl River Hydro-Electric or Mandi Scheme which is now operated by the Punjab P.W.D. Electricity Branch with its Headquarters at Lahore.

This project owes its origin to the need which began to be felt in the Punjab during the War of 1914-18 for making energy available for industrial and agricultural purposes at rates cheaper than were then prevailing.

The site was discovered in the year 1922. A detailed project was prepared by 1923. Work on the construction of the first stage of this scheme was started in 1926. The total capital outlay on the scheme to the end of the year 1944-45 has been Rs. 730.6 lacs.

Due to the extensive nature of the construction works, it was found necessary to build two small temporary Hydro-electric power stations one at Dhelu near Shanan and the other at Thuji near the headworks at Brot which were linked together and the combined installed capacity was 1440 kW.

Water is withdrawn from the Uhl and the Lamba Dug Rivers at Brot and conveyed by a 9.25 ft. internal diameter concrete lined circular pressure tunnel which is one of the longest tunnels in India and is the first steel mantle tunnel to be built in Asia. The tunnel is about 3 miles long and is designed for a normal full discharge of 600 cusecs (but it can carry up to 800 cusecs if required). The tunnel feeds steel penstocks which run down the slope to the Shanan Power Station near Jogindarnagar (Mandi State) so as to utilise 1,800 ft. of the total fall thus converting the snow fed waters of the Uhl and its tributary into electrical energy.

The initial installed capacity of Shanan Power Station is 48,000 kW. The plant consists of four 17,000 B.H.P. Pelton wheels,

running at 428.5 r.p.m. each driven by a single jet of water and connected to a 12,000 kW, 11,000 volt, 3 phase, 50 cycle alternator.

From the Shanan Power Station energy generated at 11,000 volts is stepped up to 132,000 volts which is the highest voltage adopted for this purpose in India. The transmission system comprises a double circuit 132 kV trunk transmission line supported on steel towers 80 ft. high normally set 1,000 ft. apart but with spans extending even upto 3,360 ft. in the hills. This line supplies sub-stations at Kangra, Pathankot, Dhariwal, Amritsar and Lahore.

A single circuit 132 kV line also runs from Amritsar to Jullundur and is continued at 33 kV to serve Goraya and Ludhiana sub-stations. A 66 kV single circuit line starts from Lahore and supplies sub-stations at Kasur and Ferozepur while a similar line from Lahore serves sub-stations at Shahdara, Sheikhupura, Chuharkana, Mohlan, Jaranwala and Lyallpur.

From these various sub-stations 11,000 volt lines radiate to supply between them about sixty towns and villages. In addition to serving 31,000 consumers directly from its own mains, the Branch also furnishes bulk supplies to the N.W.R. for its own Workshops and to the P.W.D. Central Workshops, to two licensees (the Amritsar Municipality and the Jullundur Electric Supply Co.) and also to the Kapurthala State at two points. The connected load at the end of March, 1945 was 59,289 kW, the total number of units generated being 125,530,190 and the revenue assessed 60.36 lacs for the year 1944-45.

Post-War Schemes.

During the last world war, though the construction of any major new schemes could not be undertaken, the question of post-war power development in the province has been seriously engaging the attention of the Punjab Government. As an outcome of detailed investigations a Five Year Post-War Development plan has been approved by the Government.

All these schemes, in addition to providing power for thousands of irrigation tube wells throughout the province, will provide much needed additional power for the industrial and economic development of the province.

The possibility of introducing tube well irrigation in certain parts of the Punjab adds to the interest of post-war hydro-electric projects in the province. This would enable thousands of acres of hitherto uncommanded land to be brought under cultivation, thereby increasing the food supply of the province and also lower the water table very considerably and tend appreciably to eradicate the menace of water-logging in many parts of the province.

Rasul Hydel Scheme.

This is a special priority scheme and provides for the development of 22,000 kW of electric power at Rasul headworks from water to be dropped from the Upper Jhelum Canal to the Lower Jhelum Canal with an available average head of 84.75 ft.

The Scheme is estimated to cost Rs. 818.5[illegible] lakhs and provides for the construction of [a] hydro-electric station at Rasul with two 11,000 kW Kaplan generating sets. It also provides for a double circuit 132 kV line from Shalamar (Lahore) to Rasul *via* Gujranwala, Gujrat and Jhelum and single circuit 132 kV line on double circuit towers from Jhelum to Rawalpindi *via* Gujarkhan. It also provides for: (i) a double circuit 66 kV line from Gujranwala to Lyallpur *via* Hafizabad, Sukheke, Sangla Hill and Chak Jhumra, (ii) a double circuit 66 kV line from Rasul to Malakwal, (iii) and 66 kV and 33 kV single circuit lines between Lyallpur and Chiniot, Malakwal and Sargodha *via* Bhulwal, Rasul and Chakori, Malakwal and Bhabra, Hafizabad and Chinawan, Bhulwal and Bhera and Gujranwala and Sialkot *via* Daska.

This scheme is primarily meant for providing tube well irrigation in some of the districts in the western and central Punjab and the available power is proposed to be utilised in the following manner: (i) Operation of 180 tube wells to be installed on the channels of the Northern Canals of the Irrigation Branch (ii) Supply of electrical energy for industrial power and lighting in twenty-eight towns in the districts of Shahpur, Jhelum, Gujrat, Sialkot, Gujranwala, Sheikhupura, Lyallpur and Jhang (iii) Supply of power to the Uhl River Grid to the extent of 5,000 kW during the low water period in the Joginderagar catchment area.

The construction of this scheme has already started and it is scheduled to be ready for operation by the middle of 1949.

Nangal Scheme.

The Punjab Government have recently accorded administrative approval to what is known as the Nangal Power Project.

This project provides for a diversion weir from the Sutlej at Nangal in North-east Punjab near Bhakra and a canal 37 miles long and of 10,000 cusecs capacity from Nangal to Rupar. At Rupar, one branch will lead to the Sirhind Canal while another branch will form the head line upper of the future Bhakra Canal. From a study of the discharge tables of the Sutlej river for the last 35 years it appears that 3,000 cusecs would be a safe minimum supply on which to count and the initial stage of the project is based on the utilisation of this minimum discharge.

After the Bhakra Dam is completed the canal in addition to the free flow of the river, will take the releases from the Bhakra reservoir. The fair minimum discharge available will then be 6,000 cusecs and the firm power available will be doubled.

Situated on the canal will be 4 power houses with heads of 81,53.5, 53.5 and 51 ft. at minimum flow period, yielding a total of 66,400 kW of primary power at 72% load factor. When the Bhakra Dam is completed and more water becomes available it is anticipated that, with the installation of a fifth power house at [illegible]

elow Rupar, it will be possible to develop pprox. 1,32,000 kW of primary power at 2 per cent. load factor.

The project provides for: (i) A double circuit 32 kV trunk line—on 220 kV towers—from Nangal to Ambala and single circuit onward p to Delhi *via* Panipat. The towers between Ambala and Delhi will be designed for 220 kV nd stringing of a second circuit in future, if ecessary. (ii) A double circuit 132 kV line—n 220 kV towers—between Nangal and ullundur (iii) A single circuit 132 kV line, n double circuit towers, between Jullundur, erozepur, Fazilka and Pakpattan. (iv) 66 kV nd 33 kV branch lines connecting the 132 kV runk line grid sub-stations with Karnal, Abdul-ahpur, Patiala, Nabha, Bilaspur, Naraingarh Sirmoor State), Khanna, Jagraon, Moga, Kot-Kapura, Bhatinda, Muktsar and Abohar owns, (v) 11 kV lines and local distribution et work for supplying the irrigation tube wells nd towns covered by the Scheme.

The Nangal Power Project has been rendered rgently necessary to provide power for the onstruction of the Bhakra Dam; to provide ower for the industrial and economic develop-ment of the province; and to provide for tube ell pumping to increase the irrigation supplies n the Sutlej Valley, Sirhind and Western umna Canal Systems as early as possible.

The subsidiary advantages of the Project re that: (i) It will obviate material interference with Rupar Head Works and the Sirhind Canal. part from the political difficulties thus escaped, here will be a saving of Rs. 165 lakhs. (ii) It will provide a balancing reservoir for the Bhakra Dam releases and, by stabilising diurnal varia-tions, will enable the full development of Bhakra ower.

The initial stage of the scheme *i.e.* the levelopment of 66,400 kW of primary power, s estimated to cost Rs. 1,774 lakhs and expected o be completed by the middle of 1951. The inal stage, which is estimated to cost an ad-litional sum of Rs. 191 lakhs, will not be taken n hand until after Bhakra power is available nd the power position of the province has een thoroughly re-examined.

Mangla Hydro-Electric Scheme

This project provides for the generation of 0,000 kW of hydro-electric power at Mangla ear the Punjab Irrigation Branch Head Works n the Upper Jhelum Canal from a head of 0 ft. and minimum flow of approx. 5,000 cusecs n the head reach of the canal. It also provides or the linking of this power station by a double ircuit 132 kV line with the 132 kV Grid sub-tation at Jhelum which would be constructed nder the Rasul Hydel Scheme.

Extension.

Addition of a pipe line and two 12,000 kW elton wheel generating sets at Jogindarnagar s an extension of the existing hydro-lectric works of the Uhl River Scheme at ogindarnagar and is meant for developing dditional power which, in cold weather periods during shortage of water at the headworks at Brot, will be supplied by means of the Mangla Hydro-Electric Scheme but, when there is a shut down of that generating plant during summer, it will be supplied by these additional sets at Jogindarnagar power station which has an ample supply of water in summer to run five machines.

These two schemes are therefore primarily meant to supplement each other during the low water periods at the respective power stations, thus ensuring a constant supply of additional power to the province all throughout the year. The schemes are estimated to cost Rs. 99.52 lakhs and scheduled to be completed in 1951.

The Bhakra Project.—This is the major post-war hydro-electric project of the Punjab and has been considered in many shapes and forms since it was first submitted about 30 years ago. The project involved protracted negotia-tions with various States through which the irrigation canals will run, ascertaining as to which of them would like to participate in the scheme and under what terms.

It was only very recently that these protracted negotiations reached more or less a final stage and serious attention could be given to detailed designs of the dam, canals, power station, etc. The work of designing the Dam has finally been entrusted to a firm of American Consulting Engineers headed by Mr. Savage, who is generally considered the best living authority on high dams and has been responsible for the design of such marvels of modern engineering as the Boulder Dam and Grand Coulie Dam in the U. S. A.

The scheme involves the construction of a 480 ft. high dam across the Sutlej at Bhakra in north-east Punjab and the creation of a reservoir for canal irrigation and development hydro-electric power.

The Bhakra storage is estimated to have a live storage of approx. 3.4 million acre feet capable of discharging during the 270 days, when natural river supplies are non-existant, a mean discharge of about 6,300 cusecs. It will irrigate the dry famine stricken tracts of Hissar, Rohtak and the adjacent States where no canal irrigation is available at present. It will also generate about 1,88,000 kW of electric power at 0.72 load factor (which is the average load factor of the Punjab Grid), with an installed capacity of 3,20,000 kW, *i.e.*, four machines of 80,000 kW capacity. The generating station will be linked up with the transmission system of the Punjab Grid with extensions in the Western Punjab up to Multan.

The construction of so stupendous a scheme is naturally a slow job, if full measures of safety and a reasonable economy are to be provided. The preliminary work has already been started but the scheme is not expected to be completed before 1956.

Nizamsagar Project.—The Hyderabad State has decided to proceed with the Nizamsagar Hydro-Electric Project as an immediate post-

war measure for bringing hydro-electric power to Hyderabad City. The scheme is intended to utilise the water stored in the Nizamsagar dam and it is expected that electric power varying from about 1,500 kW as the minimum to about 11,500 kW as maximum could be generated. It is proposed to instal 2—4,000 kW hydro-electric generating sets and to construct 80 miles of 66 kV transmission lines for supply to Hyderabad City.

Tungabhadra Project.—An agreement has recently been reached on the apportionment of the waters of the Tungabhadra river between the Governments of Madras, Mysore and Hyderabad. For the share of the waters, it will be possible for Hyderabad State to utilise three drops in the irrigation canal for generation of hydro-electric power, giving an initial output of about 15—25,000 kW.

Future Hydro-Electric Projects.—There are a number of hydro-electric power sites on the Manjeera, Kaddam and Purna tributaries of the Godavari and on river Dindi, a branch of Kistna river as well as on the upper and lower reaches of the Kistna. The actual power potentialities of these sites need detailed investigation.

KOLHAPUR STATE.

The Kolhapur State has embarked on the generation of electric power from the water stored in the Radhanagari dam which has been raised to the height of 40 feet. It will be further raised to 126 ft. for which construction is now in progress. The power house will be situated at the foot of the dam and the installation will comprise 4—1,200 kW Kaplan sets operating on 65.116 feet head. The power will be transmitted by means of 32 miles of 33 kV lines to Kolhapur city for augmenting the water supply to the city, supply of energy to industrial concerns and take over the load from the existing oil engine station. The Radhanagari station will be supplemented by another Thermal 1,300 kW station at Kolhapur. Both the stations will run in parallel. The scheme is also intended to provide an assured water supply for existing irrigation and new areas that will be put under cultivation by the installation of about 175 electric pump sets in the area served by the transmission lines.

HYDRO-ELECTRIC DEVELOPMENT IN N.-W. F. P.

Malakand.—The possibility of generating electricity at Malakand was first recognised some 25 years ago. The waters of the Swat river to the north of Malakand are utilised for fertilising the north eastern part of the Peshawar valley by driving a tunnel known as Benton tunnel under the Malakand pass and constructing a canal. It is recognised that by extending it by another half a mile upto a point above the upper Swat canal, advantage could be taken of a natural fall of some 250 feet for the production of electricity. This scheme was sanctioned in 1934 and a new tunnel known as Burkitt tunnel, 12 feet in diameter, was constructed. From the tail of the Benton tunnel, water is discharged over a regulating weir into the new power tunnel from which it emerges through an open channel with silt extractor into the forebay. At the remote end of the forebay, a spillway syphon is provided to allow evacuation of excess water automatically in the event of sudden changes of load. From the forebay the water flows through penstock pipes 515 feet long with external diameter varying from 61 inches at the top to 55 inches at the bottom into the power house situated below at Malakand.

The available discharge is 800 cusecs with a total head of 250 feet. The generating plant consists of three reaction turbine sets each generating 3,200 kW at 11 kV, 3 phase 5 cycles. The pressure is stepped up by transformers to 66 kV and power transmitted by a 30 mile double circuit line to Mardan and thence by 74 miles of single circuit ring main to Peshawar Cantonment, one line passing through Charsadda and the other through Risalpur and Nowshera. 140 miles of 11 kV branch lines are also provided for serving important towns and rural areas in the province. The scheme came into operation in 1938.

The hydraulic works and the power house have been designed for the installation of three more generating sets at a future date. Two additional sets each of 5,000 kW are on order and will be installed early in 1948.

An extension of the 66 kV transmission system to Wah is now in progress and a further extension to Haripur and Abbottabad is proposed.

Local Self-Government.

A field of the administration of India profoundly affected by the Reforms of 1919, and again by the India Act of 1935, was that of local government. This was one of the subjects transferred to Indian ministers, and under their leadership considerable developments have been essayed. On the whole, the progress of local government in India for the past quarter of a century has been encouraging, but uneven. As the annual reports of provincial governments show, there are some towns which have shown a real sense of responsibility in civic affairs and have administered them efficiently. In a minority of cases, however, the local "city fathers" have signally failed to discharge their duties to the public benefit, with the result that they have been superseded and the conduct of municipal affairs has reverted to official control. The greatest successes have been won in the Presidency towns, and particularly by the Municipality of Bombay. The difficulties in the way of progress were manifest. Local government had to be a creation—the devolution of authority from the Government to the local body, and that to a people who for centuries had been accustomed to autocratic administration. Again, the powers entrusted to local bodies were insignificant and the financial support was small. There are, however, many encouraging signs of improvement.

Throughout the greater part of India, the village constitutes the primary territorial unit of Government organisation, and from the villages are built up the larger administrative titles—tahsils, sub-divisions, and districts.

"The typical Indian village has its central residential site, with an open space for a pond and a cattle stand. Stretching around this nucleus lie the village lands, consisting of a cultivated area and (very often) grounds for grazing and wood-cutting.... The inhabitants of such a village pass their life in the midst of these simple surroundings, welded together in a little community with its own organisation and government, which differ in character in the various types of villages, its body of detailed customary rules and its little staff of functionaries, artisans and traders. It should be noted, however, that **in certain portions of India, *e.g.*, in the greater part of Assam, in Eastern Bengal, and on the west coast of the Madras Presidency, the village as here described does not exist, the people living in small collections of houses or in separate homesteads.**"—(*Gazetteer of India.*)

The villages above described (of which there are 700,000 in India) fall under two main classes, *viz* :—

Types of Villages.—"(1) The 'severalty' or raiyatwari village which is the prevalent form outside Northern India. Here the revenue is assessed on individual cultivators. There is no joint responsibility among the villagers, though some of the non cultivated lands may be set apart for a common purpose, such as grazing, and waste land may be brought under the plough only with the permission of the Revenue Authorities, and on payment of assessment. The village government vests in a hereditary headman, known by an old vernacular name, such as *patel* or *reddi*, who is responsible for law and order and for the collection of the Government revenue. He represents the primitive headship of the tribe or clan by which the village was originally settled."

"(2) The joint or landlord village, the type prevalent in the United Provinces, the Punjab and the Frontier Province. Here the revenue was formerly assessed on the village as a whole, its incidence being distributed by the body of superior proprietors, and a certain amount of collective responsibility still, as a rule, remains. The village site is owned by the proprietary body who allow residences to the tenantry, artisans, traders and others. The waste land is allotted to the village, and, if wanted for cultivation, is partitioned among the shareholders. The village government was originally by the *punchayet* or group of heads of superior families. In later times one or more headmen have been added to the organisation to represent the village in its dealings with the local authorities; but the artificial character of this appointment, as compared with that which obtains in a raiyatwari village is evidenced by the title of its holder, which is generally *lambardar*, a vernacular derivative from the English word 'number.' It is this type of village to which the well-known description in Sir H. Maine's *Village Communities* is alone applicable, and here the co-proprietors are in general a local oligarchy with the bulk of the village population as tenants or labourers under them."

Village Autonomy.—The Indian villages formerly possessed a large degree of local autonomy, since the ruling dynasties and their local representatives did not, as a rule, concern themselves with the individual cultivators, but regarded the village as a whole, or some large landholder as responsible for the payment of the Government revenues, and the maintenance of local order. This autonomy has now disappeared owing to the establishment of local, civil and criminal courts, the present revenue and police organisation, the development of communications, the growth of individualism, and the operation of the individual *raiyatwari* system, which is extending even in the north of India. Nevertheless the village remains the first unit of administration; the principal village functionaries—the headman, the accountant, and the village watchman—are largely utilised and paid by Government, and there is still a large degree of common village feeling and interests.

Punchayets.—For some years there was an active propaganda in favour of reviving the village council-tribunal, or *Punchayet*, and the Decentralisation Commission of 1908 made the following special recommendations:—

"While, therefore, we desire the development of a *punchayet* system, and consider that the objections urged thereto are far from insurmountable, we recognise that such a system can only be gradually and tentatively applied, and that it is impossible to suggest any uniform and definite method of procedure. We think that a commencement should be made by giving certain powers to limited *Punchayets* in those

villages in which circumstances are most favourable by reason of homogeneity, natural intelligence and freedom from internal feuds. These powers might be increased gradually as results warrant, and with success here, it will become easier to apply the system in other villages. Such a policy, which must be the work of many years, will require great care and discretion, much patience, and judicious discrimination between the circumstances of different villages; and there is a considerable consensus of opinion that this new departure should be made under the special guidance of sympathetic officers."

These recommendations, however, were never implemented and the *punchayet* system, while it still exists in non-official form, is tending to decline. There is still the possibility that it may be revived. For present purposes it is unnecessary to refer at greater length to the subject of village self-government. Various measures have been passed, but it is too early to say what life they have. The Punjab Government has passed a Village Punchayet Act, which enables Government to establish in a village, a system of councillors to whom certain local matters, including judicial power, both civil and criminal of a minor character, may be assigned. In Bihar a Village Administration Act has been passed for the administration of village affairs by villagers themselves, including minor civil and criminal cases. Other Governments have taken steps in the same direction.

Municipalities.—The Presidency towns had some form of Municipal administration, first under Royal Charters and later under statute, from comparatively early times, but outside of them there was practically no attempt at municipal legislation before 1842. An Act passed in that year for Bengal, which was practically inoperative, was followed in 1850 by an Act applying to the whole of India. Under this Act and subsequent Provincial Acts a large number of municipalities was formed in all provinces. The Acts provided for the appointment of commissioners to manage municipal affairs, and authorised the levy of various taxes, but in most Provinces the commissioners were all nominated, and from the point of view of self-government, these Acts did not proceed far. It was not until after 1870 that much progress was made. Lord Mayo's Government, in their Resolution of that year introducing the system of provincial finance, referred to the necessity of taking further steps to bring local interest and supervision to bear on the management of funds devoted to education, sanitation, medical, charity, and local public works. New municipal Acts were passed for the various Provinces between 1871 and 1874, which, among other things, extended to the elective principle, but only in the Central Provinces was popular representation generally and successfully introduced. In 1881-2 Lord Ripon's Government issued orders which had the effect of greatly extending the principle of local self-government. Acts were passed in 1883-4 that greatly altered the constitution, powers, and functions of municipal bodies, a wide extension being given to the elective system, while independence and responsibility were conferred on the committees of many towns by permitting them to elect a private citizen as chairman. Arrangements were made also to increase municipal resources and financial responsibility, some items of provincial revenue suited to and capable of development under local management being transferred, with a proportionate amount of provincial expenditure, for local objects. The general principles thus laid down have continued to govern the administration of municipalities down to the present day. As the population of most Indian towns rises, so does the number of municipalities increase. For the most part they display a lively interest in civic affairs and are actively engaged in improving the conditions under which their fellow citizens live.

District Boards.—The duties and functions assigned to the municipalities in urban areas are in rural areas entrusted to district and local Boards. In almost every district of British India save in the province of Assam, there is a board subordinate to which are two or more sub-district boards; while in Bengal, Madras and Bihar and Orissa, there are also Union Committees.

As in the case of municipalities the tendency has been throughout India to increase the elected members at the expense of the nominated and the official members. The Boards are practically manned by Indians. The most important item of revenue is provincial rates. The principal objects of expenditure are education which has come remarkably to the front in recent years and civil works such as roads and bridges. Medical relief is also sharing with education, though in a less degree, the lion's share of the available revenue.

The annual audit reports on the working of local self-government institutions in the various provinces reveal on the whole a disappointing record. There is a general reluctance to increase local taxation and several municipalities are conspicuous for their negligence in recovering arrears. There are, of course, some honourable exceptions; in Bombay Presidency, Ahmedabad and Sholapur furnish encouraging examples. In 1939 a Local Self-Government Committee was appointed by the Bombay Government under the chairmanship of Professor V. G. Kale. The Committee made several recommendations. To overcome the general reluctance to impose additional taxation the Committee suggested that taxation by local authorities was likely to be better appreciated if it were associated with specific services rendered to the people; the idea was to earmark yields of certain taxes for definite purposes. The Committee also laid down the principle that citizens generally should understand that amenities can be provided only if they are paid for; thus a compulsory education cess was suggested to finance ambitious educational schemes.

In August 1940 the Bombay Government convened a conference of Presidents of important local bodies at Poona to consider the Committee's report under the presidentship of J. A. Madan, I.C.S., then Adviser to the Bombay Governor. The conference was opened by Sir Roger Lumley who paid a tribute to the Committee for the careful manner in which the investigation was carried out and for the balanced judgment which had been brought to bear on the complicated problems of municipal administration. The conference discussed the recommendations of the Committee and there was

unanimity of opinion on a large number of the Committee's proposals. These proposals, however, still remain to be implemented by the Bombay Government.

In September 1942, the Government of Bombay made new rules prescribing the powers, duties, remuneration and conditions of service of the secretaries of village panchayats. Among other requirements, every secretary will have to execute a surety bond for Rs. 200 with one surety of like amount, the bond to be in favour of the district local board.

Improvement Trusts.—A notable feature in the recent sanitary history of India is the activity played by the great cities in the direction of social improvements. In Bombay, Calcutta, Lucknow, Allahabad, Lahore and Cawnpore the Improvement Trusts developed important activities which are described in a separate chapter (q.v.). (In Bombay the work of the Improvement Trust is carried on by the Bombay Municipality). Other cities are beginning to follow the examples of these great cities. The Government of India in 1937 established an Improvement Trust to attend to slum clearance in old Delhi City and to the general expansion of their winter capital. This body has lately undertaken an ambitious scheme, costing many lakhs of rupees, for the abolition of slums and the re-housing of dispossessed workers.

Calcutta Improvement Trust.

The Calcutta Improvement Trust originated from a medical enquiry into the sanitary condition of the town in 1896, owing to the outbreak of plague. Preliminary investigation continued for several years, and the Trust was instituted in January, 1912, with a view to making provision for improvement and expansion of Calcutta by opening up congested areas, providing open spaces and improved building sites, laying out or altering streets and for rehousing of the poorer and working classes. The Act provided for a large expenditure on improvement schemes and for local taxation or raising of loans to this end. It provided for the constitution of a Board of Trustees of eleven members with a whole-time Chairman.

The following constituted the Board of Trustees on 1st May 1946: C. W. Gurner, C.S.I., I.C.S., Chairman; Sailapati Chatterji, Chief Executive Officer, Calcutta Corporation (*ex-officio*); Netai Charan Paul, elected by the Corporation of Calcutta under Section 7 (1) (*a*) of the Calcutta Improvement Act, 1911; Sudhansu Kumar Mitter, elected by the elected Councillors, Corporation of Calcutta, under Section 7 (1) (*b*) of the Calcutta Improvement Act, 1911, as modified by the Amendment Act of 1926; Alexandar Clark, elected by Councillors other than elected Councillors of the Corporation of Calcutta, under Section 7 (1) (c) of the Calcutta Improvement Act, 1911, as modified by the Amendment Act of 1926; T. Godley, elected by the Bengal Chamber of Commerce; J. K. Mitter, elected by the Bengal National Chamber of Commerce; Begum Hamida Momin; Abdur Rahman Siddiqi, M.A., LL.B., Bar-at-Law, M.L.A. Central; Bernard Matthews, F.R.I.B.A., F.S.I., M.T.P.I. Raja Bhupendra Narayan Sinha Bahadur of Nashirpur, appointed by the Local Government.

During the 32 years that it has now been at work, the Trust has carried through many improvement schemes both in the city proper and the suburban areas which have changed the face of Calcutta wholly and beyond recognition. It has constructed over 67 miles of new roads, 37 public parks covering an area of about 304·8 acres and a large lake with 80·22 acres of water area.

In Central Calcutta many highly insanitary *bustees* have been done away with and several roads of an improved type laid out, the most important of which is the Chittaranjan Avenue, 100 ft. wide, which at present extends from Chowringhee, past Shambazar, to Raja Raj Ballav Street, a stretch of 3 miles. It is intended ultimately to extend it up to the Chitpur Bridge. The Section of Chittaranjan Avenue near the Chowringhee end is well placed for commerce and trade and has gained increased importance by being linked up with Dalhousie Square on the West by means of a new road 84 feet wide between Mission Row and Mangoe Lane and a further extension of this road from Chittaranjan Avenue to Wellington Street on the east and the clearing-up of an adjacent area in Chandni Chawk by the construction of a 40-feet road. One of the most important of the Schemes of the Trust is the approach road to the new Howrah Bridge from Dalhousie Square. The first section of this project, which has so far cost nearly a crore and a half, from St. Andrew's Church to Canning Street, now comprises of a 100 feet wide road from Dalhousie Square corner to Canning Street, and a 60 ft. wide road diagonally from Royal Exchange Place to Lower Chitpur Road. This route is functioning as a new avenue through the heart of the city, but its immediate importance up to the present has been rather in creating a thoroughfare from Clive Street to Lower Chitpur Road than in promoting traffic northwards from Dalhousie Square, as Canning Street at which it ends on the north is a street of very limited traffic value. It is also in the programme of the Trust to extend this road through Territhi Bazar, one of the still existing dirtiest spots in the heart of the city, to Circular Road near Sealdah Station. For the second section of the project from Canning Street to Strand Road, the acquisition of land is complete—cost of acquisition is about a crore and thirty lakhs. Tenders for Engineering Works for this scheme as also for several other schemes for which land acquisition is complete have recently been let out and it is expected that work will proceed in full swing very soon.

In the north of the City, two large and sixteen small parks have been constructed in different quarters. Of the two large parks one is named Deshabandhu Park and the other Cossipore-Chitpore open space measuring 53 bighas and 186 bighas respectively.

The Cossipore-Chitpore Park has a small artificial lake and football grounds four for schools and clubs of North Calcutta. Few tennis courts are also provided. The Deshabandhu Park has also been provided with play-grounds. Several wide roads have been laid through this highly congested area. The approaches to the City have also been adequately widened.

Good progress has also been made with that highly congested area to the west of the City by opening up new roads and widening the existing ones. A 84 ft. road connecting Chittaranjan Avenue with Strand Road slightly to the north of Jagannath Ghat has been constructed, which provides a continuous main traffic route with the same width of roadway as Chittaranjan Avenue, extending right across Calcutta from Strand Road on the west to Upper Circular Road on the east. An interesting small work is the extension of a storm water sewer from Jagannath Ghat Road to Strand Bank Road carrying with it the construction of a 60-ft. roadway. Another important scheme is the new 60 ft. road between Dariapanarayan Tagore Street and Pathuriaghat Street which, with the side roads, opens up a very congested area and forms a portion of a main projected north and south road through Bara Bazar from Harrison Road to a new main east-and-west diagonal road through Ahiritollah. The widening of Kalakar Street represents the most important effort yet made to penetrate the inner recesses of Bara bazar and provides a new 60 feet road from Harrison Road to Jagannath Ghat Road with short lengths of widening of cross roads in accordance with existing alignments. Running, as it does, through an area with a population of over 200 to the acre and closely built up with four or five storeyed houses, the gross cost of acquisition of land was exceptionally high. Demolition was of greater difficulty than usual owing to the height of the buildings and the narrowness of the lanes.

It has been made financially possible for the Trust to proceed with some portion of its original programme for the improvement of Bara Bazaar and other costly and thickly-populated commercial areas by the passing of the Calcutta Improvement (Amendment) Act, 1931, which empowers the Board of Trustees in certain cases to levy betterment fees on properties which abut on to a new or widened street instead of acquiring the properties.

The Government in Notification No. 592M of the 24th April, 1939 intended the powers of the Trust to an area in the Howrah Municipality for the purpose of constructing the Approach road from the west to the New Howrah Bridge. The Main Approach Road running from East to West has been designed at 84 feet in width with a 54 feet carriageway and from the Bridge Approach to Dobson Road a new 70' road with a 50 feet carriageway with two low level roads had been provided for in the Scheme.

The Suburban Areas to the south and south-east of Calcutta required greater attention and extensive development schemes were undertaken. Several open spaces and squares have been laid out in various parts. A large number of insanitary tanks have been filled up, which required approximately 20 million c. ft. earth. Russa Road which forms the southern approach to the town has been widened to 150 ft. for a length of one mile and 100 ft. for a length of another mile. It now gives a most pleasant drive from Chowringhee to Tollygunge. A 100 ft. wide East to West road, from Ballygunge Railway Station to Chetla Bridge, and for recreation an artificial lake of 167 bighas with adequate grounds have been constructed. The "Lake Area," as it is now commonly known, consisting of land originally acquired for the provision of earth and partly for a statutory open space for one of the Trust schemes, assumes more and more the nature of a Model Park, and comprises well laid out football grounds in addition to its natural amenities. The Trust pursued the policy of planting and embellishing it as a place of public recreation for south Calcutta and found scope here for various experiments in Park technique, of which the most interesting was a Children's Pool properly designed for the purpose and believed to be the first of its kind in the Indian city. But all its activities have now come to a stop and must await the return of better times, as whole of this area has been requi-itioned by the Government for Military requirements.

The Southern Avenue Scheme was approaching completion but came to a stop on the outbreak of war. This area with the large lake and its amenities has already proved very attractive for residential houses and almost a new city is springing up, relieving considerably the congestion in the main city. From the junction of Southern Avenue and Gariahat Road, the work of widening Gariahat Road and Old Ballygunge Road upto Syed Ameer Ali Avenue had also been held up for the same difficulties, but preparations for proceeding with the work is now in full swing.

The central section of the eastern part of Calcutta has already been developed by the Trust into a beautiful residential area with the amenity of a large park near Park Circus known as Eastern Park, measuring 65 bighas, with large playing fields for football, tennis, etc. The Gorachand Road Scheme providing for the completion of the northern portion of this park and the commencement of a wide avenue running parallel to Lower Circular Road through the outer fringe of Entally has been completed and the Schemes providing the wide Avenue on its north which had to be temporarily suspended have again been taken in hand.

The Trust pursues a liberal policy in the development of open spaces and recreation grounds. The public squares vested in the Calcutta Corporation in 1911 had a total area of about 96 acres. In 1912, Bompas, the first Chairman of the Trust, pointed out that in the ratio, viz., about 9 per cent. of its public open spaces which measured about 1,250 acres (including the Maidan, the Horticultural and the Zoological Gardens) to its total acreage, Calcutta was almost on a par at that time with London possessing 6,675 acres of public parks or gardens, while its percentage exceeded that of New York, Berlin and Birmingham. But it must be pointed out that about 1,000 acres of Calcutta's 1,250 was accounted for in the Maidan and new open spaces in other parts of Calcutta were an urgent

need. The Trust has so far added over 300 acres in open spaces. Of this the Dhakuria Lake comprises the most important as well as the most popular feature. The Eastern Park at Gorachand area, the Deshbandhu Park and Cossipur-Chitpur Open Spaces at the north of the city are the larger of the parks laid out, besides a large number of parks scattered throughout the city. Among the less conspicuous but very useful activities in this regard is the adaptation of land acquired on alignments of future streets, which will not be required for the purpose for several years, as temporary recreation grounds. These play-grounds, while for the most part individually small in area, are very popular with children. Another of the important experiments of the Trust in providing play grounds and open spaces had been the conversion of small plots of land in "Bustee Fire Lanes" (opened out by the Trust on behalf of the Government as an A. R. P. measure) to temporary play grounds equipped with swings, etc., for children living in the nearby bustees. Arrangements are in progress in conjunction with the Government to retain some of these as a permanent feature.

For the housing of the displaced population the Trust has undertaken on a large scale the following schemes :—

In the early stages three blocks of three storeyed tenement buildings containing 252 lettable rooms were built in Wards Institution Street for the poorer classes. It was found, however, that the persons displaced preferred to take their compensation and migrate to some place where they could erect *bastis* of their own, the class of structures they were accustomed to live in. These chawls were then filled with persons of limited means, *e.g.*, school masters, poor students, clerks and persons of the artisan class. As many as 1,200 people are housed in these chawls. The buildings, including land, cost Rs. 2,44,369 and are let at very low rents—ground floor rooms at Rs. 4 per mensem and top floor rooms at Rs. 6 per mensem, each room measuring 12'×12' with a 4 ft. verandah in front and opening on to a central passage 7 ft. wide.

As these chawls failed to attract the people for whom they were meant, the Board next tried an experiment in providing sites for bustees. Two sites with a lettable area of 16 bighas were acquired within the area of Maniktola Municipality, but they failed to attract because they were out of the way and were expensive.

Kerbala Tank Lane Re-housing Scheme.—In this scheme 4 detached and 35 semi-detached houses were built. The detached houses were sold as this scheme never became popular with the class of tenants for whom they were originally intended. Owing to this unpopularity the Board further decided to throw open to tenants of all classes 18 out of the remaining 35 semi-detached houses. This change of policy, however, produced no effect on the letting.

Owing to want of suitable tenants the entire dwellings in Kerbala Tank Re-housing Scheme was sold by private sale in 1927.

Bow Street Re-housing Scheme.—Seven blocks of buildings containing one-roomed, two-roomed and three-roomed suites have been constructed to re-house Anglo-Indians displaced by the operations of the Trust. This scheme has proved a striking success.

Paikpara Re-housing Scheme.—This scheme has an area of 36 bighas well laid out in 96 building sites. A new re-housing scheme has been undertaken by the Board, as already stated, at Christopher Road for the bustee population to be displaced by the execution of Scheme No. XXXV (Eastern Park to Gorachand Road) and Schemes XLIX and LII on its North. A special feature of the new scheme is that the land is to be developed as a model bustee for displaced bustee dwellers.

Special facilities are offered to dishoused persons for securing land in various improved areas for reinstatement purposes.

Christopher Road Re-housing Scheme.—Several blocks of 2-roomed and 3-roomed flats are under construction in this Scheme and the trust contemplates building a large number of blocks in this Scheme and develop it as a model housing Scheme. An important feature of this Scheme is the fixation of the rents according to the ability of the class of the tenant for which these houses are meant, irrespective of the return to the trust on the Capital and Special measures will be taken to ensure that these are actually let out to these classes.

Bridges.—The old bridges of Calcutta, which are hemmed in by canals and railway lines inadequately bridged, have almost all of them been replaced by modern and up-to-date bridges to suit the growing traffic requirements. The new bridges of the city have traffic capacity comparing favourably with those of London. The new bridges at Maniktola, Beliaghata and at Shambazar have roadways of 37 feet, with two footpaths each 10 feet in width. The Chitpore Bridge has been redesigned as a reinforced concrete bridge capable of accommodating four lines of fast traffic and two lines of slow traffic The Alipore Bridge, has a roadway of 30 feet (3 traffic widths) and 2 footpaths of 6 feet each.

The reconstructed Tollygunge Bridge across Tolly's Nullah is also a larger bridge of a modern design. The Barrackpore Bridge, the last bridge to be completed, has also been redesigned as a reinforced concrete bridge on the same lines as the Chitpore bridge. The next bridge to be taken up is the Ultadanga Bridge, specifications and estimates for which have been completed. A start would have normally been made by now, but had to be postponed due to the war situation.

Financial.—Capital charge during the year 1944-45 amounted to Rs. 38.07 lakhs which included Rs. 37·64 lakhs spent on land acquisition and Rs. 0·43 lakhs on engineering works. The gross expenditure of the Trust on Capital Works up to the end of the year 1944-45 was 22.11 crores. To meet this large expenditure, the Trust has borrowed Rs. 4,17,50,000. Other Capital receipts (mainly from the sale of land and buildings) have yielded Rs. 12.59 crores and the revenue fund from its annual surplus (after providing for the service of loans) has contributed Rs. 4.49 crores to Capital Works.

Up to 1944-45 the Trust spent nearly Rs. 18.17 crores on land acquisition and Rs. 3.34 crores on engineering works.

The Indian Ports.

The administration of the affairs of the larger ports (*Calcutta, Bombay, Madras, Karachi and Chittagong*) is vested by law in bodies especially constituted for the purpose. They have wide powers, but their proceedings are subject in a greater degree than those of municipal-bodies to the control of Government.

Figures for 1944-45 relating to income, expenditure and capital debt of the five principal ports managed by Trusts (Aden and Rangoon are excluded from the tables) as obtainable from the Department of Commercial Intelligence and Statistics (India) are shown in the following table :—

	Income.	Expenditure.	Capital Debt.
	Rs.	Rs.	Rs.
Calcutta	7,03,16,448	5,69,49,524	20,11,57,933
Bombay	4,74,65,437	3,84,12,909	15,81,66,046
Madras	1,03,19,062	93,85,188	1,29,96,437
Karachi	1,62,48,384	1,18,24,611	2,35,74,000
Chittagong	7,08,541	9,20,729	(*a*) 53,40,264

(*a*) Includes a loan of Rs. 10½ lakhs from Government for Port Improvement.

BOMBAY.

BOARD OF TRUSTEES OF THE PORT OF BOMBAY.—Sir B. Rama Rau, C.I.E., I.C.S. (Chairman). *Nominated by Government.*— The Embarkation Commandant, Bombay; The Naval Officer-in Charge, Bombay; The Collector of Customs, Bombay; The General Manager, G.I.P. Railway; The General Manager, B. B. & C. I. Railway; Dinkar Desai; H. E. Butler, C.I.E., O.B.E.; U. M. Mirchandani, I.C.S. *Elected by the Bombay Chamber of Commerce.*— W. A. Bell; R. W. Bullock; C. J. Damala; A. D. Finney; D. R. C. Hartley, C.B.E., D.S.O., R.D. *Elected by the Indian Merchants' Chamber.*— Haridas Madhavdas; Behram N. Karanjia; Ramdas Kilachand; J. C. Setalvad; M. A. Master. *Elected by the Municipal Corporation.*— Madhavlal M. Bhatt; Ratilal M. Gandhi. *Elected by the Millowners' Association.*— Krishnaraj Madhavjee Damodar Thackersey.

The following are the Principal Officers of the Trust :—

Secretary.—N. M. Morris (on war leave); A. S. Bakre, M.A. (Cantab.), Bar-at-Law (Ag.); *Special Officer*, V. D. Jog.

ACCOUNTS DEPARTMENT.

Chief Accountant, C. F. Lynn, M.A., A.C.A.A.; *Offg. Senior Asstt. Accts.*, R. B. C. Cour-Palais and F. X. T. Misquita.

ENGINEERING DEPARTMENT.

Chief Engineer, F. M. Surveyor, B.Sc. (Glas.), M.Inst. C.E. (Ag.); *Deputy Chief Engineer*, Khan Bahadur S. H. Mehta, B.A., B.E., M.I.E. (Ag.); *Executive Engineers*, P. E. Golvala, M.C.E., A.M. Inst. C.E., M.I. Struct. E. (Lond.), M.I.E. (Ag.); S. C. Pastakia, A.R.I., B.A., F.I.I.A., M.I. Struct. E. (Lond.). (Ag.); *Mechanical Superintendent*, D. V. Kohli, B.Sc. (Hons.), Mech. Eng (Durham), B.Sc, Elec. Eng. (Durham) (Ag.); *Consulting Engineers & Agents*, Messrs. Cochrane & Partners, 23, Palace Street, London S.W.1.

DOCKS DEPARTMENT.

Manager, W. G. H. Templeton; *Deputy Managers*, F. Seymour-Williams, D.S.O. (on war leave); A. Mattos; L. E. Walsh (on special duty); E. J. Kail; D. L. Lynn (on war leave); G. K. Dukes; V. Vaz, B.A. (Ag.).

RAILWAY DEPARTMENT.

Manager, H. A. Gaydon; *Deputy Manager*, P. M. Boyce; M. E. A. Kizilbash (Ag.).

PORT DEPARTMENT.

Deputy Conservator, C. B. M. Thomas (Ag.); *Harbour Master*, R. C. Vint (Ag.).

LAND AND BUNDERS DEPARTMENT.

Manager, H. G. Doshi, B.E., M.I.E.; *Deputy Manager*, E. M. Bhacka, B.E., A.M.I.E.

STORES DEPARTMENT.

Controller of Stores, R. C. Master, B.A., F.S.S.

MEDICAL DEPARTMENT.

Chief Medical Officer, Dr. M. L. Mistry, M.D. (Lond.), M.R.C.P. (Lond.); *Health Officer*, Dr. A. J. Mhatre, M.B.B.S., D.P.H. (Lond.), L.M. (Dublin).

A. R. P. DEPARTMENT.

Honorary A. R. P. Controller, Khan Bahadur S. H. Mehta, B.A., B.E., M.I.E.

LABOUR WELFARE DEPARTMENT.

Labour Welfare Officer, Batuk H. Mehta, B.A., LL.B., Solicitor.

CALCUTTA.

The Commissioners for the Port of Calcutta are as follows:—

Sir Thomas H. Elderton, K.C.I.E., *Chairman.*
W. A. Burns, *Deputy Chairman.*

Elected by the Bengal Chamber of Commerce:—Sir Renwick Haddow; W. L. Gordon; H. D. Cumberbatch; T. S. Gladstone; F. C. Guthrie; N. Brodie.

Elected by the Calcutta Trades' Association:—A. E. Brown.

Elected by the Bengal National Chamber of Commerce:—I. B. Sen; Dr. S. C. Law, M.A., Ph.D.

Elected by the Indian Chamber of Commerce:—K. P. Goenka.

Elected by the Muslim Chamber of Commerce:—A. K. Noormohamed.

Elected by the Municipal Corporation of Calcutta:—A. K. M. Baquer.

Nominated by Government:—Captain J. Cameron, R.I.N.; Rai Bahadur N. C. Ghosh, O.B.E.; G. E. Cuffe; W. R. Fitz Gerald; S. C. Satyawadi.

The principal officers of the Trust are:—
Offg. Secretary.—S. L. Dass.
Deputy Controller, Port, A. R. P. & C. O. Calcutta Port H. Q. Administrative Group, D. of I. Corps (Docks).—Lt.-Col. C. W. T. Hook.
Traffic Manager.—W. Steer.
Chief Accountant.—J. Dand, C.A.
Chief Engineer.—A. Webster, C.I.E., M. Inst. C.E.
Controller of Stores.—R. A. Delahunty.
Chief Mech. Engineer:—N. M. Irvine, B.Sc., M. Mech. E.
Deputy Conservator.—Lt.-Commander E. L. Pawsey, R.N. (Retd.).
Medical Officer.—Lt.-Col. F. J. Anderson, M.C., C.I.E., M.B., B.S., F.R.C.S., I.M.S. (Retd.).
Consulting Engineers and London Agents:—Messrs. Rendel Palmer & Tritton.

CHITTAGONG.

Chittagong in Eastern Bengal, lying on the right bank of the river Karnafuli at a distance of 12 miles from the sea, was already an important Port in the sixteenth century, when the Portuguese gave it the name of Porto Grande.

The construction of the Assam-Bengal Railway has facilitated the trade with Assam and Eastern Bengal for which the Port of Chittagong is the natural outlet.

Chittagong, Bengal, Lat. 22° 21'N; Long. 91° 50 E, 1941 Pop. 84,000.

TRADE.

Imports—Salt, mineral oil, machinery, tea estate, stores, rice, coal and railway material.

Exports—Wax, jute, tea, hides, cotton, capas, rice, paddy, eggs, poultry and live-stocks.

Accommodation—Vessels of any size can proceed 9 miles up the Karnafuli to Chittagong at H.W. draught of 22 ft. to 26 ft.

There are 5 berths for ocean-going vessels at the Bengal-Assam Railway jetties, also one set of fixed moorings.

Jetties are 2,100 ft. long, provided with hydraulic cranes 17 to lift 35 cwts. and 4 to lift 10 tons, ample shed accommodation, and jetties are in direct rail communication with the Bengal-Assam Railway system, cargo in bulk being dealt with direct into wagons. Depth at jetties about 26 feet at L. W. S. T.

Provisions.—Fresh provisions, good drinking water and coal obtainable.

Navigation.—Conditions over the three river bars have been improved by river training works such that dredging has been practically eliminated.

Night pilotage which is in force except during the S. W. monsoon has been suspended until further notice.

Charges.—Port dues 4 annas 6 pies per reg. ton. Hospital dues 2 pies per reg. ton. Harbour Master's fee Rs. 32. Mooring and unmooring in fixed berths Rs. 32, swinging berths Rs. 16. Berth alongside jetties Rs. 40, per day, night work and holidays extra.

Pilotage not exceeding—	Rs.	a.		Rs.	a.
10 ft. to 20 ft. from ..	67	8	to	304	4
21 ft.	337	8			
22 ft.	385	4			
23 ft.	439	4			
24 ft.	486	0			
25 ft.	553	8			
26 ft.	634	8			

Towage by Port Commissioners' Tug.

Port Authority: The Commissioners for the Port of Chittagong.

Officials.—Deputy Conservator, Commander H. J. Garrett; Port Engineer, F. J. Green, B.Sc., M.I.C.E., &c.; Secretary and Chief Accountant, P. Das Gupta, B.Sc., A.S.A.A.; Lloyds Agents, James Finlay & Co.

COCHIN.

Cochin, the newest port of the East, lies in the direct route to Australia from Europe. It serves a vast hinterland comprising the States of Cochin and Travancore, and the southern districts of the Madras Presidency. The harbour fulfils the long-felt need of a port open throughout the year on this coast. It is the natural outlet for the chief planting areas of South India.

The development of the harbour involved the cutting of a passage through the bar which blocked the entrance from the sea to an extensive backwater. The first cut through the bar of a wide and deep channel was made in 1928. Since 1930 the harbour has been in use. A powerful tug has been provided. A hotel on modern lines has been constructed to provide accommodation for passengers and other visitors to the port.

Cochin was declared a major port under the control of the Government of India on 1st August 1936, and rapidly converted into a modern terminal port.

The principal officers are :—

Administrative Officer and Chief Engineer :—A. G. Milne, M. Inst. C.E., M.I. Mech. E.

Executive Engineer :—Rao Sahib V. Srinivasan, B.A., B.E., A.M. Inst. C.E.

Port Officer :—Lieut.. Commander H. G. Fletcher, R.I.N.R.

Harbour Master :—H. A. Sheppard (Offg. Port Officer).

Offg. Harbour Master : —B. Brook.

Traffic Manager :—Topen Bhose.

Chief Accountant :—K. Kesava Ayyangar, B.Com., G.D.A.

Port Health Officer :—Dr. B. Gopalakrishna Prabhu, L.M.S., B.Sc., D.T.M. (Cal.)

KARACHI.

TRUSTEES.

Chairman.—W. E. Bushby, A.C.G.I., A.M. Inst.C.E., I.S.E., J.P.

Vice-Chairman, Elected by the Board—H. K. C. Hare (Ralli Brothers Ltd.) nominated by Government in default of valid election by the Karachi Chamber of Commerce.

Appointed by Government. – Divisional Superintendent, North Western Railway ; Principal Officer, Mercantile Marine Department, Karachi District ; Embarkation Commandant ; Collector of Customs.

Elected by the Municipal Corporation of Karachi —Wallimahomed Haji Yakub, J.P.

Nominated by Government in default of valid election by the Karachi Chamber of Commerce.—R. H. Martin (Forbes, Forbes, Campbell & Co., Ltd.). E. J. Pakes (Mackinnon Mackenzie & Co.). A. J. Bebbington (Cox & Kings (Agents), Ltd.).

Elected by the Karachi Indian Merchants' Association.—Sukhdev Udhawdas (R. B. Vishindas Sukhdev) ; Jagannath Ralaram Tandon, B.Sc., J.P. (R.B. Ralaram Jagannath).

Elected by the Buyers & Shippers' Chamber.—Haridas Lalji ; Vishramdas Dewandas (Dewandas Bhambhomal).

PRINCIPAL OFFICERS OF THE PORT TRUST.

Chief Engineer.—D. B. Brow, M.C., M.Inst.C.E.

Deputy Chief Engineer.—E. L. Everatt, M.Inst.C.E., M.I.Mech.E

Chief Accountant.—P. C. Jaidka, B com. (Birm.), A.C.A.

Ag Traffic Manager.—M. A. Raymond, M.A., Bar-at-Law.

Ag Deputy Conservator.—A. A. Goldie.

Secretary.—Nenumal Tekchand.

Chief Storekeeper.—C. J. T. Rozario.

A.R.P. & Labour Welfare Officer.—Jamnadas Dewanmal.

Port Fire Officer.—L. H. Rolfe.

MADRAS.

The following gentlemen are the Trustees of the Port of Madras :—

Appointed by Government.—Lt.-Col. G. P. Alexander, M.Inst.C.E. (Chairman and Port Engineer). R. de K. Maynard, M.Inst.T. (General Manager, Madras and Southern Mahratta Railway). J. F. C. Reynolds, O.I.E. (General Manager, South Indian Railway). F. A. I. Richardson (Collector of Madras, Madras). A. Khaleeli, I.C.S. (Director of Industries and Commerce). Sri S. Guruswami (Representative of labour).

Elected by Commercial Bodies.—*(Representing Chamber of Commerce, Madras).* C. Elphinston ; Th. Lykiardopulo ; H. S. Town, M.L.A. ; Sir Robert Denniston. *(Representing Southern India Chamber of Commerce, Madras).* Sri A. R. Ramanathan; Sri K. Eswara Iyer ; Sri K. Govindan. *(Representing the Madras Trades' Association).* A. M. H. Russell. *(Representing the Andhra Chamber of Commerce).* Sri P. Suryanarayana Sastry, B.A. *(Representing the Corporation of Madras).* Sri V. Chakkarai Chettiar, B.A., B.L. *(Representing the Southern India Skin and Hide Merchants' Association).* Ahmed Khaleeli.

Principal Officers are :—

General Manager.—F. D. C. Sumner ; *Deputy Conservator of Port.*—Lt.-Col. A. D. Berrington ; *Chief Accountant.*—Major G. Venkataraya Pai, M.A., F.I.A.C., M.I.E.A. ; *Traffic Manager.*—Major M. S. Venkataraman, B.A. ; *Executive Engineer.*—Lt.-Col. E. G. Bowers, M.C., M.I.E.E. ; *Mechanical and Electrical Engineer.*—Major S. W. White, M.I. Mar.E., A.M.I.N.A., A.M.I. Mech.E. ; *Engineer and Dredger Master, Dredger "Madras".*—Captain F. G. Cooper ; *Assistant Engineers.*—Captain S. Nagabushanam, B.A., M.E., A.I.E.E. ; Captain K. N. Srinivasan, B.E. ; *Assistant Electrical Engineer.*—Captain V. R. Srinivasan, Grad. I.E.E., D.F.H. ; *Harbour Master.*—Major L. T. Lewis ; *Assistant Harbour Masters.*—L. J. Whitlock, B. Hennin, Lt. Masillamani ; *Additional Deputy Chief Accountant.*—Lt. A. Hamiah, B.A. (Hons.).

VIZAGAPATAM HARBOUR AND PORT.

Vizagapatam Harbour was created in order to supply an outlet for a large area of fertile country adjacent to the east coast of India, with considerable mineral resources and no alternative access to the outside world. The scheme was first formulated many years ago in the days of the East India Company, but was not actually taken up before 1925. In 1933, the Harbour was first opened for sea-going vessels, and it now provides the following facilities:—

An Entrance Channel, sheltered by hills with a minimum depth sufficient to admit vessels drawing 28½ feet of water on any day of the year, gives access to a completely sheltered inside harbour, provided with three quay berths, each 500 feet long, and equipped with fully portal electric cranes, transit sheds, and railway lines, both behind and on the quay-side of the transit sheds. Two of these berths are specially equipped for the rapid shipment of manganese ore in bulk; one of them is also equipped as an auxiliary coal bunkering berth. In addition, a special coal bunkering jetty berth is provided, at which coal is carried on board ships direct over adjustable gangways. Four mooring berths are also provided, at which vessels are served by a fleet of lighters operated by the Port.

Storage Sheds, for lease to import and export merchants, are provided with water frontage and rail service in the rear. From these sheds, export cargo can be carried directly alongside vessels by means of lighters.

The hauling equipment of the Harbour comprises five tugs of 1500, 600, 450, 120 and 100 H.P. respectively.

A graving dock with an entrance 60 feet 6 inches wide is provided; but in view of the fact that its length is at present limited to 300 feet, it is used principally for docking the craft of the Port, although it is also used by a certain number of small size vessels of other ownership.

The port can, by special arrangement, deal with lifts up to 50 tons on the quay, but cannot lift more than 3 tons into and out of vessels.

Simultaneously with the construction of the harbour, a special railway connection, linking it with the Central Provinces, was constructed by the B. N. Railway. This line takes off at Raipur from the Calcutta-Bombay main line of the B. N. Railway, and joins the Calcutta-Madras main line at Vizianagram, which is a station situated some 40 miles north of Vizagapatam. This connection reduces the distance between Vizagapatam and a large section of the Central Provinces to such an extent that the rail route from that section to Vizagapatam is 180 miles shorter than the rail route either to Calcutta or to Bombay.

The Port is administered by the Government of India.

Principal Officers:—

Administrative Officer & Chief Engineer and Conservator.—W. E. W. Crealock, Vizagapatam.

Manager, Traffic & Marine and Deputy Conservator.—Lt. Col. J. W. Day, I.E.

Port Engineer.—Rao Bahadur Major S. Nanjundiah, I.E.

Harbour Master.—Major E. H. Glassup, I.E.

Suptd. of Machinery.—F. H. McD. Wilson, Vizagapatam.

PORTS AND TRADE CENTRES IN INDIA.

Following are other Ports in British India and in Indian States. Ports in French possessions (Pondicherry, Karikal and Chandarnagore) and in Portuguese Possessions (Marmugao, Daman and Diu) are given separately in those sections of the Year Book:—

Keti Bandar	Surat	Honavar	Dhanushkodi
Sirganda	Bulsar	Jaigad	Negapatam
Mandvi	Revdanda	Vijaydurg	Cuddalore
Navlakhi	Bankot	Bhatkal	Masulipatam
Bedi	Dabhol	Coondapoor	Cocanada
Okha	Ratnagiri	Mangalore	Bimlipatam
Dwarka	Jaitapur	Tellicherry	Gopalpur
Porbandar	Malwan	Calicut	Chandbali
Bhavnagar	Vengurla	Alleppey	Cuttack
Dholiera	Karwar	Quilon	Puri
Broach	Sankata	Tuticorin	

Following are the principal Ports and Trade Centres in Portuguese and French India:—Marmugao (Portuguese India), Mahe (French India), Pondicherry (French India).

Following is a list of Trade Centres additional to the list of ports given above:—

Agra	**Baroda**	**Indore**	**Mysore**
Ahmedabad	**Benares**	**Jaipur**	**Nagpur**
Allahabad	**Cawnpore**	**Jubbulpore**	**Sholapur**
Amraoti	**Dacca**	**Lahore**	**Sialkot**
Amritsar	**Delhi**	**Lucknow**	**Srinagar**
Asansol	**Gwalior**	**Madura**	**Visagapatam**
Bangalore	**Hyderabad**	**Mirzapur**	

KETI BANDAR AND SIRGANDA are two other minor ports in Sind. They are under the jurisdiction of the Principal Collector of Customs, Sind. Neither of them, however, is of sufficient importance to deserve detailed mention.

MANDVI which is situated south of Sirganda is the chief port of Cutch.

NAVLAKHI is the Chief Port of the State of Morvi and has a fine situation on the coast of Kathiawar. Ships anchor two miles from the pier. Navlakhi is the terminus on the metre-gauge line of the Morvi Railway and is thus directly connected with Delhi, Rajputana, Gujarat and Kathiawar. The port is open throughout the year and has been greatly developed in the last decade.

BEDI: Bedi Bandar is the principal port in the State of Nawanagar, situated a few miles from the city of Jamnagar, at the head of a tidal creek some eight miles long, near the mouth of which is the roadstead called Rozi, in which ocean-going vessels lie at anchor.

There is at the head of the creek a spacious basin equipped with warehousing accommodation and railway connections offering facilities to merchants for the effective conduct of extensive trade. Goods are transhipped between the basin and steamers which lie in the Gulf of Cutch by means of lighters which are towed up and down the creek by tugs as the state of the tide permits.

The consistent encouragement of the Ruler and the number and importance of the merchant class in Jamnagar with their trade connections at other places in Kathiawar and beyond, have all assisted in developing a large and important traffic.

No merchandise is handled at Rozi. Its landing stage, connected by road and rail to Jamnagar, is used exclusively for mails and passenger traffic to and from Cutch.

OKHA: Port Okha, situated in a detached portion of Baroda State far distant from the Gaekwar's main territories in Gujarat is dissimilar from other Kathiawar ports. It is an entirely modern conception, begun and completed with enterprise for the express purpose of dealing with ocean-going traffic and commodities.

It lies in a strategic position at the extreme north-east point of the Kathiawar Peninsula, readily accessible to all steamers trading along that coast. The Harbour scheme has been well designed; there is an excellent ferro-concrete jetty, served by railway lines and trains, alongside which large vessels can lie at all states of the tide, and there are also swinging moorings for other vessels in a protective position. The warehouse accommodation and railway connections are good. Okha is far removed from the large centres of population, being 231 miles from Wadhwan Junction through which railway centre its traffic must pass.

DWARKA: Just below Port Okha is Dwarka, a famous place of pilgrimage, and a port of call on the Bombay-Karachi route. Steamers lie off at some distance from the shore and the traffic is chiefly local.

PORBANDAR: The foreign trade of Porbandar was at one time prosperous, but it is now chiefly coastwise.

BHAVNAGAR, the capital of Bhavnagar State, lies half way up the Gulf of Cambay on its western side. The Gulf is defined by a very great range of tide, attaining as much as 40 feet at Bhavnagar, which is situated on a creek several miles from the open waters of the Gulf. The port facilities comprise an anchorage 8 miles or more from the port proper, between which and large vessels at the anchorage goods are moved in lighters while the port itself can accommodate small coasting steamers which lie on the mud at low tide. There is ample warehouse accommodation and good direct railway communication with the whole of India.

PORTS IN BOMBAY PRESIDENCY: Apart from Bombay, which is the most important Port in the Presidency, there are no other Major Ports, though there are a number of Minor Ports at which trade is carried on in fair weather. Among these may be mentioned Dhollera, Broach, Surat and Bulsar on the Gujarat Coast and numerous small ports on the Konkan coast, the more important among these from the point of view of trade, being Ratnagiri, Dabhol, Malwan, Vengurla and Honavar.

The Dhollera port is connected by road to the Railway Station at Dhandhuka at a distance of 18 miles. It possesses natural advantages and is situated within convenient distance from the chief centres of trade and industry in Kathiawar and North Gujarat. Broach and Surat are well known old ports.

The safest harbours on the Konkan coast are Jaigad and Vijaydurg in the Ratnagiri district and Karwar in the North Kanara district. Details regarding the value of import and export trade in 1937 at these various minor ports are given below:—

	(Rupees in Lakhs) Imports.	Exports.
Dhollera	1·9	4·0
Broach	59·1	48·7
Surat	29·7	10·8
Bulsar	11·7	8·0
Revdanda	12·4	10·9
Bankot	22·0	6·4
Dabhol	28·7	11·0
Ratnagiri	43·5	18·7
Jaitapur	22·2	3·1
Malwan	31·6	6·1
Vengurla	20·5	10·8
Karwar	10·0	6·1
Sankata	9·2	11·0
Honavar	16·8	11·5
Jaigad	11·7	0·6
Vijaydurg	10·8	1·9
Bhatkal	4·2	0·2

SURAT is situated 14 miles from the sea with which it is connected by a river negotiable only by small country craft. Surat was one of the earliest and most important of the East India Company's factories, and its trade was very considerable in agricultural produce and cotton, the value of which was estimated in 1801 at over £1,000,000. A hundred years later this total had contracted to £200,000 and in the last fifteen years the decrease has been even more marked, most of the trade being now transferred to Bombay owing to the linking up of the two ports by the Bombay, Baroda and Central India Railway.

COONDAPOOR is a port of call only for steamers on the Bombay-Mangalore run.

MANGALORE: To the South of Goa lies the Madras district of South Kanara whose district headquarters is Mangalore, open to the coasting trade of Karwar, Honavar and Bhatkal. Mangalore is situated at the junction of the Gorpur & Netravati Rivers, about 130 miles south of Mormugao. It is a tidal port served chiefly by backwater communication with the hinterland. It is the North-Western terminus of the South Indian Railway. Vessels up to 200 tons can anchor inside the backwater; larger vessels lie about two miles from the shore.

The chief exports to Europe are pepper, tea and cashew kernels (exported also to the United States) from neighbouring areas, coffee and sandalwood from Mysore, rubber to Ceylon and tiles, rice, salt fish, dried fruits and fish manures to Ceylon, Goa and the Persian Gulf. The foreign import trade is steadily increasing.

Mangalore is the favourite port on the coast for the Laccadive and Amindivi Islanders, who bring their coir and other cocoanut produce there for sale.

TELLICHERRY is situated on the Calicut-Mangalore extension of the South Indian Railway, about 94 miles South of Mangalore and 14 miles South of Cannanore, a town of about the same size with much smaller foreign trade. Steamers which anchor about two miles off the shore, can work at Tellicherry even during the monsoon when all the other ports on the coast are closed, owing to the natural backwater provided by the rocky approaches to the port.

The principal exports are coffee and pepper, which come down by road from estates in Mysore and Coorg, copra, sandalwood, tea, ginger, cardamom and rose-wood. The foreign trade is steadily increasing. The chief imports are sugar from Java, wet dates, rice and provisions and machinery for estates.

CALICUT, the capital of the Malabar District, is some 42 miles south of Tellicherry and about 90 miles north of Cochin. It is 413 miles by rail from Madras. The Port is practically closed during the South-West Monsoon from the end of May until the latter half of August. The sea is very shallow and steamers anchor about three miles from the shore, connection being maintained by lighters and small boats. Nativecraft of 150 tons and below lie about 800 yards off the shore.

Beypore, seven miles to the south of the mouth of the river of that name, is regarded as a wharf of Calicut Port. It has a number of wharves along the river bank and native craft of 150 tons burthen are able to anchor half a mile from the mouth.

The principal exports are coir, coir fibre, copra, coffee, tea, pepper, ginger, rubber, groundnut, raw cotton and fish-manure. The foreign import trade, which is insignificant, consists chiefly of metals.

ALLEPPEY, the premier port and commercial centre in Travancore, is situated about 50 miles North of Quilon, and 35 miles South of Cochin. A canal connects the port with the interior backwaters. Its warehouses are a convenient depot for the storage and disposal of all fresh produce, and it possesses a roadstead affording safe anchorage during the greater part of the year.

The chief exports are copra, coconuts, coir fibre and matting, cardamoms, ginger and pepper.

QUILON, the "Collum" of Marco Polo, has been a trading centre from very early times. It is connected with Alleppey by backwater, and is on the Shencottah-Quilon-Trivandrum branch of the South Indian Railway. Vessels anchor about ¾ miles from the shore and a railway siding runs up to the landing place.

The chief exports are coconut oil, coir mats, timber, and fish, but the foreign trade is insignificant.

TUTICORIN: After rounding Cape Comorin, the southern most point of the Indian Peninsula, one enters again the Madras Presidency and reaches Tuticorin. This port, which is open all the year round, has, next to Madras and Cochin, the largest trade in Southern India.

The harbour is so shallow that steamers anchor about 5 miles from the shore and continuous dredging is necessary to keep the channel open between the shore and the roadstead. At the same time Hare Island upon which the Light House is situated, affords considerable protection to the lighters and other craft used for landing and shipping, and the work is seldom interrupted by bad weather. The South Indian Railway runs alongside the landing and shipping wharves from which passengers and goods can be transhipped to launches and lighters.

There is a very considerable trade with Ceylon in rice, pulses, onions, chillies and livestock for consumption in that island. Other chief articles of export are raw cotton (to Japan and United Kingdom), tea, senna leaves, Palmyra fibre and cardamoms.

DHANUSHKODI is the terminus of the South Indian Railway on the South-Eastern extremity of the Island of Rameswaram at the junction of Palk Strait with the Gulf of Mannar and connected with Talaimannar in Ceylon 21 miles distant by steamer service, the journey being made in about two hours. The port is equipped with a pier. Cargo is loaded direct from the railway trucks on this pier into steamer hatches.

The chief exports are fish (dry and salted), rice, tea and cotton piecegoods.

NEGAPATAM, the Chief Port in the Tanjore District is about 13 miles South of Karikal. The harbour is equipped with wharves and other facilities for the landing and shipment of goods and the considerable foreshore to the north is utilized for the storage of timber. Nagore, the eastern terminus of a branch of the South Indian Railway and a siding runs into the harbour premises at the Negapatam Port Station. The port is further connected by river and canal with the tobacco growing area to the south. The harbour is situated at the junction of the Kaduvaiyar River with the sea. Nagore, 5 miles to the north, a great place of pilgrimage for Muhammadans, is a wharf of Negapatam.

The principal exports from Negapatam are groundnuts for Europe and coloured cotton piecegoods, tobacco and fresh vegetables for Penang, Singapore and Colombo, the port being the chief provisioning centre for the coolies who are constantly leaving by this route to work on rubber and tea estates in Ceylon and the Federated Malay States.

CUDDALORE is situated about 15 miles south of Pondicherry. Steamers anchor about a mile off-shore, and the harbour wharves are situated on the western bank of the Uppanar Backwater and have been provided with a quay wall to facilitate the loading and unloading of cargo boats therefrom.

The export trade consists principally of groundnut kernels and coloured piecegoods in small quantities. The coasting trade consists mainly of grain and pulse. The foreign import trade is chiefly of boiled betelnuts from the Straits.

MASULIPATAM, the principal port in the delta of the Kistna River, has few natural advantages. Large vessels cannot anchor within five miles from the shore and the harbour wharves are distant another three miles up a tortuous tidal creek. Native craft up to about 150 tons can cross the bar at the south of this creek at high tides but in foul weather communication between ship and shore is practically suspended. Steamers touch at the port occasionally and foreign trade is chiefly by steam vessels with foreign ports, the principal exports being groundnuts, castor-seed and oil cake.

The prosperity of the port has never recovered from the cyclone of 1864, when a tidal wave caused a disastrous inundation involving the loss of 30,000 lives.

COCANADA is situated on the Cocanada Bay, just north of the Godavari River, some 80 miles south of Vizagapatam and 270 miles north of Madras. In spite of several disabilities, it ranks fifth in importance among the ports of the Madras Presidency. Large steamers anchor about 6 to 7 miles from the shore and service is maintained with lighters which land cargo at the numerous small wharves and jetties constructed on the banks of the Cocanada Canal.

The principal shipments to Europe are raw cotton and groundnuts and castor-seeds. The import trade consists chiefly of kerosene from America, sugar from Java and metals from the United Kingdom, Germany and Belgium.

BIMLIPATAM is 22 miles north-west of Waltair. A good road connects it with Vizianagram sixteen miles distant and another road with Vizagapatam. The harbour is an open roadstead and ships lie about a mile off the shore and loading and unloading is effected by lighters. The foreign trade has revived to some extent. The imports are of little importance. There are considerable exports of Bimlipatam jute, myrobalans, niger seeds, gingelly seeds and groundnut kernels.

Coastwise imports and exports are of little importance.

GOPALPUR in the Ganjam District, is situated ten miles from Berhampur on the Bengal Nagpur Railway.

North of Gopalpur, the sea board for 250 miles is that of Orissa, the maritime trade of which is chiefly inter-Provincial and the only ports that deserve mention are Balasore, Chandbali, Cuttack, False Point and Puri.

BALASORE, situated on the right bank of the Burabalang river and headquarters of the district of that name, was the only port of which Orissa could boast until the opening up of the country after the great famine of 1866. It was frequented at that time by vessels with cargoes of rice from Madras and with cowries, then largely used for currency, from the Laccadives and Maldives. The port is of historical interest as being one of the earliest European Settlements in India, factories having been established here in the 17th century by English, Dutch, French, Danish and Portuguese Merchants.

Balasore as a port is practically defunct. Foreign ships have ceased to visit since 1904 and coastal ships since 1910. An occasional country craft of negligible tonnage enters during the cold weather season for paddy, but beyond that there is no sea-borne trade. There is no import trade.

CHANDBALI, situated on the left bank of the Baitarani River is a port of some importance on the Orissa Coast. It has a flourishing coasting trade with Calcutta but there is no direct foreign trade as in former days. The exports consist mainly of rice and the imports are cotton twist, piecegoods, kerosene oil, salt and gunny bags.

CUTTACK is situated 253 miles from Calcutta at the apex of a triangle formed by the Mahanadi and Katjuri rivers. It is on the main line of railway running between Madras and Calcutta and is connected by canal with Chandbali between which a small inland steamer trade exists and which links Cuttack with Calcutta. A short distance up the coast from Cuttack lies the port of False Point which has been closed since 1924, as the seaborne trade had entirely disappeared.

The decline of the small ports is said to be due to a variety of reasons and usually the chief reason quoted is that the Ports have silted up but this is not actually the case. The Ports have declined for two main reasons namely the coastal Railway which has automatically cut out the sea trade since it cannot assist it and secondly that larger deep draft steamers have taken the place of the smaller coasting steamers and sailing ships of 30 years ago. The long and deeper draft steamers cannot enter such small ports as Balasore, Chandbali and False Point and hence the trade which at one time found its way by sea has now been caught by the railway and carried to the larger ports like Calcutta from where it is distributed elsewhere.

PURI is an open roadstead. It has a small Customs Office.

Education.

Indian education is unintelligible except through its history. Seen thus, it affords the spectacle of a growth which, while to one it will appear as a blunder based on an initial error easily avoided, to another it stands out as a symbol of sincerity and honest endeavour on the part of a far-sighted race of rulers whose aim has been to guide a people, alien in sentiments and prejudices, into the channels of thought and attitude best calculated to fit them for the needs of modern life and western ideals. There is to-day no subject in the whole area of administrative activity in India which presents greater complexities and differences of opinion than education. Government, local bodies and private persons of learning have in the past devoted their limited funds to meeting the demands of those who perceived the benefits of education, rather than to cultivating a desire for education where it did not exist. The result is that the structure has become top-heavy. The lower classes are largely illiterate, while the middle classes who constitute the bulk of the *intelligentsia* are in point of numbers at least educated to a pitch equal to that of countries whose economic conditions are more highly developed. As might be expected from this abnormal distribution of education, the form which it has eventually assumed contains corresponding defects. In recent years, however, strenuous efforts have been made to remedy these defects. Primary Education Acts have been passed in the several provinces in favour of the expansion of primary education among the masses. On the other hand, the numbers of students in colleges and universities have grown apace. The volume of educated unemployment had at one time reached alarming proportions, but in recent years, owing to the conditions of war, many educated young men have been absorbed in the services; still the problem of finding suitable employment for all educated men in peace time has to be tackled gradually.

The Introduction of Western Learning.

In the early days of its dominion in India, the East India Company had little inclination for the doubtful experiment of introducing western learning into India. Warren Hastings, the dominating figure of the time, was a genuine admirer of the laws and literature of the East. His policy was to enable the ancient learning to revive and flourish under the protection of a stable government, and to interfere as little as possible with the habits and customs of the people. Even the Act of 1813 which set apart a lakh of rupees for the introduction and promotion of a knowledge of the sciences was interpreted as a scheme for the encouragement of Sanskrit and Arabic. In the following year the Court of Directors instructed the Governor-General to leave the Hindus "to the practice of usage, long established among them, of giving instruction in their own homes, and to encourage them in the exercise and cultivation of their talents by the stimulus of honorary marks of distinction and in some cases by grants of pecuniary assistance." But mass education was not touched.

It was from sources other than Government that the **desire for western knowledge** arose in India. In 1816, David Hare, an English watchmaker in Calcutta, joined hands with the great Indian reformer, Raja Ram Mohan Roy, to institute the Hindu College for the promotion of western secular learning. The new institution was distrusted both by Christian missionaries and by orthodox Hindus, but its influence grew apace. Fifteen years later, the Committee of Public Instruction in Bengal reported that a taste for English had been widely disseminated and that independent schools, conducted by young men reared in the Hindu College, were springing up in every direction. In Bombay, the Elphinstone Institution was founded in memory of the great ruler who left India in 1827. A still more remarkable innovation was made in 1835 by the establishment of the Calcutta Medical College, whose object was to teach "the principles and practice of medical science in strict accordance with the mode adopted in Europe." Many pronounced the failure of the undertaking to be inevitable; for, under the Hindu custom the higher castes were forbidden to touch the dead. This obstacle was surmounted by Madhusudan Gupta who, with a few courageous pupils, began the dissection of a human body.

Another impetus to the introduction of western learning was the devotion of **Christian missionaries**. The humanitarian spirit, which had been kindled in England by Wesley, Burke and Wilberforce, influenced action also in India. Carey, Marshman and Ward opened the first missionary College at Serampore in 1818; and twelve years later, Alexander Duff reversed the whole trend of missionary policy in India by his insistence on teaching rather than on preaching, and by the foundation of his school and College in Calcutta. In Madras, the missionaries had been still earlier in the field; for as early as in 1787 a small group of missionary schools were being directed by Mr. Schwarz. The Madras Christian College was opened in 1837. In Bombay, the Wilson School (afterwards College) was founded in 1834.

Lord William Bentinck's minute of 1835 (based upon Macaulay's famous minute) marks a somewhat tardy acceptance by Government of the new policy. Government then determined, while observing a neutrality in religious matters, to devote its available funds to the maintenance of secondary schools and colleges of western learning, to be taught through the medium of English. But this decision did not entail that Oriental learning should be neglected; still less that the development of the vernaculars should be discouraged. Other changes powerfully contributed to the success of the new system. The freedom of the Press was established in 1835; English was substituted for Persian as the language of the Courts in 1837; and in 1844 Sir Henry Hardinge ordained that preference in Government appointments should be given to those who had received a western educatio

In the following decade the new learning took firm root in India; and, though the Muhammadans still held aloof, the demand for English schools outstripped the means of Government for providing them. Fortunately there has been of late a marked appreciation among Muslim leaders of the need for improving the instructional level of their co-religionists; and in many of the provinces of India a great impulse towards educational advance among the Muhammadan community is now noticeable. The Muslim University at Aligarh more recently the Osmania University of Hyderabad, Deccan, are direct out-comes of the urge for higher education felt by the leaders of the Muslim community.

To Missionary Societies is due the initiative in the modern education of women, strongly supported by Hare and Ram Mohan Roy. The establishment of a girls' school in Calcutta in 1849, by Drinkwater Bethune is a landmark in the history of female education in India.

GROWTH AND ORGANISATION OF ENGLISH EDUCATION.

An epoch in Indian educational history is marked by Sir Charles Wood's despatch in 1854. Perhaps its most notable feature was the emphasis which it laid on the importance of primary education. The old idea that the education imparted to the higher classes of society would filter down to the lower classes was discarded. The new policy was boldly "to combat the ignorance of the people which may be considered the greatest curse of the country." For this purpose Departments of Public Instruction were created on lines which do not differ very materially from the Departments of the present day. The despatch also broke away from the practice followed since 1835, whereby most of the available public funds had been expended upon a few Government schools and colleges, and instituted a policy of grants-in-aid to private institutions. It emphasised the importance of encouraging the study of the vernaculars as the only possible media for mass education.
